Ms. Heather McTeer Toney
Regional Administrator
U.S. EPA, Region 4
61 Forsyth Street, SW
Atlanta, Georgia 30303

RE: Request for the Kentucky portion of the Cincinnati, OH-KY-IN area to be redesignated as attaining the 2008 8-hour ozone National Ambient Air Quality Standards (NAAQS)

Dear Ms. McTeer Toney:

The Energy and Environmental Cabinet (Cabinet) respectfully submits the following revision to Kentucky's State Implementation Plan (SIP). Kentucky formally request EPA to redesignate the Kentucky portion of the Cincinnati, OH-KY-IN nonattainment area, as attainment for the 2008 8-hour ozone NAAQS.

In accordance with 40 CFR 51.102, a copy of the proposed redesignation request was made available for public comment from May 16, 2016 until June 21, 2016. The only comments received during the public comment period were from EPA. A response to EPA's comments is included in this submittal.

If you have any questions or comments concerning this matter, please contact Ms. Melissa Duff, Program Planning Manager for the Division for Air Quality, at (502) 782-6597 or Melissa.Duff@ky.gov.

Sincerely,

Charles G. Snavely
Secretary

APPENDICES

CHAPTER ONE
Introduction

On March 27, 2008, the Environmental Protection Agency (EPA) promulgated a revised National Ambient Air Quality Standard (NAAQS) for the 8-hour ozone standard, which went into effect May 27, 2008 (73 FR 16436). Both the primary and secondary standards were lowered from the previous standard of 0.080 to 0.075 parts per million (ppm). The primary standard provides public health protection, while the secondary standard provides public welfare protection, including protection against decreased visibility and damage to animals, crops, vegetation, and building.

The final area designations were published on May 21, 2012 and became effective July 20, 2012 (77 FR 30088). The Cincinnati, OH-KY-IN MSA area, which includes portions of Kentucky, Ohio and Indiana, was designated as marginal nonattainment for the 2008 8-hour ozone NAAQS. A portion of Boone, Campbell, and Kenton Counties, Kentucky are included in the nonattainment area. A map of the nonattainment area is located at Figure 1, Chapter Three, depicting the final designated areas.

The Clean Air Act (CAA) requires each state with areas failing to meet the 8-hour ozone NAAQS to develop State Implementation Plans (SIP) to expeditiously attain and maintain the standard. Under Section 181(a)(1) of the CAA, Kentucky's marginal classification requires that the Cincinnati, OH-KY-IN MSA area attain the standard within three years of the final designations effective date (July 20, 2012), establishing a due date of July 20, 2015 for attainment.

The current design value of the ambient monitoring data for the Boone County and Campbell County monitors are 0.061ppm and 0.071 ppm respectively. The current design values are based on data collected from 2013 to 2015 (Please refer to Chapter Three). The design values for both of the Northern Kentucky monitors support Kentucky's request to EPA to redesignate the Kentucky portions of the Cincinnati, OH-KY-IN MSA area from nonattainment to attainment. In addition, the states of Ohio and Indiana submitted requests to redesignate to their respective portions of the Cincinnati, OH-KY-IN MSA nonattainment area to attainment.

Pursuant to Section 107(d)(3)(E) of the CAA, states may request nonattainment areas to be redesignated to attainment, provided specific criteria are met. The following criteria must be met in order for an area to be redesignated from nonattainment to attainment:

1. The Administrator determines that the area has attained the ozone standard. (CAA Section 107(d)(3)(E)(i))
2. The Administrator has fully approved the applicable implementation plan for the area under Section 110(k). (CAA Section 107(d)(3)(E)(ii))
3. The Administrator determines that the improvement in air quality is due to permanent and enforceable reductions in emissions resulting from implementation of the SIP, federal requirements, and other permanent and enforceable reductions. (CAA Section 107(d)(3)(E)(iii))
4. The Administrator has fully approved a maintenance plan, including a

contingency plan, under Section 175A. (CAA Section 107(d)(3)(E)(iv))

5. The state has met all requirements under Section 110 and Part D of Title I of the Act. (CAA Section 107(d)(3)(E)(v))

Chapter Two discusses each of the required criteria, with a detailed analysis provided in subsequent chapters.

CHAPTER TWO
Requirements for Redesignation

This redesignation request was prepared in accordance with CAA Section 107(d)(3)(E). A summary of each redesignation criterion, as it applies to the Cincinnati, OH-KY-IN MSA nonattainment area, follows.

1. Attainment of the standard (CAA Section 107(d)(3)(E)(i))

The state must demonstrate to the Administrator that the area is attaining the applicable NAAQS by providing 3 years of clean ambient air quality data. The data should be the product of ambient monitoring that represents the area of highest concentration. The data should be collected and quality-assured in accordance with 40 CFR 58 and recorded in EPA's Air Quality System (AQS) database for it to be available to the public for review. Pursuant to 40 CFR 50.15(b), the 8-hour primary and secondary ozone ambient air quality standards are met at an ambient air monitoring site when the 3-year average of the annual fourth-highest daily maximum 8-hour average ozone concentration is less than or equal to 0.075 ppm, as determined in accordance with 40 CFR 50, Appendix P.

Demonstration: The current design value of the ambient monitoring data for the Boone County and Campbell County monitors are 0.061ppm and 0.071 ppm respectively. The current design values are based on data collected from 2013 to 2015 (please refer to Chapter Three). Chapter Four provides the emissions inventory portion of this submittal, which demonstrates that NOx and VOC emissions decline over time and that these reductions are due to permanent and enforceable emission reductions.

2. Approved SIP for the area under CAA Section 110(k) (CAA Section 107(d)(3)(E)(ii))

The SIP for the area must be fully approved under section 110(k), and must satisfy all requirements that apply to the area.

Demonstration: Kentucky submitted a final SIP documenting the CAA requirements of Section 110(a) infrastructure provisions for the 2008 8-hour ozone NAAQS on July 17, 2012. On March 7, 2013[1] EPA took final action to approve the infrastructure elements, conditionally approve the prevention of significant deterioration (PSD) requirements, and disapprove the interstate transport requirements. Kentucky revised the New Source Review (NSR), PSD, and Nonattainment New Source Review (NNSR) regulations on January 31, 2013 and EPA converted the conditional approval related to PSD infrastructure requirements to full approval under the CAA on November 3, 2014[2].

In final actions to redesignate both the Knoxville, TN[3] and Charlotte-Rock Hill, NC[4] 2008 8-hour Ozone nonattainment areas, EPA determined that it is not necessary to have the interstate

[1] 78 FR 14681 *Approval and Promulgation of Implementation Plans; Kentucky; 110(a)(1) and (2) Infrastructure Requirements for the 2008 8-Hour Ozone National Ambient Air Quality Standards*
[2] 79 FR 65143 *Approval and Promulgation of Implementation Plans; Commonwealth of Kentucky: New Source Review*
[3] 80 FR 29237 *Approval and Promulgation of Implementation Plans and Designation of Areas for Air Quality Planning*

transport requirements approved in order for an area to be redesignated to attainment. "EPA believes that the requirements linked with a particular nonattainment area's designation and classifications are the relevant measures to evaluate in reviewing a redesignation request. The transport SIP submittal requirements, where applicable, continue to apply to a state regardless of the designation of any one particular area in the state. Thus, EPA does not believe that the CAA's interstate transport requirements should be construed to be applicable requirements for purposes of redesignation."[5] Therefore, Kentucky meets the requirements of CAA 107(d)(3)(E)(ii) and requests redesignation of the Kentucky portion of the Cincinnati, OH-KY-IN MSA nonattainment area to attainment.

3. Permanent and enforceable improvement in air quality (CAA Section 107(d)(3)(E)(iii))

The state must be able to reasonably attribute the improvement in air quality to emission reductions which are permanent and enforceable. The state should estimate the percent reduction achieved from federal measures, as well as control measures that have been adopted and implemented by the state.

Demonstration: Chapter Four discusses this requirement in more detail and provides the demonstration.

4. Maintenance plans (CAA Section 107(d)(3)(E)(iv))

Section 107(d)(3)(E) requires that for an area to be redesignated, EPA must fully approve a maintenance plan that meets the requirements of CAA Section 175A. The maintenance plan constitutes a SIP revision and must provide for maintenance of the relevant NAAQS in the area for at least ten years after redesignation, along with a commitment to review the plan. Section 175A also requires that the plan shall contain additional measures, if any, as may be necessary to ensure such maintenance with the standard.

The maintenance plan shall also contain such contingency measures, as the Administrator deems necessary, to ensure prompt correction of any violation of the NAAQS. At a minimum, the contingency measures must include a requirement that the state will implement all measures contained in the nonattainment SIP prior to redesignation.

Demonstration: States seeking approval of a maintenance plan for a nonattainment area should consider the following provisions:

- attainment inventory (Chapter Four contains the discussion and demonstration);
- maintenance demonstration (Chapter Four contains the discussion and demonstration);
- monitoring network (Chapter Three contains the discussion and demonstration);
- verification of continued attainment (Chapter Four contains the discussion and

demonstration); and

- contingency plan (Chapter Six contains the discussion and demonstration).

5. Section 110 and Part D requirements (CAA Section 107(d)(3)(E)(v))

For purposes of redesignation, a state must meet all requirements of Section 110 *State Implementation Plans for National Primary and Secondary Ambient Air Quality Standards* and Part D *Plan Requirements for Nonattainment Areas* that were applicable prior to submittal of the complete redesignation request.

Demonstration: This document demonstrates that the Kentucky portion of the Cincinnati, OH-KY-IN 2008 8-hour ozone nonattainment area meets the requirements of CAA Section 110 and Part D, and therefore, is eligible to be redesignated to attainment.

CHAPTER THREE
Ozone Monitoring

This chapter provides detailed information demonstrating that Kentucky meets the requirements of CAA Section 107(d)(3)(E)(i).

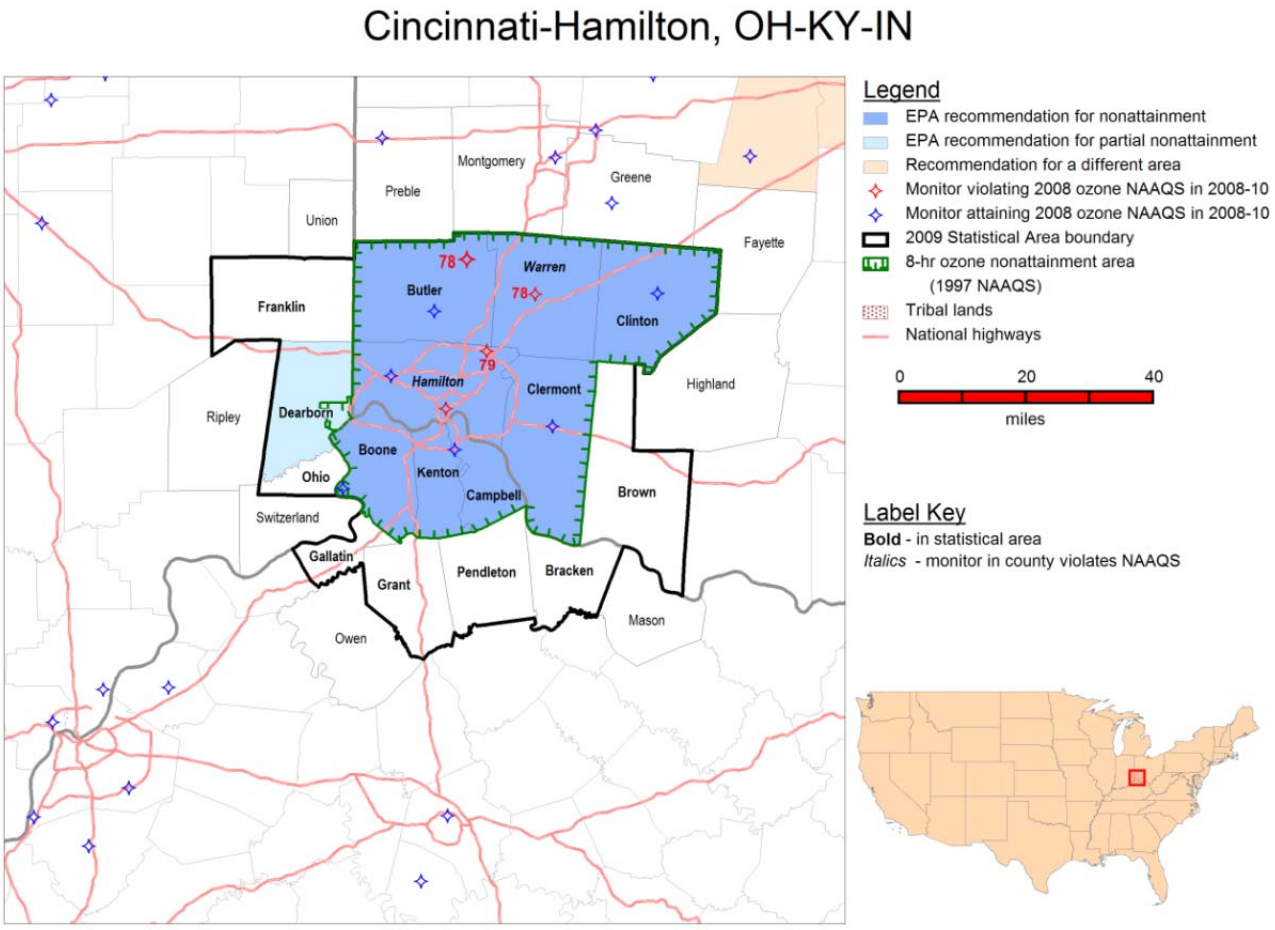
Requirement 1 of 4
A demonstration that the 2008 8-hour Ozone NAAQS, as established in 40 CFR 50.15, has been attained.

Demonstration: The 8-hour Ozone NAAQS are met at an ambient air quality monitoring site when the three-year average of the annual fourth-highest daily maximum eight-hour average ozone concentrations is less than or equal to 0.075 ppm. When this occurs, the site is said to be in attainment.

Currently, there are two ambient air monitors that measure ozone concentrations located within the Kentucky portion of the Cincinnati, OH-KY-IN MSA nonattainment area: one in Boone County and one in Campbell County. The 8-hour ozone data collected from 2013-2015 for the two monitor's results in a three-year average of the annual fourth-highest daily maximum eight-hour average ozone concentrations of 0.061 ppm and 0.071 ppm, respectively. Each of these design values are below the 0.075 ppm standard. Therefore, the data demonstrates that the Kentucky portions of the nonattainment area are in attainment.

The 8-hour ozone nonattainment designation was based on ambient air quality data collected from 2008 through 2010 that exceeded the 2008 Ozone NAAQS of 0.075 ppm. Although the two monitors in Kentucky's portion of the area were not violating the 8-hr ozone NAAQS, Boone, Campbell and Kenton counties were included as part of the Cincinnati, OH-KY-IN MSA nonattainment area. The violating monitors for the MSA were located in Hamilton, Butler, and Warren Counties in Ohio. Current ambient air quality data from all monitoring sites in the MSA are below 0.075 ppm and are attaining the 2008 8-hour ozone NAAQS. Design values for all monitors within the nonattainment area are shown in Table 1.

Figure 1 - Map of the Cincinnati, OH-KY-IN MSA Nonattainment Area and Monitor Locations



Requirement 2 of 4

Ambient air monitoring data that has been quality assured in accordance with 40 CFR 58, Appendix A, is recorded in the EPA Air Quality System (AQS) database, and available for public view. Each state and local agency must develop a quality system to ensure that the monitoring results:

- meet a well-defined need, use, or purpose;
- provide data of adequate quality;
- satisfy stakeholder expectations;
- comply with applicable standards specifications;
- comply with statutory/other requirements of society;
- reflect consideration of cost and economics.

Demonstration: The Kentucky Division for Air Quality (Division) has a quality assurance program which ensures that all ambient air monitoring data collected is accurate and precise; air monitors are audited on a scheduled basis; and data validation is performed monthly. All ambient air monitoring data shown in Table 1 has been quality-assured in accordance with 40

CFR 58, Appendix A and the data has been recorded into the EPA AQS database. It is anticipated that these monitors will remain at current locations for the foreseeable future. Pursuant to 40 CFR § 58.15, each air monitoring agency must certify the previous year of AQS-submitted data as accurate by May 1 of the following year. On March 31, 2016, the Division submitted a letter to EPA certifying that the 2015 ozone ambient concentration data and the quality assurance data have been completely submitted to AQS. The 2015 ozone quality assured data are shown below in Table 1. This data demonstrates that ozone concentration continue to decline in the area.

Requirement 3 of 4

A showing that the three-year average of the fourth highest values, based on data from all monitoring sites in the area or its affected downwind environs, are below 0.075 ppm. The design value is based on three complete years of ozone monitoring data.

Demonstration: In 2014, the ambient air monitoring data for ozone in the Kentucky portions of Boone, Campbell and Kenton counties of the nonattainment area; the nonattainment portion of Butler, Clermont, Clinton, Hamilton and Warren counties in Ohio; and a portion of Dearborn County, Indiana indicated no further exceedances of the 2008 8-hour standard as seen in Table 1.

Table 1
Annual 4th Maximum High Trend for 8-Hour Ozone
(parts per million)

Site ID	County	2012	2013	2014	2015	2012-2014 Design Value	2013-2015 Design Value
21-015-0003	Boone, KY	0.074	0.059	0.062	0.062	0.065	0.061
21-037-3002	Campbell, KY	0.084	0.072	0.071	0.071	0.075	0.071
39-017-0004	Butler, OH	0.083	0.068	0.070	0.070	0.073	0.069
39-017-0018	Butler, OH	0.084	0.068	0.069	0.070	0.073	0.069
39-017-9991	Butler, OH	0.085	0.069	0.069	0.068	0.074	0.068
39-025-0022	Clermont, OH	0.091	0.066	0.068	0.070	0.075	0.068
39-027-1002	Clinton, OH	0.086	0.064	0.070	0.070	0.073	0.068
39-061-0006	Hamilton, OH	0.087	0.069	0.070	0.072	0.075	0.070
39-061-0010	Hamilton, OH	0.083	0.064	0.073	0.070	0.073	0.069
39-061-0040	Hamilton, OH	0.082	0.069	0.069	0.071	0.073	0.069
39-165-0007	Warren, OH	0.080	0.067	0.071	0.071	0.072	0.069

Requirement 4 of 4

A commitment that once redesignated, the state will continue to operate an appropriate monitoring network to verify the maintenance of the attainment status.

Demonstration: Kentucky will continue to operate an ambient air quality monitoring network consistent with the network plan and assessments required by 40 CFR 58.10 and 40 CFR 58, Appendix D. Any modification to the network will be conducted in accordance with 40 CFR 58.14. As required by 40 CFR 58.16, all data collected will be recorded in the AQS database and will therefore be available to the public.

CHAPTER FOUR
Emission Inventory

This chapter discusses the emissions inventory portion of this submittal and demonstrates that Kentucky meets the requirements of CAA Section 107(d)(3)(E)(iii).

Pursuant to the CAA, a demonstration must show that the improvement in air quality between the year that violations occurred and the year that attainment was achieved is based on permanent and enforceable emission reductions. To verify the emission reductions, Kentucky is submitting a comprehensive inventory of ozone precursor emissions (VOC and NOx) representative of the year when the area achieves attainment of the 8-hour ozone air quality standard (2014). Other emission inventory related information includes a projection of the emission inventory to a year at least 10 years following redesignation; a demonstration that the projected level of emissions is sufficient to maintain the 8-hour ozone standard; and a commitment to provide future updates of the inventory to enable tracking of emission levels during the 10-year maintenance period.

Airport (Air), Non-road and Area sources were provided by Indiana Department of Environmental Management (IDEM). "Air" is the term used to represent aircraft emissions. This term (Air) was also used to be consistent with documents from the two other states involved in this EPA submittal, Ohio and Indiana. Point source emissions data were obtained through the Kentucky Emissions Inventory database. Ohio-Kentucky-Indiana Regional Council of Governments (OKI) provided the On-road emissions inventory. IDEM, OKI, Ohio EPA, and the Division had frequent communication and consultation to ensure the nonattainment area emissions inventory were accurate and consistent among all three States.

Requirement 1 of 4
A comprehensive emission inventory of ozone completed for the base year and a projection of the emission inventory to a year at least 10 years following redesignation.

Demonstration:
In accordance with sections 172(c)(3) and 182(a)(1) of the CAA an emissions inventory was prepared for base year (2011) NOx and VOC emissions in the Cincinnati, OH-KY-IN MSA nonattainment area. The 2011 base year inventory represents a comprehensive, accurate, and current inventory of actual emissions from all sources of the relevant pollutants in the 2008 8-hour ozone nonattainment area. To demonstrate that emissions are sufficient to maintain the NAAQS, the emissions inventory has been projected for the years 2014, 2017, 2020, 2025 and 2030. For the attainment year, 2014 was selected since the design value for the 2012-2014 period shows attainment of the 2008 8-hour ozone NAAQS.

Totals calculated in tons per summer day (TSD) were provided by IDEM and derived according to the EPA guidance document "Temporal Allocation of Annual Emissions Using EMCH Temporal Profiles," and by using the temporal allocation references accompanying the 2011v6.1 modeling inventory files. These files provide SCC specific profiles that allow annual emission totals to be distributed across various temporal periods, as described in EPA's guidance document. Totals for each sector can be found in Appendix C.

The emissions inventory is broken down into six emission categories: EGU, Non-EGU, Air, Non-road, Area and On-road. The emission totals for the Kentucky portion of the nonattainment area are partial county totals for all emission categories with the exception of Air. Using 2014 as the attainment year, the subsequent years were chosen at appropriate intervals and project maintenance for at least a 10-year period. The following sections describe how data for each emission category was obtained and used. Documentation detailing the method for projecting emissions is included in Appendix E.

Point Sources

Kentucky used actual 2011 EGU, Non-EGU emissions for point sources since 2014 data was not available at the time. The point source emissions inventory is located in Appendix C, while the projection methodology can be found in Appendix E. The EGU and Non-EGU sources represent partial county totals while the Air sources represent entire county totals. "Air emissions" is the term used to represent aircraft emissions. This term ("Air") was also used to be consistent with documents from the two other states involved in this EPA submittal, Ohio and Indiana. IDEM provided aircraft emissions data for Kentucky. Aircraft emissions are included in Boone County, where the Cincinnati/Northern Kentucky International Airport is located. Data were obtained from the Ozone NAAQS Emissions Modeling Platform (2011 v6.1)[6]. A temporal breakdown of the data was used through EPA modeling guidance[7]. The Air emission totals outside of the nonattainment area were negligible therefore Kentucky decided to include them with the nonattainment area totals.

For Boone, Campbell, and Kenton Counties, EGU and non-EGU facilities were first identified within the applicable Census Tracts of the nonattainment area. There are a total of 21 facilities located within the designated Census Tract boundaries, as summarized below in Table 2.

TABLE 2
POINT SOURCE FACILITIES IN NORTHERN KENTUCKY – OZONE REDESIGNATION REQUEST

Kentucky County	Number of EGU & non-EGU Source Facilities
Boone	17
Campbell	2
Kenton	2
TOTAL	**21**

Mobile Sources

Emissions for the base year, the attainment year, and all interim years for highway mobile were developed by Ohio-Kentucky-Indiana Regional Council of Governments (OKI) using EPA's MOVES 2014 mobile source emissions model. OKI is the metropolitan planning organization for the Greater Cincinnati area. The technical support document is provided in Appendix D.

[6] https://www3.epa.gov/ttn/chief/emch/index.html
[7] https://www3.epa.gov/ttn/chief/emch/temporal/

Area Sources/Non-Highway Mobile Sources

(IDEM) provided area and non-highway emissions data for Kentucky. Data were obtained from the Ozone NAAQS Emissions Modeling Platform (2011 v6.1). A temporal breakdown of the data was used through EPA modeling guidance.

Since county portions are involved for all three northern Kentucky counties, these were determined by multiplying the 2011 emissions for the entire county by the percentage of the county that is in the nonattainment area. Emissions from the county portions were then projected out to the appropriate future years. Table 3 below summarizes the county area percentages that were used to estimate the area and non-highway mobile emissions for Kentucky.

TABLE 3
COUNTY AREA PERCENTAGES FOR NORTHERN KENTUCKY OZONE NONATTAINMENT AREA (NAA)
AREA AND NON-HIGHWAY MOBILE SOURCES

Kentucky County	NAA Percentage
Boone	57%
Campbell	56%
Kenton	54%
Percentages were obtained by using the measurement function in Google Earth.	

The application of these percentages to the total county emissions provided by IDEM for area and non-highway mobile emission sources resulted in the representation of emissions from the applicable Census Tracts. Area and non-highway mobile emissions data can be found in Appendix C.

Requirement 2 of 4

A demonstration that the projected level of emissions is sufficient to maintain the ozone standard.

Maintenance is demonstrated either by showing that future levels of ozone will not exceed the level of the attainment inventory, or by modeling to show that the future mix of sources and emission rates will not cause a violation of the NAAQS.

A maintenance demonstration should also include a listing of all ozone control measures being implemented in the area by sector (See Chapter Five).

Demonstration: A maintenance demonstration requires a comparison of the projected emissions inventory with the baseline inventory. If the projected emissions remain at or below the baseline emissions, there is a demonstration of maintenance. If, however, the projected emissions are above the baseline, then additional control measures are required to ensure the projected emissions will remain at or below the baseline emissions. The baseline inventory and annual projections for all pollutant sources can be found in Appendix C.

Tables 4 through 23 detail the projected emissions through 2030 for all counties within the Cincinnati, OH-KY-IN MSA nonattainment area. EPA Region 4 requires more interim years than EPA Region 5, therefore the 2017, 2025 interim years are represented within the Kentucky submittal but not the Ohio or Indiana submittals. The 2030 projected emission totals (VOC and NOx) for Boone, Campbell and Kenton Counties' are below the 2011 emissions totals, thus demonstrating continued maintenance of the 8-hour ozone standard.

The Division submitted a SIP revision to EPA on May 3 2016, requesting that amended regulation 401 KAR 59:174 be incorporated into Kentucky's SIP. The amended regulation allows for decommissioning and removal of Stage II Vapor Recovery Systems (VRS). Kentucky's submittal demonstrates that the removal of Stage II VRS controls at gasoline dispensing facilities in Northern Kentucky will result in VOC emission reductions beginning in 2016. However, these reductions were not taken into consideration within this submittal and were not relied upon to reach attainment. The Stage II submittal is pending approval from EPA.

Safety Margin

The transportation conformity regulation, 40 CFR Part 93, Subpart A, *Conformity to State or Federal Implementation Plans of Transportation Plans, Programs, and Projects Developed, Funded or Approved under Title 23 U.S.C. or the Federal Transit Laws*, requires that mobile source emissions submitted or approved to a state's SIP be used in determining conformity of transportation plans for the area. This regulation also allows the addition of a safety margin to the mobile emissions budgets. Per 40 CFR 93.101, the safety margin is defined as "the amount by which the total projected emissions from all sources of a given pollutant are less than the total emissions that would satisfy the applicable requirement for reasonable further progress, attainment or maintenance." In accordance with 40 CFR 93.105, interagency consultation was used to select an interim year for 2020.

In estimating safety margins, the calculation methodology involves two steps. These calculations are illustrated using a county example, 2020 VOC emissions for Boone County.

STEP #1: CALCULATING SAFETY MARGIN

(2014 Attainment VOC Total – 2020 VOC Total) x Safety Margin as Requested by OKI

= 2020 VOC Safety Margin

(8.54 tons per summer day (TSD) – 7.00 TSD) x 15% = 2020 VOC Safety Margin

= **0.23 TSD VOC Safety Margin**

The same calculation for VOC is performed for the two other Kentucky counties: Campbell and Kenton Counties. Combined together, the three county-level VOC safety margins are the total VOC safety margin for the Kentucky portion of the Cincinnati, OH-KY-IN MSA 2008 8-hour ozone nonattainment area. Identical calculations are also performed to determine the safety margin for NOx.

STEP #2: CALCULATING BUDGET WITH SAFETY MARGIN

2020 VOC Mobile + 2020 Safety Margin = 2020 VOC Budget with Safety Margin

= 1.38 TSD VOC + 0.23 TSD VOC = 2020 VOC Budget with Safety Margin

= **1.61 TSD VOC Budget with Safety Margin**

On-road mobile sources include both passenger and freight vehicles. County-specific vehicle population and other local data were used in calculating these emissions. EPA's Motor Vehicle Emission Simulator (MOVES2014) mobile model was used to estimate the on-road mobile source emissions. For specific details concerning the modeling of on-road mobile source emissions, please see Appendix D of Kentucky's submittal.

Although the vehicle miles traveled (VMT) data for the Kentucky portion of the Cincinnati, OH-KY-IN nonattainment area slightly increased from 2011 to 2030, the overall on-road mobiles source emissions decreased during the same time frame. The Ohio-Kentucky-Indiana Regional Council of Governments, or OKI, a transportation planning and advocacy agency based out of Cincinnati, Ohio, provided VMT data in the following table.

OKI Vehicle Miles Traveled by County (per summer day)

County	2011	2014	2020	2030
Boone	3,706,116	3,844,287	4,113,420	4,626,949
Campbell	2,310,234	2,396,364	2,564,129	2,884,241
Kenton	3,507,534	3,638,302	3,893,013	4,379,027
TOTAL	**9,523,884**	**9,878,953**	**10,570,562**	**11,890,217**

Although OKI did not provide VMT data for the years 2017 and 2025, the Division interpolated emissions for those years.

The same calculation for VOC is performed for the two other Kentucky counties: Campbell and Kenton Counties. Combined together, the three county-level VOC budget with safety margins are the total VOC budget with safety margin for the Kentucky portion of the Cincinnati, OH-KY-IN MSA 2008 8-hour ozone nonattainment area.

Tables 24 through 41 show a summary of the projected emissions with the corresponding safety margins. As agreed upon during the interagency consultation process, budgets are established for the combined Ohio and Indiana portions and for the separate Kentucky portion.

As part of this redesignation SIP revision, KYTC requested a 15% safety margin. If only a portion of the safety margin is needed during a transportation conformity determination, then the area's transportation initiatives should proceed in alignment with transportation conformity. If, however, the amount of safety margin needed exceeds the amount of safety margin available during the transportation conformity determination, it is possible a transportation conformity amendment may be needed. In this scenario, interagency consultation procedures will take effect which would lead to review and comment of further transportation conformity documentation through amendments to Transportation Improvement Programs and Transportation Plans.

For 2020, the total safety margin for the Kentucky portion of the Cincinnati, OH-KY-IN MSA nonattainment area added to the highway mobile source VOC emissions budget is 0.56 TSD. Also for 2020, the total safety margin for the Kentucky portion of the Cincinnati, OH-KY-IN

MSA nonattainment area added to the highway mobile source NOx emissions budget is 1.16 TSD.

For 2030, the total safety margin for the Kentucky portion of the Cincinnati, OH-KY-IN MSA nonattainment area added to the highway mobile source VOC emissions budget is 0.89 TSD. Also for 2030, the total safety margin for the Kentucky portion of the Cincinnati, OH-KY-IN MSA nonattainment area added to the highway mobile source NOx emissions budget is 1.95 TSD.

A highway mobile emissions summary relating to the total safety margins is provided below in Table 42.

Table 42
Kentucky Portion of the Cincinnati, OH-KY-IN MSA
2008 8-Hour Ozone Nonattainment Area
Highway Mobile Emission Budgets with Safety Margins
(TSD)

Mobile Budget	2020	2030
VOC	3.54	1.99
NOx	6.20	2.69
Safety Margin		
VOC	0.56	0.89
NOx	1.16	1.95
Budgets with Margins		
VOC	4.10	2.87
NOx	7.35	4.64

The addition of the safety margin to the 2020 and 2030 mobile emissions ensure that the total emissions from all sectors do not exceed the emissions for the attainment year, 2014. The additional safety margin amounts do not cause the projected emissions in 2020 and 2030 to exceed the highway mobile source emissions for the year 2014.

The highway mobile source emissions budgets included in Table 42 above will apply to future transportation conformity determinations.

Tables 43 and 44 demonstrate that for the combined area, projected 2030 emissions for all pollutants are less than 2014 attainment year levels.

Requirement 3 of 4

A demonstration that improvement in air quality between the year violations occurred and the year attainment was achieved is based on permanent and enforceable emission reductions and not on temporary adverse economic conditions or unusually favorable meteorology.

Demonstration:

Table 45 below demonstrates that emissions will decrease between the attainment year and the 2030 maintenance year. VOC emissions in the nonattainment area are projected to decrease by 34.44 TSD while NOx emissions are projected to decrease by 72.94 TSD. These reductions reflect the integration of programs that will continue to reduce emissions. The Tier 3 vehicle and fuel standards, the national program for greenhouse gas (GHG) emissions, and fuel economy standards are a few examples of the federal programs that will continue to ensure permanent and enforceable emissions reductions over time. These programs are discussed in further detail in Chapter Five, requirement 5 of 5.

Table 45
Cincinnati, OH-KY-IN MSA
2008 8-Hour Ozone Nonattainment Area
Emission Reductions
(TSD)

	2014	2030	Total Reductions
VOC	131.83	95.92	**35.91**
NOx	200.31	117.26	**83.05**

Requirement 4 of 4

Provisions for future annual updates of the inventory to enable tracking of the emission levels, including an annual emission statement from major sources.

Demonstration

Major point sources in Kentucky are required to submit annual air emissions data, in accordance with EPA's Air Emissions Reporting Requirements (AERR). Kentucky's database of annual air emissions will be used to prepare ozone precursor inventories for future years, as necessary, to comply with the inventory reporting requirements established in the CFR. Emissions information will be compared to the 2011 base year and the 2030 projected maintenance year inventories to assess emission trends, as necessary, and to assure continued compliance with the ozone standard.

CHAPTER FIVE

Control Measures and Regulations

This chapter discusses the permanent and enforceable reductions, maintenance plan requirements, and demonstrates Kentucky's compliance with the requirements of CAA Sections 107(d)(3)(E)(ii), 107(d)(3)(E)(iv), and 107(d)(3)(E)(v).

Requirement 1 of 5

Section 182(a)(2)(A) of the 1990 CAA Amendments requires states with marginal nonattainment areas to submit a SIP providing for implementation of all reasonably available control measures as expeditiously as practicable (including such reductions in emissions from existing sources in the area as may be obtained through the adoption, at a minimum, of RACT).

Demonstration: Section 172(c)(1) requires the plans for all nonattainment areas to provide for the implementation of all RACM as expeditiously as practicable and to provide for attainment for the NAAQS. As stated in 80 FR 12268, "Implementation of the 2008 National Ambient Air Quality Standards for Ozone: State Implementation Plan Requirements; Final Rule", "Under CAA section 182(a), Marginal areas have up to 3 years from the effective date of designation to attain the NAAQS, and are not required to submit an attainment demonstration SIP." Included as a footnote on page 12268 of the same federal register, EPA details that "An attainment demonstration consists of: (1) Technical analysis, such as base year and future year modeling of emissions which identifies sources and quantifies emissions from those sources that are contributing to nonattainment; (2) analyses of future year emissions reductions and air quality improvement resulting from existing (i.e., already adopted or "on the books") national, regional and local programs, and potential new local measures needed for attainment, including RACM and RACT for the area; (3) a list of adopted measures (including RACT) with schedules for implementation and other means and techniques necessary and appropriate for demonstrating attainment as expeditiously as practicable but no later than the outside attainment date for the area's classification; and (4) a RACM analysis to determine whether any additional RACM measures could advance attainment by 1 year." A demonstration does not need to be made for RACT/RACM since the Cincinnati, OH-KY-IN area has already attained the standard, thereby no further measures can be taken to expedite the attainment date.

Even though there are no further measures needed to provide for attainment in the Cincinnati area, Kentucky has regulations in place that were previously adopted into the SIP. Kentucky promulgated rules requiring reasonable available control measure (RACM) for ozone from stationary sources for particular source categories. The RACT requirements can be found in 401 KAR Chapter 59 for new sources and 401 KAR Chapter 61 for existing sources. Statewide RACT rules have been applied to all major sources of VOCs located in a county or portion of a county which is designated ozone nonattainment, for any nonattainment classification except marginal. For those sources that are not subject to RACT requirements in 401 KAR Chapters 59 or 61, the generally applicable Kentucky RACT rules for ozone can be found in 401 KAR 50:012.

Requirement 2 of 5

Section 182(a)(3)(B) of the CAA requires states to ensure they have an emission reporting program in place, requiring stationary sources of NOx or VOCs to submit an annual emission

statement certifying that the information contained in the statement is accurate to the best knowledge of the individual certifying the statement.

Demonstration: Kentucky first implemented an Emissions Statement Program in response to a nonattainment designation of the 1997 ozone NAAQS. Since that time, the original regulation has been changed. Kentucky does not have a stand-alone regulation for the emissions statement requirements of CAA Section 182(a)(3)(B). The emissions statement is listed within Kentucky's permitting regulations. Regulations 401 KAR 52:020 *Title V permits*, 52:030 *Federally-enforceable permits for nonmajor sources*, 52:040 *State-origin permits*, and 52:070 *Registration of designated sources* require that an emission certification be submitted to the Division annually. Kentucky submitted an emissions statement SIP revision to EPA on September 14, 2015.

Requirement 3 of 5

Section 172(c)(2) of the 1990 CAA Amendments requires SIPs for nonattainment areas to show reasonable further progress (RFP). Section 171(1) defines RFP as "such annual incremental reductions in emissions of the relevant air pollutant as are required by this part or may reasonably be required by the Administrator for the purpose of ensuring attainment of the applicable national ambient air quality standard by the applicable date."

Demonstration: Kentucky's RFP provisions are covered in 401 KAR 51:052 *Review of new sources in or impacting upon nonattainment areas*. In a federal register released March 6, 2015, *Implementation of the 2008 National Ambient Air Quality Standards for Ozone*, EPA stated that upon determination that an area is attaining the standard, the requirements for the area to submit RFP plans and other attainment-related planning requirements shall be suspended for as long as the area continues to attain the standard (80 FR 12264). On May 4, 2016, EPA promulgated a final rule (81 FR 26697) declaring that Kentucky, along with several other states, as attaining the 2008 Ozone NAAQS based on complete, quality-assured and certified ozone monitoring data. The requirements for reasonable further progress and other measures needed for attainment will not apply for redesignations because they only have meaning for areas not attaining the standard[8]. Therefore, Kentucky is not required to demonstrate RFP for the 2008 Ozone NAAQS.

Requirement 4 of 5

Acceptable provisions to provide for new source review. The requirements of the new source review program will be replaced by the prevention of significant deterioration (PSD) program once the area has been redesignated therefore, in order to ensure the PSD program will become fully effective immediately upon redesignation, the state must establish that it has the proper provisions in place.

Demonstration: Kentucky has a longstanding and fully implemented NSR program. This is addressed in 401 KAR 51:052[9]. Additionally, 401 KAR Chapter 51 includes provisions for the PSD permitting program (401 KAR 51:017). Kentucky's NSR and PSD programs were last

[8] John Calcagni, "Procedures for Processing Requests to Redesignate Areas to Attainment", September 4, 1992: 6
[9] http://www.lrc.ky.gov/kar/401/051/052.htm

revised and approved into Kentucky's SIP on September 15, 2010[10]. Both programs were found applicable to the 2008 ozone NAAQS.

Any facility that is not listed in the 2011 emission inventory, or for the closing of which credit was taken in demonstrating attainment, will not be allowed to construct, reopen, modify, or reconstruct without meeting all applicable NSR requirements. Once the area is redesignated, Kentucky will implement NSR through the PSD program.

Requirement 5 of 5
Section 172(c)(6) requires other plan provisions, such as control measures, to provide for attainment of the standard.

Demonstration: Since the Cincinnati, OH-KY-IN area has already attained the standard, no additional measures are needed to provide for attainment. However, control measures already in place, or being implemented over the next few years, will continue to reduce stationary point, highway mobile, and nonroad mobile source emissions. The following programs have shown, or are expected to show, emission reductions in VOC and NOx emissions due to regulatory measures implemented by both the EPA and Kentucky. Monitoring, recordkeeping, and reporting requirements are incorporated into Kentucky's air permits to ensure ongoing compliance. Kentucky has an active enforcement program to address violations identified by field office staff.

Federal Control Measures

Tier II Emission Standards for Vehicles and Gasoline Sulfur Standards

EPA finalized a federal rule in 2000 to reduce emissions from passenger vehicles in each manufacturer's fleet to meet an average standard of 0.07 grams of NOx per mile. Additionally, in January 2006 the sulfur content of gasoline was required to be on average 30 ppm which assists in lowering NOx emissions. EPA estimated that the reduction of NOx emissions was ranged from 77 percent for cars to 86 percent for minivans, light trucks and small SUVs. VOC emissions were also reduced, ranging from 12 percent for cars up to 18 percent for minivans, light trucks and small SUVs. These emission reductions are federally enforceable.
Tier III Emission Standards for Vehicles and Gasoline Sulfur Standards

On March 3, 2014, the EPA finalized new Tier III emission standards for light duty (and some larger) motor vehicles. Light duty vehicles include cars, SUVs, vans, and most pickup trucks. Phase-in of the standards will begin with Model Year 2017. By the time Tier III is fully implemented in Model Year 2025, the standards for light duty vehicles will require a national reduction of about 80% in tailpipe emissions of VOC and nitrogen oxides (both of which contribute to the formation of ground-level ozone) and of about 70% in tailpipe emissions of particulates.

Like the current Tier II standards, which were promulgated in 2000 and phased in between Model Years 2004 and 2009, the Tier III standards treat vehicles and fuels as a system:

[10] 75 FR 55988

reductions in vehicle emissions are easier to achieve if the fuel used contains less sulfur. The Tier III standards will require that gasoline contain no more than 10 parts per million (ppm) sulfur on an annual average basis beginning January 1, 2017, down from 30 ppm under the Tier II program. Further, the rule extends the required useful life of emission control equipment from 120,000 miles to 150,000 miles, and sets standards for heavier duty gasoline-powered vehicles. The standards will also require about a 50% reduction in evaporative emissions

EPA anticipates that the implementation of the Tier III vehicle and fuel standards will reduce emissions of NOx, VOC, $PM_{2.5}$, and air toxics. The fuel standards alone, which would take effect in 2017, are projected to provide an immediate 56% reduction in sulfur dioxide (SO_2) emissions as the ultra-low sulfur gasoline is deployed in existing vehicles and engines. Further, EPA projects that NOx emissions will be reduced by about 260,000 tons by 2018 (about 10% of the current emissions from on-highway vehicles), and by about 330,000 tons by 2030 (about 25% of the current emissions from on-highway vehicles) as covered vehicles become a larger percentage of the fleet. VOC and CO emissions are projected to be reduced by about 170,000 tons and 3.5 million tons respectively by 2030 (16% and 24% of the current emissions from on-highway vehicles). These projected national reductions would immediately reduce ozone levels in 2017 when the sulfur controls take effect, and would lead to significant decreases in ambient concentrations of ozone, $PM_{2.5}$ and air toxics by 2030 as the vehicle fleets become updated.

Tier 4 Vehicle Standards

On May 11, 2004, EPA signed the final rule introducing Tier 4 emission standards, which were phased-in from 2008-2015. Engine manufacturers were required to produce new engines with advanced emission control technologies. Exhaust emissions from these engines were predicted to decrease by more than 90 percent. When the full inventory of older nonroad engines are replaced by Tier 4 engines, annual emission reductions are estimated at 738,000 tons of NOx and 129,000 tons of PM.

Clean Air Interstate Rule

Significant emissions reductions from coal-fired electricity generating units (EGUs) have contributed to the region's reduction in emissions and significant improvement in air quality. On May 12, 2005 the EPA promulgated the Clean Air Interstate Rule (CAIR). CAIR required 27 eastern states as well as the District of Columbia to achieve SO_2 and NOx emission reductions for new and existing EGUs. CAIR utilized a cap and trade system to reduce SO_2 and NOx emissions. The CAIR NO_x ozone season and annual programs began in 2009, while the CAIR SO_2 annual program began in 2010. The D.C. Circuit remanded CAIR without vacatur on December 23, 2008. The December 23, 2008 court ruling left CAIR and the CAIR FIPs, including the CAIR trading programs, in place until the U.S. EPA issued a new rule to replace CAIR in accordance with the July 11, 2008 decision.

Kentucky developed regulations 401 KAR 51:210, 401 KAR 51:220, and 401 KAR 51:230 (effective February 2, 2007) in response to CAIR; those regulations are still in place. However, reductions due to this regulation and CAIR were not included in the inventory and its projections for the Kentucky portion of the nonattainment area.

Cross-State Air Pollution Rule

EPA issued the Cross-State Air Pollution Rule (CSAPR) in July 2011. As amended, CSAPR requires 28 states in the eastern half of the United States to significantly improve air quality by reducing power plant emissions that cross state lines and contribute to ozone and fine particle pollution in other states. CSAPR was scheduled to replace CAIR starting on January 1, 2012. However, the timing of CSAPR's implementation was affected by D.C. Circuit actions that stayed and then vacated CSAPR before implementation. On April 29, 2014, the U.S. Supreme Court reversed the D.C. Circuit's vacatur, and on October 23, 2014, the D.C. Circuit granted EPA's motion to lift the stay and shift the CSAPR compliance deadlines by three years. Accordingly, CSAPR Phase I implementation began January 1, 2015, with Phase II to begin in 2017.

National Program for greenhouse gas (GHG) emissions and fuel economy standards

The federal GHG and fuel economy standards apply to light-duty cars and trucks in model years 2012-2016 (phase 1) and 2017-2025 (phase 2). The final standards are projected to result in an average industry fleet-wide level of 163 grams/mile of carbon dioxide (CO2) which is equivalent to 54.5 miles per gallon (mpg) if achieved exclusively through fuel economy improvements. The fuel economy standards will result in less fuel being consumed, and therefore less NOx emissions released. These emission reductions will be federally enforceable.

Utility Mercury Air Toxics Standards (MATS) and New Source Performance Standards (NSPS)

On February 16, 2012, the EPA published final rules for both the (1) MATS for new and existing coal- and oil-fired EGUs and (2) NSPS for fossil-fuel fired electric utility, industrial-commercial-institutional and small industrial-commercial-institutional steam generating units. The MATS rule is expected to reduce both NOx and SO_2 emissions, in addition to mercury and other air toxic emissions. MATS applies to EGUs larger than 25 megawatts that burn coal or oil for the purpose of generating electricity for sale and distribution through the national electric grid to the public. For the NSPS, the EPA revised the standards that new coal- and oil-fired power plants must meet for NOx, SO_2, and particulate matter (PM). The emission reductions associated with the MATS and the revised NSPS are federally enforceable.

NOx SIP Call in Surrounding States

In October 1998, the EPA made a finding of significant contribution of NOx emissions from certain states and published a rule that set ozone season NOx budgets for the purpose of reducing regional transport of ozone (63 FR 57356). This rule, referred to as the NOx SIP Call, called for ozone season controls to be put on utility and very large industrial boilers, as well as internal combustion engines in 22 states in the Eastern United States. A NOx emissions budget was set for each state and the states were required to develop rules that would allow them to meet their budget. A NOx trading program was established, allowing sources to buy credits to meet their NOx budget as opposed to actually installing controls (68 FR 37418). The emission budgets were to be met by May of 2004. Even with the trading program, the amount of ozone season NOx emissions have decreased significantly in and around Kentucky.

State Control Measures

NOx SIP Call Rule

In response to the EPA's NOx SIP call, Kentucky adopted 401 KAR 51:150 and 401 KAR 51:160 to control the emissions of NOx from EGUs and large stationary combustion sources (75 FR 54755). These regulations cover (1) fossil fuel-fired stationary boilers, combustion turbines, and combined cycle systems serving a generator with a nameplate capacity greater than 25 megawatts and selling any amount of electricity, (2) fossil fuel-fired stationary boilers, combustion turbines, and combined cycle systems having a maximum design heat input greater than 250 million British thermal units per hour, and (3) reciprocating stationary internal combustion engines rated at equal or greater than 2400 brake horsepower (3000 brake horsepower for diesel engines and 4400 brake horsepower for dual fuel engines). As part of the NOx SIP call, the EPA rules established a NOx budget for sources in Kentucky and other states.

Open Burning Bans

401 KAR 63:005 "Open Burning" was first incorporated into the Kentucky SIP on July 12, 1982. A revision to the open burning regulation was finalized on October 17, 2007 which addressed problems involving the disposal of debris from storms, mixed household garbage and clarified when open burning is permitted. Kentucky's open burning regulations prohibit most types of open burning in moderate ozone nonattainment areas within Kentucky during the period of May-September when ozone development is most likely. This requirement continues in the Northern Kentucky area.

CHAPTER SIX
Contingency Measures

This chapter provides detailed information demonstrating that Kentucky meets the requirements of CAA Section 107(d)(3)(E)(v).

Requirement 1 of 3
A commitment to submit a revised plan eight years after redesignation.

Demonstration: Section 175A(b) of the CAA requires that eight years after formal redesignation, the state continues to provide for maintenance of the standard by submitting another maintenance plan that covers an additional 10 years. Kentucky commits to submit to EPA a plan for future maintenance of the standard in Boone, Campbell and Kenton Counties as required.

Requirement 2 of 3
A commitment to expeditiously enact and implement additional contingency control measures in response to exceeding specified predetermined levels (triggers) or in the event that future violations of the ambient standard occur.

Demonstration: Future reviews of actual emissions for this redesignated area will be performed using the latest emission factors, models, and methodologies. For these periodic inventories, Kentucky will review the assumptions made for the purpose of the maintenance demonstration concerning projected growth of activity levels. If any of these assumptions appear to have changed substantially, Kentucky will re-project emissions.

If an annual fourth high monitored value of 0.079 ppm occurs in a single ozone season or if periodic emission inventory updates reveal excessive or unanticipated growth greater than 10% in ozone precursor emissions within the maintenance area, an initial "indicator" response will take effect. A study will be conducted to determine whether the ozone value indicates a trend toward higher ozone values or whether emissions appear to be increasing. The study will evaluate whether the trend, if any, is likely to continue and, if so, the control measures necessary to reverse the trend. Implementation of necessary controls in response to an initial "indicator" response will take place as expeditiously as possible, but in no event later than 12 months from the conclusion of the most recent ozone season.

If a two-year average fourth high monitored value of 0.076 ppm or a violation of the standard occurs within the maintenance area an action level response will take effect. If it is found that the triggering event is not due to an exceptional event, malfunction, or noncompliance with a permit condition or rule requirement, Kentucky in conjunction with the metropolitan planning organization or regional council of governments, will determine additional control measures needed to assure future attainment of the NAAQS for ozone. Measures that can be implemented in a short time will be selected in order to be in place within 18 months from the close of the ozone season that prompted the action level.

Requirement 3 of 3
A list of potential contingency measures that would be implemented in such an event.

Demonstration: In the event of a monitored violation of the 8-hour ozone NAAQS standard in the Cincinnati, OH-KY-IN maintenance area, Kentucky commits to adopt, within nine months, one or more of the following contingency measures to re-attain the standard. All regulatory programs will be implemented within 18 months after the triggering monitored violation.

- Implementation of a program to require additional emission reductions on stationary sources;
- Implementation of fuel programs, including incentives for alternative fuels;
- Restriction of certain roads or lanes to, or construction of such roads or lanes for use by, passenger buses or high-occupancy vehicles;
- Trip-reduction ordinances;
- Employer-based transportation management plans, including incentives;
- Programs to limit or restrict vehicle use in downtown areas, or other areas of emission concentration, particularly during periods of peak use;
- Programs for new construction and major reconstructions of paths or tracks for use by pedestrians or by non-motorized vehicles when economically feasible and in the public interest.

The selection of contingency measures will be based on three main factors: cost effectiveness, emission reduction potential, and economic and social considerations. The Division will complete any necessary analyses and submit to the EPA. Contingency measures will be adopted and implemented as quickly as possible, however no later than eighteen months after the triggering event. In the event that an area returns to attainment prior to the implementation of the contingency measure(s), those measures may not be implemented.

Kentucky also reserves the right to implement other contingency measures if new control programs should be developed and deemed more advantageous for the area. Prior to the implementation of any contingency measure(s) not listed, the Commonwealth of Kentucky will solicit input from all interested and affected parties in the area. No contingency measure will be implemented without notification to and approval granted by EPA.

CHAPTER SEVEN
Public Participation

A public hearing was scheduled, in accordance with 40 CFR 51.102, to be held at the GAPS Training Facility, 801 Teton Trail, Frankfort, KY on June 21, 2016. No request for a public hearing was received; therefore, the scheduled public hearing was cancelled.

The SIP revision package was made available on the Division's website during the 30 day comment period from May 16, 2016, until June 21, 2016. The Division received written comments from EPA during the public comment period and no other comments were received. The Division's response to those comments is provided in Appendix F along with a copy of the public hearing notice.

CHAPTER EIGHT
Conclusion

The most recent three years of ozone monitoring data (2013-2015) for the Cincinnati, OH-KY-IN MSA nonattainment area demonstrate compliance with the 2008 8-hour ozone NAAQS. There have been many major programs enacted that have led to significant emissions reductions since the area was first designated as nonattainment. Since that time, the air quality has improved significantly and has attained the ozone NAAQS. Additionally, the maintenance plan demonstrates that the projected emissions inventories for all future projected years, including the final year of the maintenance plan (2030) are all less than the base year emissions inventory. Therefore, maintenance of the 2008 8-hour ozone NAAQS has also been demonstrated.

Kentucky hereby requests that the Cincinnati, OH-KY-IN MSA 2008 8-hour Ozone nonattainment area be redesignated to attainment simultaneously with EPA approval of the maintenance plan provisions contained herein.

RIN 2060–AP37

Air Quality Designations for the 2008 Ozone National Ambient Air Quality Standards

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This rule establishes initial air quality designations for most areas in the United States, including areas of Indian country, for the 2008 primary and secondary national ambient air quality standards (NAAQS) for ozone. The designations for several counties in Illinois, Indiana, and Wisconsin that the EPA is considering for inclusion in the Chicago nonattainment area will be designated in a subsequent action, no later than May 31, 2012. Areas designated as nonattainment are also being classified by operation of law according to the severity of their air quality problems. The classification categories are Marginal, Moderate, Serious, Severe, and Extreme. The EPA is establishing the air quality thresholds that define the classifications in a separate rule that the EPA is signing and publishing in the **Federal Register** on the same schedule as these designations. In accordance with that separate rule, six nonattainment areas in California are being reclassified to a higher classification.

DATES: The effective date of this rule is July 20, 2012.

ADDRESSES: The EPA has established a docket for this action under Docket ID NO. EPA–HQ–OAR–2008–0476. All documents in the docket are listed in the index at *http://www.regulations.gov*. Although listed in the index, some information is not publicly available, i.e., Confidential Business Information or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the Internet and will be publicly available only in hard copy form. Publicly available docket materials are available either electronically in the docket or in hard copy at the Docket, EPA/DC, EPA West, Room 3334, 1301 Constitution Ave. NW., Washington, DC. The Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room is (202) 566–1744, and the telephone number for the Office of Air and Radiation Docket and Information Center is (202) 566–1742.

In addition, the EPA has established a Web site for this rulemaking at: *http://www.epa.gov/ozonedesignations*. The Web site includes the EPA's final state and tribal designations, as well as state initial recommendation letters, the EPA modification letters, technical support documents, responses to comments and other related technical information.

TAR Tribal Authority Rule
U.S. United States
U.S.C. United States Code
VCS Voluntary Consensus Standards
VOC Volatile Organic Compounds

II. What is the purpose of this action?

The purpose of this action is to announce and promulgate initial area designations for most areas of the country with respect to the 2008 primary and secondary NAAQS for ozone, in accordance with the requirements of Clean Air Act (CAA) section 107(d). The EPA is designating areas as either nonattainment, unclassifiable, or unclassifiable/attainment. In addition, the nonattainment areas are classified by operation of law according to the severity of their ozone air quality problems and six areas in California are being reclassified immediately to a higher classification. The classification categories are Marginal, Moderate, Serious, Severe, and Extreme. The EPA is establishing the air quality thresholds that define the classifications in a separate rule titled, "Implementation of the 2008 National Ambient Air Quality Standards for Ozone: Nonattainment Area Classifications Approach, Attainment Deadlines and Revocation of the 1997 Ozone Standards for Transportation Conformity Purposes" (Classifications Rule). In that separate rule, the EPA also codified the immediate reclassification of six areas in California. (*See* 40 CFR 51.1103(d).) The list of all areas being designated in each state and in areas of Indian county appear in the tables at the end of this final rule (amendments to 40 CFR 81.301–356). For areas designated as nonattainment, the tables include the area's classification by operation of law or the area's reclassification in accordance with 40 CFR 51.1103(d).

In this action, the EPA is designating 45 areas as nonattainment. Seven of the areas are multi-state areas. The EPA is designating one area, Uinta Basin, WY, as unclassifiable because there is existing non-regulatory monitoring in the area that detected levels of ozone that exceed the NAAQS. Regulatory monitoring has been conducted in that area since April 2011, and thus there are not yet three consecutive years of certified ozone monitoring data available that can be used to determine the area's attainment status. Consistent with previous initial area designations for ozone, the EPA is designating all the remaining state areas and Indian country as unclassifiable/attainment.

Consistent with the EPA's "Policy for Establishing Separate Air Quality Designations for Areas of Indian Country" (December 20, 2011), the EPA is designating four areas of Indian country separately from their adjacent/surrounding state areas.[1] The lands of the Pechanga Tribe and the Morongo Tribe in Southern California are being designated as separate nonattainment areas, while two additional areas in Indian country are being designated as separate unclassifiable/attainment areas.

The EPA is basing the designations on the most recent certified ozone air quality monitoring data and an evaluation of factors to assess contributions to nonattainment in nearby areas. State areas designated as nonattainment are subject to planning and emission reduction requirements as specified in the CAA. Requirements vary according to an area's classification. The EPA will be proposing shortly an implementation rule to assist states in the development of state implementation plans for attaining the ozone standards.

III. What is ozone and how is it formed?

Ground-level ozone, O_3, is a gas that is formed by the reaction of volatile organic compounds (VOCs) and oxides of nitrogen (NO_X) in the atmosphere in the presence of sunlight. These precursor emissions are emitted by many types of pollution sources, including power plants and industrial emissions sources, on-road and off-road motor vehicles and engines, and smaller sources, collectively referred to as area sources. Ozone is predominately a summertime air pollutant. However, high ozone concentrations have also been observed in cold months, where a few high elevation areas in the Western U.S. have experienced high levels of local VOC and NO_X emissions that have formed ozone when snow is on the ground and temperatures are near or below freezing. Ozone and ozone precursors can be transported to an area from sources in nearby areas or from sources located hundreds of miles away. For purposes of determining ozone nonattainment area boundaries, the CAA requires the EPA to include areas that contribute to nearby violations of the NAAQS.

IV. What are the 2008 ozone NAAQS and the health and welfare concerns they address?

On March 12, 2008, the EPA revised both the primary and secondary NAAQS for ozone to a level of 0.075 parts per million (ppm) (annual fourth-highest daily maximum 8-hour average concentration, averaged over 3 years) to provide increased protection of public health and the environment.[2] The 2008 ozone NAAQS retains the same general form and averaging time as the 0.08 ppm NAAQS set in 1997, but is set at a more protective level.

Ozone exposure also has been associated with increased susceptibility to respiratory infections, medication use by asthmatics, doctor visits, and emergency department visits and

[1] For more information, visit *http://www.epa.gov/ttncaaa1/t1/memoranda/20120117indiancountry.pdf.*

[2] *See* 73 FR 16436; March 27, 2008. For a detailed explanation of the calculation of the 3-year 8-hour average, *see* 40 CFR part 50, Appendix I.

hospital admissions for individuals with respiratory disease. Ozone exposure may also contribute to premature death, especially in people with heart and lung disease. The secondary ozone standard was revised to protect against adverse welfare effects including impacts to sensitive vegetation and forested ecosystems.

V. What are the CAA requirements for air quality designations?

When the EPA promulgates a new or revised NAAQS, the EPA is required to designate areas as nonattainment, attainment, or unclassifiable, pursuant to section 107(d)(1) of the CAA. The CAA requires the EPA to complete the initial area designation process within 2 years of promulgating the NAAQS. However, if the Administrator has insufficient information to make these designations within that time frame, the EPA has the authority to extend the deadline for designation decisions by up to 1 additional year.

By not later than 1 year after the promulgation of a new or revised NAAQS, each state governor is required to recommend air quality designations, including the appropriate boundaries for areas, to the EPA. The EPA reviews those state recommendations and is authorized to make any modifications the Administrator deems necessary. The statute does not define the term "necessary," but the EPA interprets this to authorize the Administrator to modify designations that did not meet the statutory requirements or were otherwise inconsistent with the facts or analysis deemed appropriate by the EPA. If the EPA is considering modifications to a state's initial recommendation, the EPA is required to notify the state of any such intended modifications to its recommendation not less than 120 days prior to the EPA's promulgation of the final designation. These notifications are commonly known as the "120-day letters." If the state does not agree with the EPA's intended modification, it then has an opportunity to respond to the EPA to demonstrate why it believes the modification proposed by the EPA is inappropriate. Even if a state fails to provide any recommendation for an area, in whole or in part, the EPA still must promulgate a designation that the Administrator deems appropriate.

Section 107(d)(1)(A)(i) of the CAA defines a nonattainment area as, "any area that does not meet (or that contributes to ambient air quality in a nearby area that does not meet) the national primary or secondary ambient air quality standard for the pollutant." If an area meets either prong of this definition, then the EPA is obligated to designate the area as "nonattainment." Section 107(d)(1)(A)(iii) provides that any area that the EPA cannot designate on the basis of available information as meeting or not meeting the standards should be designated as "unclassifiable." Historically for ozone, the EPA designates the remaining areas as "unclassifiable/attainment" indicating that the areas either have attaining air quality monitoring data or that air quality information is not available because the areas are not monitored, and the EPA has not determined that the areas contribute to a violation in a nearby area.

The EPA believes that section 107(d) provides the agency with discretion to determine how best to interpret the terms "contributes to" and "nearby" in the definition of a nonattainment area for a new or revised NAAQS, given considerations such as the nature of a specific pollutant, the types of sources that may contribute to violations, the form of the standards for the pollutant, and other relevant information. In particular, the EPA believes that the statute does not require the agency to establish bright line tests or thresholds for what constitutes "contribution" or "nearby" for purposes of designations.[3] Similarly, the EPA believes that the statute permits the EPA to evaluate the appropriate application of the term "area" as may be appropriate for a particular NAAQS.

Section 301(d) of the CAA authorizes the EPA to approve eligible Indian tribes to implement provisions of the CAA on Indian reservations and other areas within the tribes' jurisdiction. The Tribal Authority Rule (TAR) (40 CFR Part 49), which implements section 301(d) of the CAA, sets forth the criteria and process for tribes to apply to the EPA for eligibility to administer CAA programs. The designations process contained in section 107(d) of the CAA is included among those provisions determined to be appropriate by the EPA for treatment of tribes in the same manner as states. Under the TAR, tribes generally are not subject to the same submission schedules imposed by the CAA on states. As authorized by the TAR, tribes may seek eligibility to submit designation recommendations to the EPA.

VI. What is the chronology for this designations rule and what guidance did the EPA provide?

Within one year after a new or revised air quality standard is established, the CAA requires the governor of each state to submit to the EPA a list of all areas in the state, with recommendations for whether each area meets the standard. On December 4, 2008, the EPA issued guidance for states and tribal agencies to use for this purpose. (*See* memorandum from Robert J. Meyers, Principal Deputy Assistant Administrator, to Regional Administrators, Regions I–X, titled, "Area Designations for the 2008 Revised Ozone National Ambient Air Quality Standards.) The guidance provided the anticipated timeline for designations and identified important factors that the EPA recommended states and tribes consider in making their recommendations. These factors include air quality data, emissions data, traffic and commuting patterns, growth rates and patterns, meteorology, geography/topography, and jurisdictional boundaries. In the guidance, the EPA asked that states and tribes submit their designation recommendations, including appropriate area boundaries, to the EPA by March 12, 2009. Later in the process, the EPA issued 2 new guidance memoranda related to designating areas of Indian county. (*See* December 20, 2011, memorandum from Stephen D. Page, Director, Office of Air Quality Planning and Standards, to Regional Air Directors, Regions I–X, titled, "Policy for Establishing Separate Air Quality Designations for Areas of Indian Country," and December 20, 2011, memorandum from Stephen D. Page, Director, Office of Air Quality Planning and Standards, to Regional Air Directors, Regions I–X, titled, "Guidance to Regions for Working with Tribes during the National Ambient Air Quality Standards (NAAQS) Designations Process.")

Under the initial schedule, the EPA intended to complete the initial designations for the 2008 ozone NAAQS on a 2-year schedule, by March 12, 2010. On September 16, 2009, the EPA announced that it would initiate a rulemaking to reconsider the 2008 ozone NAAQS for various reasons, including the fact that the 0.075 ppm level fell outside of the range recommended by the Clean Air Scientific Advisory Committee, the independent group that provides advice to the EPA Administrator on the technical bases for the EPA's NAAQS. The EPA signed the proposed reconsideration on January 6, 2010. (*See* 75 FR 2938; January 19, 2010.) Because of the significant uncertainty the ozone NAAQS reconsideration created regarding the continued applicability of the 2008 NAAQS, the EPA determined there was insufficient information to

[3] This view was confirmed in *Catawba County* v. *EPA*, 571 F.3d 20 (D.C. Cir. 2009).

designate areas within 2 years of promulgation of the NAAQS. Therefore, the EPA used its authority under CAA section 107(d)(1)(B) to extend the deadline for designating areas by 1 year, until March 12, 2011. (*See* 75 FR 2936; January 19, 2010.) The EPA has not taken final action on the proposed reconsideration; thus, the current NAAQS for ozone remains at 0.075 ppm, as established in 2008.

After the March 12, 2011, designation deadline passed, WildEarth Guardians and Elizabeth Crowe (WildEarth Guardians) filed a lawsuit seeking to compel the EPA to take action to designate areas for the 2008 ozone NAAQS. *WildEarth Guardians and Elizabeth Crowe* v. *Jackson* (D. Ariz. 11–CV–01661). The EPA and WildEarth Guardians settled the case by entering into a consent decree that requires the EPA Administrator to sign a final rule designating areas for the 2008 ozone NAAQS by May 31, 2012.

On September 22, 2011, the EPA issued a memorandum to clarify for state and local agencies the status of the 2008 ozone NAAQS and to outline plans for moving forward to implement them. The EPA indicated that it would proceed with initial area designations for the 2008 NAAQS, and planned to use the recommendations states made in 2009 as updated by the most current, certified air quality data from 2008–2010. While the EPA did not request that states submit updated designation recommendations, the EPA provided the opportunity for states to do so. Several states chose to update their recommendations, and some requested that the EPA base designations for their areas on certified air quality data from 2009–2011, and committed to certify the 2011 data earlier than the May 1 deadline for annual air monitoring certification under 40 CFR part 58.15(a)(2) so that the EPA would have sufficient time to consider the data in making decisions on designations and nonattainment area boundaries.

On or about December 9, 2011, the EPA sent letters to Governors and Tribal leaders notifying them of the EPA's preliminary response to their designation recommendations and to inform them of the EPA's approach for completing the designations for the 2008 ozone NAAQS. The EPA requested that states submit any additional information that they wanted the EPA to consider by February 29, 2011, including any certified 2011 air quality monitoring data. On January 31, 2011, the EPA sent revised 120-day letter responses to Illinois, Indiana, and Wisconsin based on updated ozone air quality data for 2009–2011, submitted by the state of Illinois two days before the EPA sent the December 9, 2011, letters. Given the timing of Illinois' submission of certified data, EPA was not able to consider the information in the December 9, 2011, letters. After reviewing the new information, which indicated a violation of the ozone NAAQS at a monitor in the Chicago area, the EPA sent letters on January 31, 2012 notifying Illinois, Indiana, and Wisconsin that it intended to designate certain counties, identified in those letters, as nonattainment for the 2008 ozone NAAQS. The EPA cannot finalize a designation for those areas until 120 days following the letters. Therefore, the EPA will be designating the Illinois, Indiana, and Wisconsin counties identified in the January 31, 2011, letters in a separate rule that will be signed no later than May 31, 2012.

Although not required by section 107(d) of the CAA, the EPA also provided an opportunity for members of the public to comment on the EPA's 120-day response letters to states and tribes. The EPA announced a 30-day public comment period in the **Federal Register** on December 20, 2011 (76 FR 78872). The comment period was subsequently extended until February 3, 2012 (77 FR 2677; January 19, 2012). On February 14, 2012 (77 FR 8211), the EPA reopened the public comment period for the limited purpose of inviting comment on the EPA's revised responses to Illinois, Indiana, and Wisconsin. State and tribal recommendations and the EPA's preliminary responses were posted on EPA's Web site at *http://www.epa.gov/ozonedesignations* and are available in the docket for the designations action. Comments from the states, tribes and the public, and EPA's responses to significant comments, are also in the docket.

VII. What air quality data has the EPA used to designate areas for the 2008 ozone NAAQS?

The final ozone designations are based primarily on certified air quality monitoring data from calendar years 2008–2010, which was the most recent certified data available to the EPA at the time the EPA notified the states of its intended modifications to their recommendations. Under 40 CFR 58.16, states are required to report all monitored ozone air quality data and associated quality assurance data within 90 days after the end of each quarterly reporting period, and under 40 CFR part 58.15(a)(2) states are required to submit annual summary reports and a data certification letter to the EPA by May 1 for ozone air quality data collected in the previous calendar year. States generally had not completed these requirements for calendar year 2011 ozone air quality data when the EPA notified states of our intended designations on December 9, 2011. In certain cases, states included as part of their designation recommendations a request that the EPA consider monitoring data from 2009–2011 in making final designation decisions. In these requests, they indicated to the EPA what they expected their certified ozone air quality data would show regarding whether an area was attaining the standard, and for designations purposes they committed to certifying their 2011 data no later than February 29, 2012, so that the EPA would have sufficient time to consider it. Thus, for those areas, the EPA considered the state's preliminary representation of 2011 data in sending the 120-day notification letter. We have verified these representations in making our final designations decisions.

VIII. What are the ozone air quality classifications?

In accordance with CAA section 181(a)(1), each area designated as nonattainment for the 2008 ozone NAAQS is classified by operation of law at the same time as the area is designated by the EPA. Under Subpart 2 of part D of title I of the CAA, state planning and emissions control requirements for ozone are determined, in part, by a nonattainment area's classification. The ozone nonattainment areas are classified based on the severity of their ozone levels (as determined based on the area's "design value," which represents air quality in the area for the most recent 3 years).[4] The possible classifications are Marginal, Moderate, Serious, Severe, and Extreme. Nonattainment areas with a "lower" classification have ozone levels that are closer to the standard than areas with a "higher" classification. Areas in the lower classification levels have fewer and/or less stringent mandatory air quality planning and control requirements than those in higher classifications. The final Classifications Rule, which is being signed at the same time as the designations rule and being published and effective at the same time or before the designations, establishes the classification thresholds for each classification category for purposes of the 2008 NAAQS and explains the EPA's methodology for calculating the thresholds. In addition, in the

[4] The air quality design value for the 8-hour ozone NAAQS is the 3-year average of the annual 4th highest daily maximum 8-hour average ozone concentration. *See* 40 CFR part 50, Appendix I.

Classifications Rule, the EPA promulgated a regulation, 40 CFR 51.1103(d), that immediately reclassifies 6 areas in California to higher classifications. The classification for each nonattainment area designated for the 2008 ozone NAAQS is shown in the 40 CFR part 81 tables at the end of this designations rule.

IX. What is the reclassification of six California nonattainment areas?

The final Classifications Rule addresses the reclassification for the 2008 ozone NAAQS of selected areas in California that had voluntarily reclassified under the 1997 ozone NAAQS. In accordance with the final Classifications Rule, the following areas are being voluntarily reclassified to a higher classification for purposes of the 2008 NAAQS pursuant to that rule: Serious—Ventura County, CA; Severe—Los Angeles-San Bernardino Counties (West Mojave Desert), Riverside County (Coachella Valley), and Sacramento Metro, CA; Extreme—Los Angeles-South Coast Air Basin, and San Joaquin Valley, CA. These classifications are reflected in the tables at the end of this final rule (amendments to 40 CFR 81.301–356).

X. Can states request that areas within 5 percent of the upper or lower limit of a classification threshold be reclassified?

Under CAA section 181(a)(4), an ozone nonattainment area may be reclassified to a higher or lower classification (also known as a classification bump up or a bump down) "if an area classified under paragraph (1) (Table 1) would have been classified in another category if the design value in the area were 5 percent greater or 5 percent less than the level on which such classification was based." The section also states that "In making such adjustment, the Administrator may consider the number of exceedances of the national primary ambient air quality standard for ozone in the area, the level of pollution transport between the area and other affected areas, including both intrastate and interstate transport, and the mix of sources and air pollutants in the area."

As noted in the preamble to the rule designating and classifying areas following enactment of the CAA Amendments of 1990, the section 181(a)(4) provisions grant the Administrator broad discretion in making or determining not to make, a reclassification. (*See* 56 FR 56698; November 6, 1991.) As part of the 1991 action, the EPA developed criteria to evaluate whether it is appropriate to reclassify a particular area. (*See* list below and at 56 FR 56698.) Because section 181(b)(3) provides that the EPA must grant any state request to reclassify an area into a higher classification, the EPA focused these criteria primarily on how the EPA would assess requests for a lower classification. In 1991, EPA approved reclassifications when the area met the first requirement (a request by the state to EPA) and at least some of the other criteria, and did not violate any of the criteria (emissions reductions, trends, etc.). The EPA used the same method and criteria once again to evaluate reclassification requests under section 181(a)(4) for purposes of the 1997 ozone NAAQS. The EPA intends to continue to use this same approach for purposes of evaluating any request for a reclassification for the 2008 ozone NAAQS. For reclassifications downwards, states may only request a reclassification to the next lower classification, and air quality data from prior years cannot be used as justification to be reclassified to an even lower classification.

The criteria EPA intends to use to evaluate whether it is appropriate to reclassify a particular area include:

Request by state: The EPA does not intend to exercise its authority to reclassify areas on the EPA's own initiative. Rather, the EPA intends to rely on the state to submit a request for a reclassification. A tribe may also submit such a request and, in the case of a multi-state nonattainment area, all affected states must submit the same reclassification request.

Discontinuity: A five percent reclassification must not result in an illogical or excessive discontinuity relative to surrounding areas. In particular, in light of the area-wide nature of ozone formation, a reclassification should not create a "donut hole" where an area of one classification is surrounded by areas of higher classification.

Attainment: Evidence should be available that the proposed area would be able to attain by the earlier date specified by the lower classification in the case of a reclassification downward.

Emissions reductions: Evidence should be available that the area would be very likely to achieve the appropriate total percent emission reduction necessary in order to attain in the shorter time period for a reclassification downward.

Trends: Near- and long-term trends in emissions and air quality should support a reclassification. Historical air quality data should indicate substantial air quality improvement for a reclassification downward. Growth projections and emission trends should support a reclassification downward. In addition, we will consider whether vehicle miles traveled and other indicators of emissions are increasing at higher than normal rates.

Years of data: The same years of ozone air quality data used for the initial designation and classification should be used for reclassification requests.

A. Five Percent Reclassifications to a Lower Classification

For an area to be eligible to be reclassified to a lower classification under section 181(a)(4), the area's design value must be within five percent of the upper limit for the next lower classification. For example, an area with a Moderate design value of 0.090 ppm (or less) would be eligible to request a reclassification to Marginal because 0.090 ppm is five percent more than the upper limit of 0.086 ppm for the Marginal classification. Accordingly, areas with the following design values may be eligible to request a reclassification to the next lower classification: Moderate areas with a design value of 0.090 ppm or less; Serious areas with a design value of 0.105 ppm or less; and Severe areas with a design value of 0.118 ppm or less.

B. Five Percent Reclassifications to a Higher Classification

An ozone nonattainment area may also be reclassified under section 181(a)(4) to the next higher classification. As with five percent reclassifications to a lower classification, the EPA does not intend to exercise its authority to reclassify areas to a higher classification on the EPA's own initiative. Rather, the EPA intends to rely on the state to submit a request for such a reclassification. Areas with the following design values are eligible to request a reclassification to the next higher classification: Marginal areas with a design value of 0.082 ppm or more; Moderate areas with a design value of 0.095 ppm or more; and Serious areas with a design value of 0.108 ppm or more.

C. Timing of the Five Percent Reclassifications

A Governor or eligible Tribal governing body of any area that wishes to pursue a reclassification should submit all requests and supporting documentation to the EPA Regional Office by June 20, 2012. This relatively short time frame is necessary because section 181(a)(4) only authorizes the Administrator to make such

reclassifications within 90 days after the initial classification.

XI. How do designations affect Indian country?

All state areas listed in the tables at the end of this document are designated as indicated, and include Indian country geographically located within such areas, except as otherwise noted. In general, state recommendations for initial area designations do not apply to Indian country. Consistent with the "Policy for Establishing Separate Air Quality Designations for Areas of Indian Country" (December 20, 2011), in instances where the EPA did not receive an initial designation recommendation from a tribe, the EPA is designating their area of Indian country along with the adjacent/surrounding state area(s). Tribes whose areas of Indian country are designated as nonattainment for the 2008 ozone NAAQS are being affected by poor air quality. Where nonattainment areas include both Indian country and state land, it is important for states and tribes to work together to coordinate planning efforts. Coordinated planning will help ensure that the planning decisions made by the states and tribes complement each other and that the nonattainment area makes reasonable progress toward attainment and ultimately attains the 2008 ozone NAAQS.

XII. Where can I find information forming the basis for this rule and exchanges between the EPA, states, and tribes related to this rule?

Information providing the basis for this action are provided in the docket for this rulemaking. The applicable EPA guidance memoranda and copies of correspondence regarding this process between the EPA and the states, tribes, and other parties are available for review at the EPA Docket Center listed above in the addresses section of this document, and on the EPA's ozone designation Web site at *http://www.epa.gov/ozonedesignations.* State-specific information is available from the EPA Regional Offices.

XIII. Statutory and Executive Order Reviews

Upon promulgation of a new or revised NAAQS, the CAA requires the EPA to designate areas as attaining or not attaining the NAAQS. The CAA then specifies requirements for areas based on whether such areas are attaining or not attaining the NAAQS. In this final rule, the EPA assigns designations to areas as required.

A. Executive Order 12866: Regulatory Planning and Review and Executive Order 13563: Improving Regulation and Regulatory Review

This action responds to the CAA requirement to promulgate air quality designations after promulgation of a new or revised NAAQS. This type of action is exempt from review under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 13563 (76 FR 3821, January 21, 2011).

B. Paperwork Reduction Act

This action does not impose an information collection burden under the provisions of the *Paperwork Reduction Act,* 44 U.S.C. 3501 *et seq.* Burden is defined at 5 CFR 1320.3(b). This rule responds to the CAA requirement to promulgate air quality designations after promulgation of a new or revised NAAQS. This requirement is prescribed in the CAA section 107. The present final rule does not establish any new information collection requirements.

C. Regulatory Flexibility Act

This final rule is not subject to the Regulatory Flexibility Act (RFA), which generally requires an agency to prepare a regulatory flexibility analysis for any rule that will have a significant economic impact on a substantial number of small entities. The RFA applies only to rules subject to notice-and-comment rulemaking requirements under the Administrative Procedure Act (APA) or any other statute. This rule is not subject to notice-and-comment requirements as provided under CAA section 107(d)(2)(B).

D. Unfunded Mandates Reform Act

This action contains no federal mandate under the provisions of Title II of the Unfunded Mandates Reform Act of 1995 (UMRA), 2 U.S.C. 1531–1538 for state, local, or tribal governments or the private sector. The action imposes no enforceable duty on any state, local or tribal governments or the private sector. Therefore, this action is not subject to the requirements of sections 202 and 205 of the UMRA.

This action is also not subject to the requirements of section 203 of UMRA because it contains no regulatory requirements that might significantly or uniquely affect small governments. It does not create any additional requirements beyond those of the CAA and ozone NAAQS (40 CFR 50.15). The CAA establishes the process whereby states take primary responsibility in developing plans to meet the ozone NAAQS.

E. Executive Order 13132: Federalism

This final rule does not have federalism implications. It will not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132. The CAA establishes the process whereby states take primary responsibility in developing plans to meet the ozone NAAQS. This rule will not modify the relationship of the states and the EPA for purposes of developing programs to implement the ozone NAAQS. Thus, Executive Order 13132 does not apply to this rule.

F. Executive Order 13175: Consultation and Coordination With Indian Tribal Governments

Subject to the Executive Order 13175 (65 FR 67249, November 9, 2000) the EPA may not issue a regulation that has tribal implications, that imposes substantial direct compliance costs, and that is not required by statute, unless the Federal government provides the funds necessary to pay the direct compliance costs incurred by tribal governments, or the EPA consults with tribal officials early in the process of developing the proposed regulation and develops a tribal summary impact statement.

The EPA has concluded that this action may have tribal implications. However, it will neither impose substantial direct compliance costs on tribal governments, nor preempt tribal law. Tribes whose areas of Indian country are being designated as "nonattainment" for the 2008 ozone NAAQS are affected by poor air quality. Although tribes are not required to submit implementation plans under the Clean Air Act, for those tribes whose areas are being designated as part of surrounding state areas, it will be imperative that states and the tribes coordinate on air quality planning efforts to ensure that ozone levels are reduced. In addition, several tribes' areas of Indian country are being designated as "nonattainment" separately from their surrounding state areas. For these tribes, internal capacity for air quality planning will be important to enable their areas of Indian country to come into attainment.

The EPA consulted with tribal officials early in the process of developing this regulation to permit them to have meaningful and timely input into its development. At the beginning of the designations process,

letters were sent to all tribes who were expected to be impacted by designations for the 2008 ozone NAAQS. These letters not only informed the tribes of the overall designations process, but also offered the tribes consultation to ensure early communication and coordination. Additionally, letters were sent to potentially affected tribes indicating the EPA's intended designations for their areas of Indian country. These letters offered an additional opportunity for consultation. All consultations were completed in late February/early April 2012. During consultation, the primary concerns raised by tribes included the following: Impact of nonattainment designation on future economic development; appropriateness of using data from monitors not on tribal land; and ensuring final decisions are consistent with the EPA's "Policy for Establishing Separate Air Quality Designations for Areas of Indian Country." (December 20, 2011). During the consultations, the EPA's Regional Offices ensured that the tribes fully understood the reasoning for the EPA's preliminary designations decisions and how those decisions are aligned with a consideration of the most recent certified air quality data and all other relevant information, including the EPA's "Policy for Establishing Separate Air Quality Designations for Areas of Indian Country." To the extent possible, the EPA included the tribes' input into the final decision-making process for designations of their areas of Indian country for the 2008 ozone NAAQS.

G. Executive Order 13045: Protection of Children From Environmental Health and Safety Risks

The EPA interprets Executive Order 13045 (62 FR 19885, April 23, 1997) as applying only to those regulatory actions that concern health or safety risks, such that the analysis required under section 5–501 of the Executive Order has the potential to influence the regulation. This action is not subject to Executive Order 13045 because it does not establish an environmental standard intended to mitigate health or safety risks.

H. Executive Order 13211: Actions That Significantly Affect Energy Supply, Distribution, or Use

This action is not subject to Executive Order 13211 (66 FR 28355 (May 22, 2001)), because it is not a significant regulatory action under Executive Order 12866.

I. National Technology Transfer and Advancement Act (NTTAA)

Section 12(d) of the NTTAA of 1995, Public Law 104–113, section 12(d) (15 U.S.C. 272 note) directs the EPA to use voluntary consensus standards (VCS) in its regulatory activities unless to do so would be inconsistent with applicable law or otherwise impracticable. Voluntary consensus standards are technical standards (e.g., materials specifications, test methods, sampling procedures, and business practices) that are developed or adopted by VCS bodies. The NTTAA directs the EPA to provide Congress, through the Office of Management and Budget, explanations when the Agency decides not to use available and applicable VCS.

This action does not involve technical standards. Therefore, the EPA did not consider the use of any VCS.

J. Executive Order 12898: Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Populations.

Executive Order 12898 (59 FR 7629 (Feb. 16, 1994)) establishes federal executive policy on environmental justice. Its main provision directs federal agencies, to the greatest extent practicable and permitted by law, to make environmental justice part of their mission by identifying and addressing, as appropriate, disproportionately high and adverse human health or environmental effects of their programs, policies, and activities on minority populations and low-income populations in the U.S.

The CAA requires that the EPA designate as nonattainment "any area that does not meet (or that contributes to ambient air quality in a nearby area that does not meet) the national primary or secondary ambient air quality standard for the pollutant." By designating as nonattainment all areas where available information indicates a violation of the ozone NAAQS or a contribution to a nearby violation, this action protects all those residing, working, attending school, or otherwise present in those areas regardless of minority or economic status.

The EPA has determined that this final rule will not have disproportionately high and adverse human health or environmental effects on minority or low-income populations because it increases the level of environmental protection for all affected populations without having any disproportionately high and adverse human health or environmental effects on any population, including any minority or low-income population.

K. Congressional Review Act

The Congressional Review Act, 5 U.S.C. 801 *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the U.S. The EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the U.S. prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a "major rule" as defined by 5 U.S.C. 804(2). This rule will be effective July 20, 2012.

L. Judicial Review

Section 307(b)(1) of the CAA indicates which Federal Courts of Appeal have venue for petitions of review of final actions by the EPA. This section provides, in part, that petitions for review must be filed in the Court of Appeals for the District of Columbia Circuit: (i) When the agency action consists of "nationally applicable regulations promulgated, or final actions taken, by the Administrator," or (ii) when such action is locally or regionally applicable, if "such action is based on a determination of nationwide scope or effect and if in taking such action the Administrator finds and publishes that such action is based on such a determination."

This rule designating areas for the 2008 ozone NAAQS is "nationally applicable" within the meaning of section 307(b)(1). This rule establishes designations for areas across the U.S. for the 2008 ozone NAAQS. At the core of this rulemaking is the EPA's interpretation of the definition of nonattainment under section 107(d)(1) of the CAA, and its application of that interpretation to areas across the country.

For the same reasons, the Administrator also is determining that the final designations are of nationwide scope and effect for the purposes of section 307(b)(1). This is particularly appropriate because, in the report on the 1977 Amendments that revised section 307(b)(1) of the CAA, Congress noted that the Administrator's determination that an action is of "nationwide scope or effect" would be appropriate for any action that has a scope or effect beyond a single judicial circuit. H.R. Rep. No. 95–294 at 323, 324, *reprinted* in 1977

U.S.C.C.A.N. 1402–03. Here, the scope and effect of this rulemaking extends to numerous judicial circuits since the designations apply to areas across the country. In these circumstances, section 307(b)(1) and its legislative history calls for the Administrator to find the rule to be of "nationwide scope or effect" and for venue to be in the D.C. Circuit.

Thus, any petitions for review of final designations must be filed in the Court of Appeals for the District of Columbia Circuit within 60 days from the date final action is published in the **Federal Register**.

List of Subjects in 40 CFR Part 81

Environmental protection, Air pollution control, National parks, Wilderness areas.

Dated: April 30, 2012.

Lisa P. Jackson,

Administrator.

For the reasons set forth in the preamble, 40 CFR Part 81, is amended as follows:

PART 81—DESIGNATIONS OF AREAS FOR AIR QUALITY PLANNING PURPOSES

■ 1. The authority citation for part 81 continues to read as follows:

Authority: 42 U.S.C. 7401, *et seq.*

Subpart C–Section 107 Attainment Status Designations

■ 2. Section 81.301 is amended as follows:

■ a. By revising the table heading for "Alabama—Ozone (8-Hour Standard)" to read "Alabama—1997 8-Hour Ozone NAAQS (Primary and Secondary)"

■ b. By adding a new table entitled "Alabama—2008 8-Hour Ozone NAAQS (Primary and Secondary)" following the newly designated table " Alabama—1997 8-Hour Ozone NAAQS (Primary and Secondary)" to read as follows:

§ 81.301 Alabama.

Designated area	Designation		Classification	
	Date [1]	Type	Date [1]	Type
The area of the county north and east of the boundary defined by a line starting at the point defined by the intersection of the southwest corner Section 30 Range (R) 115 West Township (T) 27N and the northwest corner of Section 31 R 115 West T27N of Sublette County at Sublette County's border with Lincoln County. From this point the boundary moves to the west 500 feet to Aspen Creek. The boundary follows the centerline of Aspen Creek downstream to the confluence of Aspen Creek and Fontenelle Creek (in R116W T26N, Section 1). From this point the boundary moves generally to the south along the centerline of Fontenelle Creek to the confluence of Fontenelle Creek and Roney Creek (in R115W T24N Section 6). From the confluence, the boundary moves generally to the east along the centerline of Fontenelle Creek and into the Fontenelle Reservoir (in R112W T24N Section 6). The boundary moves east southeast along the centerline of the Fontenelle Reservoir and then toward the south along the centerline of the Green River to where the Green River in R111W T24N Section 31 crosses into Sweetwater County.				
Sublette County				
Sweetwater County (part)				
The area of the county west and north of the boundary which begins at the midpoint of the Green River, where the Green River enters Sweetwater County from Lincoln County in R111W T24N Section 31. From this point, the boundary follows the center of the channel of the Green River generally to the south and east to the confluence of the Green River and the Big Sandy River (in R109W T22N Section 28). From this point, the boundary moves generally north and east along the centerline of the Big Sandy River to the confluence of the Big Sandy River with Little Sandy Creek (in R106W T25N Section 33). The boundary continues generally toward the northeast along the centerline of Little Sandy Creek to the confluence of Little Sandy Creek and Pacific Creek (in R106W T25N Section 24). From this point, the boundary moves generally to the east and north along the centerline of Pacific Creek to the confluence of Pacific Creek and Whitehorse Creek (in R103W T26N Section 10). From this point the boundary follows the centerline of Whitehorse Creek generally to the northeast until it reaches the eastern boundary of Section 1 R103W T26N. From the point where Whitehorse Creek crosses the eastern section line of Section 1 R103W T26N, the boundary moves straight north along the section line to the southeast corner of Section 36 R103W T27N in Sublette County where the boundary ends.				
Rest of State and Rest of Indian Country	.....	Unclassifiable/Attainment.

Implementation of the 2008 National Ambient Air Quality Standards for Ozone: Nonattainment Area Classifications Approach, Attainment Deadlines and Revocation of the 1997 Ozone Standards for Transportation Conformity Purposes

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: In this final rule, the EPA is establishing the air quality thresholds that define the classifications assigned to all nonattainment areas for the 2008 ozone national ambient air quality standards (NAAQS) (the "2008 ozone NAAQS") which were promulgated on March 12, 2008. The EPA is also granting reclassification for selected nonattainment areas that voluntarily reclassified under the 1997 ozone NAAQS. This rule also establishes December 31 of each relevant calendar year as the attainment date for all nonattainment area classification categories. Finally, this rule provides for the revocation of the 1997 ozone NAAQS for transportation conformity purposes to occur 1 year after the effective date of designations for the 2008 ozone NAAQS.

DATES: This rule is effective on July 20, 2012.

ADDRESSES: The EPA has established a docket for this action under Docket ID No. EPA–HQ–OAR–2010–0885. All documents in the docket are listed on the *http://www.regulations.gov* Web site. Although listed in the index, some information is not publicly available, e.g., confidential business information (CBI) or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, will be publicly available only in hard copy form. Publicly available docket materials are available either electronically through *http://www.regulations.gov* or in hard copy at the Air and Radiation Docket and Information Center, EPA/DC, EPA West Building, Room 3334, 1301 Constitution Ave. NW., Washington, DC. The Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room is (202) 566–1744, and the telephone number for the Air Docket is (202) 566–1742.

FOR FURTHER INFORMATION CONTACT: For further general information on this rulemaking, contact Dr. Karl Pepple, Office of Air Quality Planning and Standards, U.S. Environmental Protection Agency (C539–01), Research Triangle Park, NC 27711, phone number (919) 541–2683, or by email at *pepple.karl@epa.gov;* or Mr. Butch Stackhouse, Office of Air Quality Planning and Standards, U.S. Environmental Protection Agency (C539–01), Research Triangle Park, NC 27711, phone number (919) 541–5208, or by email at *stackhouse.butch@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this action apply to me?

Entities potentially affected directly by this final rule include state, local, and tribal governments. Entities potentially affected indirectly by the final rule include owners and operators of sources of emissions [volatile organic compounds (VOCs) and nitrogen oxides (NO_X)] that contribute to ground-level ozone concentrations.

B. Where can I get a copy of this document and other related information?

In addition to being available in the docket, an electronic copy of this notice will be posted at *http://www.epa.gov/air/ozonepollution/actions.html#impl* under "recent actions."

C. How is this notice organized?

The information presented in this notice is organized as follows:

APPENDIX A-2
77 FR 34221
June 11, 2012

for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2).)

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Incorporation by reference, Intergovernmental relations, Nitrogen dioxide, Particulate matter, Reporting and recordkeeping requirements, Sulfur oxides.

Dated: May 29, 2012.

Susan Hedman,

Regional Administrator, Region 5.

40 CFR part 52 is amended as follows:

Air Quality Designations for the 2008 Ozone National Ambient Air Quality Standards for Several Counties in Illinois, Indiana, and Wisconsin; Corrections to Inadvertent Errors in Prior Designations

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This rule completes the initial air quality designations for the 2008 primary and secondary national ambient air quality standards (NAAQS) for ozone. On April 30, 2012, the EPA promulgated the initial ozone air quality designations for all areas in the United States except for 12 counties in Illinois, Indiana and Wisconsin, which the EPA was still evaluating. This action designates those counties. The EPA is designating all or parts of 11 counties as the Chicago-Naperville, IL-IN-WI nonattainment area. The EPA is designating the remaining county and parts of counties as unclassifiable/attainment. The Chicago-Naperville, IL-IN-WI nonattainment area is being classified by operation of law as a Marginal area according to the severity of its air quality problem. This rule also corrects inadvertent errors in the regulatory text regarding the designation of three areas in the ozone designation rule signed on April 30, 2012.

DATES: The effective date of this rule is July 20, 2012.

ADDRESSES: The EPA has established a docket for this action under Docket ID No. EPA–HQ–OAR–2008–0476. All documents in the docket are listed in the index at *http://www.regulations.gov.* Although listed in the index, some information is not publicly available, i.e., Confidential Business Information or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the Internet and will be publicly available only in hard copy form. Publicly available docket materials are available either electronically in the docket or in hard copy at the Docket, EPA/DC, EPA West,

Room 3334, 1301 Constitution Ave. NW., Washington, DC. The Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room is (202) 566–1744, and the telephone number for the Office of Air and Radiation Docket and Information Center is (202) 566–1742.

In addition, the EPA has established a Web site for this rulemaking at: *http://www.epa.gov/ozonedesignations.* The Web site includes the EPA's final state and tribal designations, as well as state initial recommendation letters, the EPA modification letters, technical support documents, responses to comments and other related technical information.

FOR FURTHER INFORMATION CONTACT: Carla Oldham, Office of Air Quality Planning and Standards, U.S. Environmental Protection Agency, Mail Code C539–04, Research Triangle Park, NC 27711, phone number (919) 541–3347 or by email at: *oldham.carla@epa.gov.*

Regional Office contact: Edward Doty, phone number (312) 886–6057 or by email at: *doty.edward@epa.gov.*

SUPPLEMENTARY INFORMATION: The public may inspect the rule and state-specific technical support information at the following location:

Regional office	Affected states
John Mooney, Chief, Air Programs Branch, EPA Region 5, 77 West Jackson Street, Chicago, IL 60604, (312) 886–6043.	Illinois, Indiana, and Wisconsin.

Table of Contents

VCS Voluntary Consensus Standards
VOC Volatile Organic Compounds

II. What is the purpose of this action?

The purpose of this action is to promulgate initial air quality designations for 12 counties in Illinois, Indiana and Wisconsin for the 2008 primary and secondary NAAQS for ozone, in accordance with the requirements of Clean Air Act (CAA) section 107(d). Whenever the EPA establishes a new or revised NAAQS, section 107(d) requires the EPA to designate all areas of the country as to whether the areas are meeting or not meeting the new or revised NAAQS. In an action signed on April 30, 2012, the EPA designated all other areas of the country for the 2008 ozone NAAQS (77 FR 30088; May 21, 2012). At that time, the EPA did not designate 12 counties in Illinois, Indiana and Wisconsin because the EPA was still evaluating them for inclusion in the Chicago-Naperville, IL-IN-WI nonattainment area. The EPA has now completed that evaluation. The EPA is designating eight of the counties and parts of three of the counties as the Chicago-Naperville, IL-IN-WI nonattainment area. The EPA is designating the remaining county and parts of counties as unclassifiable/attainment. The Chicago-Naperville, IL-IN-WI nonattainment area is also being classified by operation of law as a Marginal area according to the severity of its air quality problem. The designation for each of these 12 counties is provided in the tables at the end of this notice (amendments to 40 CFR 81.314, 315, and 350). For areas designated as nonattainment, the tables include the area's classification.

State areas designated as nonattainment are subject to planning and emission reduction requirements as specified in the CAA. Requirements vary according to an area's classification. The EPA will be proposing shortly an implementation rule to assist states in the development of state implementation plans for attaining the ozone standards.

This rule also corrects inadvertent errors in the regulatory text regarding the designation of three areas in the ozone designation rule signed on April 30, 2012. The affected areas are the Kentucky portion of the Cincinnati, OH-KY-IN nonattainment area, the partial Kenton County, KY unclassifiable/attainment area, and Crittenden County, AR.

III. What is ozone and how is it formed?

Ground-level ozone, O_3, is a gas that is formed by the reaction of volatile organic compounds (VOCs) and oxides of nitrogen (NO_X) in the atmosphere in the presence of sunlight. These precursor emissions are emitted by many types of pollution sources, including power plants and industrial emissions sources, on-road and off-road motor vehicles and engines, and smaller sources, collectively referred to as area sources. Ozone is predominately a summertime air pollutant. However, high ozone concentrations have also been observed in cold months, where a few high elevation areas in the Western U.S. have experienced high levels of local VOC and NO_X emissions that have formed ozone when snow is on the ground and temperatures are near or below freezing. Ozone and ozone precursors can be transported to an area from sources in nearby areas or from

sources located hundreds of miles away. For purposes of determining ozone nonattainment area boundaries, the CAA requires the EPA to include areas that contribute to nearby violations of the NAAQS.

IV. What are the 2008 ozone NAAQS and the health and welfare concerns they address?

On March 12, 2008, the EPA revised both the primary and secondary NAAQS for ozone to a level of 0.075 parts per million (ppm) (annual fourth-highest daily maximum 8-hour average concentration, averaged over 3 years) to provide increased protection of public health and the environment.[1] The 2008 ozone NAAQS retain the same general form and averaging time as the 0.08 ppm NAAQS set in 1997, but are set at a more protective level.

Ozone exposure has been associated with increased susceptibility to respiratory infections, medication use by asthmatics, doctor visits, and emergency department visits and hospital admissions for individuals with respiratory disease. Ozone exposure may also contribute to premature death, especially in people with heart and lung disease. The secondary ozone standard was revised to protect against adverse welfare effects including impacts to sensitive vegetation and forested ecosystems.

V. What are the CAA requirements for air quality designations?

When the EPA promulgates a new or revised NAAQS, the EPA is required to designate areas as nonattainment, attainment, or unclassifiable, pursuant to section 107(d)(1) of the CAA. The CAA requires the EPA to complete the initial area designation process within 2 years of promulgating the NAAQS. However, if the Administrator has insufficient information to make these designations within that time frame, the EPA has the authority to extend the deadline for designation decisions by up to 1 additional year.

By not later than 1 year after the promulgation of a new or revised NAAQS, each state governor is required to recommend air quality designations, including the appropriate boundaries for areas, to the EPA. The EPA reviews those state recommendations and is authorized to make any modifications the Administrator deems necessary. The statute does not define the term "necessary," but the EPA interprets this to authorize the Administrator to modify designations that did not meet the statutory requirements or were otherwise inconsistent with the facts or analysis deemed appropriate by the EPA. If the EPA intends to make any modifications to a state's initial recommendation, the EPA is required to notify the state of any such intended modifications to its recommendation not less than 120 days prior to the EPA's promulgation of the final designation. These notifications are commonly known as the "120-day letters." If the state does not agree with the EPA's intended modification, it then has an opportunity to respond to the EPA to demonstrate why it believes the modification proposed by the EPA is inappropriate. Even if a state fails to provide any recommendation for an area, in whole or in part, the EPA still must promulgate a designation that the Administrator deems appropriate.

Section 107(d)(1)(A)(i) of the CAA defines a nonattainment area as, "any area that does not meet (or that contributes to ambient air quality in a nearby area that does not meet) the national primary or secondary ambient air quality standard for the pollutant." If an area meets either prong of this definition, then the EPA is obligated to designate the area as "nonattainment." Section 107(d)(1)(A)(iii) provides that any area that the EPA cannot designate on the basis of available information as meeting or not meeting the standards should be designated as "unclassifiable." Historically for ozone, the EPA designates the remaining areas that do not meet the definition of a nonattainment area or an unclassifiable area as "unclassifiable/attainment" indicating that the areas either have attaining air quality monitoring data or that air quality information is not available because the areas are not monitored, and the EPA has not determined that the areas contribute to a violation in a nearby area.

The EPA believes that section 107(d) provides the agency with discretion to determine how best to interpret the terms "contributes to" and "nearby" in the definition of a nonattainment area for a new or revised NAAQS, given considerations such as the nature of a specific pollutant, the types of sources that may contribute to violations, the form of the standards for the pollutant, and other relevant information. In particular, the EPA believes that the statute does not require the agency to establish bright line tests or thresholds for what constitutes "contribution" or "nearby" for purposes of designations.[2] Similarly, the EPA believes that the statute permits the EPA to determine the most appropriate application of the term "area" for a particular NAAQS.

Section 301(d) of the CAA authorizes the EPA to approve eligible Indian tribes to implement provisions of the CAA on Indian reservations and other areas within the tribes' jurisdiction. The Tribal Authority Rule (TAR) (40 CFR Part 49), which implements section 301(d) of the CAA, sets forth the criteria and process for tribes to apply to the EPA for eligibility to administer CAA programs. The designations process contained in section 107(d) of the CAA is included among those provisions determined to be appropriate by the EPA for treatment of tribes in the same manner as states. Under the TAR, tribes generally are not subject to the same submission schedules imposed by the CAA on states. As authorized by the TAR, tribes may seek eligibility to submit designation recommendations to the EPA.

VI. What is the chronology for the initial air quality designation rules and what guidance did the EPA provide?

As discussed above, in 2008 the EPA revised both the primary and secondary NAAQS for ozone. On December 4, 2008, the EPA issued guidance for states and tribal agencies to use in developing area designation recommendations for the 2008 ozone NAAQS. (*See* memorandum from Robert J. Meyers, Principal Deputy Assistant Administrator, to Regional Administrators, Regions I–X, titled, "Area Designations for the 2008 Revised Ozone National Ambient Air Quality Standards.") The guidance provided the anticipated timeline for designations and identified important factors that the EPA recommended states and tribes consider in making their recommendations. These factors include air quality data, emissions data, traffic and commuting patterns, growth rates and patterns, meteorology, geography/topography, and jurisdictional boundaries. In the guidance, the EPA asked that states and tribes submit their designation recommendations, including appropriate area boundaries, to the EPA by March 12, 2009. Later in the process, the EPA issued two new guidance memoranda related to designating areas of Indian county.[3]

[1] *See* 73 FR 16436; March 27, 2008. For a detailed explanation of the calculation of the 3-year 8-hour average, *see* 40 CFR part 50, Appendix I.

[2] This view was confirmed in *Catawba County* v. *EPA*, 571 F.3d 20 (D.C. Cir. 2009).

[3] *See* December 20, 2011, memorandum from Stephen D. Page, Director, Office of Air Quality Planning and Standards, to Regional Air Directors, Regions I–X, titled, "Policy for Establishing Separate Air Quality Designations for Areas of Indian Country," and December 20, 2011, memorandum from Stephen D. Page, Director,

Continued

(There are no areas of Indian country affected by this action.)

Under the initial schedule, the EPA intended to complete the initial designations for the 2008 ozone NAAQS on a 2-year schedule, by March 12, 2010. On September 16, 2009, the EPA announced that it would initiate a rulemaking to reconsider the 2008 ozone NAAQS for various reasons, including the fact that the 0.075 ppm level fell outside of the range recommended by the Clean Air Scientific Advisory Committee, the independent group of scientists that provides advice to the EPA Administrator on the technical bases for the EPA's NAAQS. The EPA signed the proposed reconsideration on January 6, 2010 (75 FR 2938; January 19, 2010). Because of the significant uncertainty the ozone NAAQS reconsideration created regarding the continued applicability of the 2008 NAAQS, the EPA determined there was insufficient information to designate areas within 2 years of promulgation of the NAAQS. Therefore, the EPA used its authority under CAA section 107(d)(1)(B) to extend the deadline for designating areas by 1 year, until March 12, 2011 (75 FR 2936; January 19, 2010). The EPA has not taken final action on the proposed reconsideration; thus, the current NAAQS for ozone remains at 0.075 ppm, as established in 2008.

After the March 12, 2011, designation deadline passed, WildEarth Guardians and Elizabeth Crowe (WildEarth Guardians) filed a lawsuit seeking to compel the EPA to take action to designate areas for the 2008 ozone NAAQS. *WildEarth Guardians and Elizabeth Crowe* v. *Jackson* (D. Ariz. 11–CV–01661). The EPA and WildEarth Guardians settled the case by entering into a consent decree that requires the EPA Administrator to sign a final rule designating areas for the 2008 ozone NAAQS by May 31, 2012.

On September 22, 2011, the EPA issued a memorandum to clarify for state and local agencies the status of the 2008 ozone NAAQS and to outline plans for moving forward to implement them. The EPA indicated that it would proceed with initial area designations for the 2008 NAAQS, and planned to use the recommendations states made in 2009 as updated by the most current, certified air quality data from 2008–2010. While the EPA did not request that states submit updated designation recommendations, the EPA provided the opportunity for states to do so. Several states chose to update their recommendations, and some requested that the EPA base designations for their areas on certified air quality data from 2009–2011, and committed to certify the 2011 data earlier than the May 1 deadline for annual air monitoring certification under 40 CFR 58.15(a)(2) so that the EPA would have sufficient time to consider the data in making decisions on designations and nonattainment area boundaries. The states of Illinois, Indiana, and Wisconsin did not submit updated designation recommendations.

On or about December 9, 2011, the EPA sent letters to Governors and Tribal leaders notifying them of the EPA's preliminary response to their designation recommendations and to inform them of the EPA's approach for completing the designations for the 2008 ozone NAAQS. The EPA requested that states submit any additional information that they wanted the EPA to consider by February 29, 2011, including any certified 2011 air quality monitoring data. Two days prior to those letters, on December 7, 2011, Illinois sent a letter to the EPA submitting the state's 2011 certified air quality monitoring data for consideration in the designation process. The data, when considered with data from the two previous years (2009 and 2010), indicated a violation of the 2008 ozone NAAQS at a monitor in Lake County, Illinois (which is in the Chicago-Naperville-Michigan City, IL-IN-WI consolidated statistical area). Given the timing of Illinois' submission of the certified data, the EPA was not able to consider the information in the December 9, 2011, letters. After reviewing the 2011 air quality data and assessing contributions to nonattainment from nearby areas, the EPA sent letters on January 31, 2012, notifying Illinois, Indiana, and Wisconsin that it intended to designate certain counties (or parts thereof), identified in those letters, as nonattainment for the 2008 ozone NAAQS. On April 30, 2012, the EPA Administrator signed a final rule designating almost all areas in the United States, including Indian country. At that time, the EPA did not designate the Illinois, Indiana, and Wisconsin counties identified in the January 31, 2011, notification letters because the necessary 120-day period had not yet elapsed following the January letters notifying the states that the EPA intended to modify the states' recommendations.

Although not required by section 107(d) of the CAA, the EPA also provided an opportunity for members of the public to comment on the EPA's 120-day response letters to states and tribes. For the notification letters sent on or about December 9, 2011, the EPA announced a 30-day public comment period in the **Federal Register** on December 20, 2011 (76 FR 78872). The comment period was subsequently extended until February 3, 2012 (77 FR 2677; January 19, 2012). On February 14, 2012 (77 FR 8211), the EPA reopened the public comment period for the limited purpose of inviting comment on the EPA's revised responses to Illinois, Indiana, and Wisconsin. State and tribal recommendations and the EPA's 120-day response letters were posted on EPA's Web site at *http://www.epa.gov/ozonedesignations* and are available in the docket for the designations action. Comments from the states, tribes and the public, and EPA's responses to significant comments, are also in the docket.

VII. What air quality data has the EPA used to designate these areas for the 2008 ozone NAAQS?

The EPA based the designations in this action on the most recent 3 years of certified air quality monitoring data available at the end of January 2012 when the EPA notified Illinois, Indiana, and Wisconsin of its revised responses to their designation recommendations. Thus, the EPA considered ozone monitoring data for the 2009–2011 period for Illinois and for the 2008–2010 period for Indiana and Wisconsin.

Under 40 CFR 58.16, states are required to report all monitored ozone air quality data and associated quality assurance data within 90 days after the end of each quarterly reporting period, and under 40 CFR 58.15(a)(2) states are required to submit annual summary reports and a data certification letter to the EPA by May 1 for ozone air quality data collected in the previous calendar year. States generally had not completed these requirements for calendar year 2011 ozone air quality data when the EPA notified states of our intended designations on December 9, 2011. For purposes of the designations promulgated on April 30, 2012, several states recommended that the EPA consider monitoring data from 2009–2011 in making final decisions and certified their 2011 data early for this purpose. In the letters to these states, the EPA indicated it would need the certified data by February 29, 2012, in order to have sufficient time to consider it in making final decisions. On December 7, 2011, Illinois sent a letter to the EPA submitting the state's 2011 certified air quality data for consideration in the designations.

Office of Air Quality Planning and Standards, to Regional Air Directors, Regions I–X, titled, "Guidance to Regions for Working with Tribes during the National Ambient Air Quality Standards (NAAQS) Designations Process."

Although there was not sufficient time for the EPA to consider the 2011 data from Illinois in the December 9, 2011, letters, the EPA subsequently considered the data and sent letters to Illinois, Indiana, and Wisconsin on January 31, 2012, revising the intended designation for 12 counties in the Chicago-Naperville, IL-IN-WI area. Indiana and Wisconsin did not request that the EPA consider their 2011 monitoring data or early certify such data.

VIII. What are the ozone air quality classifications?

In accordance with CAA section 181(a)(1), each area designated as nonattainment for the 2008 ozone NAAQS is classified by operation of law at the same time as the area is designated by the EPA. Under Subpart 2 of part D of Title I of the CAA, state planning and emissions control requirements for ozone are determined, in part, by a nonattainment area's classification. The ozone nonattainment areas are classified based on the severity of their ozone levels (as determined based on the area's "design value," which represents air quality in the area for the most recent 3 years).[4] The possible classifications are Marginal, Moderate, Serious, Severe, and Extreme. Nonattainment areas with a "lower" classification have ozone levels that are closer to the standard than areas with a "higher" classification. Areas in the lower classification levels have fewer and/or less stringent mandatory air quality planning and control requirements than those in higher classifications. The EPA established the air quality thresholds that define the classification categories in a rule titled, "Implementation of the 2008 National Ambient Air Quality Standards for Ozone: Nonattainment Area Classifications Approach, Attainment Deadlines and Revocation of the 1997 Ozone Standards for Transportation Conformity Purposes" (77 FR 30160; May 21, 2012). Based on those thresholds, the Chicago-Naperville, IL-IN-WI area is classified as a Marginal area.

IX. Can states request that areas within 5 percent of the upper or lower limit of a classification threshold be reclassified?

As discussed in the April 30, 2012, final rule, states may request that an area be reclassified to a higher or lower classification pursuant to section 181(a)(4), within 90 days of promulgation of the designation, if the area would have been classified in another category if the design value in the area were 5 percent greater or 5 percent less than the level on which such classification was based. The Chicago-Naperville, IL-IN-WI nonattainment area is being designated as a Marginal area, which is the lowest classification category. Therefore, the only possible reclassification would be to a higher classification. Marginal areas with an air quality design value of 0.082 ppm or more are eligible to request reclassification to a higher classification under section 181(a)(4). Because the 2009–2011 design value for the Chicago-Naperville, IL-IN-WI nonattainment area is 0.076 ppm, the nonattainment area is not eligible to be reclassified under that provision. However, the EPA notes that under section 181(b)(3), the EPA must grant any state request to reclassify an area into a higher classification.

X. Where can I find information forming the basis for this rule and exchanges between the EPA, states and tribes related to this rule?

Information providing the basis for this action is provided in the docket for this rulemaking, Docket ID NO. EPA–HQ–OAR–2008–0476. The applicable EPA guidance memoranda and copies of correspondence regarding this process between the EPA and the states, tribes and other parties are available for review at the EPA Docket Center listed above in the addresses section of this document, and on the EPA's ozone designation Web site at *http://www.epa.gov/ozonedesignations.* State-specific information is available from the EPA Regional Office.

XI. What are the corrections to inadvertent errors in the designations for three areas in the April 30, 2012 designations rule?

This rule also corrects inadvertent errors in the regulatory text for two areas in Kentucky and one area in Arkansas in the ozone designation rule signed on April 30, 2012 (77 FR 30088; May 21, 2012). The affected areas are the Cincinnati, OH-KY-IN nonattainment area (specifically related to Boone and Campbell counties), the partial Kenton County, KY unclassifiable/attainment area, and Crittenden County, AR. These corrections are set forth in the regulatory text at the end of this notice.

The Technical Support Document for the Cincinnati, OH-KY-IN nonattainment area, which is part of the record for the April 30, 2012, designations rule, states, "All of the census tracts in Boone, Campbell, and Kenton Counties are included in the nonattainment area for the 2008 8-hour ozone NAAQS, excluding census tracts 706.01 and 706.04 in Boone County, 637.01 and 637.02 in Kenton County, and 520.01 and 520.02 in Campbell County." In the regulatory text for the Cincinnati, OH-KY-IN nonattainment area, 2000 Census tracts 706.01 and 706.04 in Boone County, KY and 2000 Census tracts 520.01 and 520.02 in Campbell County, KY were inadvertently listed as being part of the nonattainment area. These 2000 Census tracts were also correctly listed in the regulatory text as designated unclassifiable/attainment. The EPA is removing the erroneous duplicative listings under the Cincinnati, OH-KY-IN nonattainment area. For the partial Kenton County unclassifiable/attainment area, this action corrects a typographical error that incorrectly numbered one of the component 2000 Census tracts as 637.04 rather than 637.02.

The Technical Support Document for the Memphis, TN-MS-AR nonattainment area, which is part of the record for the April 30, 2012, designations rule, states, "Based on the assessment of the factors described above, the EPA is designating the following counties as nonattainment for the Memphis, TN-MS-AR area because they are either violating the 2008 ozone NAAQS or contributing to a violation in a nearby area: Crittenden County, Arkansas, and Shelby County, Tennessee in their entireties and the portion of DeSoto County that is included in the Memphis MPO boundary." In the regulatory text for the April 30, 2012, designations rule, Crittenden County, AR was correctly listed as part of the Memphis, TN-MS-AR nonattainment area. However, the county was also inadvertently listed as an unclassifiable/attainment area. The EPA is correcting that error by removing the duplicative entry for Crittenden County, AR as an unclassifiable/attainment area.

XII. Statutory and Executive Order Reviews

Upon promulgation of a new or revised NAAQS, the CAA requires the EPA to designate areas as attaining or not attaining the NAAQS. The CAA then specifies requirements for areas based on whether such areas are attaining or not attaining the NAAQS. In this final rule, the EPA assigns designations to areas as required.

[4] The air quality design value for the 8-hour ozone NAAQS is the 3-year average of the annual 4th highest daily maximum 8-hour average ozone concentration. *See* 40 CFR part 50, Appendix I.

A. Executive Order 12866: Regulatory Planning and Review and Executive Order 13563: Improving Regulation and Regulatory Review

This action responds to the CAA requirement to promulgate air quality designations after promulgation of a new or revised NAAQS. This type of action is exempt from review under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 13563 (76 FR 3821, January 21, 2011).

B. Paperwork Reduction Act

This action does not impose an information collection burden under the provisions of the *Paperwork Reduction Act,* 44 U.S.C. 3501 *et seq.* Burden is defined at 5 CFR 1320.3(b). This rule responds to the CAA requirement to promulgate air quality designations after promulgation of a new or revised NAAQS. This requirement is prescribed in the CAA section 107. The present final rule does not establish any new information collection requirements.

C. Regulatory Flexibility Act

This final rule is not subject to the Regulatory Flexibility Act (RFA), which generally requires an agency to prepare a regulatory flexibility analysis for any rule that will have a significant economic impact on a substantial number of small entities. The RFA applies only to rules subject to notice-and-comment rulemaking requirements under the Administrative Procedure Act (APA) or any other statute. This rule is not subject to notice-and-comment requirements as provided under CAA section 107(d)(2)(B).

D. Unfunded Mandates Reform Act

This action contains no federal mandate under the provisions of Title II of the Unfunded Mandates Reform Act of 1995 (UMRA), 2 U.S.C. 1531–1538 for state, local, or tribal governments or the private sector. The action imposes no enforceable duty on any state, local or tribal governments or the private sector. Therefore, this action is not subject to the requirements of sections 202 and 205 of the UMRA.

This action is also not subject to the requirements of section 203 of UMRA because it contains no regulatory requirements that might significantly or uniquely affect small governments. It does not create any additional requirements beyond those of the CAA and ozone NAAQS (40 CFR 50.15). The CAA establishes the process whereby states take primary responsibility in developing plans to meet the ozone NAAQS.

E. Executive Order 13132: Federalism

This final rule does not have federalism implications. It will not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132. The CAA establishes the process whereby states take primary responsibility in developing plans to meet the ozone NAAQS. This rule will not modify the relationship of the states and the EPA for purposes of developing programs to implement the ozone NAAQS. Thus, Executive Order 13132 does not apply to this rule.

F. Executive Order 13175: Consultation and Coordination With Indian Tribal Governments

Subject to the Executive Order 13175 (65 FR 67249, November 9, 2000) the EPA may not issue a regulation that has tribal implications, that imposes substantial direct compliance costs, and that is not required by statute, unless the federal government provides the funds necessary to pay the direct compliance costs incurred by tribal governments, or the EPA consults with tribal officials early in the process of developing the proposed regulation and develops a tribal summary impact statement.

The EPA has concluded that this action does not have tribal implications. The EPA is not designating any areas of Indian country in this final rule.

G. Executive Order 13045: Protection of Children From Environmental Health and Safety Risks

The EPA interprets Executive Order 13045 (62 FR 19885, April 23, 1997) as applying only to those regulatory actions that concern health or safety risks, such that the analysis required under section 5–501 of the Executive Order has the potential to influence the regulation. This action is not subject to Executive Order 13045 because it does not establish an environmental standard intended to mitigate health or safety risks.

H. Executive Order 13211: Actions That Significantly Affect Energy Supply, Distribution, or Use

This action is not subject to Executive Order 13211 (66 FR 28355 (May 22, 2001)), because it is not a significant regulatory action under Executive Order 12866.

I. National Technology Transfer and Advancement Act (NTTAA)

Section 12(d) of the NTTAA of 1995, Public Law 104–113, section 12(d) (15 U.S.C. 272 note) directs the EPA to use voluntary consensus standards (VCS) in its regulatory activities unless to do so would be inconsistent with applicable law or otherwise impractical. Voluntary consensus standards are technical standards (e.g., materials specifications, test methods, sampling procedures, and business practices) that are developed or adopted by VCS bodies. The NTTAA directs the EPA to provide Congress, through the Office of Management and Budget, explanations when the Agency decides not to use available and applicable VCS.

This action does not involve technical standards. Therefore, the EPA did not consider the use of any VCS.

J. Executive Order 12898: Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Populations.

Executive Order 12898 (59 FR 7629 (Feb. 16, 1994)) establishes federal executive policy on environmental justice. Its main provision directs federal agencies, to the greatest extent practicable and permitted by law, to make environmental justice part of their mission by identifying and addressing, as appropriate, disproportionately high and adverse human health or environmental effects of their programs, policies, and activities on minority populations and low-income populations in the U.S.

The CAA requires that the EPA designate as nonattainment "any area that does not meet (or that contributes to ambient air quality in a nearby area that does not meet) the national primary or secondary ambient air quality standard for the pollutant." By designating as nonattainment all areas where available information indicates a violation of the ozone NAAQS or a contribution to a nearby violation, this action protects all those residing, working, attending school, or otherwise present in those areas regardless of minority or economic status.

The EPA has determined that this final rule will not have disproportionately high and adverse human health or environmental effects on minority or low-income populations because it increases the level of environmental protection for all affected populations without having any disproportionately high and adverse human health or environmental effects on any population, including any minority or low-income population.

K. Congressional Review Act

The Congressional Review Act, 5 U.S.C. 801 *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the U.S. The EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the U.S. prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**.This action is not a "major rule" as defined by 5 U.S.C. 804(2). This rule will be effective July 20, 2012.

L. Judicial Review

Section 307(b)(1) of the CAA indicates which Federal Courts of Appeal have venue for petitions of review of final actions by the EPA. This section provides, in part, that petitions for review must be filed in the Court of Appeals for the District of Columbia Circuit: (i) when the agency action consists of "nationally applicable regulations promulgated, or final actions taken, by the Administrator," or (ii) when such action is locally or regionally applicable, if "such action is based on a determination of nationwide scope or effect and if in taking such action the Administrator finds and publishes that such action is based on such a determination."

This rule designating the final few areas for the 2008 ozone NAAQS is "nationally applicable" within the meaning of section 307(b)(1). This rule, along with a rule signed on April 30, 2012, establishes designations for areas across the U.S. for the 2008 ozone NAAQS. At the core of this rulemaking is the EPA's interpretation of the definition of nonattainment under section 107(d)(1) of the CAA, and its application of that interpretation to areas across the country.

Thus, any petitions for review of final designations must be filed in the Court of Appeals for the District of Columbia Circuit within 60 days from the date final action is published in the **Federal Register**.

List of Subjects in 40 CFR Part 81

Environmental protection, Air pollution control, National parks, Wilderness areas.

Dated: May 31, 2012.

Lisa P. Jackson,

Administrator.

For the reasons set forth in the preamble, 40 CFR part 81, is amended as follows:

PART 81—DESIGNATIONS OF AREAS FOR AIR QUALITY PLANNING PURPOSES

■ 1. The authority citation for part 81 continues to read as follows:

Authority: 42 U.S.C. 7401, *et seq.*

Subpart C—Section 107 Attainment Status Designations

§ 81.304 [Amended]

■ 2. In section 81.304, the table entitled "Arkansas—2008 8-Hour Ozone NAAQS (Primary and Secondary)" is amended by removing the entry for Crittenden County before the entry for Cross County.

■ 3. In section 81.314, the table entitled "Illinois—2008 8-Hour Ozone NAAQS (Primary and Secondary)" is amended as follows:

■ a. By adding a new entry for "Chicago-Naperville, IL-IN-WI" before the entry for "St. Louis-St. Charles-Farmington, MO-IL";

■ b. By adding a new entry for "Grundy County (remainder)" before the entry for "Hamilton County"; and

■ c. By adding a new entry for "Kendall County (remainder)" before the entry for "Knox County".

The additions read as follows:

§ 81.314 Illinois.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R04–OAR–2012–0700; FRL–9788–6]

Approval and Promulgation of Implementation Plans; Kentucky; 110(a)(1) and (2) Infrastructure Requirements for the 2008 8-Hour Ozone National Ambient Air Quality Standards

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: EPA is taking final action to approve in part, conditionally approve in part, and disapprove in part, the July 17, 2012, State Implementation Plan (SIP) submission provided by the Commonwealth of Kentucky, through the Division of Air Quality (DAQ) of the Kentucky Energy and Environment Cabinet. Kentucky DAQ submitted the July 17, 2012, SIP submission as a replacement to its original September 8, 2009, SIP submission. Specifically, this final rulemaking pertains to the Clean Air Act (CAA or Act) requirements for the 2008 8-hour ozone national ambient air quality standards (NAAQS) infrastructure SIP. The CAA requires that each state adopt and submit a SIP for the implementation, maintenance, and enforcement of each NAAQS promulgated by EPA, which is commonly referred to as an "infrastructure" SIP. Kentucky DAQ made a SIP submission demonstrating that the Kentucky SIP contains provisions that ensure the 2008 8-hour ozone NAAQS are implemented, enforced, and maintained in the Commonwealth (hereafter referred to as "infrastructure submission"). EPA is now taking final action on three related actions on Kentucky DAQ's infrastructure SIP submission. First, EPA is taking action to approve Kentucky DAQ's infrastructure submission provided to EPA on July 17, 2012, as meeting certain required infrastructure elements for the 2008 8-hour ozone NAAQS. Second, with respect to the infrastructure elements related to specific prevention of significant deterioration (PSD) requirements, EPA is taking final action to approve, in part and conditionally approve in part, the infrastructure SIP submission based on a December 19, 2012, commitment from Kentucky DAQ to submit specific enforceable measures for approval into the SIP to address specific PSD program deficiencies. Third, EPA is taking final action to disapprove Kentucky DAQ's infrastructure SIP submission with respect to certain interstate transport requirements for the 2008 8-hour ozone NAAQS because the submission does not address the statutory provisions with respect to the relevant NAAQS and thus does not satisfy the criteria for approval. The CAA requires EPA to act on this portion of the SIP submission even though under a recent court decision, Kentucky DAQ was not yet required to submit a SIP submission to address these interstate transport requirements. Moreover, under that same court decision, this disapproval does not trigger an obligation for EPA to promulgate a Federal Implementation Plan (FIP) to address these interstate transport requirements.

DATES: This rule will be effective April 8, 2013.

ADDRESSES: EPA has established a docket for this action under Docket Identification No. EPA–R04–OAR–2012–0700. All documents in the docket are listed on the *www.regulations.gov* Web site. Although listed in the index, some information is not publicly available, i.e., Confidential Business Information or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the Internet and will be publicly available only in hard copy form. Publicly available docket materials are available either electronically through *www.regulations.gov* or in hard copy at the Regulatory Development Section, Air Planning Branch, Air, Pesticides and Toxics Management Division, U.S. Environmental Protection Agency, Region 4, 61 Forsyth Street SW., Atlanta, Georgia 30303–8960. EPA requests that if at all possible, you contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section to schedule your inspection. The Regional Office's official hours of business are Monday through Friday, 8:30 a.m. to 4:30 p.m. excluding federal holidays.

FOR FURTHER INFORMATION CONTACT: Nacosta C. Ward, Regulatory Development Section, Air Planning Branch, Air, Pesticides and Toxics Management Division, U.S. Environmental Protection Agency, Region 4, 61 Forsyth Street SW., Atlanta, Georgia 30303–8960. The telephone number is (404) 562–9140. Ms. Ward can be reached via electronic mail at *ward.nacosta@epa.gov.*

SUPPLEMENTARY INFORMATION:

Table of Contents

I. Background

Upon promulgation of a new or revised NAAQS, sections 110(a)(1) and (2) of the CAA require states to address basic structural SIP requirements, including emissions inventories, monitoring, and modeling to assure attainment and maintenance for that new NAAQS.

Section 110(a) of the CAA generally requires states to make a SIP submission to meet applicable requirements in order to provide for the implementation, maintenance, and enforcement of a new or revised NAAQS within three years following the promulgation of such NAAQS, or within such shorter period as EPA may prescribe. These SIP submissions are commonly referred to as "infrastructure" SIP submissions. Section 110(a) imposes the obligation upon states to make an infrastructure SIP submission to EPA for a new or revised NAAQS, but the contents of that submission may vary depending upon the facts and circumstances. In particular, the data and analytical tools available at the time the state develops and submits the infrastructure SIP for a new or revised NAAQS affect the content of the submission. The contents of such infrastructure SIP submissions may also vary depending upon what provisions the state's existing SIP already contains. In the case of the 2008 8-hour ozone NAAQS, states typically have met the basic program elements required in section 110(a)(2) through earlier SIP submissions in connection with previous ozone NAAQS.

More specifically, section 110(a)(1) provides the procedural and timing requirements for SIPs. Section 110(a)(2) lists specific elements that states must meet for "infrastructure" SIP requirements related to a newly

established or revised NAAQS. As mentioned above, these requirements include basic structural SIP requirements such as modeling, monitoring, and emissions inventories that are designed to assure attainment and maintenance of the NAAQS. The applicable infrastructure SIP requirements that are the subject of this rulemaking are listed below.[1]

- 110(a)(2)(A): Emission limits and other control measures.
- 110(a)(2)(B): Ambient air quality monitoring/data system.
- 110(a)(2)(C): Program for enforcement of control measures.[2]
- 110(a)(2)(D)(i): Interstate transport.[3]
- 110(a)(2)(E): Adequate resources.
- 110(a)(2)(F): Stationary source monitoring system.
- 110(a)(2)(G): Emergency power.
- 110(a)(2)(H): Future SIP revisions.
- 110(a)(2)(I): Areas designated nonattainment and meet the applicable requirements of part D.[4]
- 110(a)(2)(J): Consultation with government officials; public notification; and PSD and visibility protection.
- 110(a)(2)(K): Air quality modeling/data.
- 110(a)(2)(L): Permitting fees.
- 110(a)(2)(M): Consultation/participation by affected local entities.

[1] Two elements identified in section 110(a)(2) are not governed by the three year submission deadline of section 110(a)(1) because SIPs incorporating necessary local nonattainment area controls are not due within three years after promulgation of a new or revised NAAQS, but rather due at the time the nonattainment area plan requirements are due pursuant to other provisions of the CAA for submission of SIP revisions specifically applicable for attainment planning purposes. These requirements are: (1) Submissions required by section 110(a)(2)(C) to the extent that subsection refers to a permit program as required in part D Title I of the CAA; and (2) submissions required by section 110(a)(2)(I) which pertain to the nonattainment planning requirements of part D, Title I of the CAA. Today's final rulemaking does not address infrastructure elements related to section 110(a)(2)(I) or the nonattainment planning requirements of 110(a)(2)(C).

[2] This rulemaking only addresses requirements for this element as they relate to attainment areas.

[3] Section 110(a)(2)(D)(i) includes four requirements referred to as prongs 1 through 4. Prongs 1 and 2 are provided at section 110(a)(2)(D)(i)(I); prongs 3 and 4 are provided at section 110(a)(2)(D)(i)(II). At this time, pursuant to a recent decision of the U.S. Court of Appeals for the DC Circuit, the SIP submission from Kentucky DAQ to meet section 110(a)(2)(D)(i)(I) is not a required SIP submission. The portions of the SIP submission relating to 110(a)(2)(D)(i)(II) and 110(a)(2)(D)(ii), in contrast, are required. Although prongs 1 and 2 are not required, EPA is acting today to disapprove Kentucky's submittal related to these prongs for the reasons described in the proposed rule associated with this rulemaking. *See* 78 FR 3867. Further information regarding EPA's disapproval of prongs 1 and 2 is also provided below in section II.

[4] This requirement as mentioned above is not relevant to today's final rulemaking.

On January 17, 2013, EPA proposed to approve Kentucky's July 17, 2012, infrastructure SIP submission and proposed to conditionally approve in part sections 110(a)(2)(C), prong 3 of (D)(i), and (J), and disapprove in part section 110(a)(2)(D)(i) for the 2008 8-hour ozone NAAQS. *See* 78 FR 3867.

EPA proposed conditional approval in part for sections 110(a)(2)(C), prong 3 of (D)(i),[5] and (J) because, while the Commonwealth's SIP does not currently contain provisions to address the structural PSD requirements of the PSD and Nonattainment New Source Review (NNSR) requirements related to the implementation of the NSR $PM_{2.5}$ Rule and the $PM_{2.5}$ PSD Increment-SILs-SMC Rule (only as it relates to $PM_{2.5}$ Increments), Kentucky DAQ committed in a letter dated December 19, 2012, to submit, within one year, specific enforceable measures to EPA for incorporation into the SIP to address these requirements. *See* 78 FR 3867. This commitment letter meets the requirements of section 110(k)(4) of the CAA. Kentucky DAQ's December 19, 2012, letter can be accessed at *www.regulations.gov* using Docket ID No. EPA–R04–OAR–2012–0700.

With respect to section 110(a)(2)(D)(i)(I),[6] for the 2008 8-hour ozone NAAQS, EPA published a proposal to disapprove Kentucky DAQ's July 17, 2012, SIP revision. EPA proposed disapproval of these elements because the infrastructure SIP submission asserted that the requirements of 110(a)(2)(D)(i)(I) with respect to the 2008 8-hour ozone NAAQS were satisfied by the Commonwealth's approved regulations to meet the Clean Air Interstate Rule (CAIR) requirements. CAIR, however, was promulgated before the 2008 8-hour ozone NAAQS were promulgated, and CAIR did not, in any way, address interstate transport requirements related to the 2008 8-hour ozone NAAQS. *See* 78 FR 3867.

Finally, EPA notes that this final action on Kentucky's infrastructure SIP submission for the 2008 8-hour ozone NAAQS is required not only by section 110(k), but also by order issued by the U.S. District Court for the Northern District of California in *WildEarth Guardians* v. *Jackson,* Case No. 11–CV–5651 YGR. In an October 17, 2012, order granting partial summary judgment in the case, as modified in a December 7, 2012, order granting in part EPA's motion for an amended order, that court directed EPA to take final action upon the infrastructure SIP at issue in this action by March 4, 2013. With respect to Kentucky, the court specifically ordered EPA to act upon the infrastructure SIP submission made by the Commonwealth on September 8, 2009, as revised on July 17, 2012. As explained in more detail in response to relevant comments, EPA is addressing the requirements of section 110(a)(2)(D)(i)(I) consistent with the opinion of the DC Circuit Court's opinion in *EPA Homer City Generation* v. *EPA,* 696 F.3d 7 (DC Cir. 2012).

[5] Section 110(a)(2)(D)(i) includes four requirements referred to as prongs 1 through 4. Prongs 1 and 2 are provided at section 110(a)(2)(D)(i)(I); prongs 3 and 4 are provided at section 110(a)(2)(D)(i)(II). Today's conditional approval only relates to the structural PSD requirements of section 110(a)(2)(D)(i)(II), also known as prong 3 as noted above in footnote 3.

[6] Section 110(a)(2)(D)(i)(I) includes two distinct requirements referred to as prongs 1 and 2. Prong 1 requires states to prohibit emissions that significantly contribute to nonattainment of the NAAQS in another state and prong 2 request states to prohibit emissions that interfere with maintenance of the NAAQS in another state.

II. Response to Comments

EPA received five sets of comments on the January 17, 2013, proposed rulemaking to approve in part, conditionally approve in part, and disapprove in part, Kentucky DAQ's infrastructure SIP submission intended to meet the CAA requirements for the 2008 8-hour ozone NAAQS. A summary of the comments and EPA's responses are provided below.

Comment 1: One commenter contends that EPA cannot approve the section 110(a)(2)(A) portion of Kentucky DAQ's infrastructure SIP submission because certain counties in the Commonwealth have air quality monitors with data that suggest such areas are not attaining the 2008 8-hour ozone NAAQS. Specifically, the Commenter cites air monitoring reports for Jefferson and Oldham counties indicating violations of the NAAQS based on 2009–2011 design values. The Commenter further contends that, based on available data for 2010–2012, 10 Kentucky counties will violate the 2008 8-hour ozone NAAQS based on 2010–2012 design values. According to the Commenter, if a designated attainment area violates the NAAQS, then this means that the state must necessarily lack adequate emissions limits in its infrastructure SIP submission to attain and maintain that NAAQS.

Response 1: EPA disagrees with the Commenter's contention that Kentucky DAQ's 2008 8-hour ozone infrastructure SIP submission is not approvable with respect to section 110(a)(2)(A) because of the monitor design values noted by the Commenter. While EPA shares the Commenter's concern regarding counties monitoring exceedances of the

2008 8-hour ozone NAAQS based upon 2009–2011 design values, such concerns are outside the scope of what is germane to an evaluation of section 110(a)(2)(A) of an infrastructure SIP.[7]

Pursuant to section 110(a)(2)(A), an infrastructure SIP submission must include enforceable emission limitations and other control measures, means, or techniques (including economic incentives such as fees, marketable permits, and auctions of emissions rights), as well as schedules and timetables for compliance, as may be necessary or appropriate to meet the applicable requirements of the Act. The Commenter, however, seems to believe that in the context of an infrastructure SIP submission, section 110(a)(2)(A) requires that a state must monitor attainment of the NAAQS at all monitors throughout the state in order to demonstrate that the SIP contains the requisite emissions limitations and other control measures, means or techniques prescribed by the Act. EPA does not believe that this is a reasonable interpretation of the provision with respect to infrastructure SIP submissions. Rather, EPA believes that the proper inquiry at this juncture is whether the state has met the basic structural SIP requirements appropriate at the point in time EPA is acting upon it. The Act provides states and EPA with other tools to address concerns that arise with respect to violations of the NAAQS in a designated attainment area, such as the authority to redesignate areas pursuant to section 107(d)(3), the authority to issue a "SIP Call" pursuant to section 110(k)(5), or the general authority to approve SIP revisions that can address such violations of the NAAQS through other appropriate measures. As stated in EPA's proposed approval for this rule, to meet section 110(a)(2)(A), Kentucky submitted a list of existing emission reduction measures in the SIP that control emissions of volatile organic compounds and nitrogen oxides (NOx) in order to address ambient ozone levels. EPA believes that this is sufficient for purposes of infrastructure SIP submission.

Comment 2: The Commenter contends that EPA must disapprove Kentucky's infrastructure SIP submission as it relates to section 110(a)(2)(A) because the submittal fails to contain enforceable ozone precursor limits and schedules/timetables for compliance to ensure attainment and maintenance of the NAAQS. Specifically, the Commenter contends that Kentucky has failed to identify how it will address the violations for those counties monitoring violations of the NAAQS.

Response 2: EPA disagrees with the Commenter's contention that Kentucky should be required to submit the emissions limitations and other control measures associated with a nonattainment plan in order to satisfy section 110(a)(2)(A) requirements. This would be beyond the scope of what is required per section 110(a)(2)(A) in the context of an infrastructure SIP submission. Nonattainment area plans are due on a different schedule from the section 110 infrastructure elements, and such plans, if required, are reviewed and acted upon through a separate process. Here, the most of the counties cited by the Commenter are not designated nonattainment,[8] and as such, the nonattainment plan requirements referenced by the Commenter are not currently due. As noted above, EPA shares the Commenter's concern regarding areas that are monitoring exceedances of the 2008 8-hour ozone NAAQS and will work appropriately with state and local agencies to address such exceedances. Further, in approving Kentucky's infrastructure SIP, EPA is affirming that Kentucky has sufficient authority to take the types of actions required by the CAA in order to bring such areas back into attainment.

Comment 3: A number of Commenters disagreed with EPA's position that disapproval of the Kentucky's infrastructure SIP, as it relates to section 110(a)(2)(D)(i)(I) requirements, would not trigger a mandatory duty for EPA to promulgate a FIP to address these requirements. Specifically, the Commenters contend that the plain language of the CAA requires EPA to issue a FIP within two years of a disapproval action. In addition, the Commenters contend that the decision in *EME Homer City Generation* v. *EPA,* 696 F.3d 7 (DC Cir. 2012) (*EME Homer City*), was incorrectly decided and is inconsistent with previous decisions by the DC Circuit Court of Appeals. The Commenters suggest that EPA should not voluntarily follow the incorrectly decided *EME Homer City* opinion, particularly in the context of an infrastructure action that only impacts sources in Kentucky, a state under the jurisdiction of the Sixth Circuit Court of Appeals rather than the DC Circuit Court of Appeals.

Response 3: EPA has historically adopted the interpretation suggested by the Commenters that disapproval of section 110(a)(2)(D)(i)(I) would trigger an obligation for the Agency to promulgate a FIP within two years if the state did not correct the SIP deficiency within that time. EPA continues to agree that the plain language of the statute establishes these obligations, and for those reasons, we asked the U.S. Court of Appeals for the DC Circuit to grant rehearing en banc of the decision in *EME Homer City.* That petition, however, was denied on January 24, 2012, and the mandate was issued to EPA on February 4, 2012. The deadline for any party to file a petition for *certiorari* with the Supreme Court has not passed [9] and the United States has not yet decided whether to pursue further appeals. In the meantime, EPA intends to act in accordance with the *EME Homer City* opinion in which the court concluded that states have no obligation to make a SIP submission to address section 110(a)(2)(D)(i)(I) for a new or revised NAAQS until EPA has first defined a state's obligations pursuant to that section. As described in the proposed rulemaking for today's action, Kentucky did make such a submittal, and consistent with section 110(k) of the CAA, EPA is required to act upon that submittal. Because CAIR does not, in any way, address transport with respect to the 2008 8-hour ozone NAAQS, it cannot be relied upon to satisfy the requirements of 110(a)(2)(D)(i)(I) for that NAAQS. For this reason, the Agency proposed to disapprove this portion of the infrastructure SIP submission. However, because this portion of the infrastructure SIP submission is not currently required for the 2008 8-hour ozone NAAQS per the *EME Homer City* opinion, EPA's disapproval action today does not presently trigger a FIP obligation.

EPA also disagrees with the Commenters' suggestion that the Agency need not follow the DC Circuit's decision in *EME Homer City* in the context of an infrastructure action for Kentucky. The EPA rule reviewed by the court in *EME Homer City*—"Federal Implementation Plans: Interstate Transport of Fine Particulate Matter and

[7] EPA also notes that the Commenter relies upon preliminary data to suggest that certain areas are violating the 2008 8-hour ozone NAAQS based upon 2010–2012 data. This data has not yet been certified, and as such, is not yet finalized. Regardless, for the reasons discussed in Response 1, EPA does not believe that such data, were it certified and final, would provide an appropriate basis upon which to disapprove Kentucky's infrastructure SIP as it relates to section 110(a)(2)(A) requirements.

[8] As noted below, a portion of Campbell County, Kentucky is designated nonattainment for the 2008 8-hour ozone NAAQS in association with the Cincinnati-Hamilton nonattainment area.

[9] Pursuant to Rule 13 of the Supreme Court Rules, a petition for certiorari must be filed within 90 days of the date of denial of rehearing. The court may extend this deadline for good cause by up to 60 days.

Ozone and Correction of SIP Approvals," 76 FR 48207 (August 8, 2011) also known as the Cross State Air Pollution Rule (CSAPR)—was designated by EPA as a "nationally applicable" rule within the meaning of section 307(b)(1) of the CAA. *See id.* at 48352. Accordingly, all petitions for review of the CSAPR had to be filed in the U.S. Court Appeals for the DC Circuit and could not be filed in any other federal court. 42 U.S.C. 7607(b)(1). Accordingly, EPA believes the DC Circuit's decision in *EME Homer City* vacating this rule is also nationally applicable. As such, EPA does not intend to take any actions, even if they are only reviewable in another federal Circuit Court of Appeals, that are inconsistent with the decision of the DC Circuit.

Comment 4: A number of states commented that Kentucky contributes significantly to ozone nonattainment in other states. Specifically, the Maryland Department of the Environment commented that it has performed modeling to demonstrate that Maryland will continue to violate the 2008 8-hour ozone NAAQS even if all anthropogenic emissions in Maryland are eliminated. It contends that corrective actions in states like Kentucky that contribute to Maryland's nonattainment are necessary in order for the state to meet the NAAQS. The Delaware Department of Natural Resources and Environmental Control commented that modeling from the CSAPR demonstrated that Kentucky emissions significantly contribute to Delaware's ozone pollution by as much as 4.3 percent of the 2008 8-hour ozone NAAQS in 2012 and that Delaware has done its fair share to address ozone, and it expects EPA to ensure that upwind contributing states fully address their contribution to downwind nonattainment. Finally, the Connecticut Department of Energy & Environmental Protection commented that CSAPR modeling demonstrates that Kentucky emissions significantly contribute to Connecticut's ozone pollution by as much as 3.4 percent of the 2008 8-hour ozone NAAQS in 2012, and that Connecticut has done its fair share to address ozone emissions in the state, and it now expects EPA to ensure that upwind contributing states fully address their contribution to downwind nonattainment.

Response 4: EPA acknowledges the Commenters' concern that interstate transport of ozone and ozone precursors from upwind states to downwind states may have adverse consequences on the ability of downwind areas to attain the NAAQS in a timely fashion. It is for this reason that EPA attempted, through CSAPR, to address emissions found to significantly contribute to nonattainment of or interfere with maintenance of the 1997 8-hour ozone NAAQS. The modeling done for CSAPR, however, did not address the 2008 8-hour ozone NAAQS and EPA did not draw any conclusions with respect to the 2008 8-hour ozone NAAQS which did not exist when CAIR was promulgated. Moreover, the DC Circuit, in its decision vacating the CSAPR, held that states are not required to submit SIPs addressing the requirements of section 110(a)(2)(D)(i)(I) until EPA has quantified their obligation under that provision. *See EME Homer City,* 696 F.3d at 37. The *EME Homer City* opinion was issued in August of 2012, and on January 24, 2013, the court denied all petitions for rehearing. As noted in the responses above, the deadline for asking the Supreme Court to review the DC Circuit's decision has not passed and the United States has not yet decided whether to seek further appeal. In the meantime, and unless the *EME Homer City Generation* decision is reversed or otherwise modified, EPA intends to act in accordance with the DC Circuit's opinion. Under this opinion, EPA has no authority to promulgate a FIP for section 110(a)(2)(D)(i)(I) until such time as the Agency quantifies States' obligations under this section.

Comment 5: One Commenter contended even if EPA chose to follow the *EME Homer City Generation* decision, EPA should acknowledge that the disapproval starts a FIP clock and then move expeditiously to provide Kentucky with the information the *EME Homer City* court said EPA must provide. The Commenter contended that EPA should be able to quantify Kentucky's obligations under section 110(a)(2)(D)(i)(I) within six months, thereby providing the Commonwealth with 18 months to submit a new SIP to address this requirements.

Response 5: EPA disagrees. As discussed above in the response to comment 3, unless the D.C. Circuit's decision in *EME Homer City* is reversed or otherwise modified, disapproval Kentucky DAQ's 2008 infrastructure SIP as it relates to section 110(a)(2)(i)(I) does not give EPA authority, much less obligate it, to promulgate a FIP for Kentucky. EPA intends to move forward expeditiously to address the interstate transport requirements of the CAA in accordance with all applicable court decisions.

Comment 6: A number of Commenters contend that EPA's disapproval section 110(a)(2)(D)(i)(I) triggers a section 110(k)(5) obligation to initiate a "SIP Call" to revise Kentucky's inadequate infrastructure SIP related to interstate transport requirements.

Response 6: EPA disagrees. Section 110(k)(5) of the CAA provides a mechanism (i.e., a "SIP Call") for correcting SIPs that the Administrator finds to be substantially inadequate to meet CAA requirements. As discussed above, EPA has historically interpreted section 110(a)(1) of the CAA as establishing the required submittal date for SIPs addressing all of the "interstate transport" requirements in section 110(a)(2)(D) including the provisions in section 110(a)(2)(D)(i)(I) regarding significant contribution to nonattainment and interference with maintenance. The D.C. Circuit's recent opinion in *EME Homer City,* however, concluded that a SIP cannot be deemed to lack a required submission or deemed deficient for failure to meet the 110(a)(2)(D)(i)(I) obligation until EPA first quantifies that obligation. As such, and consistent with the *EME Homer City* opinion, EPA does not at this time believe that disapproval of section 110(a)(2)(D)(i)(I) requirements for Kentucky's 2008 8-hour ozone infrastructure SIP constitutes a substantial inadequacy in the Kentucky SIP because EPA has yet to quantify the Commonwealth's obligation under this requirement. EPA intends to move forward expeditiously to implement the interstate transport requirements of the CAA.

Comment 7: One Commenter contends that EPA should disapprove Kentucky's 2008 8-hour ozone infrastructure SIP submission with regard to the visibility component of 110(a)(2)(D)(i)(II) until such time that Kentucky imposes best available retrofit technology (BART) for nitrogen oxides (NOx) and sulfur dioxides for electric generating units. The Commenter asserts that the substitution of the CAIR for BART is not permanent and enforceable and references the previous litigation related to CAIR. The Commenter provides a number of comments in relation to EPA's "better than BART" approach and reliance on CAIR to support an approval action for the visibility components of Kentucky's 2008 8-hour ozone infrastructure submission.

Response 7: EPA disagrees. As explained in detail in EPA's proposed rulemaking related to today's action, EPA believes that in light of the D.C. Circuit court's decision to vacate CSAPR, also known as the Transport Rule (*see EME Homer City,* 696 F.3d 7), and the court's order for EPA to "continue administering CAIR pending the promulgation of a valid replacement," it is appropriate for EPA

to rely at this time on CAIR to support approval of Kentucky's 2008 8-hour ozone infrastructure submission as it relates to visibility. EPA has been ordered by the court to develop a new rule, and to continue implementing CAIR in the meantime. While EPA had filed a petition for rehearing of the court's decision on the Transport Rule, this petition was later denied on January 24, 2013. The deadline for any party to file a petition for *certiorari* with the Supreme Court has not passed, and the United States has not yet decided whether to pursue further appeals. In the meantime, EPA does not intend to act in a manner inconsistent with the decision of the D.C. Circuit. Based on the current direction from the court to continue administering CAIR, EPA believes that it is appropriate to rely on CAIR emission reductions for purposes of assessing the adequacy of Kentucky's infrastructure SIP with respect to prong 4 of section 110(a)(2)(D)(i)(II) while a valid replacement rule is developed and until implementation plans complying with any such new rule are submitted by the states and acted upon by EPA or until the *EME Homer City* case is resolved in a way that provides different direction regarding CAIR and CSAPR.

Furthermore, as neither the Commonwealth nor EPA has taken any action to remove CAIR from the Kentucky SIP, CAIR remains part of the federally-approved SIP and can be considered in determining whether the SIP as a whole meets the requirement of prong 4 of 110(a)(2)(D)(i)(II). EPA is taking final action to approve the infrastructure SIP submission with respect to prong 4 because Kentucky's regional haze SIP, which EPA has given a limited approval in combination with its SIP provisions to implement CAIR adequately, prevents sources in Kentucky from interfering with measures adopted by other states to protect visibility during the first planning period. While EPA is not at this time proposing to change the March 30, 2012, limited approval and limited disapproval of Kentucky's regional haze SIP, EPA expects to propose an appropriate action regarding Kentucky's regional haze SIP if necessary upon final resolution of the *EME Homer City* litigation. More detailed rationale to support EPA's approval of prong 4 for Kentucky's 2008 8-hour ozone infrastructure submission can be found in EPA's proposed rulemaking for today's final action. *See* 78 FR 3867.

Comment 8: One Commenter states that EPA should disapprove the visibility prong of Kentucky's 2008 8-hour ozone infrastructure submission because the Commenter asserts that Kentucky has failed to conduct its 5-year progress review for its regional haze SIP by the required date.

Response 8: EPA does not agree that Kentucky has missed its deadline to submit its 5-year progress review SIP related to regional haze. Kentucky's initial regional haze SIP was submitted on June 25, 2008, so the Commonwealth's 5-year regional haze progress review SIP is not due until June 25, 2013. Even assuming, however, that the deadline for the Commonwealth's submittal of its progress review SIP had passed, this alone would not warrant the disapproval of Kentucky's 2008 8-hour ozone infrastructure SIP submission as it relates to visibility.

Comment 9: One Commenter states "[n]ow that *en banc* review of *Homer* has been denied, EPA should promptly propose and promulgate a full approval of KY's regional haze SIP." The Commenter also asserts that, "[t]his prospective action should also apply to the other elements of the KY SIP that address reasonable progress and the long term strategy for visibility."

Response 9: This comment is outside of the scope of today's action. As explained in EPA's proposal notice related to today's action, EPA has already taken final action on Kentucky's regional haze SIP. *See* 77 FR 19098 (March 30, 2012). EPA's proposal notice related to today's action did not involve a reconsideration of the Agency's March 30, 2012, final action on the Commonwealth's regional haze SIP. While EPA's proposal notice did note the litigation related to the Transport Rule and also noted that based on the *EME Homer City* court's decision on the Transport Rule that it would be appropriate to propose to rescind its limited disapproval of Kentucky's regional haze SIP and propose a full approval, EPA did not take such action because the Agency was awaiting a decision related to the possibility that the court would grant EPA's petition for an *en banc* review. EPA mentioned in that proposal notice that an *en banc* review of the court's decision could have a different outcome that could bear on such action on the regional haze SIP. Since the time of EPA's proposal for Kentucky's 2008 8-hour ozone infrastructure SIP, the court has denied EPA's petition for *en banc* review. As noted above, on January 24, 2013, EPA's petition was denied and the mandate was issued to EPA on February 4, 2013. The deadline for any party to file a petition for *certiorari* with the Supreme Court has not passed and the United States has not yet decided whether to pursue further appeals. In the meantime, EPA does not intend to act in a manner inconsistent with the decision of the D.C. Circuit. However, EPA does not think it is appropriate in today's action to rescind its limited disapproval of Kentucky's regional haze SIP. Notably, as explained in EPA's proposal notice related to Kentucky's 2008 8-hour ozone infrastructure action, EPA does not believe that rescinding the Agency's previous limited disapproval of Kentucky's regional haze SIP is necessary to support a full approval of the visibility components of 110(a)(2)(D)(i)(I) and 110(a)(2)(J) for Kentucky's 2008 8-hour ozone infrastructure SIP. Moreover, EPA has not proposed to rescind the Agency's previous limited disapproval, which would be an appropriate procedural step prior to rescinding that disapproval.

Comment 10: One Commenter contends that "EPA must disapprove the infrastructure SIP because it does not contain the 2008 ozone NAAQS." In support of this contention, the Commenter points to a table codified at 401 KAR 53:010, as evidence that Kentucky's ozone limits "remain at levels set in 1997."

Response 10: EPA does not agree with the Commenter's assertion that Kentucky's 2008 8-hour ozone infrastructure SIP should be disapproved because "it does not contain the 2008 8-hour ozone NAAQS." In response to this comment, EPA has investigated the facts concerning the table in question. EPA acknowledges that the table in Appendix A to 401 KAR 53:010 pointed to by the Commenter currently does not list the 2008 8-hour ozone NAAQS. However, EPA does not believe that the out-of-date table indicates that the Kentucky SIP does not adequately address infrastructure requirements for the 2008 8-hour ozone NAAQS.

The Commonwealth's infrastructure SIP submission explicitly stated that it was submitted to address the 2008 8-hour ozone NAAQS. Within that submission, the Commonwealth indicated that its existing provisions are appropriate for purposes of the 2008 8-hour ozone NAAQS. EPA considers this to be accurate, based upon the specific contents of the infrastructure SIP submission for various elements of section 110(a)(2). For example, Kentucky's applicable permitting regulations define a "regulated NSR pollutant" as "[a] pollutant for which a national ambient air quality standard has been promulgated* * *." 401 KAR 51:001(207). In assessing permits issued by the Commonwealth, EPA routinely interprets the "for which a national

ambient air quality standard has been promulgated" language in the Kentucky SIP as referring to the current federally-promulgated NAAQS. EPA notes that in practice the Commonwealth is also addressing the 2008 8-hour ozone NAAQS.[10]

Finally, EPA understands that the Commonwealth has initiated action to update the out-of-date table cited by the Commenter to eliminate any ambiguity or confusion regarding this point. In consultation with the Commonwealth, EPA's understanding is that the Commonwealth is in the process of updating the table to reflect the current NAAQS. EPA believes that, with correction of the table, there should be no misunderstandings concerning the fact that the Commonwealth's SIP is designed to address the 2008 8-hour ozone NAAQS in accordance with the requirements of section 110(a)(1) and (2). As such, EPA does not agree that Kentucky's infrastructure SIP submission must be disapproved as a result of the out-of-date table cited by the Commenter.

Comment 11: One Commenter contends that EPA cannot determine that the Kentucky SIP provides the necessary assurances required by section 110(a)(2)(E)(i) that the Commonwealth will have adequate personnel, funding and authority under state law to carry out its implementation plan given (in the Commenter's opinion) that Kentucky's infrastructure SIP fails to adequately address the significant and important requirements of element (D)(i).

Response 11: EPA does not agree. Section 110(a)(2)(E)(i) requires that the SIP provide "necessary assurances that the State * * * will have adequate personnel, funding, and authority under State * * * law to carry our such implementation plan * * *." As described in the proposal for today's action, Kentucky has submitted information to demonstrate that DAQ is responsible for promulgating rules and regulations for the NAAQS, emissions standards, general policies, a system of permits, fee schedules for the review of plans and other planning needs. In addition, EPA noted the March 14, 2012, Agency letter to DAQ outlining the current status of grant commitments for 2011, each of which have since been finalized. Finally, the proposed rule for today's action described that Kentucky's personnel, funding, and legal authority to carry out the Commonwealth's implementation plan is included with all prehearings and final SIP submittals to EPA. Based upon this information EPA proposed to approve Kentucky's infrastructure submission for purposes of the 2008 8-hour ozone NAAQS. The Commenter does not refute these facts.

While the Commenter is correct in asserting that Kentucky's infrastructure SIP presently fails to address section 110(a)(2)(D)(i)(I) for the 2008 8-hour ozone NAAQS, it is incorrect to conclude that such failure must result in a disapproval of section 110(a)(2)(E)(i). EPA does not view the satisfaction of section 110(a)(2)(D)(i)(I) requirements as germane to an evaluation of whether a state has met its obligations under section 110(a)(2)(E)(i). Rather, EPA interprets section 110(a)(2)(E)(i) as requiring that the state have adequate authority under statutes, rules, and regulations to carry out applicable SIP obligations with respect to the relevant NAAQS. *See* 40 CFR Part 51, Subparts L and O.

As described above, EPA's disapproval of the Kentucky infrastructure SIP as it relates to the section 110(a)(2)(D)(i)(I) transport requirements is based upon the Commonwealth's reliance upon CAIR to satisfy the interstate transport obligations of a NAAQS which CAIR did not address. The fact that this portion of the SIP cannot be approved, however, does not in any way demonstrate a deficiency in the underlying authority of the Kentucky DAQ to promulgate rules and regulations to address these requirements. The Commenter provided no information to suggest that Kentucky lacks the personnel, authority to address the interstate transport requirements.

Comment 12: One Commenter asserts that EPA must disapprove Kentucky's infrastructure SIP related to section 110(a)(2)(J) (127 public notice requirements) because in the Commenter's opinion Kentucky does not provide public notification of 2008 8-hour ozone NAAQS violations in areas beyond Oldham and Jefferson counties. Specifically, the Commenter indicates that the state agency does not notify the public of 2008 8-hour ozone violations in counties that are currently designated attainment for the 1-hour and 1997 8-hour standards (i.e., all counties but Jefferson and Oldham).

Response 12: EPA does not agree with the Commenter's assertion that EPA must disapprove Kentucky's infrastructure SIP submission as it relates to the section 110(a)(2)(J) requirements for public notification because the SIP does not provide for public notification of 2008 8-hour ozone NAAQS violations.

First the Commenter fails to note the distinction between exceeding the ozone NAAQS and violating the ozone NAAQS. Under the CAA, there is a clear distinction between a violation and an exceedance of an ambient air quality standard.[11] Pursuant to the public notification requirements of section 110(a)(2)(J), states are not required to notify the public of NAAQS *violations* as suggested by the Commenter. Instead, states are required "to notify the public during any calendar [year] on a regular basis of instances or areas in which any national primary ambient air quality standard *is exceeded or was exceeded* during any portion of the preceding calendar year * * *" (emphasis added). *See* 42 U.S.C. 7427.

Second, the Commenter is mistaken because the Commonwealth does notify the public regarding ambient air quality in Kentucky, including exceedances of the standard. As described in the proposal for today's action, notification to the public regarding exceedances is accomplished through Kentucky DAQ's Web site at *http://air.ky.gov/Pages/AirQualityIndexMonitoring.aspx*, which provides real time monitoring data for all of the Commonwealth's ozone monitors and provides access to Air Quality Index (AQI) information.[12] In addition, Kentucky's Web site also provides information related to health considerations based on the concentration of the pollutants in the air and information related to ways the public can help reduce air pollution. EPA has determined that that this method of notify the public of ambient quality is sufficient to meet Kentucky's infrastructure SIP obligations described at section 110(a)(2)(J) regarding public notification.

Finally, EPA also notes that this comment presupposes that there have

[10] For example, EPA is currently reviewing the Suncoke Energy PSD Application (PSD–KY–265), which was submitted to DAQ on December 7, 2012, and received by EPA for review February 7, 2013. The terms of this application reflect the 2008 8-hour ozone standard as the applicable NAAQS.

[11] An exceedance occurs when monitored ozone concentrations exceed the NAAQS. Ozone is collected as an hourly average of continuous data and, in the context of the 2008 8-hour ozone NAAQS is then used to determine the daily 8-hour average value. An ozone exceedance occurs when a monitor records an 8-hour averaged ambient level of ozone above the standard, in this case, above 0.075 parts per million (ppm). A violation of an ozone standard (as opposed to an exceedance) is based on 3-year averages of data. Violations of the 8-hour standard are determined using the annual 4th-highest daily maximum 8-hour ozone value at each monitor. A violation requires a 3-year average of the annual 4th-highest daily maximum 8-hour value that is greater than 0.075 ppm.

[12] EPA notes that Kentucky provides this information for monitors through the Commonwealth, and that the locations of the monitors are included in the Commonwealth's approved network monitoring plan. Thus this information is available for appropriate locations throughout the state.

been violations of the 2008 ozone NAAQS based on 2010 to 2012 design values which have yet to be certified. Although the Kentucky DAQ maintains the above-referenced Web site with real time monitoring data for the Commonwealth's ozone monitors, Kentucky is not required to certify each year's data until April 1, 2013. As such, until the 2012 data referenced by the Commenter is certified, it remains preliminary and EPA does not view a NAAQS violation as having occurred. Consequently, the Commenter's reference to data not-yet-certified is premature.[13]

III. This Action

In this rulemaking, EPA is taking final action to approve Kentucky DAQ's infrastructure submission as demonstrating that the Commonwealth meets the applicable requirements of sections 110(a)(1) and (2) of the CAA for the 2008 8-hour ozone NAAQS, with the exception of section 110(a)(2)(D)(i)(I) concerning interstate transport, and sections 110(a)(2)(C), prong 3 of 110(a)(2)(D)(i), and 110(a)(2)(J) pertaining to structural PSD requirements.

With respect to section 110(a)(2)(D)(i)(I), which pertains to interstate transport, EPA is taking final action to disapprove this portion of Kentucky DAQ's infrastructure SIP for the 2008 8-hour ozone NAAQS.

With respect to sections 110(a)(2)(C), prong 3 of 110(a)(2)(D)(i), and 110(a)(2)(J), EPA is finalizing conditional approval for this portion of Kentucky DAQ's infrastructure SIP for the 2008 8-hour ozone NAAQS. Today's final action to conditionally approve of these portions of sections 110(a)(2)(C), prong 3 of 110(a)(2)(D)(i), and 110(a)(2)(J) specifically related to the structural PSD requirements is based upon a December 19, 2012, commitment letter submitted by Kentucky DAQ to EPA. The Commonwealth's December 19, 2012, letter can be accessed at *www.regulations.gov* using Docket ID No. EPA–R04–OAR–2012–0700. Through this letter, Kentucky DAQ, committed to adopt specific enforceable measures to address current deficiencies in its SIP related to the structural PSD requirements of the PSD and NNSR requirements related to the implementation of the NSR $PM_{2.5}$ Rule and the $PM_{2.5}$ PSD Increment-SILs-SMC Rule (only as it relates to $PM_{2.5}$ Increments). This commitment letter meets the requirements of section 110(k)(4) of the CAA, and as such, EPA is relying upon this commitment to conditionally approve sections 110(a)(2)(C), prong 3 of 110(a)(2)(D)(i), and 110(a)(2)(J). For more information, see EPA's proposal for today's rulemaking. *See* 78 FR 3867.

Accordingly, for purposes of today's conditional approval sections 110(a)(2)(C), prong 3 of 110(a)(2)(D)(i), and 110(a)(2)(J) as it relates to the structural PSD requirements, Kentucky DAQ must submit to EPA by March 10, 2014, a SIP revision adopting the specific enforceable measures as described in the Commonwealth's commitment letter described above. If the Commonwealth fails to actually submit this revision by March 10, 2014, today's conditional approval will automatically become a disapproval for the 2008 8-hour ozone NAAQS.

IV. Final Action

EPA is taking final action to approve most elements contained in Kentucky DAQ's infrastructure SIP submission made by the Commonwealth on September 8, 2009, as revised on July 17, 2012, because it addresses the required infrastructure elements for the 2008 8-hour ozone NAAQS with exception of sections 110(a)(2)(C), prong 3 of 110(a)(2)(D)(i), and 110(a)(2)(J) as they relate to structural PSD requirements, and section 110(a)(2)(D)(i)(I) as it relates to interstate transport. With the exceptions noted above Kentucky DAQ has addressed the elements of the CAA 110(a)(1) and (2) SIP requirements pursuant to section 110 of the CAA to ensure that the 2008 8-hour ozone NAAQS are implemented, enforced, and maintained in Kentucky.

With respect to section 110(a)(2)(D)(i)(I) specifically pertaining interstate transport, EPA is finalizing disapproval for this portion of Kentucky DAQ's infrastructure SIP for the 2008 8-hour ozone NAAQS.

With respect to sections 110(a)(2)(C), prong 3 of 110(a)(2)(D)(i), and 110(a)(2)(J) as they relate to the structural PSD requirements of the PSD and NNSR requirements related to the implementation of the NSR $PM_{2.5}$ Rule and the $PM_{2.5}$ PSD Increment-SILs-SMC Rule (only as it relates to $PM_{2.5}$ Increments), EPA is taking final action to conditionally approve the Commonwealth's infrastructure SIP in part, based on an December 19, 2012, commitment that Kentucky DAQ will adopt specific enforceable measures related to the structural PSD requirements detailed above into its SIP and submit these revisions to EPA by March 10, 2014. If the Commonwealth fails to actually submit these revisions by the applicable dates described above, today's conditional approval(s) will automatically be disapproved on that date.

V. Statutory and Executive Order Reviews

Under the CAA, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, EPA's role is to approve state choices, provided that they meet the criteria of the CAA. Accordingly, this action merely approves state law as meeting federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this action:

- Is not a "significant regulatory action" subject to review by the Office of Management and Budget under Executive Order 12866 (58 FR 51735, October 4, 1993);
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- Does not have Federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- Is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the CAA; and
- Does not provide EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using

[13] EPA also wishes to clarify that Commenter incorrectly indicates that all counties aside from Jefferson and Oldham are designated attainment for the 2008 8-hour ozone NAAQS. There are also three partial counties in Northern Kentucky (i.e., Boone, Campbell and Kenton) are designated nonattainment for the 2008 8-hour ozone NAAQS as part of the Cincinnati-Hamilton Nonattainment Area. The Campbell County monitor referred to by the Commenter is included in the 2008 8-hour ozone nonattainment area and is not in area designated attainment as suggested by one Commenter. *See* 77 FR 30088.

practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

In addition, this rule does not have tribal implications as specified by Executive Order 13175 (65 FR 67249, November 9, 2000), because the SIP is not approved to apply in Indian country located in the state, and EPA notes that it will not impose substantial direct costs on tribal governments or preempt tribal law.

The Congressional Review Act, 5 U.S.C. 801 *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this action and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a "major rule" as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the CAA, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by May 6, 2013. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. *See* section 307(b)(2).

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Incorporation by reference, Intergovernmental relations, Nitrogen dioxide, Ozone, Reporting and recordkeeping requirements, Volatile organic compounds.

Dated: March 1, 2013.

A. Stanley Meiburg

Acting Regional Administrator, Region 4.

40 CFR part 52 is amended as follows:

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

■ 1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

Subpart S—Kentucky

■ 2. Section 52.919 is amended by designating the existing undesignated paragraph as paragraph (a) and adding paragraph (b) to read as follows:

§ 52.919 Identification of plan-conditional approval.

(a) * * *

(b) Conditional Approval—Submittal from the Commonwealth of Kentucky, through the Division of Air Quality (DAQ) of the Kentucky Energy and Environment Cabinet, dated December 19, 2012, to address the Clean Air Act (CAA) sections 110(a)(2)(C), prong 3 of 110(a)(2)(D)(i), and 110(a)(2)(J) for the 2008 8-hour Ozone National Ambient Air Quality Standards. With respect to CAA sections 110(a)(2)(C), prong 3 of 110(a)(2)(D)(i), and 110(a)(2)(J), the Commonwealth must submit to EPA by March 10, 2014, SIP revisions adopting specific enforceable measures related the structural PSD requirements of the PSD and NNSR requirements related to the implementation of the NSR $PM_{2.5}$ Rule and the $PM_{2.5}$ PSD Increment-SILs-SMC Rule (only as it relates to $PM_{2.5}$ Increments) as described in the Commonwealth's commitment letter.

■ 3. In § 52.920, the table in paragraph (e) is amended by adding a new entry "110(a)(1) and (2) Infrastructure Requirements for the 2008 8-Hour Ozone National Ambient Air Quality Standards" at the end of the table to read as follows:

§ 52.920 Identification of plan.

* * * * *

(e) * * *

EPA-APPROVED KENTUCKY NON-REGULATORY PROVISIONS

Name of non-regulatory SIP provision	Applicable geographic or non-attainment area	State submittal date/effective date	EPA approval date	Explanations
*	*	*	*	*
110(a)(1) and (2) Infrastructure Requirements for the 2008 8-Hour Ozone National Ambient Air Quality Standards.	Commonwealth of Kentucky.	7/17/2012	3/7/2013 ..... [Insert citation of publication].	With the exception of section 110(a)(2)(D)(i)(I) concerning interstate transport which is being disapproved and, the portions of sections 110(a)(2)(C), prong 3 of 110(a)(2)(D)(i), and 110(a)(2)(J) related to structural PSD requirements, which are being conditionally approved.

■ 4. Section 52.930 is amended by adding paragraph (l) to read as follows:

§ 52.930 Control strategy: Ozone.

* * * * *

(l) *Disapproval.* EPA is disapproving in part, the Commonwealth of Kentucky's Infrastructure SIP for the 2008 8-hour Ozone National Ambient Air Quality Standards addressing section 110(a)(2)(D)(i)(I) concerning interstate transport requirements, submitted July 17, 2012.

Medicare Program; Extension of the Payment Adjustment for Low-volume Hospitals and the Medicare-dependent Hospital (MDH) Program Under the Hospital Inpatient Prospective Payment Systems (IPPS) for Acute Care Hospitals for Fiscal Year 2013

AGENCY: Centers for Medicare & Medicaid Services (CMS), HHS.

ACTION: Notice of extension.

SUMMARY: This notice announces changes to the payment adjustment for low-volume hospitals and to the Medicare-dependent hospital (MDH) program under the hospital inpatient prospective payment systems (IPPS) for FY 2013 in accordance with sections 605 and 606, respectively, of the American Taxpayer Relief Act of 2012.

DATES: *Effective date:* March 4, 2013. *Applicability dates:* The provisions described in this notice are applicable for discharges on or after October 1, 2012 and on or before September 30, 2013.

FOR FURTHER INFORMATION CONTACT:
Michele Hudson, (410) 786–5490.
Maria Navarro, (410) 786–4553.
Shevi Marciano, (410) 786–2874.

SUPPLEMENTARY INFORMATION:

I. Background

On January 2, 2013, the American Taxpayer Relief Act of 2012 (ATRA) (Pub. L. 112–240) was enacted. Section 605 of the ATRA extends changes to the payment adjustment for low-volume hospitals for an additional year, through fiscal year (FY) 2013. Section 606 of the ATRA extends the Medicare-dependent hospital (MDH) program for an additional year, through FY 2013.

II. Provisions of the Notice

A. Extension of the Payment Adjustment for Low-Volume Hospitals

1. Background

Section 1886(d)(12) of the Social Security Act (the Act) provides for an additional payment to each qualifying low-volume hospital under the hospital inpatient prospective payment systems (IPPS) beginning in FY 2005. Sections 3125 and 10314 of the Affordable Care Act provided for a temporary change in the low-volume hospital payment policy for FYs 2011 and 2012. Prior to the enactment of the ATRA, beginning with FY 2013, the low-volume hospital qualifying criteria and payment adjustment returned to the statutory requirements under section 1886(d)(12) of the Act that were in effect prior to the amendments made by the Affordable Care Act. (For additional information on the expiration of the provisions of the Affordable Care Act that amended the low-volume hospital adjustment at section 1886(d)(12) of the Act, we refer readers to the FY 2013 IPPS/LTCH PPS final rule (77 FR 53406 through 53408).) The regulations describing the payment adjustment for low-volume hospitals are at 42 CFR 412.101.

2. Low-Volume Hospital Payment Adjustment for FYs 2011 and 2012

For FYs 2011 and 2012, sections 3125 and 10314 of the Affordable Care Act expanded the definition of low-volume hospital and modified the methodology for determining the payment adjustment for hospitals meeting that definition. Specifically, the provisions of the Affordable Care Act amended the qualifying criteria for low-volume hospitals under section 1886(d)(12)(C)(i) of the Act to specify that, for FYs 2011 and 2012, a hospital qualifies as a low-volume hospital if it is more than 15 road miles from another subsection (d) hospital and has less than 1,600 discharges of individuals entitled to, or enrolled for, benefits under Part A during the fiscal year. In addition, section 1886(d)(12)(D) of the Act, as added by the Affordable Care Act, provides that the low-volume hospital payment adjustment (that is, the percentage increase) is to be determined "using a continuous linear sliding scale ranging from 25 percent for low-volume hospitals with 200 or fewer discharges of individuals entitled to, or enrolled for, benefits under Part A in the fiscal year to zero percent for low-volume hospitals with greater than 1,600 discharges of such individuals in the fiscal year."

We revised the regulations at 42 CFR 412.101 to reflect the changes to the qualifying criteria and the payment adjustment for low-volume hospitals according to the provisions of the Affordable Care Act in the FY 2011 IPPS/LTCH PPS final rule (75 FR 50238 through 50275 and 50414). In addition, we also defined, at § 412.101(a), the term "road miles" to mean "miles" as defined at § 412.92(c)(1), and clarified the existing regulations to indicate that a hospital must continue to qualify as a low-volume hospital in order to receive the payment adjustment in that year (that is, it is not based on a one-time qualification). Furthermore, in that same final rule, we discussed the process for requesting and obtaining the low-volume hospital payment adjustment for FY 2011 (75 FR 50240). For the second year of the changes to the low-volume hospital adjustment provided for by the provisions of the Affordable Care Act (that is, FY 2012), consistent with the regulations at § 412.101(b)(2)(ii), we updated the discharge data source used to identify qualifying low-volume hospitals and calculate the payment adjustment (percentage increase) in the FY 2012 IPPS/LTCH PPS final rule (76 FR 51677 through 51680). Under § 412.101(b)(2)(ii), for FYs 2011 and 2012, a hospital's Medicare discharges from the most recently available MedPAR data, as determined by CMS, are used to determine if the hospital meets the discharge criteria to receive the low-volume payment adjustment in the current year. In that same final rule, we established that, for FY 2012, qualifying low-volume hospitals and their payment adjustment are determined using Medicare discharge data from the March 2011 update of the FY 2010 MedPAR file, as these data were the most recent data available at that time. In addition, we noted that eligibility for the low-volume payment adjustment for FY 2012 was also dependent upon meeting (if the hospital was qualifying for the low-volume payment adjustment for the first time in FY 2012), or continuing to meet (if the hospital qualified in FY 2011) the mileage criteria specified at § 412.101(b)(2)(ii). Furthermore, we established a procedure for a hospital to request low-volume hospital status for FY 2012 (which was consistent with the process we employed for the low-volume hospital payment adjustment for FY 2011).

APPENDIX A-4
79 FR 65143
November 3, 2014

end of the effective period of this temporary deviation. This deviation from the operating regulations is authorized under 33 CFR 117.35.

Dated: October 22, 2014.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R04–OAR–2013–0486; FRL–9918–68–Region–4]

Approval and Promulgation of Implementation Plans; Commonwealth of Kentucky: New Source Review for Fine Particulate Matter

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: The Environmental Protection Agency (EPA) is taking final action to approve a revision to the Kentucky State Implementation Plan (SIP), submitted by the Commonwealth of Kentucky, through the Kentucky Division for Air Quality (KDAQ) to EPA on January 31, 2013. The SIP revision modifies the Commonwealth's New Source Review (NSR), Prevention of Significant Deterioration (PSD), and Nonattainment New Source Review (NNSR) regulations to adopt into the Kentucky SIP Federal NSR permitting requirements for the implementation of the fine particulate matter ($PM_{2.5}$) national ambient air quality standards (NAAQS). The approved changes in Kentucky's January 31, 2013, SIP submission are necessary to comply with Federal requirements. EPA is approving the Commonwealth's January 31, 2013, revision to the Kentucky SIP because the Agency has determined that the changes are consistent with the Clean Air Act (CAA or Act). Additionally, EPA is converting two conditional approvals related to the PSD infrastructure requirements for the 1997 and 2006 $PM_{2.5}$, and 2008 8-hour Ozone NAAQS to full approval under the CAA.

DATES: This rule will be effective December 3, 2014.

ADDRESSES: EPA has established a docket for this action under Docket Identification No. EPA–R04–OAR–2013–0486. All documents in the docket are listed on the *www.regulations.gov* Web site. Although listed in the index, some information is not publicly available, i.e., Confidential Business Information or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the Internet and will be publicly available only in hard copy form. Publicly available docket materials are available either electronically through *www.regulations.gov* or in hard copy at the Regulatory Development Section, Air Planning Branch, Air, Pesticides and Toxics Management Division, U.S. Environmental Protection Agency, Region 4, 61 Forsyth Street SW., Atlanta, Georgia 30303–8960. EPA requests that if at all possible, you contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section to schedule your inspection. The Regional Office's official hours of business are Monday through Friday, 8:30 a.m. to 4:30 p.m., excluding Federal holidays.

FOR FURTHER INFORMATION CONTACT: For information regarding the Kentucky SIP, contact Mr. David (Brad) Akers, Regulatory Development Section, Air Planning Branch, Air, Pesticides and Toxics Management Division, U.S. Environmental Protection Agency, Region 4, 61 Forsyth Street, SW., Atlanta, Georgia 30303–8960. Telephone number: (404) 562–9089; email address: *akers.david@epa.gov*. For information regarding NSR, contact Ms. Yolanda Adams, Air Permits Section, at the same address above. Telephone number: (404) 562–9214; email address: *adams.yolanda@epa.gov*. For information regarding $PM_{2.5}$ NAAQS, contact Mr. Joel Huey, Regulatory Development Section, at the same address above. Telephone number: (404) 562–9104; email address: *huey.joel@epa.gov*.

SUPPLEMENTARY INFORMATION:

I. Background

EPA is taking final action to approve the Commonwealth of Kentucky's January 31, 2013, SIP revision to adopt Federal requirements for NSR permitting. The Commonwealth's SIP revision makes changes to the regulations in Kentucky's Air Quality Regulations, 401 Kentucky Air Regulations (KAR) 51:001- *Definitions for 401–KAR Chapter 51;* 401 KAR 51:017—*Prevention of significant deterioration of air quality* and 401 KAR 51:052—*Review of new sources in or impacting upon nonattainment areas* to adopt NSR requirements related to the implementation of the $PM_{2.5}$ NAAQS as promulgated in the rulemakings entitled "Implementation of the New Source Review (NSR) Program for Particulate Matter Less Than 2.5 Micrometers," Final Rule, 73 FR 28321 (May 16, 2008) (hereafter referred to as the "NSR $PM_{2.5}$ Rule") and "Prevention of Significant Deterioration (PSD) for Particulate Matter Less Than 2.5 Micrometers ($PM_{2.5}$)—Increments, Significant Impact Levels (SILs) and Significant Monitoring Concentration (SMC)," Final Rule, 75 FR 64864 (October 20, 2010) (hereafter referred to as the "$PM_{2.5}$ PSD Increments-SILs-SMC Rule"). The Commonwealth must make this SIP revision to comply with Federal NSR permitting regulations at 40 CFR 51.166 and 51.165. Originally, the Commonwealth included SILs and SMC thresholds in the January 31, 2013, SIP submission, consistent with the October 20, 2010, $PM_{2.5}$ PSD Increments-SILs-SMC Rule. However, EPA cannot act on SILs or SMC provisions due to the January 22, 2013, decision by the D.C. Circuit Court of Appeals vacating the portions of the $PM_{2.5}$ PSD Increment-SILs-SMC Rule addressing the SMC and SILs (and remanding the SILs portion to EPA for further consideration).[1] *See Sierra Club* v. *EPA,* 705 F.3d 458 (D.C. Cir. 2013). Accordingly, Kentucky has since submitted a letter to EPA dated July 22, 2014, requesting that the SILs and SMC provisions from the January 31, 2013, SIP submission be withdrawn from EPA consideration; therefore these provisions are no longer before EPA for consideration. The letter can be found in Docket ID: EPA–R04–OAR–2013–0486.

Additionally, the Commonwealth's January 31, 2013, SIP submission satisfies EPA's multiple conditional approvals of the PSD-related requirements for sections 110(a)(2)(C), 110(a)(2)(D)(i)(II) and 110(a)(2)(J) of Kentucky's infrastructure SIPs for the 1997 and 2006 $PM_{2.5}$, and 2008 8-hour Ozone NAAQS. As a result, EPA is acting to convert from conditional approval to full approval KDAQ's infrastructure requirements related to its PSD program.

On July 23, 2014, EPA published a proposed rulemaking to approve the aforementioned changes to the Commonwealth's NSR program at 401

[1] On January 22, 2013, D.C. Circuit granted a request from EPA to vacate and remand to the Agency the portions of the October 20, 2010 rule addressing the SILs for $PM_{2.5}$, except for the parts codifying the $PM_{2.5}$ SILs in the NSR rule at 40 CFR 51.165(b)(2), so that the EPA could voluntarily correct an error in the provisions. *See Sierra Club v. EPA,* 705 F.3d 458 at 463–66 (D.C. Cir. 2013). The Court also vacated parts of the $PM_{2.5}$ PSD Increment-SILs-SMC Rule establishing the $PM_{2.5}$ SMC, finding that the Agency had exceeded its statutory authority with respect to these provisions. Id at 469. On December 9, 2013, EPA issued a final rulemaking to remove the vacated and remanded $PM_{2.5}$ SILs and the vacated $PM_{2.5}$ SMC provisions from 40 CFR 51.166 and 52.21. *See* 78 FR 73698.

KAR 51:001, 401 KAR 51:017 and 401 KAR 51:052, and to convert multiple conditional approvals for the Commonwealth's infrastructure SIP for the 1997 and 2006 $PM_{2.5}$, and 2008 8-hour Ozone NAAQS. *See* 79 FR 42745. Comments on the proposed rulemaking were due on or before August 22, 2014. No comments, adverse or otherwise, were received on EPA's July 23, 2014, proposed rulemaking. Pursuant to section 110 of the CAA, EPA is now taking final action to approve the changes to the Commonwealth's NSR program as provided in EPA's July 23, 2014, proposed rulemaking. EPA's July 23, 2014, proposed rulemaking contains more detailed information regarding the Commonwealth's SIP revision being approved today, and the rationale for today's final action. Detailed information regarding the $PM_{2.5}$ NAAQS and NSR Program can also be found in EPA's July 23, 2014, proposed rulemaking as well as the aforementioned final rulemakings. *See* 79 FR 42745 (July 23, 2014), 73 FR 28321 (May 16, 2008) and 75 FR 64864 (October 20, 2010), respectively.

A. NSR $PM_{2.5}$ Implementation Rule

On May 16, 2008, EPA finalized the NSR $PM_{2.5}$ Rule to implement the $PM_{2.5}$ NAAQS for the NSR permitting program. *See* 73 FR 28321. The NSR $PM_{2.5}$ Rule revised the Federal NSR program requirements to establish the framework for implementing preconstruction permit review for the $PM_{2.5}$ NAAQS in both attainment areas and nonattainment areas (NAAs) that: (1) Required NSR permits to address directly emitted $PM_{2.5}$ and certain precursor pollutants; (2) established significant emission rates for direct $PM_{2.5}$ and precursor pollutants (including sulfur dioxide (SO_2) and nitrogen oxides (NOx)); (3) established NNSR $PM_{2.5}$ emission offsets; and (4) required states to account for gases that condense to form particles (condensables) in $PM_{2.5}$ and PM_{10} applicability determinations and emission limits in PSD and NNSR permits; and (5) provided a grandfathering provision in the federal program for certain pending $PM_{2.5}$ permit applications. Additionally, the NSR $PM_{2.5}$ Rule authorized states to adopt provisions in their NNSR rules that would allow interpollutant offset trading.[2] The Commonwealth's January 31, 2013, SIP revision addresses a portion of the PSD and NNSR provisions established in EPA's May 16, 2008 NSR $PM_{2.5}$ Rule.

1. $PM_{2.5}$ Implementation Rule(s) Litigation

On January 4, 2013, the United States Court of Appeals for the District of Columbia Circuit issued a judgment[3] that remanded EPA's April 25, 2007[4] and May 16, 2008 $PM_{2.5}$ implementation rules implementing the 1997 $PM_{2.5}$ NAAQS. *See Natural Resources Defense Council* v. *EPA*, 706 F.3d 428 (D.C. Cir. 2013). The court found that because the statutory definition of PM_{10} (see section 302(t) of the CAA) included particulate matter with an aerodynamic diameter less than or equal to 10 micrometers, it necessarily includes $PM_{2.5}$. EPA had developed the 2007 and 2008 (or NSR $PM_{2.5}$ Rule) rules consistent with the general NAA requirements of subpart 1 of Part D, title I, of the CAA. Relative to subpart 1, subpart 4 of Part D, title I includes additional provisions that apply to PM_{10} NAA and is more specific about what states must do to bring areas into attainment. In particular, subpart 4 includes section 189(e) of the CAA, which requires the control of major stationary sources of PM_{10} precursors (and hence under the court decision, $PM_{2.5}$ precursors) "except where the Administrator determines that such sources do not contribute significantly to PM_{10} levels which exceed the standard in the area." The court ordered EPA to repromulgate the implementation rules pursuant to subpart 4.

Subpart 4 pertains exclusively to particulate matter NAA, and the Court did not address EPA's implementation of the $PM_{2.5}$ NAAQS under part C or the PSD program. Thus, EPA does not interpret the court's decision as affecting implementation of the PSD requirements established in the May 16, 2008 NSR $PM_{2.5}$ Rule and does not anticipate the need to revise any PSD requirements promulgated in the NSR $PM_{2.5}$ Rule in order to comply with the court's decision.

On June 2, 2014, EPA published a final rule[5] which, in part, sets a December 31, 2014 deadline for states to make any remaining required attainment-related and NNSR SIP submissions, pursuant to and considering the application of subpart 4. *See* 79 FR 31566. The Court's January 4, 2013 decision can be found in the docket for today's final rulemaking using Docket ID: EPA–R04–OAR–2013–0486.

2. "Condensable PM" Correction

In the NSR $PM_{2.5}$ Rule, EPA revised the definition of "*regulated NSR pollutant*" for PSD to add a paragraph providing that "particulate matter (PM) emissions, $PM_{2.5}$ emissions and PM_{10} emissions shall include gaseous emissions from a source or activity which condense to form particulate matter at ambient temperatures" and that on or after January 1, 2011, "such condensable particulate matter shall be accounted for in applicability determinations and in establishing emissions limitations for PM, $PM_{2.5}$ and PM_{10} in permits." *See* 73 FR 28321 at 28348. A similar paragraph added to the NNSR rule does not include "particulate matter (PM) emissions." *See* 40 CFR 51.165(a)(1)(xxxvii)(D).

On October 25, 2012, EPA took final action to amend the definition of "*regulated NSR pollutant*" promulgated in the NSR $PM_{2.5}$ Rule regarding the PM condensable provision at 40 CFR 51.166(b)(49)(vi), 52.21(b)(50)(i) and EPA's Emissions Offset Interpretative Ruling. *See* 77 FR 65107. The rulemaking removed the inadvertent requirement in the NSR $PM_{2.5}$ Rule that the measurement of condensable particulate matter be included as part of the measurement and regulation of "*particulate matter emissions.*" The term "*particulate matter emissions*"

[2] The Commonwealth's January 31, 2013 SIP submission did not adopt the NNSR interpollutant offset trading provisions EPA codified at 51.165(a)(11). The preferred trading ratios announced in the rule preamble were the subject of a petition to reconsider which was granted by the Administrator. As a result of the reconsideration, EPA issued a memorandum on June 20, 2011, providing that the ratios were no longer supported by the agency as being presumptively approvable for adoption in SIP's containing NNSR programs for $PM_{2.5}$. *See* EPA's June 20, 2011 Memorandum entitled "Revised Policy to Address Reconsideration of Interpollutant Trading Provisions for Fine Particles ($PM_{2.5}$)" at *http://www.epa.gov/nsr/guidance.html.*

[3] The Natural Resources Defense Council, Sierra Club, American Lung Association, and Medical Advocates for Healthy Air challenged before the D.C Circuit EPA's April 25, 2007 (72 FR 20586) Rule entitled "Clean Air Fine Particle Implementation Rule," that established detailed implementation regulations to assist states with the development of SIPs to demonstrate attainment for the 1997 annual and 24-hour $PM_{2.5}$ NAAQS and the separate May 16, 2008 NSR $PM_{2.5}$ Rule (the subject of today's proposed rulemaking). Today's final rulemaking only pertains to the impacts of the court's decision on the May 16, 2008 NSR $PM_{2.5}$ Rule and not the April 25, 2007 implementation rule as the Commonwealth's January 31, 2013 SIP revision adopts the NSR permitting provisions established in the NSR $PM_{2.5}$ Rule.

[4] "Clean Air Fine Particle Implementation Rule" (hereafter referred to as the 2007 Rule); Final Rule, 72 FR 20586 (April 25, 2007).

[5] The final rule is entitled "Identification of Nonattainment Classification and Deadlines for Submission of State Implementation Plan (SIP) Provisions for the 1997 Fine Particle ($PM_{2.5}$) National Ambient Air Quality Standard (NAAQS) and 2006 $PM_{2.5}$ NAAQS." This final rule also identifies the initial classification of current 1997 and 2006 $PM_{2.5}$ nonattainment areas as moderate and the EPA guidance and relevant rulemakings that are currently available regarding implementation of subpart 4 requirements.

includes filterable particles that are larger than $PM_{2.5}$ or PM_{10} and is an indicator measured under various New Source Performance Standards (NSPS) (40 CFR part 60).[6] The Commonwealth's January 31, 2013 SIP revision adopts EPA's definition for *"regulated NSR pollutant"* requiring states to consider condensables (at 40 CFR 51.166(b)(49)(vi)), excluding the term *"particulate matter emissions."*

B. $PM_{2.5}$ PSD-Increment-SILs-SMC Rule

The October 20, 2010, final rulemaking established $PM_{2.5}$ increments pursuant to section 166(a) of the CAA to prevent significant deterioration of air quality in areas meeting the NAAQS. Today's action pertains only to the $PM_{2.5}$ increments (and relevant related implementing provisions) promulgated in the October 20, 2010, rule. The Commonwealth's January 31, 2013, SIP revision adopts the PSD increment provisions promulgated in the $PM_{2.5}$ PSD Increments-SILs-SMC Rule to be consistent with the Federal NSR regulations and to appropriately implement the Commonwealth's NSR program for the $PM_{2.5}$ NAAQS.

As established in part C of title I of the CAA, EPA's PSD program protects public health from adverse effects of air pollution by ensuring that construction of new or modified sources in attainment or unclassifiable areas does not lead to significant deterioration of air quality, while simultaneously ensuring that economic growth will occur in a manner consistent with preservation of clean air resources. Under section 165(a)(3) of the CAA, a PSD permit applicant must demonstrate that emissions from the proposed construction and operation of a facility "will not cause, or contribute to, air pollution in excess of any maximum allowable increase or allowable concentration for any pollutant." In other words, when a source applies for a permit to emit a regulated pollutant in an area that is designated as attainment or unclassifiable for a NAAQS, the state and EPA must determine if emissions of the regulated pollutant from the source will cause significant deterioration in air quality. Significant deterioration occurs when the amount of the new pollution exceeds the applicable PSD increment, which is the "maximum allowable increase" of an air pollutant allowed to occur above the applicable baseline concentration [7] for that pollutant.[8]

As described in the $PM_{2.5}$ PSD Increments-SILs-SMC Rule, and pursuant to the authority under section 166(a) of the CAA, EPA promulgated numerical increments for $PM_{2.5}$ as a new pollutant [9] for which NAAQS were established after August 7, 1977,[10] and derived 24-hour and annual $PM_{2.5}$ increments for the three area classifications (Class I, II and III). *See* 75 FR 64864 at 64869 and the ambient air increment table at 40 CFR 51.166(c)(1) and 52.21(c). In addition to establishing PSD increments for the $PM_{2.5}$ NAAQS, the $PM_{2.5}$ PSD Increments-SILs-SMC Rule amended the definition at 40 CFR 51.166 and 52.21 for "major source baseline date" and "minor source baseline date" (including trigger dates) to establish the $PM_{2.5}$ NAAQS specific dates associated with the implementation of $PM_{2.5}$ PSD increments. *See* 75 FR 64864. As discussed above, the Commonwealth's January 31, 2013, SIP revision adopts the $PM_{2.5}$ PSD increment permitting requirements, including the implementing regulations discussed above, promulgated in the $PM_{2.5}$ PSD Increments-SILs-SMC Rule.

C. EPA's Conversion of Conditional Approvals for the Commonwealth's Infrastructure SIP

In addition to adopting required NSR permitting regulations for the implementation of the $PM_{2.5}$ NAAQS, the Commonwealth's January 31, 2013, SIP revision also satisfies EPA's conditional approval of the Commonwealth's 1997 annual and 2006 24-hour $PM_{2.5}$, and 2008 8-hour Ozone 110(a)(2) infrastructure SIPs [11] with respect to the PSD-related requirements [12] of sections 110(a)(2)(C), 110(a)(2)(D)(i)(II) (prong 3) and 110(a)(2)(J) of the CAA. Kentucky submitted multiple SIP submissions to EPA for approval to address the 110(a)(2) infrastructure SIP requirements for the 1997 annual and 2006 24-hour $PM_{2.5}$ NAAQS (August 26, 2008 and July 17, 2012, respectively), and the 2008 8-hour Ozone NAAQS (July 7, 2012).

On July 3, 2012, Kentucky submitted a letter requesting that EPA conditionally approve the Commonwealth's infrastructure SIP submissions with respect to PSD-related requirements for sections 110(a)(2)(C) and 110(a)(2)(J) for the 1997 and 2006 $PM_{2.5}$ NAAQS.[13] Additionally, the

[6] In addition to the NSPS for PM, it is noted that states regulated "particulate matter emissions" for many years in their SIPs for PM, and the same indicator has been used as a surrogate for determining compliance with certain standards contained in 40 CFR part 63, regarding National Emission Standards for Hazardous Air Pollutants.

[7] Section 169(4) of the CAA provides that the baseline concentration of a pollutant for a particular baseline area is generally the air quality at the time of the first application for a PSD permit in the area.

[8] For purposes of calculating increment consumption, a baseline area for a particular pollutant includes the attainment or unclassifiable area in which the source is located as well as any other attainment or unclassifiable area in which the source's emissions of that pollutant are projected (by air quality modeling) to result in an ambient pollutant increase of at least 1 microgram per meter cubed ($\mu g/m^3$) (annual average). *See* 40 CFR 52.21(b)(15)(i).

[9] EPA generally characterized the $PM_{2.5}$ NAAQS as a NAAQS for a new indicator of PM. EPA did not replace the PM_{10} NAAQS with the NAAQS for $PM_{2.5}$ when the $PM_{2.5}$ NAAQS were promulgated in 1997. EPA rather retained the annual and 24-hour NAAQS for PM_{10} (retaining PM_{10} as an indicator of coarse particulate matter),and treated $PM_{2.5}$ as a new pollutant for purposes of developing increments even though EPA had already developed air quality criteria for PM generally. *See* 75 FR 64864 (October 20, 2010).

[10] EPA interprets section 166(a) to authorize EPA to promulgate pollutant-specific PSD regulations meeting the requirements of section 166(c) and 166(d) for any pollutant for which EPA promulgates a NAAQS after 1977.

[11] The CAA requires that each state adopt and submit a SIP for the implementation, maintenance, and enforcement of each NAAQS promulgated by EPA, which is commonly referred to as an "infrastructure" SIP. Pursuant to section 110(a)(1) of the CAA, states are required to submit SIPs meeting the applicable requirements of section 110(a)(2) within three years after promulgation of a new or revised NAAQS or within such shorter period as EPA may prescribe. On July 18, 1997, EPA promulgated the primary 1997 annual and 24-hour $PM_{2.5}$ NAAQS as 15 $\mu g/m^3$ and 65 $\mu g/m^3$ respectively. *See* 62 FR 38652. On October 17, 2006, EPA strengthened the 24-hour $PM_{2.5}$ NAAQS to 35 $\mu g/m^3$. *See* 71 FR 61144. On March 27, 2008, EPA revised the NAAQS for ozone based on an 8-hour average concentrations to 0.075 parts per million (ppm). *See* 73 FR 16436.

[12] There are four separate PSDrelated rulemakings that states are required to adopt and have approved into their SIP in order to maintain a comprehensive SIP-approved PSD permitting program and comply with the PSD and enforcement requirements of 110(a)(2) infrastructure requirements for sections 110(a)(2)(C), (D)(i)(II) and (J) of the CAA. These include: 1) "Final Rule To Implement the 8-Hour Ozone National Ambient Air Quality Standard—Phase 2 Rule; Final Rule" (which codified NOx as an ozone precursor for NSR) (70 FR 71612, November 29, 2005); 2) "Prevention of Significant Deterioration and Title V Greenhouse Gas Tailoring Rule; Final Rule" (75 FR 31514, June 3, 2010) (as consistent with the Supreme Court's decision in *Utility Air Regulatory Group v. Environmental Protection Agency*, 134 S. Ct. 2427 (June 23, 2014)); 3) the NSR $PM_{2.5}$ Rule and; 4) the $PM_{2.5}$ PSD Increment-SILs-SMC Rule (only as it relates to $PM_{2.5}$ Increments). *See* 77 FR 46352 (August 3, 2012), 78 FR 3867 (January 17, 2013) and 77 FR 72291 (December. 5, 2012). Kentucky's January 31, 2013 submission satisfies two of the four required PSD rulemakings mentioned above including the 2008 NSR $PM_{2.5}$ Rule and the $PM_{2.5}$ Increments-SILs-SMC Rule (only as it relates to the PSD increments). EPA approved the remaining PSD requirements for the Greenhouse Gas Tailoring Rule and the Phase 2 Rule on December 29, 2010 (75 FR 81868) and on September 15, 2010 (75 FR 55988), respectively.

[13] EPA also relied upon Kentucky's July 3, 2012 commitment to address the PSD-related requirements as the basis for conditionally approving the Commonwealth's 1997 and 2006 $PM_{2.5}$ NAAQS infrastructure SIPs as they relate to section 110(a)(2)(D)(i)(II). *See* 78 FR 18241 (March

Continued

Commonwealth submitted another correspondence on December 19, 2012, requesting conditional approval for PSD-related requirements of sections 110(a)(2)(C), 110(a)(2)(D)(i)(II) and 110(a)(2)(J) for the 2008 lead and 2008 8-hour Ozone NAAQS infrastructure submissions.[14] Both letters documented the Commonwealth's commitment to adopt and submit the PSD-related provisions needed to comply with sections 110(a)(2)(C), 110(a)(2)(D)(i)(II) (prong 3) and 110(a)(2)(J) all in accordance with section 110(k)(4) of the CAA to ensure a comprehensive PSD program.

EPA took action to approve in part and conditionally approve in part portions of the Commonwealth's infrastructure SIP submissions for the 1997 and 2006 $PM_{2.5}$ NAAQS on October 3, 2012, and March 26, 2013, and for the 2008 8-hour ozone NAAQS on March 7, 2013. *See* 77 FR 60307, 78 FR 18241, and 78 FR 14681, respectively. The Commonwealth's January 31, 2013, SIP revision satisfies the conditions listed in EPA's previous conditional approvals for the infrastructure submissions.

II. This Action

EPA is taking final action to approve into the Kentucky SIP the Commonwealth's January 31, 2013, SIP revision, which adopts the NSR permitting regulations to implement the NSR program for the $PM_{2.5}$ NAAQS. Specifically, the Commonwealth adopts the federal NSR permitting requirements as promulgated in the NSR $PM_{2.5}$ Rule and PSD Increment-SILs-SMC Rule (40 CFR 51.165 and 51.166) at regulations 401 KAR 51:001, 51:017, and 51:052 into the Kentucky SIP. With respect to the NSR $PM_{2.5}$ Rule, the Commonwealth adopts the following: (1) the requirement for PSD and NNSR permits to address directly emitted $PM_{2.5}$ and precursor pollutants (sulfur dioxide (SO_2) and nitrogen oxides (NO_X) (as codified at 40 CFR 51.165(a)(1)(xxxvii)(C) and 51.166(b)(49)); (2) the significant emission rates for direct $PM_{2.5}$ and precursor pollutants (SO_2 and NOx) (as codified at 40 CFR 51.165(a)(1)(x)(A) and 51.166(b)(23)(i)); (3) the NNSR $PM_{2.5}$ emission offsets (as codified at 51.165(9)(i)), and (4) the PSD and NNSR requirement that condensable PM_{10} and $PM_{2.5}$ emissions be accounted for in PSD applicability determinations and in establishing emissions limitations for permitting (as codified at 40 CFR 51.165(a)(1)(xxxvii)(D) and 51.166(b)(49)).

With respect to the PSD Increment-SILs-SMC Rule, the Commonwealth's January 31, 2013, SIP revision adopts the PSD increments for $PM_{2.5}$ annual and 24-hour NAAQS pursuant to section 166(a) of the CAA. Specifically, the SIP revision changes include: 1) the $PM_{2.5}$ increments as promulgated at 40 CFR 51.166(c)(1) and (p)(4) (for Class I Variances); and 2) amendments to the terms "*major source baseline date*" (at 40 CFR 51.166(b)(14)(i)(c)), "*minor source baseline date*" (including establishment of the "trigger date") (at section 51.166(b)(14)(ii)) and "*baseline area*" (as amended at 51.166(b)(15)(i)). As discussed above, on July 22, 2014, Kentucky submitted a letter to EPA withdrawing the $PM_{2.5}$ SILs and SMC provisions promulgated in the $PM_{2.5}$ PSD Increments-SILs-SMC Rule and later vacated by the DC Circuit Court of Appeals (*See Sierra Club,* 705 F.3d at 458). Therefore, these provisions are no longer before EPA for consideration.

As discussed above in section I, the DC Circuit in *Natural Resources Defense Council* v. *EPA* issued a decision that remanded the EPA's NSR $PM_{2.5}$ Rule implementing the 1997 $PM_{2.5}$ NAAQS. The court found that EPA erred in implementing the $PM_{2.5}$ NAAQS in these rules solely pursuant to the general implementation provisions of subpart 1 of part D of title I of the Clean Air Act, rather than pursuant to the additional implementation provisions specific to particulate matter nonattainment areas in subpart 4. On June 2, 2014, the EPA issued a final rulemaking that begins to address the remand. *See* 79 FR 31566. Upon its effective date, the final rule classifies all existing $PM_{2.5}$ nonattainment areas as "Moderate" nonattainment areas and sets a deadline of December 31, 2014, for states to submit any SIP submissions, including NNSR SIPs, that may be necessary to satisfy the requirements of subpart 4, part D, title I of the CAA with respect to $PM_{2.5}$ nonattainment areas.[15]

Kentucky's submission does not include the regulation of volatile organic compounds (VOCs) and ammonia as $PM_{2.5}$ precursors, nor does it include a demonstration consistent with section 189(e) showing that major sources of those precursor pollutants would not contribute significantly to $PM_{2.5}$ levels exceeding the standard in the area. Therefore, EPA cannot conclude at this time that this part of Kentucky's NNSR submission of revisions to Chapters 51:001 and 51:052 satisfies all of the requirements of subpart 4 as they pertain to $PM_{2.5}$ NNSR permitting. Although the revisions to Kentucky's NNSR regulations at Chapters 51:001 and 51:052 may not contain all of the necessary elements to satisfy the CAA requirements when evaluated under the subpart 4 provisions, the revisions themselves represent a strengthening of the currently-approved Kentucky NNSR SIP which does not address $PM_{2.5}$ at all. As a result of the June 2, 2014 (79 FR 31566) final rule, Kentucky has until December 31, 2014, to make any additional submission necessary to address the requirements of subpart 4, including addressing the $PM_{2.5}$ precursors of VOC and ammonia for NNSR permitting purposes. Therefore, EPA is approving the NNSR revisions to Kentucky's NNSR permitting program without listing the absence of either the regulation or evaluation of VOCs and ammonia as $PM_{2.5}$ precursors as a deficiency at this time.

Finally, as discussed in section I above and in EPA's proposed action (*See* 79 FR 42745, July 23, 2014), Kentucky's January 31, 2013, SIP revision also satisfies the conditions listed in EPA's previous conditional approvals for the Commonwealth's 2008 8-hour ozone, and 1997 annual and 2006 24-hour $PM_{2.5}$ NAAQS infrastructure SIP submissions. Therefore, EPA is taking final action to convert its conditional approvals with respect to the PSD-related requirements of sections 110(a)(2)(C), 110(a)(2)(D)(i)(II) and 110(a)(2)(J) to full approvals. Given that the Commonwealth's January 31, 2013, SIP revision fulfills the conditional approval requirements for conversion to a full approval, the conditional approval language at section 52.919(a)–(c) of 40 CFR part 52, included in EPA's final conditional approvals published on October 3, 2012 (77 FR 60307), March 7, 2013 (78 FR 14681) and March 26, 2013 (78 FR 18241) is no longer necessary. This action removes the

26, 2013). EPA had already conditionally approved the Commonwealth's infrastructure SIPs for the 1997 and 2006 $PM_{2.5}$ NAAQS for the PSD-related requirements related to sections 110(a)(2)(C) and (J) on October 3, 2012. *See* 77 FR 60307.

[14] EPA has not taken action on the Commonwealth's 2008 lead infrastructure SIP submission but will consider the action in a separate rulemaking.

[15] EPA set a deadline of December 31, 2014, for the states to submit any additional attainment related SIP elements that may be needed to meet the applicable requirements of subpart 4 for areas currently designated nonattainment for the 1997 and/or 2006 $PM_{2.5}$ NAAQS, and to submit SIPs addressing the NNSR requirements in subpart 4. EPA believes that this period provides a relatively brief but reasonable amount of time for states to ascertain whether and to what extent any additional submissions are needed for a particular 1997 or 2006 $PM_{2.5}$ NAAQS nonattainment area, and to develop, adopt and submit any such SIPs.

conditional approval language at 40 CFR 52.919, with the approval of the Commonwealth's January 31, 2013, SIP revision, to reflect that the infrastructure SIPs for the Commonwealth's 2008 8-hour ozone, and 1997 annual and 2006 24-hour $PM_{2.5}$ NAAQS have been fully approved.

III. Final Action

EPA is taking final action to approve the Commonwealth of Kentucky's January 31, 2013, SIP revision adopting Federal regulations amended in the May 16, 2008, NSR $PM_{2.5}$ Rule and the October 20, 2010, $PM_{2.5}$ PSD Increment-SILs-SMC rule. EPA is approving these revisions into the Kentucky SIP because they are consistent with section 110 of the CAA and its implementing regulations. Final approval of the Commonwealth's January 31, 2013, SIP also satisfies the requirements upon which EPA conditionally approved several Kentucky infrastructure requirements related to the 1997 and 2006 $PM_{2.5}$ and the 2008 8-hour ozone NAAQS. Accordingly, EPA is also taking final action today to convert EPA's previous conditional approval of the Commonwealth's infrastructure requirements related to PSD requirements for the $PM_{2.5}$ and ozone NAAQS to a full approval.

IV. Statutory and Executive Order Reviews

Under the CAA, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, EPA's role is to approve state choices, provided that they meet the criteria of the CAA. Accordingly, this action merely approves state law as meeting federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this action:

- Is not a "significant regulatory action" subject to review by the Office of Management and Budget under Executive Order 12866 (58 FR 51735, October 4, 1993);
- does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- does not have Federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the CAA; and
- does not provide EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

The SIP is not approved to apply on any Indian reservation land or in any other area where EPA or an Indian tribe has demonstrated that a tribe has jurisdiction. In those areas of Indian country, the rule does not have tribal implications as specified by Executive Order 13175 (65 FR 67249, November 9, 2000), nor will it impose substantial direct costs on tribal governments or preempt tribal law.

The Congressional Review Act, 5 U.S.C. 801 *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this action and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a "major rule" as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the CAA, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by January 2, 2015. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. *See* section 307(b)(2).

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Incorporation by reference, Intergovernmental relations, Nitrogen oxides, Particulate matter, Reporting and recordkeeping requirements.

Dated: October 22, 2014.

Heather McTeer Toney,

Regional Administrator, Region 4.

40 CFR part 52 is amended as follows:

PART 52–APPROVAL AND PROMULGATION OF PLANS

■ 1. The authority citation for part 52 continues to read as follows:

Authority: 42.U.S.C. 7401 *et seq.*

Subpart S—Kentucky

§ 52.919 [Removed and Reserved]

■ 2. Section 52.919 is removed and reserved.

■ 3. Section 52.920(c) is amended by revising the entries for 401 KAR 51:001, 401 KAR 51:017 and 401 KAR 51:052 to read as follows:

§ 52.920 Identification of plan.

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

44 CFR Part 64

[Docket ID FEMA–2014–0002; Internal Agency Docket No. FEMA–8357]

Suspension of Community Eligibility

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Final rule.

SUMMARY: This rule identifies communities where the sale of flood insurance has been authorized under the National Flood Insurance Program (NFIP) that are scheduled for suspension on the effective dates listed within this rule because of noncompliance with the floodplain management requirements of the program. If the Federal Emergency Management Agency (FEMA) receives documentation that the community has adopted the required floodplain management measures prior to the effective suspension date given in this rule, the suspension will not occur and a notice of this will be provided by publication in the **Federal Register** on a subsequent date. Also, information identifying the current participation status of a community can be obtained from FEMA's Community Status Book (CSB). The CSB is available at *http://www.fema.gov/fema/csb.shtm.*

DATES: *Effective Dates:* The effective date of each community's scheduled suspension is the third date ("Susp.") listed in the third column of the following tables.

FOR FURTHER INFORMATION CONTACT: If you want to determine whether a particular community was suspended on the suspension date or for further information, contact David Stearrett, Federal Insurance and Mitigation Administration, Federal Emergency Management Agency, 500 C Street SW., Washington, DC 20472, (202) 646–2953.

SUPPLEMENTARY INFORMATION: The NFIP enables property owners to purchase Federal flood insurance that is not otherwise generally available from private insurers. In return, communities agree to adopt and administer local floodplain management measures aimed at protecting lives and new construction from future flooding. Section 1315 of the National Flood Insurance Act of 1968, as amended, 42 U.S.C. 4022, prohibits the sale of NFIP flood insurance unless an appropriate public body adopts adequate floodplain management measures with effective enforcement measures. The communities listed in this document no longer meet that statutory requirement for compliance with program regulations, 44 CFR Part 59. Accordingly, the communities will be suspended on the effective date in the third column. As of that date, flood insurance will no longer be available in the community. We recognize that some of these communities may adopt and submit the required documentation of legally enforceable floodplain management measures after this rule is published but prior to the actual suspension date. These communities will not be suspended and will continue to be eligible for the sale of NFIP flood insurance. A notice withdrawing the suspension of such communities will be published in the **Federal Register**.

In addition, FEMA publishes a Flood Insurance Rate Map (FIRM) that identifies the Special Flood Hazard Areas (SFHAs) in these communities. The date of the FIRM, if one has been published, is indicated in the fourth column of the table. No direct Federal financial assistance (except assistance pursuant to the Robert T. Stafford Disaster Relief and Emergency Assistance Act not in connection with a flood) may be provided for construction or acquisition of buildings in identified SFHAs for communities not participating in the NFIP and identified for more than a year on FEMA's initial FIRM for the community as having flood-prone areas (section 202(a) of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4106(a), as amended). This prohibition against certain types of Federal assistance becomes effective for the communities listed on the date shown in the last column. The Administrator finds that notice and public comment procedures under 5 U.S.C. 553(b), are impracticable and unnecessary because communities listed in this final rule have been adequately notified.

Each community receives 6-month, 90-day, and 30-day notification letters addressed to the Chief Executive Officer stating that the community will be suspended unless the required floodplain management measures are met prior to the effective suspension date. Since these notifications were made, this final rule may take effect within less than 30 days.

National Environmental Policy Act. This rule is categorically excluded from the requirements of 44 CFR Part 10, Environmental Considerations. No environmental impact assessment has been prepared.

Regulatory Flexibility Act. The Administrator has determined that this rule is exempt from the requirements of the Regulatory Flexibility Act because the National Flood Insurance Act of 1968, as amended, Section 1315, 42 U.S.C. 4022, prohibits flood insurance coverage unless an appropriate public body adopts adequate floodplain management measures with effective enforcement measures. The communities listed no longer comply with the statutory requirements, and after the effective date, flood insurance will no longer be available in the communities unless remedial action takes place.

APPENDIX A-5
80 FR 39961
July 13, 2015

safety zone will be enforced from 10 p.m. to 10:30 p.m. on July 5, 2015.

(15) *Tawas City 4th of July Fireworks, Tawas City, MI.* The safety zone listed in 33 CFR 165.941(a)(47), all U.S. waters of Lake Huron, within a 300 yard radius of position 44°16′ N, 083°30′ W, 2000 feet west of the State Dock in East Tawas, will be enforced from 10 p.m. to 11 p.m. on July 4, 2015. In the case of inclement weather on July 4 2015, this safety zone will be enforced from 10 p.m. to 11 p.m. on July 5, 2015.

(16) *Marine City Maritime Festival Fireworks, Marine City, MI.* The safety zone listed in 33 CFR 165.941(a)(13), all waters of the St. Clair River within a 500 foot radius of the fireworks launch site located at position 42°43.15 N, 082°29.2 W, approximately 500 feet offshore from the intersection of Pearl St. and N. Water St, will be enforced from 10 p.m. to 10:30 p.m. on July 31, 2015. In the case of inclement weather on July 31, 2015, this safety zone will be enforced from 10 p.m. to 10:30 p.m. on August 1, 2015.

Under the provisions of 33 CFR 165.23, entry into, transiting, or anchoring within these safety zones during the enforcement period is prohibited unless authorized by the Captain of the Port Detroit or his designated representative. Vessels that wish to transit through the safety zones may request permission from the Captain of the Port Detroit or his designated representative. Requests must be made in advance and approved by the Captain of Port before transits will be authorized. Approvals will be granted on a case by case basis. The Captain of the Port may be contacted via U.S. Coast Guard Sector Detroit on channel 16, VHF–FM. The Coast Guard will give notice to the public via Local Notice to Mariners and VHF radio broadcasts that the regulation is being enforced.

This document is issued under authority of 33 CFR 165.941 and 5 U.S.C. 552 (a). If the Captain of the Port determines that any of these safety zones need not be enforced for the full duration stated in this document, he may suspend such enforcement and notify the public of the suspension via a Broadcast Notice to Mariners.

Dated: June 29, 2015.

Scott B. Lemasters,

Captain, U. S. Coast Guard, Captain of the Port Detroit.

[Docket No. USCG–2015–0530]

RIN 1625–AA00

Safety Zone; Annual Events Requiring Safety Zones in the Captain of the Port Lake Michigan Zone-Sturgeon Bay Yacht Club Evening on the Bay Fireworks

AGENCY: Coast Guard, DHS.

ACTION: Notice of enforcement of regulation.

SUMMARY: The Coast Guard will enforce the safety zone on the waters of Sturgeon Bay in Sturgeon Bay, WI for the Evening on the Bay Fireworks. This zone will be enforced from 8:30 p.m. until 10:30 p.m. on August 8, 2015. This action is necessary and intended to ensure safety of life on navigable waters immediately prior to, during, and immediately after the fireworks display. During the aforementioned period, the Coast Guard will enforce restrictions upon, and control movement of, vessels in the safety zone. No person or vessel may enter the safety zone while it is being enforced without permission of the Captain of the Port Lake Michigan or a designated representative.

DATES: The regulations in 33 CFR 165.929 will be enforced for safety zone (f)(5), Table 165.929, from 8:30 p.m. until 10:30 p.m. on August 8, 2015.

FOR FURTHER INFORMATION CONTACT: If you have questions on this document, call or email MST1 Joseph McCollum, Prevention Department, Coast Guard Sector Lake Michigan, Milwaukee, WI at (414) 747–7148, email *joseph.p.mccollum@uscg.mil.*

SUPPLEMENTARY INFORMATION:

The Coast Guard will enforce the Sturgeon Bay Yacht Club Evening on the Bay Fireworks safety zone listed as item (f)(5) in Table 165.929 of 33 CFR 165.929. Section 165.929 lists many annual events requiring safety zones in the Captain of the Port Lake Michigan zone. This safety zone will encompass all waters of Sturgeon Bay within the arc of a circle with a 280-foot radius from the fireworks launch site located on a barge in approximate position 44°49.310′ N., 087°21.370′ W. (NAD 83). This zone will be enforced from 8:30 p.m. until 10:30 p.m. on August 8, 2015.

All vessels must obtain permission from the Captain of the Port Lake Michigan or the on-scene representative to enter, move within, or exit the safety zone. Requests must be made in advance and approved by the Captain of the Port before transits will be authorized. Approvals will be granted on a case by case basis. Vessels and persons granted permission to enter the safety zone must obey all lawful orders or directions of the Captain of the Port Lake Michigan or a designated representative.

This document is issued under authority of 33 CFR 165.929, Safety Zones; Annual events requiring safety zones in the Captain of the Port Lake Michigan zone, and 5 U.S.C. 552(a). In addition to this publication in the **Federal Register**, the Coast Guard will provide the maritime community with advance notification for the enforcement of this zone via Broadcast Notice to Mariners or Local Notice to Mariners. The Captain of the Port Lake Michigan or an on-scene representative may be contacted via Channel 16, VHF–FM.

Dated: June 16, 2015.

A.B. Cocanour,

Captain, U.S. Coast Guard, Captain of the Port Lake Michigan.

BILLING CODE 9110–04–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–HQ–OAR–2012–0943, FRL–9930–25–OAR]

Findings of Failure To Submit a Section 110 State Implementation Plan for Interstate Transport for the 2008 National Ambient Air Quality Standards for Ozone

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: The Environmental Protection Agency (EPA) is taking final action finding that 24 states have failed to submit infrastructure State Implementation Plans (SIPs) to satisfy certain interstate transport requirements of the Clean Air Act (CAA) with respect to the 2008 8-hour ozone national ambient air quality standard (NAAQS). Specifically, these requirements pertain to significant contribution to nonattainment, or interference with maintenance, of the 2008 8-hour ozone NAAQS in other states. These findings of failure to submit establish a 2-year deadline for the EPA to promulgate a Federal Implementation Plan (FIP) to address the interstate transport SIP requirements pertaining to significant

contribution to nonattainment and interference with maintenance unless, prior to the EPA promulgating a FIP, the state submits, and the EPA approves, a SIP that meets these requirements.

DATES: Effective date of this action is August 12, 2015.

FOR FURTHER INFORMATION CONTACT: General questions concerning this document should be addressed to Mrs. Gobeail McKinley, Office of Air Quality Planning and Standards, Air Quality Policy Division, Mail Code C539–04, 109 TW Alexander Drive, Research Triangle Park, NC 27711; telephone (919) 541–5246; email: *mckinley.gobeail@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. General Information

A. Notice and Comment Under the Administrative Procedures Act (APA)

Section 553 of the APA, 5 U.S.C. 553(b)(3)(B), provides that, when an agency for good cause finds that notice and public procedure are impracticable, unnecessary or contrary to the public interest, the agency may issue a rule without providing notice and an opportunity for public comment. The EPA has determined that there is good cause for making this rule final without prior proposal and opportunity for comment because no significant EPA judgment is involved in making a finding of failure to submit SIPs, or elements of SIPs, required by the CAA, where states have made no submissions or incomplete submissions, to meet the requirement. Thus, notice and public procedure are unnecessary. The EPA finds that this constitutes good cause under 5 U.S.C. 553(b)(3)(B).

B. How can I get copies of this document and other related information?

The EPA has established a docket for this action under Docket ID No. EPA–HQ–OAR–2012–0943. Publicly available docket materials are available either electronically through *https://www.regulations.gov* or in hard copy at the EPA Docket Center, EPA/DC, William Jefferson Clinton West Building, Room 3334, 1301 Constitution Avenue NW., Washington, DC. The Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room is (202) 566–1744 and the telephone number for the Office of Air and Radiation Docket and Information Center is (202) 566–1742.

C. How is the preamble organized?

Table of Contents

D. Where do I go if I have specific state questions?

The table below lists the states that failed to make an interstate transport SIP submittal addressing CAA section 110(a)(2)(D)(i)(I) requirements for the 2008 ozone NAAQS. For questions related to specific states mentioned in this document, please contact the appropriate EPA Regional Office:

Regional offices	States
EPA Region 1: Anne Arnold, Manager, Air Quality Planning Unit (OEP05–02), EPA Region I, 5 Post Office Square, Suite 100, Boston, MA 02109–3912. (617) 918–1047.	Maine, Massachusetts, New Hampshire, Vermont
EPA Region 3: Cristina Fernandez, Associate Director, Office of Air Program Planning (3AP30), Air Protection Division, EPA Region III, 1650 Arch Street, Philadelphia, PA 19103–2187. (215) 814–2178.	Pennsylvania, Virginia, West Virginia
EPA Region 4: R. Scott Davis, Chief, Air Planning & Implementation Branch, EPA Region IV, Sam Nunn Atlanta Federal Center, 61 Forsyth Street SW, 12th Floor, Atlanta, GA 30303. (404) 562–9127.	Alabama, Florida, Georgia, Mississippi, North Carolina, South Carolina, Tennessee
EPA Region 5: John Mooney, Air Program Branch Manager, Air Programs Branch, EPA Region 5, 77 West Jackson Street, Chicago, IL 60604–3590. (312) 886–6043.	Illinois, Michigan, Minnesota
EPA Region 6: Guy Donaldson, Chief, Air Planning Section, EPA Region VI, 1445 Ross Avenue, Dallas, TX 75202–2733. (214) 665–7242.	Arkansas, New Mexico, Oklahoma
EPA Region 7: Joshua A. Tapp, Branch Chief, Air Planning and Development Branch, EPA Region VII, 11201 Renner Blvd., Lenexa, KS 66219. (913) 551–7606.	Iowa, Kansas, Missouri
EPA Region 9: Matt Lakin, Air Program Manager, Air Planning Office, EPA Region 9, 75 Hawthorne Street, San Francisco, CA 94105. (415) 972–3851.	California

II. Background and Overview

A. Interstate Transport SIPs

The CAA section 110(a) imposes an obligation upon states to submit SIPs that provide for the implementation, maintenance and enforcement of a new or revised NAAQS within 3 years following the promulgation of that NAAQS. Section 110(a)(2) lists specific requirements that states must meet in these SIP submissions, as applicable. The EPA refers to this type of SIP submission as the "infrastructure" SIP because it ensures that states can implement, maintain and enforce the air standards. Within these requirements, section 110(a)(2)(D)(i) contains requirements to address interstate transport of NAAQS pollutants. A SIP revision submitted for this sub-section is referred to as an "interstate transport SIP." In turn, section 110(a)(2)(D)(i)(I) requires that such a plan contain adequate provisions to prohibit emissions from the state that will contribute significantly to nonattainment of the NAAQS in any other state ("prong 1") or interfere with maintenance of the NAAQS in any other state ("prong 2"). Interstate transport prongs 1 and 2, also called the "good neighbor" provisions, are the requirements relevant to this findings document.

Pursuant to CAA section 110(k)(1)(B), the EPA must determine no later than 6 months after the date by which a state is required to submit a SIP whether a state has made a submission that meets the minimum completeness criteria established per section 110(k)(1)(A). The EPA refers to the determination that a state has not submitted a SIP submission that meets the minimum completeness criteria as a "finding of failure to submit." If the EPA finds a state has failed to submit a SIP to meet its statutory obligation to address 110(a)(2)(D)(i)(I), pursuant to section 110(c)(1) the EPA has not only the authority, but the obligation, to promulgate a FIP within 2 years to address the CAA requirement. This finding therefore starts a 2-year clock for promulgation by the EPA of a FIP, in accordance with CAA section 110(c)(1), unless prior to such promulgation the state submits, and the EPA approves, a submittal from the state to meet the requirements of CAA section 110(a)(2)(D)(i)(I) for the 2008 8-hour ozone NAAQS. The EPA will work with states subject to these findings of failure to submit and provide assistance as necessary to help them develop approvable submittals in a timely manner. The EPA notes this action does not start a mandatory sanctions clock pursuant to CAA section 179 because this finding of failure to submit does not pertain to a part D plan for nonattainment areas required under CAA section 110(a)(2)(I) or a SIP call pursuant to CAA section 110(k)(5).

B. Background on 2008 Ozone NAAQS and Related Rulemakings

On March 12, 2008, the EPA strengthened the NAAQS for ozone.[1] The EPA revised the previous 8-hour primary ozone standard of 0.08 parts per millions (ppm) to 0.075 ppm. The EPA also revised the secondary 8-hour standard to the level of 0.075 ppm making it identical to the revised primary standard. Infrastructure SIPs addressing the revised standard were due March 12, 2011. In September 2009, the EPA announced it would reconsider the 2008 8-hour ozone NAAQS.[2] To reduce the workload for states during the interim period of reconsideration, the EPA also announced its intention to propose staying implementation of the 2008 ozone NAAQS for a number of the requirements. Then, on January 6, 2010, as part of its voluntary rulemaking on reconsideration, the EPA proposed to revise the 2008 NAAQS for ozone from 75 ppb to a level within the range of 60 to 70 ppb. *See* 75 FR 2938 (January 19, 2010). The EPA indicated its intent to issue final standards, based upon the reconsideration, by summer 2011.

On July 6, 2011, the EPA finalized the Cross-State Air Pollution Rule (CSAPR), 76 FR 48208, in response to the remand by the United States Court of Appeals for the District of Columbia Circuit (DC Circuit) of the EPA's earlier rule, the Clean Air Interstate Rule (CAIR).[3] *See North Carolina* v. *EPA,* 531 F.3d 896 (D.C. Cir. 2008), *modified by* 550 F.3d 1176 (remanding CAIR). CSAPR addresses ozone transport with respect to the 1997 ozone NAAQS, but does not address the 2008 ozone standard, because the 2008 ozone NAAQS was under reconsideration by the EPA during the analytical work for CSAPR.

On September 2, 2011, consistent with the direction of the President, the Administrator of the Office of Information and Regulatory Affairs of the Office of Management and Budget returned the draft final 2008 ozone NAAQS rule to the EPA for further consideration.[4] In view of this direction and the timing of the EPA's ongoing periodic review of the ozone NAAQS required under CAA section 109 (as announced on September 29, 2008), the EPA decided to coordinate further proceedings on its voluntary rulemaking on reconsideration of the 2008 ozone NAAQS with that ongoing periodic review, by deferring the completion of its voluntary rulemaking on reconsideration until it completed its statutorily-required periodic review.[5] During this time period for renewed implementation of the 2008 ozone standard, however, a number of legal developments pertaining to the EPA's promulgation of CSAPR created uncertainty over the EPA's statutory interpretation and implementation of the "good neighbor" requirement as to that standard.

On August 21, 2012, the DC Circuit issued a decision in *EME Homer City Generation, L.P.* v. *EPA* addressing several legal challenges to CSAPR and holding, among other things, that states had no obligation to submit good neighbor SIPs until the EPA had first quantified each state's good neighbor obligation.[6] Accordingly, under that decision the submission deadline for good neighbor SIPs under the CAA would not necessarily be tied to the promulgation of a new or revised NAAQS. While the EPA disagreed with this interpretation of the statute and sought review first with the DC Circuit *en banc* and then with the United States Supreme Court, the EPA complied with the DC Circuit's ruling during the pendency of its appeal. In particular, the EPA indicated that consistent with the DC Circuit's opinion, it would not at that time issue findings that states had failed to submit SIPs addressing the good neighbor requirements in CAA section 110(a)(2)(D)(i)(I).[7] Moreover, when the EPA made findings that states had failed to submit infrastructure SIPs

[5] *Id.*

[6] *EME Homer City Generation, L.P.* v. *EPA,* 696 F.3d 7, 31 (D.C. Cir. 2012).

[7] *See, e.g.,* Memorandum from the Office of Air and Radiation former Assistant Administrator Gina McCarthy to the EPA Regions, "Next Steps for Pending Redesignation Requests and State Implementation Plan Actions Affected by the Recent Court Decision Vacating the 2011 Cross-State Air Pollution Rule," November 19, 2012; 78 FR 65559 (November 1, 2013) (final action on Florida infrastructure SIP submission for 2008 8-hour ozone NAAQS); and 78 FR 14450 (March 6, 2013) (final action on Tennessee infrastructure SIP submissions for 2008 8-hour ozone NAAQS).

addressing the 2008 ozone NAAQS, the EPA explained that it was not issuing findings as to the good neighbor requirements in accordance with the court's holding in *EME Homer City Generation*. 78 FR 2882, 2884 (January 15, 2013) (Findings of Failure To Submit a Complete State Implementation Plan for Section 110(a) Pertaining to the 2008 Ozone National Ambient Air Quality Standard).

While the DC Circuit declined to consider the EPA's appeal *en banc*,[8] on January 23, 2013, the Supreme Court granted the EPA's petition for certiorari.[9] During 2013 and early 2014, as the EPA awaited a decision from the Supreme Court, the EPA initiated efforts and technical analyses aimed at identifying and quantifying state good neighbor obligations for the 2008 ozone NAAQS. As part of this effort, the EPA solicited stakeholder input and also provided states with, and requested input on, emissions inventories for 2011 and emissions inventory projections for 2018.

On April 29, 2014, the Supreme Court issued a decision reversing the DC Circuit's *EME Homer City* opinion on CSAPR and held, among other things, that under the plain language of the CAA, states must submit SIPs addressing the good neighbor requirement in CAA section 110(a)(2)(D)(i)(I) within 3 years of promulgation of a new or revised NAAQS, regardless of whether the EPA first provides guidance, technical data or rulemaking to quantify the state's obligation. Thus, the Supreme Court affirmed that states have an obligation in the first instance to address the good neighbor provision after promulgation of a new or revised NAAQS, a holding that also applies to states' obligation to address interstate transport for CAA section 110(a)(2)(D)(i)(I) for the 2008 ozone NAAQS.

C. Mandatory Duty Suit for the EPA's Failure to Make Findings of Failure To Submit for States That Did Not Submit SIPs

On March 15, 2013, several states and the District of Columbia filed a complaint challenging the EPA's assertion in the January 15, 2013 findings of failure to submit for the 2008 ozone NAAQS infrastructure SIPs that it did not have the authority to issue findings as to the good neighbor provision.[10] After the Supreme Court issued its decision reversing the DC Circuit's vacatur of CSAPR, the EPA requested partial vacatur and remand of the January 15, 2013 portion of the findings that pertained to the good neighbor provision. On August 1, 2014, the court granted the EPA's request, vacating the EPA's decision not to make findings of failure to submit with respect to the good neighbor provision and remanding the findings to the EPA for further consideration.

Shortly thereafter, Sierra Club and WildEarth Guardians filed two separate cases alleging that the EPA had not fulfilled its mandatory duty to make findings of failure to submit good neighbor SIPs addressing interstate transport in CAA section 110(a)(2)(D)(i)(I) with respect to the 2008 ozone NAAQS. In the first case, Sierra Club filed a complaint in the U.S. District Court for the Northern District of California (Northern District of California) on July 15, 2014, seeking an order to compel the EPA to make findings of failure to submit with respect to the 2008 ozone NAAQS good neighbor SIP for the state of Tennessee.[11] On November 18, 2014, Sierra Club and WildEarth Guardians filed another complaint in the same court seeking an order to compel the EPA to make findings of failure to submit with respect to the 2008 ozone NAAQS good neighbor SIPs for the following states: Arkansas, California, Connecticut, Georgia, Iowa, Illinois, Kansas, Massachusetts, Maine, Michigan, Minnesota, Missouri, New Hampshire, New Mexico, Oklahoma, Pennsylvania, Rhode Island, South Carolina, Virginia, Washington and West Virginia.[12] On January 15, 2015, the plaintiffs amended their complaint in the second case to add Alabama, Florida, North Carolina and Mississippi. On May 15, 2015, the court entered judgment ordering the EPA to, by June 30, 2015, sign a notice issuing its findings of failure to submit with respect to the 2008 ozone NAAQS interstate transport SIPs for the 26 states addressed in both cases.[13]

The EPA recognizes the practical and legal uncertainty that has surrounded the 2008 ozone NAAQS and the proper interpretation of the good neighbor provision. States were given the impression that if the NAAQS were revised as a result of the reconsideration, the 3-year SIP deadline would reset. The EPA also recognizes that this uncertainty may have influenced states' efforts to develop SIPs to address CAA section 110(a)(2)(D)(i)(I) requirements for the 2008 ozone NAAQS. Given that the NAAQS have not been revised and the United States Supreme Court overturned the DC Circuit opinion on CSAPR, March 12, 2011, remains the legally applicable deadline for good neighbor SIPs for the 2008 8-hour ozone NAAQS.

In response to the orders from the DC Circuit and the Northern District of California, the EPA is taking this action for all states that have failed to submit complete SIPs addressing CAA section 110(a)(2)(D)(i)(I) for the 2008 ozone NAAQS. To date, 26 states, the District of Columbia and Puerto Rico have submitted complete SIPs addressing CAA section 110(a)(2)(D)(i)(I) for the 2008 ozone NAAQS. Three states specifically identified in the Northern District of California's order have made complete submissions as of the date of this document. Therefore, the EPA is issuing national findings of failure to submit good neighbor SIPs addressing the requirements of CAA sections 110(a)(2)(D)(i)(I) as to the 2008 ozone NAAQS, addressing all states that have not made complete submissions as to the date of this document.

D. Further Background Specific to North Carolina SIP Status

On November 12, 2012, the state of North Carolina submitted a SIP revision to the EPA addressing, among other things, the good neighbor provision of CAA section 110(a)(2)(D)(i)(I) for the 2008 ozone NAAQS. The submission was determined to be complete by a letter dated November 15, 2012. On July 15, 2014, Sierra Club filed a complaint in the Northern District of California alleging that the EPA had failed to take final action on the North Carolina SIP submission, including the interstate transport provisions, by the statutory deadline and asked the court to order the EPA to take such final action by a date certain.[14] Subsequently, on September 3, 2014, the state of North Carolina submitted a letter withdrawing the good neighbor provision of the November 12, 2012, infrastructure SIP submission addressing CAA section

[8] *EME Homer City Generation, L.P.* v. *EPA*, No. 11–1302 (D.C. Cir. January 24, 2013), ECF No. 1417012 (denying the EPA's motion for rehearing *en banc*).

[9] *EPA* v. *EME Homer City Generation, L.P.*, 133 S. Ct. 2857 (2013) (granting the EPA's and other parties' petitions for certiorari).

[10] *Maryland* v. *EPA*, Case No. 13–1070 (D.C. Cir., filed March 15, 2013).

[11] Complaint, *Sierra Club* vs. *McCarthy*, Case 4:14–cv–3198–JSW (N.D. Cal. July 15, 2014). The complaint also included a separate claim regarding the EPA's alleged failure to take final action to approve or disapprove infrastructure SIPs as to a number of states.

[12] Complaint, *Sierra Club* vs. *McCarthy*, Case 4:14–cv–05091–YGR (N.D. Cal. November. 18, 2014).

[13] *See* Judgment, *Sierra Club* v. *McCarthy*, Case 4:14–cv–05091–YGR (N.D. Cal. May 15, 2015).

[14] Complaint, *Sierra Club* v. *McCarthy*, Case 4:14–cv–03198–JSW, (N.D. Cal. July 15, 2014).

110(a)(2)(D)(i)(I).[15] In reliance on the withdrawal, Sierra Club filed an amended complaint on December 12, 2014, that revised its claim to remove the allegation that the EPA had failed to act the good neighbor provision of North Carolina's SIP.[16] The parties to the litigation subsequently entered into a consent decree that settled the remaining claim as to North Carolina.[17] In further reliance on the withdrawal, Sierra Club and WildEarth Guardians also filed an amended complaint in case number 4:14–cv–05091, discussed above, alleging that the EPA had failed to make a finding of failure to submit as to North Carolina's good neighbor SIP for the 2008 ozone NAAQS.[18]

On June 26, 2015, North Carolina submitted a letter indicating that it wished to "rescind" its September 3, 2014 withdrawal of its good neighbor SIP to address the 2008 ozone NAAQS.[19] The letter explained that the November 12, 2012 submittal did not include modeling and that preliminary air quality modeling released by the EPA on January 22, 2015, supported its interstate transport SIP. The letter also explained that, based on this modeling, the state concluded "it has met its obligations under CAA section 110(a)(1) and (2)(D) related to interstate transport . . . and therefore, does not expect" to be subject to this document finding certain states' failure to submit interstate transport SIPs for the 2008 ozone NAAQS.

On June 30, 2015, the EPA responded to North Carolina's June 26, 2015 letter.[20] Because the EPA determined that it was not appropriate to rescind North Carolina's prior withdrawal of its November 12, 2012 SIP submission, and because the June 25, 2015, letter relies on new information and analysis to support the state's conclusion regarding its statutory interstate transport obligations that was not contained in its November 12, 2012, SIP submission (*i.e.*, the preliminary air quality modeling released by the EPA on January 22, 2015), the EPA views the June 26, 2015 letter as a new SIP submission. Accordingly, the EPA has evaluated the June 26, 2015 letter for completeness as a SIP revision pursuant to the criteria in 40 CFR part 51, appendix V, and concluded that the June 26, 2015, letter is an incomplete SIP submission. The incompleteness letter notes that North Carolina's June 26, 2015, letter contains new information and analysis upon which North Carolina now relies to support its conclusions regarding the state's statutory obligations to address interstate transport, in particular the EPA's air quality modeling, and that neither the new information nor North Carolina's conclusions relying upon that information were subject to public notice and comment per criteria 2.1(f)–(h) of appendix V. Accordingly, the EPA is finding in this document that North Carolina has failed to submit a complete SIP revision addressing CAA section 110(a)(2)(D)(i)(I) as to the 2008 ozone NAAQS.

III. Findings of Failure To Submit for States That Failed To Make a Good Neighbor SIP Submission for the 2008 Ozone NAAQS

Three states (*i.e.*, Connecticut, Rhode Island and Washington) addressed by the Northern District of California's order have made complete SIP submittals addressing the good neighbor provision for the 2008 ozone NAAQS. Hawaii was not addressed by the Northern District of California's order and the state has submitted a complete SIP submittal addressing the good neighbor provision for the 2008 ozone NAAQS. The EPA is making findings of failure to submit for 24 states. The EPA is finding that the following states have not made a complete good neighbor SIP submittal to meet the requirements of CAA section 110(a)(2)(D)(i)(I): Alabama, Arkansas, California, Florida, Georgia, Iowa, Illinois, Kansas, Massachusetts, Maine, Michigan, Minnesota, Mississippi, Missouri, New Hampshire, New Mexico, North Carolina, Oklahoma, Pennsylvania, South Carolina, Tennessee, Vermont,[21] Virginia and West Virginia.

IV. Environmental Justice Considerations

This document is making a procedural finding that certain states have failed to submit a SIP to address CAA section 110(a)(2)(D)(i)(I) for the 2008 ozone NAAQS. The EPA did not conduct an environmental analysis for this rule because this rule would not directly affect the air emissions of particular sources. Because this rule will not directly affect the air emissions of particular sources, it does not affect the level of protection provided to human health or the environment. Therefore, this action will not have potential disproportionately high and adverse human health or environmental effects on minority, low-income or indigenous populations.

V. Statutory and Executive Order Reviews

A. Executive Order 12866: Regulatory Planning and Review and Executive Order 13563: Improving Regulation and Regulatory Review

This action is not a significant regulatory action and was therefore not submitted to the Office of Management and Budget (OMB) for review.

B. Paperwork Reduction Act (PRA)

This action does not impose an information collection burden under the provisions of the Paperwork Reduction Act, 44 U.S.C. 3501 *et seq.* This final rule does not establish any new information collection requirement apart from what is already required by law.

C. Regulatory Flexibility Act (RFA)

This action is not subject to the RFA. The RFA applies only to rules subject to notice and comment rulemaking requirements under the Administrative Procedure Act (APA), 5 U.S.C. 553, or any other statute. This rule is not subject to notice and comment requirements because the agency has invoked the APA "good cause" exemption under 5 U.S.C. 553(b).

D. Unfunded Mandates Reform Act of 1995 (UMRA)

This action does not contain any unfunded mandate as described in UMRA, 2 U.S.C. 1531–1538, and does not significantly or uniquely affect small governments. The action implements mandates specifically and explicitly set forth in the CAA under section 110(a) without the exercise of any policy discretion by the EPA.

---

[15] *See,* Letter from Sheila Holman, Director, Division of Air Quality, NCDENR, to Heather McTeer Toney, Regional Administrator, USEPA Region 4, "Withdrawal of Section 110(a)(2)(D)(i)(I) from North Carolina's 2008 Ozone Infrastructure State Implementation Plan Submittal" (September 3, 2014).

[16] First Amended Complaint, *Sierra Club* v. *McCarthy,* Case 4:14–cv–03198–JSW, (N.D. Cal. December 12, 2014).

[17] *See* Judgment, *Sierra Club* v. *McCarthy,* Case 4:14–cv–03198–JSW, (N.D. Cal. May 15, 2015).

[18] *See* Amended Complaint, *Sierra Club* v. *McCarthy,* Case No. 4:14–cv–05091 (N.D. Cal. Jan. 15, 2015).

[19] *See* Letter from Sheila C. Holman, NCDENR, to Heather McTeer Toney, USEPA Region 4, "Recession [sic] of North Carolina's September 3, 2014, Withdrawal of 2008 Ozone Infrastructure State Implementation Plan Certification Pertaining to Interstate Transport (Section 110(a)(2)(D)(i)(I))" (June 26, 2015).

[20] *See* Letter from Beverly H. Banister, USEPA Region 4, to Sheila Holman, NCDENR, "Response to North Carolina's June 26, 2015 Letter Seeking to Rescind the September 3, 2014 Withdrawal of the 2008 Ozone Infrastructure State Implementation Plan Certification Regarding Interstate Transport" (June 30, 2015).

[21] We are making a finding for the state of Vermont even though the state was not addressed by the Northern District of California's order. In fairness and to fulfill its statutory obligations, the EPA is addressing all states that have not made a submittal in this findings document.

E. Executive Order 13132: Federalism

This action does not have federalism implications. It will not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government.

F. Executive Order 13175: Consultation and Coordination With Indian Tribal Governments

This action does not have tribal implications as specified in Executive Order 13175. This rule responds to the requirement in the CAA for states to submit SIPs under section 110(a) to address CAA section 110(a)(2)(D)(i)(I) for the 2008 ozone NAAQS. No tribe is subject to the requirement to submit an implementation plan under section 110(a) within 3 years of promulgation of a new or revised NAAQS. Thus, Executive Order 13175 does not apply to this action.

G. Executive Order 13045: Protection of Children From Environmental Health and Safety Risks

The EPA interprets Executive Order 13045 as applying only to those regulatory actions that concern environmental health or safety risks that the EPA has reason to believe may disproportionately affect children, per the definition of "covered regulatory action" in section 2–202 of the Executive Order. This action is not subject to Executive Order 13045 because it does not concern an environmental health risk or safety risk.

H. Executive Order 13211: Actions That Significantly Affect Energy Supply, Distribution or Use

This action is not subject to Executive Order 13211, because it is not a significant regulatory action under Executive Order 12866.

I. National Technology Transfer and Advancement Act

This rulemaking does not involve technical standards.

J. Executive Order 12898: Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations

The EPA believes the human health or environmental risk addressed by this action will not have potential disproportionately high and adverse human health or environmental effects on minority, low-income or indigenous populations because it does not affect the level of protection provided to human health or the environment. The EPA's evaluation of environmental justice considerations is contained in section IV of this document.

K. Congressional Review Act (CRA)

This action is subject to the CRA, and the EPA will submit a rule report to each House of the Congress and to the Comptroller General of the United States. This action is not a "major rule" as defined by 5 U.S.C. 804(2).

L. Judicial Review

Section 307(b)(l) of the CAA indicates which federal Courts of Appeal have venue for petitions of review of final agency actions by the EPA under the CAA. This section provides, in part, that petitions for review must be filed in the Court of Appeals for the District of Columbia Circuit (i) when the agency action consists of "nationally applicable regulations promulgated, or final actions taken, by the Administrator," or (ii) when such action is locally or regionally applicable, if "such action is based on a determination of nationwide scope or effect and if in taking such action the Administrator finds and publishes that such action is based on such a determination."

The EPA has determined that this final rule consisting of findings of failure to submit certain of the required good neighbor SIP provisions is "nationally applicable" within the meaning of section 307(b)(1). This rule affects 24 states across the country that are located in seven of the ten EPA Regions, 10 different federal circuits, and multiple time zones.

This determination is appropriate because, in the 1977 CAA Amendments that revised CAA section 307(b)(l), Congress noted that the Administrator's determination that an action is of "nationwide scope or effect" would be appropriate for any action that has "scope or effect beyond a single judicial circuit." H.R. Rep. No. 95–294 at 323–324, reprinted in 1977 U.S.C.C.A.N. 1402–03. Here, the scope and effect of this action extends to the 10 judicial circuits that include the states across the country affected by this action. In these circumstances, section 307(b)(1) and its legislative history authorize the Administrator to find the rule to be of "nationwide scope or effect" and thus to indicate that venue for challenges lies in the DC Circuit. Accordingly, the EPA is determining that this is a rule of nationwide scope or effect. Under section 307(b)(1) of the CAA, petitions for judicial review of this action must be filed in the United States Court of Appeals for the District of Columbia within 60 days from the date this final action is published in the **Federal Register**. Filing a petition for review by the Administrator of this final action does not affect the finality of the action for the purposes of judicial review nor does it extend the time within which a petition for judicial review must be filed, and shall not postpone the effectiveness of such rule or action.

Revisions to the California State Implementation Plan, South Coast Air Quality Management District

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: The Environmental Protection Agency (EPA) is taking action to approve a revision to the South Coast Air Quality Management District (SCAQMD) portion of the California State Implementation Plan (SIP). This revision concerns volatile organic compound (VOC) emissions from Large Confined Animal Facilities. We are approving a local rule to regulate these emission sources under the Clean Air Act (CAA or the Act).

DATES: This rule will be effective on August 12, 2015.

ADDRESSES: The EPA has established docket number EPA–R09–OAR–2014–0841 for this action. Generally, documents in the docket for this action are available electronically at *http://www.regulations.gov* or in hard copy at EPA Region IX, 75 Hawthorne Street, San Francisco, California 94105–3901. While all documents in the docket are listed at *http://www.regulations.gov,* some information may be publicly available only at the hard copy location (*e.g.,* copyrighted material, large maps, multi-volume reports), and some may not be available in either location (*e.g.,* confidential business information (CBI)). To inspect the hard copy

Determinations of Attainment by the Attainment Date, Extensions of the Attainment Date, and Reclassification of Several Areas for the 2008 Ozone National Ambient Air Quality Standards

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: The Environmental Protection Agency (EPA) is taking final action on three separate and independent types of determinations for each of the 36 areas that are currently classified as "Marginal" for the 2008 ozone National Ambient Air Quality Standards (NAAQS). First, the EPA is determining that 17 areas attained the 2008 ozone NAAQS by the applicable attainment date of July 20, 2015, based on complete, quality-assured and certified ozone monitoring data for 2012–2014. Second, the EPA is granting 1-year attainment date extensions for eight areas on the basis that the requirements for such extensions under the Clean Air Act (CAA) and the EPA's implementing regulations have been met. Third, the EPA is determining that 11 areas failed to attain the 2008 ozone NAAQS by the applicable attainment date of July 20, 2015, and thus are reclassified by operation of law as "Moderate" for the 2008 ozone NAAQS. States containing any or any portion of these new Moderate areas must submit State Implementation Plan (SIP) revisions that meet the statutory and regulatory requirements that apply to 2008 ozone nonattainment areas classified as Moderate by January 1, 2017.

DATES: This rule is effective on June 3, 2016.

ADDRESSES: The EPA has established docket number EPA–HQ–OAR–2015–0468 for this action. All documents in the docket are listed on *http://www.regulation.gov* Web site. Although listed in the index, some information is not publicly available, *e.g.,* Confidential Business Information or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the Internet and will be publicly available only in hard copy form. SUPPLEMENTARY INFORMATION:

Table of Contents

I. Proposed Actions

On August 27, 2015, the EPA proposed to find that 17 Marginal areas attained the 2008 NAAQS by the applicable attainment date of July 20, 2015, based on complete, quality-assured and certified ozone monitoring data for 2012–2014. *See* 80 FR 51992. The EPA also proposed to find that eight areas met the criteria, as provided in CAA section 181(a)(5) and 40 Code of Federal Regulations (CFR) 51.1107, to qualify for a 1-year attainment date extension for the 2008 ozone NAAQS even though they did not attain the NAAQS by the applicable deadline. Finally, the EPA proposed to find that 11 areas failed to attain the 2008 ozone NAAQS by the applicable Marginal attainment date and that they did not qualify for a 1-year attainment date extension. Under CAA section 181(b)(2)(A), if the EPA determines that an area failed to attain a given NAAQS by the applicable attainment date, the area shall be reclassified to a higher classification. In the EPA's August 2015 proposal, the EPA specified those 11 areas would be reclassified to Moderate.

The reclassified areas must attain the standard as expeditiously as practicable, but in any event no later than July 20, 2018.

The EPA proposed two options for establishing a deadline for states to submit the SIP revisions required for Moderate areas once their areas are reclassified from Marginal. The first option would have required state air agencies to submit the required SIP revisions as expeditiously as practicable, but no later than the beginning of the ozone season in 2017 for each respective area. The second option would have required state air agencies to submit the required SIP revisions as expeditiously as practicable, but no later than January 1, 2017. After consideration of the comments received on these proposed options, the EPA is finalizing a due date of no later than January 1, 2017, for all Moderate area SIP requirements that apply to newly reclassified areas.

A. Determinations of Attainment

In the proposal, the EPA evaluated data from air quality monitors in the 36 areas classified as Marginal for the 2008 ozone NAAQS in order to determine each area's attainment status as of the applicable attainment date of July 20, 2015. Seventeen of the 36 nonattainment areas' monitoring sites with valid data had a design value [1] equal to or less than 0.075 parts per million (ppm) based on 2012–2014 monitoring period.[2] Thus, the EPA proposed to determine, in accordance with section 181(b)(2)(A) of the CAA and the EPA's implementing regulations at 40 CFR 51.1103, that the 17 areas listed in the following Table 1 attained the standard by the applicable attainment date for Marginal areas for the 2008 ozone NAAQS.

TABLE 1—MARGINAL NONATTAINMENT AREAS THAT ATTAINED THE 2008 OZONE NAAQS BY THE JULY 20, 2015, ATTAINMENT DATE

2008 ozone NAAQS nonattainment area	2012–2014 design value (ppm)
Allentown-Bethlehem-Easton, PA	0.070
Baton Rouge, LA	0.072
Calaveras County, CA	0.071
Charlotte-Rock Hill, NC-SC	0.073

San Francisco Bay Area, CA	0.072
Seaford, DE	0.074
Tuscan Buttes, CA	0.075
Upper Green River Basin Area, WY	0.064

B. Extensions of Marginal Area Attainment Dates

Of the 36 Marginal nonattainment areas for the 2008 ozone NAAQS, there are eight areas for which the EPA proposed to grant a 1-year attainment date extension based on determinations that these areas met the requirements for an extension under CAA section 181(a)(5), including compliance with all commitments and requirements in the applicable implementation plan and "clean" data in the year preceding the attainment year. In addition, for each of these areas, at least one state with jurisdiction over all or part of the area requested such an extension.

The EPA proposed that eight Marginal nonattainment areas for the 2008 ozone NAAQS failed to attain the NAAQS by July 20, 2015, but met the attainment date extension criteria of CAA section 181(a)(5), as interpreted in 40 CFR 51.1107. The EPA proposed to find that all implicated states were meeting the obligations and commitments of their applicable implementation plans, in accordance with CAA section 181(a)(5)(A), and that, per CAA section 181(a)(5)(B) and the implementing regulations, the 4th highest daily maximum 8-hour average concentrations for all monitors in each area were not greater than 0.075 ppm for 2014, the year preceding the attainment year (*see* 40 CFR 51.1107). The EPA, therefore, proposed to grant a 1-year extension of the applicable Marginal area attainment date from July 20, 2015, to July 20, 2016, for the nonattainment areas listed in Table 2.

TABLE 2—MARGINAL NONATTAINMENT AREAS THAT QUALIFY FOR A 1-YEAR ATTAINMENT DATE EXTENSION FOR THE 2008 OZONE NAAQS

2008 ozone NAAQS nonattainment area	2012–2014 design value (ppm)	2014 4th highest daily maximum 8-hr average (ppm)
Cleveland-Akron-Lorain, OH	0.078	0.075
Houston-Galveston-Brazoria, TX	0.080	0.072
Philadelphia-Wilmington-Atlantic City, PA-NJ-MD-DE	0.077	0.074
Pittsburgh-Beaver Valley, PA	0.077	0.071
San Luis Obispo (Eastern San Luis Obispo), CA	0.076	0.073
Sheboygan County, WI	0.081	0.072
St. Louis-St. Charles-Farmington, MO-IL	0.078	0.072
Washington, DC-MD-VA	0.076	0.069

[1] Design value is a statistic that describes the air quality status of a given location relative to the level of the NAAQS. Design values for a site are the 3-year average annual fourth-highest daily maximum 8-hour average ozone concentrations.

[2] These determinations were based upon 3 years of complete, quality-assured and certified 2012–2014 data, in accordance with 40 CFR part 58 and recorded in EPA's Air Quality Statistics (AQS) database. Some areas attained the standard earlier with 2011, 2012 and 2013 data and maintained the standard in 2014, *i.e.*, Knoxville, TX attained the standard with 2011–2013 ozone data and continued to attain with 2012–2014 data.

C. Determinations of Failure To Attain and Reclassification

Lastly, the EPA proposed to determine that 11 areas (listed in Table 3) failed to attain the 2008 ozone NAAQS by the applicable attainment date of July 20, 2015 and were not eligible for a 1-year attainment date extension. For each of these areas, the 4th highest daily maximum 8-hour average for at least one monitor in each area was greater than 0.075 ppm for 2014. CAA section 181(b)(2)(A) provides that a Marginal nonattainment area shall be reclassified by operation of law upon a determination by the EPA that such area failed to attain the relevant NAAQS by the applicable attainment date. The new classification proposed for each of these 11 areas would be the next higher classification of "Moderate" under the CAA statutory scheme.[3]

TABLE 3—MARGINAL NONATTAINMENT AREAS TO BE RECLASSIFIED AS MODERATE BECAUSE THEY DID NOT ATTAIN THE 2008 OZONE NAAQS BY THE JULY 20, 2015, ATTAINMENT DATE

2008 ozone NAAQS nonattainment area	2012–2014 design value (ppm)	2014 4th highest daily maximum 8-hr average (ppm)

Imperial County, CA	0.080	0.078
Kern County (Eastern Kern), CA	0.084	0.089
Mariposa County, CA	0.078	0.077
Nevada County (Western part), CA	0.079	0.082
New York-N. New Jersey-Long Island, NY-NJ-CT	0.085	0.081
Phoenix-Mesa, AZ	0.080	0.080
San Diego County, CA	0.079	0.079

D. Moderate Area SIP Revision Submission Deadline

The EPA also proposed to apply the Administrator's discretion, per CAA section 182(i), to adjust the statutory deadlines for submitting required SIP revisions for reclassified Moderate ozone nonattainment areas. CAA section 182(i) requires that reclassified areas meet the applicable plan submission requirements "according to the schedules prescribed in connection with such requirements, except that the Administrator may adjust any applicable deadlines (other than attainment dates) to the extent such adjustment is necessary or appropriate to assure consistency among the required submissions." Under the Moderate area plan requirements of CAA section 182(b)(1) and 40 CFR 51.1108, states with ozone nonattainment areas classified as Moderate are provided 3 years (or 36 months) from the date of designation to submit a SIP revision complying with the Moderate ozone nonattainment plan requirements. For areas designated nonattainment for the 2008 ozone NAAQS and originally classified as Moderate, that deadline was July 20, 2015, a date that has already passed. The EPA, therefore, interpreted CAA section 182(i) as providing the authority to adjust the applicable deadlines "as necessary or appropriate to assure consistency among the required submissions" for the 11 reclassified 2008 Marginal ozone nonattainment areas. The CAA neither provides authority for the EPA to adjust the deadline to provide the full 3 years from the date of reclassification nor provides that the EPA may adjust the attainment date. In determining an appropriate deadline for the states with jurisdiction for these 11 reclassified nonattainment areas to submit their Moderate area SIP revisions, the EPA proposed two options for deadlines. The first proposed option would require that states submit the required SIP revisions as expeditiously as practicable, but no later than the beginning of the ozone season in 2017 for each state. We believed that this option would provide states additional time that may be needed to accomplish planning, administrative and SIP revision processes. Of the 11 areas proposed for reclassification to Moderate, four areas have ozone seasons that begin later than January 1 (based on ozone monitoring season changes finalized with the 2015 ozone NAAQS)[4] and this option would provide 2 additional months past January 2017 for those four areas. The second proposed option would require states submit the SIP revisions as expeditiously as practicable, but no later than January 1, 2017. We believed that setting a single specific submittal date would establish a consistent deadline for all 11 nonattainment areas, similar to the single uniform SIP submission deadline that would have applied to all areas if they had been initially classified as Moderate. This option would provide states with approximately 9 months after these reclassifications are finalized to develop complete SIP submissions and it is the latest SIP submittal date that would be compatible with the date by when Moderate area reasonably available control measures (RACM) and reasonably available control technology (RACT) must be in place (*i.e.,* begin no later than January 1 of the 5th year after the effective date of designation for the 2008 ozone NAAQS, which is, in this case, January 1, 2017).

E. Rescission of Clean Data Determination and Proposed SIP Call for the 1997 8-Hour Ozone NAAQS for New York-N. New Jersey-Long Island (NY-NJ-CT) Nonattainment Area

On June 18, 2012, the EPA issued a clean data determination (CDD) for the NY-NJ-CT nonattainment area, suspending the three states' obligations to submit attainment-related planning requirements, including the obligation to submit attainment demonstrations, RACM and reasonable further progress (RFP) plans, and contingency measures, with respect to the 1997 8-hour ozone

[3] The 2012–2014 design values for the 11 areas did not exceed 0.100 ppm, which is the threshold for reclassifying an area to Serious per CAA section 181(b)(2)(A)(ii) and 40 CFR 51.1103.

[4] *See* Table D–3 of appendix D to 40 CFR part 58.

standard. On May 15, 2014 (79 FR 27830), the EPA proposed to rescind the CDD for the area based on the fact that the area was no longer attaining the 1997 8-hour ozone standard, and the EPA proposed a SIP Call for submittal of a new ozone attainment demonstration for the NY-NJ-CT area for the 1997 ozone NAAQS. As an alternative to submitting a new attainment demonstration for the 1997 ozone NAAQS, the EPA proposed to permit the relevant states to respond to the SIP Call by voluntarily requesting to be reclassified to Moderate for the 2008 ozone standard (*see* CAA section 181(b)(3)) and to prepare SIP revisions demonstrating how they would attain the more stringent 2008 standard as expeditiously as practicable, but no later than the Moderate area attainment date in 2018. The EPA explained in the May 2014 proposal that, because the 2008 standard is more stringent than the 1997 standard, the area would necessarily attain the 1997 standard once the area adopted a control strategy designed to achieve the tighter standard. Moreover, where state planning resources were constrained, those resources were better used focused on attaining the more stringent standard.

In the agency's August 27, 2015, proposal regarding determinations of attainment of the 2008 Marginal ozone areas, the EPA discussed how its proposed actions affected the May 2014 proposed options for responding to a SIP Call for the 1997 8-hour ozone NAAQS. Specifically, the proposed option to permit the relevant states to respond to the final SIP Call by requesting reclassification to Moderate for the 2008 ozone standard [*see* CAA section 181(b)(3)] would consequently require that the states submit SIPs demonstrating how they would attain the more stringent 2008 standard as expeditiously as practicable. We explicitly noted in the August 2015 proposal that, if we were to finalize the determination that the NY-NJ-CT area failed to attain the 2008 ozone NAAQS by the Marginal area attainment date, the area would be reclassified by operation of law, and thus effectively eliminating the need for the three states to voluntarily request reclassification. The area would then be subject to Moderate nonattainment area planning requirements, and the subsequent submission of Moderate area attainment plans for the 2008 ozone standard would necessarily satisfy a final SIP Call for the NY-NJ-CT area on the 1997 ozone standard, because an approvable plan would demonstrate attainment of a more stringent NAAQS. We also noted that either of the proposed 2008 ozone attainment plan due dates would meet the statutory timeframe for the SIP revision due subsequent to a SIP Call for the 1997 ozone NAAQS for the area.

II. Final Actions

The publication of the EPA's proposed rule on August 27, 2015, (80 FR 51992) started a public comment period that ended on September 28, 2015.[5] The comments received during this period may be found in the electronic docket for this action. A majority of commenters supported the EPA's actions as proposed to determine that certain areas attained the 2008 ozone NAAQS by the applicable attainment date, to provide 1-year attainment date extensions to the identified areas, and to reclassify to Moderate the non-attaining areas that do not qualify for an attainment date extension. Additional significant comments pertinent to each proposed action are addressed in the following appropriate sections. Included in the docket for this action is a full summary of significant comments received on the EPA's proposal and our responses to those comments. To access comments and the Response to Comment document, please go to *http://www.regulations.gov* and search for Docket No. EPA–HQ–OAR–2015–0468, or contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section.

[a] On July 28, 2015, the EPA redesignated to attainment the North Carolina portion of the Charlotte-Rock Hill, NC-SC, nonattainment area for the 2008 8-hour ozone NAAQS, effective August 27, 2015. *See* 80 FR 44873. On December 11, 2015, the EPA redesignated to attainment the South Carolina portion of the Charlotte-Rock Hill, NC-SC, nonattainment area for the 2008 8-hour ozone NAAQS, effective January 11, 2016. *See* 80 FR 76865. The EPA is herein determining that this area attained the 2008 ozone NAAQS by the applicable attainment date in order to satisfy the agency's obligation under CAA section 181(b)(2)(A).

[b] On July 13, 2015, the EPA redesignated to attainment the Knoxville, TN, nonattainment area for the 2008 8-hour ozone NAAQS, effective August 12, 2015. *See* 80 FR 39970. Given that this area was still designated nonattainment as of July 20, 2015, the EPA is herein determining that this area attained the 2008 ozone NAAQS by the applicable attainment date in order to satisfy the agency's obligation under CAA section 181(b)(2)(A).

[c] On February 10, 2016, the EPA proposed to redesignate to attainment the Arkansas portion of the Memphis, TN-MS-AR, nonattainment area for the 2008 8-hour ozone NAAQS. *See* 81 FR 7046. On February 11, 2016, the EPA proposed to redesignate to attainment the Mississippi portion of the Memphis, TN-MS-AR, nonattainment area for the 2008 8-hour ozone NAAQS. *See* 81 FR 7269.

A. Determinations of Attainment

Pursuant to section 181(b)(2)(A) of the CAA and 40 CFR 51.1103, the EPA is making a final determination that the 17 Marginal nonattainment areas listed in Table 1 attained the 2008 ozone NAAQS by the applicable attainment date of July 20, 2105. We received no adverse comments on this proposal.

Once effective, this action satisfies the EPA's obligation pursuant to CAA section 181(b)(2)(A) to determine, based on an area's air quality as of the attainment date, whether the area attained the standard by that date. The effect of a final determination of attainment by the area's attainment date is to discharge the EPA's obligation under CAA section 181(b)(2)(A), and to establish that, in accordance with CAA section 181(b)(2)(A), the areas will not be reclassified for failure to attain by the applicable attainment date. These determinations of attainment do not constitute a redesignation to attainment. Redesignations require states to meet a number of additional statutory criteria, including the EPA approval of a state plan demonstrating maintenance of the air quality standard for 10 years after redesignation. As for all NAAQS, the EPA is committed to working with states that choose to submit redesignation requests for the 2008 ozone NAAQS.

B. Extensions of Marginal Area Attainment Dates

Pursuant to CAA section 181(a)(5), the EPA is making a final determination to grant 1-year attainment date extensions of the applicable attainment date from July 20, 2015, to July 20, 2016, for the 8 Marginal nonattainment areas listed in Table 2. The EPA received a number of comments on its proposal to extend the Marginal area attainment dates for the areas listed in Table 2. We summarize and respond to some of the key comments. The docket for this action contains a more detailed Response to Comment document.

Comment: One commenter claimed that the EPA's proposed 1-year extension of the attainment date for the Philadelphia-Wilmington-Atlantic City, PA-NJ-MD-DE area is unlawful and arbitrary because the state of Delaware did not request an extension of the attainment date. The commenter argued that granting an attainment date extension to a multi-state area when all states have not requested the extension is inconsistent with the EPA's failure to grant the state of New York's most recent voluntary reclassification request with regard to the 1997 8-hour ozone NAAQS.[6] The commenter stated that there, the EPA refused to grant New York's request because the agency's position was that voluntarily reclassifying the area required all states with jurisdiction over the multi-state area to request the reclassification. The commenter noted that in that case the EPA interpreted CAA section 182(j)(1) "to require coordination and unanimity among the affected states," and the commenter stated that the provision "seemingly has equal bearing" on a request to extend the attainment date.

Response: The EPA disagrees with the commenter that a request for voluntary reclassification under CAA section 181(b)(3) and a request for an extension of the attainment date under CAA section 181(a)(5) both require "unanimity" among the affected states. The EPA also does not agree that granting an extension of the attainment date to all states with jurisdiction over the Philadelphia multi-state nonattainment area is inconsistent with its prior reading of CAA section 182(j)(1).

The statutory provisions governing voluntary reclassifications and requests for 1-year attainment date extensions differ in key respects regarding the question of whether all states in a nonattainment area need to request the action before the EPA may grant such requests. CAA section 181(b)(3), which governs voluntary reclassifications, states that "the Administrator shall grant the request of any State to reclassify a nonattainment area *in that State* [in accordance with the area's

[6] Letter from Joseph J. Martens, Commissioner, New York Department of Environmental Conservation, addressed to the EPA Administrator Lisa Jackson. June 20, 2012.

design value] to a higher classification" (emphasis added). The EPA reads that provision, and specifically the words "in that state," to mean that although any state may request a reclassification, it can only do so on behalf of its own state. The same limiting phrase does not appear in the statutory provision governing 1-year attainment date extensions. That provision, CAA section 181(a)(5), states, "Upon application by any State, the Administrator may extend for 1 additional year" the attainment date, provided that the state has complied with all requirements and commitments pertaining to the area in its applicable implementation plan and the area meets certain air quality criteria. Because the statute grants the EPA the discretion to extend an attainment date "upon application by any State" and establishes limiting conditions that can be demonstrated as satisfied by either a state or by the EPA, CAA section 181(a)(5) by its terms does not require the consent of every state within a multi-state nonattainment area. The EPA does, however, interpret that provision as requiring all states with jurisdiction over the nonattainment area to substantively meet the two statutory conditions, although we note that the provision does not specify who must make the demonstration that the conditions have been met.

Interpreting these two provisions to permit differing thresholds of state "unanimity" is particularly reasonable given the consequence of the EPA's action in each case. In extending an attainment date, the EPA imposes no additional obligation upon any state, but rather grants areas that are close to achieving the air quality standard 1 additional year to come into compliance, provided that the states governing that area meet certain criteria. A voluntary reclassification, on the other hand, can impose significant new attainment planning and emission reduction obligations. Had Congress intended to allow one state to request a reclassification on behalf of another state, and, therefore, to impose upon another state, without that state's consent, all of the resource-intensive consequences potentially associated with that action, it could have clearly stated so.

The EPA further disagrees with the commenter that its prior interpretation of CAA section 182(j)(1)—requiring all states in a multi-state ozone nonattainment area to agree to a voluntary reclassification—is inconsistent with *not* requiring such consensus in the case of an attainment date extension. CAA section 182(j)(1)(A) directs states to "take all reasonable steps to coordinate, substantively and procedurally, the revisions and implementation of [SIPs] applicable to the nonattainment area concerned." This provision on its face does not apply to an attainment date extension under CAA section 181(a)(5). Extending the attainment date by 1 year does not change an area's SIP submission requirements. Therefore, CAA section 182(j)(1)(A)'s directive to states governing a multi-state area to coordinate SIP submissions plainly does not have bearing on a provision that does not alter or affect SIP submissions. By contrast, as the EPA has stated, the coordination required by CAA section 182(j)(1)(A) is relevant to a voluntary reclassification, which establishes upon the states with jurisdiction over the nonattainment area new obligations to prepare and submit revisions to SIPs.

Comment: One commenter stated that the states of Delaware and New Jersey did not make any claim or demonstration that they have complied with all requirements and commitments in the SIP, and, therefore, granting an extension to the multi-state area is not warranted. The commenter alleged that the EPA implied that an analysis of Delaware's compliance with the CAA section 181(a)(5)(A) criteria was conducted but that the EPA failed to provide any evidence or showing that Delaware did in fact comply with all requirements and commitments in the applicable implementation plan pertaining to the Philadelphia nonattainment area.

Response: Given the state and federal partnership in implementing the CAA, it is not unreasonable for the EPA to interpret CAA section 181(a)(5)(A), in the absence of a state submitting a certification of compliance, for the EPA to exercise discretion and conduct an independent review of the applicable SIP in order to, in this case, determine whether Delaware and New Jersey are in compliance with the requirements and commitments of the federally-approved SIP. CAA section 302(q) defines "applicable implementation plan" as the portion (or portions) of the implementation plan, or most recent revision thereof, which has been approved under CAA section 110, or promulgated under CAA section 110(c), or promulgated or approved pursuant to regulations promulgated under CAA section 201(d) and which implements the relevant requirements of the CAA. The Act does not specify what type of review is required in order for the states or the EPA to demonstrate that the condition under CAA section 181(a)(5)(A) has been met; therefore, the EPA reasonably interprets the condition to require a review of the relevant, applicable approved implementation plan provisions, and an application of its own knowledge and expertise with regard to whether the state is meeting those obligations, including a review of whether the agency or outside parties has identified state noncompliance with the obligations. Therefore, in proposing to grant a 1-year extension of the attainment date for the Philadelphia area, and in conjunction with EPA Headquarters, the EPA Regional Offices, which have particular expertise and knowledge of the contents and implementation of SIPs, conducted reviews of whether Delaware and New Jersey are in compliance with their applicable implementation plans.

The EPA reviewed New Jersey's applicable ozone implementation plan found at 40 CFR 52.1570 and the most recent actions related to New Jersey's applicable ozone implementation plan, which include the following EPA approvals: 74 FR 22837—"Approval and Promulgation of Implementation plans, New Jersey Reasonable Further Progress Plans, Reasonable Available Control Technology, Reasonably Available Control Measures and Conformity Budgets"; 75 FR 45483—"Approval and Promulgation of Implementation Plans; Implementation Plan Revision; State of New Jersey"; and 75 FR 80340—"Approval and Promulgation of Implementation Plans; New Jersey; 8-hour Ozone Control Measure." Since the adoption of these measures, New Jersey has also amended its SIP to adopt and implement additional emission reductions as part of its SIPs to reduce regional haze and to meet the NAAQS for fine particles. The EPA has reviewed the contents of New Jersey's applicable SIPs and notes that there are no pending enforcement actions by the EPA or outside parties alleging that New Jersey has failed to implement its applicable plan.

Similarly, the EPA reviewed Delaware's applicable ozone implementation plan found at 40 CFR 52.420. In our August 2015 proposal, we noted a recent proposal to disapprove a revision to Delaware's New Source Review (NSR) preconstruction permitting program regulation, *see* 80 FR 30015 (May 26, 2015). Despite this proposed disapproval of a SIP revision, we did not believe this proposal to disapprove a SIP revision was a bar to the EPA granting a 1-year attainment date extension for the Philadelphia area because there is an underlying approved nonattainment NSR SIP. The EPA has examined its own internal database of the notices required under 40 CFR 51.161(a), (b) and (d) (relating to a

notice providing for public and the EPA comment on permit applications) and information posted by the state of Delaware. For the period after September 11, 2013 (the date on which Delaware's newly expanded offset area provisions under state law were effective), the EPA has identified no permits which triggered the requirement for lowest achievable emission rate (LAER) and offsets under Delaware's Regulation 1125 relating to ozone precursors of volatile organic compounds and nitrogen oxides (NO_X). The EPA found that Delaware had undertaken a number of permitting actions since September 11, 2013, but none of these were subject to sections 2.5.5 and 2.5.6 of Delaware's Regulation 1125. The EPA also did not find any incidences of enforcement actions by the agency or outside parties alleging that Delaware is not meeting its SIP obligations.

Moreover, the commenter has not presented any evidence or made any demonstration that suggests either New Jersey or Delaware is not in compliance with their applicable SIP and is, thus, unqualified to receive an attainment date extension. Based on its review of the states' applicable implementation plans and its knowledge and expertise of state actions with regard to those plans, the EPA is making a final determination that both New Jersey and Delaware are meeting the conditional requirement of CAA section 181(a)(5)(A).

Comment: One commenter requested that the EPA deny Wisconsin's request for a 1-year extension to their attainment year for the Sheboygan County Marginal ozone nonattainment area. The commenter argued that 2015 preliminary air quality monitoring data for the Sheboygan area indicates that the area will not attain the standard in 2016, and, moreover, that the data also will not support a second 1-year extension of the attainment date for the Sheboygan area. The commenter maintained that even if a state meets the two conditions provided in CAA section 181(a)(5), the EPA retains the discretion to deny a request for a 1-year extension, and the commenter urged that the EPA should exercise its discretion in this case. In support, the commenter provided a citation to a 1994 EPA memo (Berry Memorandum)[7] that cautions states to consider whether an attainment date extension will ultimately be helpful if the area is not likely to attain the NAAQS by the extended attainment date. The commenter further pointed out that Wisconsin has an "inflexible and lengthy process for rulemaking," which could further hinder the state's ability to meet the attainment date in the future, if the state delays planning and implementing additional control measures now. The commenter also pointed out that the Sheboygan area has not made considerable progress towards attaining the standard, and that the area backslid into nonattainment for the 1997 8-hour ozone NAAQS in 2012 and 2013. The commenter suggested that, rather than granting a 1-year extension of the attainment date, the EPA should determine that the Sheboygan area failed to meet its Marginal area attainment date of July 20, 2015, and, therefore, the EPA should reclassify the area to Moderate, which will allow the state of Wisconsin adequate time to achieve emissions reductions to meet the new attainment date for a Moderate area.

Response: CAA section 181(a)(5) of the CAA, as interpreted by the EPA in 40 CFR 51.1107, authorizes the EPA to grant a 1-year attainment date extension upon application by a state if: (1) The state has complied with all requirements and commitments in the applicable SIP, and (2) all monitors in the area have a fourth highest daily maximum 8-hour average of 0.075 ppm or less for the last full year of air quality data prior to the attainment date (*i.e.,* 2014 for an attainment date of July 20, 2015). Here, Wisconsin has clearly met both of the conditions for the Sheboygan area. Wisconsin submitted a request to the EPA for a 1-year extension of the attainment date for the Sheboygan area, certifying that Wisconsin had complied with all requirements and commitments pertaining to the area in the applicable implementation plan and that all monitors in the area have a fourth highest daily maximum 8-hour average of 0.075 ppm or less for 2014, the most recent complete year of quality-assured and certified data preceding the July 20, 2015, attainment date.[8] The EPA has also evaluated the quality-assured and certified air quality monitoring data for 2014 and determined that Sheboygan met the air quality requirements of CAA section 181(a)(5)(B) and 40 CFR 51.1107. Although the EPA agrees with the commenter that the Administrator retains the discretion to deny a state's request for an attainment date extension even if the state has met both criteria in CAA section 181(a)(5), the agency is declining to exercise that discretion here. The commenter relies primarily upon preliminary air quality data for 2015 that has not been quality assured and certified to contend that the Administrator should deny Wisconsin's request here.[9] Given that the state meets the extension criteria, the Administrator is disinclined to deny the state's request based on preliminary data. Moreover, the citation from the Berry Memorandum that the commenter relies upon is directed at cautioning states, in deciding whether *to request* an extension, to consider whether a 1-year attainment date extension will be helpful in achieving the NAAQS and is not directed at the Administrator's decision to grant or deny such request. The EPA does, however, agree with the commenter that, given the air quality trends and data presented by the commenter, it would be prudent for the state to begin preparing for the possibility that the area may not attain by the July 20, 2016, attainment date, and also may fail to meet the requirements to get an additional 1-year attainment date extension. However, the agency does not believe that those possibilities are reason enough to deny the state's request for this first 1-year attainment date extension, given that Wisconsin has met the two statutory criteria. Therefore, the EPA declines to grant the commenter's request to find that the area failed to attain by July 20, 2015, and to subsequently reclassify the area accordingly. The Sheboygan nonattainment area will remain classified as Marginal for the 2008 ozone NAAQS until the EPA (1) determines, based on quality assured and certified air quality data for 2013–2015, that the area did not attain the 2008 ozone NAAQS by July 20, 2016, and does not qualify for an additional 1-year extension[10] and (2) reclassifies the area based on this determination. We expect Wisconsin to be taking the necessary steps to achieve timely attainment and will continue to work with the state toward that end.

[7] *See* memorandum signed by D. Kent Berry, Acting Director, Air Quality Management Division, "Procedures for Processing Bump Ups and Extension Requests for Marginal Ozone Nonattainment Areas." U.S. EPA, February 3, 1994.

[8] *See* letter signed by Bart Sponseller, Deputy Division Administrator, Air, Waste and Remediation & Redevelopment Division, Wisconsin Department of Natural Resources addressed to Ms. Susan Hedman, Regional Administrator, U.S. EPA Region 5. RE: Request for 1-year extension to the attainment date for the Sheboygan, WI nonattainment area, May 12, 2015. Docket EPA–HQ–OAR–2015–0468–0022 at *http://www.regulations.gov.*

[9] These data are subject to the EPA's date certification requirements of 40 CFR 58.15, which require a state to submit its annual data certification letter by May 1.

[10] The area will qualify for a second 1-year extension if, and only if, the average of annual fourth-high daily maximum 8-hour ozone concentrations for 2014 and 2015 is at or below 0.075 ppm at all monitors in Sheboygan County.

Comment: One commenter maintained that, in evaluating whether a state is in compliance with all requirements and commitments pertaining to an area pursuant to CAA section 181(a)(5)(A), the EPA may not rely on a letter from the state certifying that the state is meeting this requirement. The commenter argued that there must be a factual and rational basis for the agency to grant 1-year extensions and that assertions by the states that they are in compliance with all requirements and commitments does not provide a factual or rational basis when there is no evidence that the assertion was based on a systematic review of compliance or noncompliance.

Response: The EPA disagrees with the commenter's assertion. CAA section 181(a)(5) does not specify who must make the demonstration as to whether a state is complying with all requirements and commitments to the area in the applicable implementation plan. Nothing in the provision explicitly prohibits the EPA from relying on certified statements from state officials that the requirement of CAA section 181(a)(5)(A) has been met, and nothing in the provision supports the commenter's suggestion that the EPA is independently required to perform a "systematic review of compliance or noncompliance" of the state's SIP regardless of whether a state official has made a certified statement to that effect in order to grant an attainment date extension. Given the state and federal partnership in implementing the CAA, it is not unreasonable for the EPA to interpret CAA section 181(a)(5)(A) as permitting the agency to rely upon the certified statements of its state counterparts, and the EPA has long interpreted the provision to be satisfied by such statements.[11] In practice, in conjunction with a request for an extension, a state air agency's Executive Officer, or other senior individual with equivalent responsibilities, signs and affirms that their state is complying with their applicable federally-approved SIP. The commenter argues that the certifications lack rational or factual bases, but has not presented any evidence or made any demonstration that suggests any of the states receiving an attainment date extension are not in compliance with their SIPs. Absent such a showing, the EPA is disinclined to invalidate the certifications made by the states.

[11] *See* Berry Memorandum.

C. Determinations of Failure To Attain and Reclassification

Pursuant to CAA section 181(b)(2), the EPA is finalizing its proposed determinations that the 11 Marginal nonattainment areas listed in Table 3 have failed to attain the 2008 ozone NAAQS by the applicable attainment date of July 20, 2015. Therefore, upon the effective date of this rule, these 11 Marginal 2008 ozone nonattainment areas will be reclassified by operation of law to Moderate for the 2008 ozone standard. The EPA received a number of adverse comments on its proposal to find that certain Marginal nonattainment areas failed to attain and to reclassify those areas. We summarize and respond to some of the key comments later. The docket for this action contains a more detailed Response to Comments document.

Comment: A number of commenters, while conceding that air quality monitoring data factually required the EPA to determine that an area failed to attain by its attainment date, alleged that certain nonattainment areas' failure to attain by the Marginal area attainment date was due in large part to the influence of transported emissions from upwind states. These commenters alleged that the EPA has not done enough to enforce CAA section 110(a)(2)(D), which requires states to eliminate emissions that significantly contribute to, or interfere with maintenance of the NAAQS in other states. One commenter further noted that the EPA's current strategy with regard to ozone transport addresses only the revoked 85 parts per billion (ppb) standard, and that the EPA has no strategy to reduce transport after 2017.

Response: The agency's mandatory duty to make determinations of attainment or failure to attain the NAAQS exists regardless of the nature or effect of transported emissions on monitored air quality data in a given nonattainment area.[12] Nonetheless, the EPA readily acknowledges the role interstate transport of precursors to ozone pollution plays in the efforts of downwind areas to attain and maintain the NAAQS. To that end, as commenters have alluded to, the agency has taken a number of steps to fulfill its statutory obligation to enforce CAA section 110(a)(2)(D), or the "good neighbor" provision, including the NO_X SIP Call, the Clean Air Interstate Rule, and the Cross-State Air Pollution Rule (CSAPR). most recently, the EPA has proposed to update CSAPR specifically to address the 2008 ozone NAAQS with tightened NO_X budgets designed to achieve emission reductions in upwind states before the Moderate area attainment date of July 2018.

[12] *See Sierra Club* v. *EPA*, 294 F.3d 155, 160–62 (D.C. Cir. 2002) (holding that the EPA is not permitted to relax mandatory statutory requirements for downwind areas on the basis of interstate transport).

D. Moderate Area SIP Revision Submission Deadline

The EPA received a number of comments on its two proposed options for establishing the Moderate area SIP due date that would apply to areas newly reclassified under this final action. After full consideration of those comments and pursuant to CAA section 182(i), the EPA is finalizing that SIP revisions required for the newly reclassified Moderate areas must be submitted as expeditiously as practicable, but no later than January 1, 2017. The EPA acknowledges that for some states with Moderate nonattainment areas reclassified from Marginal, meeting this SIP submittal deadline may be challenging. The EPA is committed to working closely with these states to help them prepare their SIP revisions in a timely manner.

We summarize and provide responses to the most significant comments on this issue later; however, all comments received on the proposed options and the EPA's responses are available in the Response to Comment document located in the docket for this final rule.

Comment: One commenter contended that the EPA failed to provide a legal basis for extending the SIP submittal deadlines for Moderate nonattainment areas. The commenter believed that the EPA made no claim that the 2017 SIP submittal deadlines are necessary or appropriate to assure consistency among the required submissions. The commenter also believed that the EPA's proposed extension would interfere with the attainment date and contravene CAA section 110(l). The commenter pointed out that if the EPA finalized the SIP submission deadline to coincide with the area's beginning of the ozone monitoring season, the consequence would be that the EPA would have less than 18 months to take action on state SIP submittals, as late as July 2018, which is very near the attainment date. The commenter believed that would be far too late for the EPA to require timely corrections of SIPs that fail to satisfy the requirements and fail to assure timely attainment.

Response: The EPA disagrees with the commenter on all aspects of these comments. First, we believe that CAA section 182(i) clearly provides the Administrator the discretion to adjust any applicable deadline for reclassified

areas (other than attainment dates) to the extent such adjustment is necessary or appropriate to assure consistency among the required submissions.

The EPA disagrees with the implication of the comment that the default assumption upon reclassification is that the EPA would not adjust the Moderate area SIP submission deadlines. The fact that Congress included CAA section 182(i) in the statute indicates that it envisioned that upon reclassification, deadlines would be adjusted by the Administrator in a reasonable fashion. This is a particularly reasonable interpretation under the facts at issue here: The attainment date for Marginal areas under the statute and regulations was July 20, 2015, and the Moderate area SIP submission date for areas initially classified as Moderate for the 2008 ozone NAAQS was also July 20, 2015. Under CAA section 181(b)(2)(A), the EPA must make determinations of attainment and necessary reclassifications within 6 months of the statutory attainment date. Therefore, under the commenter's interpretation of the CAA, upon reclassification 6 months after July 20, 2015, states would immediately be found to be in default of the obligation to submit a Moderate area plan, a deadline that had passed 6 months prior, even though that obligation did not apply until the moment of reclassification. We do not agree that Congress would have intended the draconian and absurd result of providing states initial notice of an obligation and in the same action finding them at fault for already failing to have met that obligation. Therefore, the EPA believes that it is reasonable to read CAA section 182(i) in the context of the 11 reclassified 2008 Marginal ozone areas to provide the Administrator the authority to adjust the applicable deadline for Moderate area attainment plans "as necessary or appropriate to assure consistency among the required submissions."

Moreover, failing to establish new Moderate area SIP submission deadlines for the 11 areas that we are reclassifying in this rulemaking would lead to potential inconsistency in required submissions among those areas. Under the commenter's interpretation, these areas would all have missed their deadline to submit a Moderate area plan on July 20, 2015. The commenter would, therefore, have the EPA begin issuing findings of failure to submit under CAA section 110(k), which are required by statute 6 months following the statutory deadline to submit a SIP, simultaneously with this action, that is, the EPA's determination that the areas failed to attain and reclassification of those areas. Following the EPA's issuance of findings of failure to submit for the 11 areas, there would be no defined statutory or regulatory deadline by which to remedy the states' failures to make submittals, except the outside limit of 2 years, the deadline for EPA's obligation to implement a Federal Implementation Plan (FIP). Additionally, if the EPA had not affirmatively determined that a state had made a complete SIP submittal for an area within 18 months from the issuance of a finding of failure to submit, the offset sanction identified in CAA section 179(b)(2) would apply to the affected nonattainment area.

The EPA also disagrees with the commenter that establishing a new SIP submittal deadline for the reclassified areas is in contravention of CAA section 110(l). CAA section 110(l) requires that plan revisions must go through notice and public hearing at the state level before submission to the EPA, and that "the Administrator shall not approve a revision of a plan if the revision would interfere with any applicable requirement concerning attainment and reasonable further progress . . . or any other applicable requirement of this chapter." In order for the EPA's proposed SIP submittal date to be in contravention of CAA section 110(l), one has to assume that the states will submit deficient SIPs and that the EPA will not take any kind of corrective action on those SIPs until after the maximum possible time period permitted under the statue to take action on such submittals (18 months) has passed. Only then could a SIP submittal date of more than 18 months prior to the attainment date be interpreted as interfering with the attainment of the NAAQS. The EPA does not believe this is a reasonable reading of CAA section 110(l) or the circumstances of these reclassifications and SIP deadline adjustments. While the EPA acknowledges that the timeline for preparation and submittal of SIPs must be compressed in order for measures to be in place to ensure areas attain by their new Moderate area attainment date, in establishing the new SIP submittal deadlines for these reclassified areas, the agency is also taking into account the time required for states to identify measures, complete the public notice and hearing process at the state level, and prepare SIP submissions.

Comment: Several commenters supported the EPA's proposed option to align the deadline for SIP revisions with the start of the respective nonattainment area's 2017 ozone season. They cited a number of reasons this option was preferred, including that more time would be provided to states to accomplish planning, administrative and SIP revisions processes in order to meet the deadline. They also cited that this option would be consistent among states in that they would need to submit their SIP revisions by their respective ozone seasons. However, another commenter pointed out that finalizing this option would result in SIP submittal dates that would be varied among the states and, therefore, inconsistent. The same commenter also stated that setting the SIP deadline for the beginning of each area's ozone season would not be compatible with ensuring implementation of RACT by January 1, 2017, which is the deadline established in 40 CFR 51.1112(a)(3).

Response: As noted earlier, of the 11 areas being reclassified to Moderate, there are only four areas located in states with ozone seasons that begin later than January 1 that could potentially benefit from an extra 2 months to submit their SIP revisions. While the EPA recognizes the value of additional time (beyond January 1, 2017) to these states to develop an attainment demonstration, an RFP plan, and contingency measures, the EPA also recognizes the value in establishing a single due date for Moderate area SIP submissions—including RACT—that does not extend beyond the deadline for implementing such controls. Thus, the EPA is finalizing its second proposed option, which requires that states submit the required Moderate area SIP revisions as expeditiously as practicable, but no later than January 1, 2017. This approach aligns the SIP submittal deadline with the January 1, 2017, deadline for implementing RACT pursuant to 40 CFR 51.1112(a)(3), for each area, and would also ensure that SIPs requiring control measures needed for attainment, including RACM, would be submitted prior to when those controls are required to be implemented. This option also treats states consistently, in keeping with CAA section 182(i). The EPA recognizes the challenges posed by these very short deadlines and is committed to working closely with all states to help them prepare their SIP revisions, including parallel processing, in a timely manner.

E. Rescission of Clean Data Determination and Final SIP Call for the 1997 8-Hour Ozone NAAQS for the New York-N. New Jersey-Long Island (NY-NJ-CT) Nonattainment Area

This action finalizes the EPA's determination that the NY-NJ-CT nonattainment area failed to attain the

2008 standard by the Marginal area attainment date of July 20, 2015, and must be reclassified to Moderate by operation of law in accordance with CAA section 181(b)(2)(A). In addition, the EPA is also finalizing in this rulemaking the proposed rescission of its prior CDD for the NY-NJ-CT nonattainment area with regard to the 1997 8-hour ozone NAAQS, as well as the accompanying SIP Call proposed with that rescission. As noted previously, in the May 2014 proposal, the EPA proposed that one way the affected states could respond to the SIP Call would be to voluntarily request a reclassification under the 2008 ozone NAAQS and to submit a SIP that meets the Moderate area requirements for that standard.

By reclassifying the area by operation of law, this final action effectively eliminates the need for the three affected states to request reclassification under this option. However, as explained in the agency's August 27, 2015, proposal and reiterated later, the EPA believes it is appropriate for the three states involved to be able to meet their obligations under the SIP Call for the 1997 ozone NAAQS with their Moderate area SIP submittal for the 2008 ozone standard. This final action also supersedes the 18 months, which is the maximum period allowed under CAA section 110(k)(5), that EPA proposed to provide the states of New York, New Jersey and Connecticut from the effective date of a final SIP Call to develop and submit to the EPA the relevant SIPs for the 1997 or 2008 ozone NAAQS. As discussed previously, the EPA is finalizing that the required SIP revisions for these areas shall be submitted as expeditiously as practicable, but no later than January 1, 2017. We also note that this deadline meets the statutory timeframe for a SIP revision under CAA section 110(k)(5).

The EPA did not receive adverse comments on its August 27, 2015, proposal to reclassify the NY-NJ-CT nonattainment area to Moderate, nor did the EPA receive comments about its statement that submitting an attainment plan for the 2008 ozone standard would satisfy a final SIP Call on the 1997 ozone standard. We received a number of comments on the May 15, 2014, proposal (79 FR 27830) to rescind the CDD for the NY-NJ-CT 1997 8-hour ozone nonattainment area and the accompanying SIP Call for attainment plans. We summarize later some of the significant comments submitted in response to the May 15, 2014, proposal and our responses. Additionally, we have made available a more detailed summary of comments and responses in a document titled, "*Response to Comments: Proposed Rule: Rescission of Determination of Attainment and Call for Attainment Plans for New York, New Jersey and Connecticut for the 1997 8-Hour Ozone National Ambient Air Quality Standards for the NY-NJ-CT 1997 Ozone Nonattainment Area,*" which is available in the docket associated with this rulemaking.

Comment: One commenter believed that CAA section 110(k)(5) either compels or provides the EPA the authority necessary to expand the proposed SIP Call to include any state that is shown to significantly contribute to the failure of the NY-NJ-CT area to attain because these states have failed to meet their obligations under CAA section 110(a)(2)(D)(i)(I).[13] The commenter further believed that CAA section 110(k)(5) allows the EPA to issue a SIP Call to address states' SIPs that are inadequate in mitigating transport as described in CAA sections 176A and 184. The commenter believed that the U.S. Supreme Court decision in *EPA* v. *EME Homer City* (134 S. Ct. 1584 (2014)), compels the EPA to immediately issue FIPs for upwind states that have failed to take all necessary steps to make it feasible for any nonattainment area significantly impacted by interstate air pollution to attain and maintain both the 1997 and 2008 8-hour ozone NAAQS. Finally, the commenter noted that the "CSAPR modeling shows that Connecticut receives no more than a 0.2 ppb total benefit from the CSAPR remedy, which is entirely inadequate given the overwhelming scope of transport."

Response: CAA section 110(a)(2)(D)(i)(I) requires states to prohibit emissions that contribute significantly to nonattainment in, or interfere with maintenance by any other state with respect to primary and secondary NAAQS. In the CSAPR promulgated on August 8, 2011 (76 FR 48207), the EPA found that emissions of sulfur dioxide and NO_X in 27 eastern, midwestern, and southern states contribute significantly to nonattainment or interfere with maintenance in one or more downwind states with respect to one or more of three air quality standards—the annual $PM_{2.5}$ NAAQS promulgated in 1997, the 24-hour $PM_{2.5}$ NAAQS promulgated in 2006, and, as relevant here, the ozone NAAQS promulgated in 1997.

For the 1997 ozone NAAQS specifically, twenty states are required under CSAPR to reduce NO_X emissions during the ozone season (May through September) because they contribute to downwind states' ozone pollution. The emission reductions under CSAPR in these upwind states will improve ozone air quality in downwind states and help them attain and maintain the 1997 8-hour ozone standard.

The timing of CSAPR's implementation was initially affected by litigation over the rule. On December 30, 2011, the D.C. Circuit stayed the effectiveness of CSAPR pending resolution of judicial review. On August 21, 2012, the D.C. Circuit vacated CSAPR,[14] but on April 29, 2014, the U.S. Supreme Court issued an opinion reversing the D.C. Circuit's 2012 decision and remanded the case to the D.C. Circuit.[15] Following the remand, on October 23, 2014, the D.C. Circuit granted the EPA's motion to lift the CSAPR stay and toll the CSAPR compliance deadlines by 3 years. Accordingly, CSAPR Phase 1 implementation began on January 1, 2015, with Phase 2 beginning in 2017. *See* CSAPR interim final rule at 81 FR 13275 (March 14, 2016). Subsequently, the D.C. Circuit issued its final ruling as to CSAPR, affirming it in most respects but invalidating without vacating several of the rule's state-specific budgets, including some of the rule's Phase 2 ozone-season NO_X budgets.[16] The EPA has since proposed a rulemaking to update to the CSAPR ozone-season NO_X budgets in order to address the more stringent 2008 ozone NAAQS and to respond to the D.C. Circuit's remand of the Phase 2 ozone-season NO_X budgets.[17] As proposed, the CSAPR Update ozone-season NO_X budgets would be effective starting in 2017, effectively replacing CSAPR Phase 2.

The EPA disagrees with the commenter that the Supreme Court's decision in *EPA* v. *EME Homer City* compels the agency to issue new FIPs or to expand the scope of the proposed SIP Call to address the 1997 and 2008 8-hour ozone NAAQS. The Supreme Court did, however, confirm that the EPA properly issued the CSAPR FIPs in response to disapprovals of SIPs or findings of failure to submit SIPs implementing states' 110(a)(2)(D)(i)(I) obligations with regard to the 1997 ozone NAAQS. Those FIPs took effect and began implementation on January 1,

[13] The commenter refers to states' interstate transport obligations under CAA section 110(a)(2)(D)(ii), but the EPA understands these citations to in fact refer to the good neighbor provision, which is CAA section 110(a)(2)(D)(i)(I).

[14] *EME Homer City Generation, L.P.* v. *EPA*, 696 F.3d 7, 38 (D.C. Circuit 2012).

[15] *EPA* v. *EME Homer City Generation, L.P.*, 134 S. Ct. 1584 (2014).

[16] *EME Homer City Generation, L.P.* v. *EPA*, 795 F.3d 118 (D.C. Circuit 2015).

[17] 80 FR 75706 (December 3, 2015).

2015 pursuant to the D.C. Circuit's grant of the EPA's motion requesting lifting of the stay, so we note that at the time the NY-NJ-CT area fell back into nonattainment of the 1997 standard, it did not have the benefit of CSAPR reductions. While the commenter points out that modeling conducted for the CSAPR rulemaking projected that the remedy would provide "no more than a 0.2 ppb total benefit," the same modeling also predicted that those reductions, once implemented, would fully resolve nonattainment and maintenance problems for the 1997 ozone NAAQS in the receptors identified in the NY-NJ-CT nonattainment area. For upwind states that were linked only to receptors where downwind nonattainment and maintenance problems were fully resolved under the remedy, the EPA found that CSAPR quantified the full reduction responsibility for the 1997 ozone NAAQS under CAA section 110(a)(2)(D)(i)(I).[18] Therefore, the EPA could not expand the scope of the SIP Call being issued on the basis that upwind states had not fulfilled their 110(a)(2)(D)(i)(I) obligations as to the 1997 ozone NAAQS when the EPA has already issued a FIP that fully resolves the obligations of those states with respect to that standard.

The EPA also does not agree that it would be appropriate in this action to more broadly apply its 110(k)(5) authority to include additional states in this SIP Call to address interstate pollutant transport as described in sections 176A and 184 of the CAA. The EPA acknowledges that a number of states, including Connecticut and New York, submitted a petition under CAA section 176A requesting that the EPA add additional states to the Ozone Transport Region (OTR) that was established under section 184 of the CAA. The EPA is reviewing that petition separately and is not acting on that petition in this action. In addition, the EPA's authority to require SIP revisions under 110(k)(5) as they relate to additional control measures required by CAA section 184 applies to only states that are currently part of the OTR.

III. Environmental Justice Considerations

The CAA requires that states with areas designated as nonattainment submit to the Administrator the appropriate SIP revisions and implement specified control measures by certain dates applicable to the area's classification. By requiring additional planning and implementation requirements for the 11 nonattainment areas that we determined failed to attain the 2008 ozone NAAQS standard, the part of this action reclassifying those 11 areas from Marginal to Moderate will protect all those residing, working, attending school, or otherwise present in those areas regardless of minority or economic status.

IV. Statutory and Executive Order Reviews

A. Executive Order 12866: Regulatory Planning and Review and Executive Order 13563: Improving Regulation and Regulatory Review

This action is exempt from review by the Office of Management and Budget (OMB) because it makes determinations if designated 2008 ozone nonattainment areas are either attaining or failing to attain the 2008 ozone NAAQS by the attainment date along with resulting reclassifications or determination to grant 1-year attainment date extensions.

B. Paperwork Reduction Act (PRA)

This rule does not impose any new information collection burden under the PRA. OMB has previously approved the information collection activities contained in the existing regulations and has assigned OMB control number 2060–0695. This action to find that the Marginal ozone nonattainment areas listed in Table 3 failed to attain the 2008 NAAQS by the applicable attainment date, to reclassify those areas as Moderate ozone nonattainment areas, and to adjust any applicable deadlines, does not establish any new information collection burden that has not already been identified in the existing 2008 ozone NAAQS Information Collection Request number 2347.01.

C. Regulatory Flexibility Act (RFA)

I certify that this action will not have a significant economic impact on a substantial number of small entities under the RFA. This action will not impose any requirements on small entities. Determinations of nonattainment and the resulting reclassification of nonattainment areas by operation of law under section 181(b)(2) of the CAA do not in and of themselves create any new requirements. Instead, this rulemaking only makes a factual determination, and does not directly regulate any entities. This action also establishes the deadline by which states will need to submit revisions to their SIPs to address the new Moderate area requirements, and that deadline, if based on the statute, would otherwise be more stringent. In this final action, the EPA is exercising discretion under CAA section 182(i) which allows the Administrator to provide state air agencies additional time to comply with those requirements.

D. Unfunded Mandates Reform Act (UMRA)

This action does not contain any unfunded mandate as described in UMRA, 2 U.S.C. 1531–1538, and does not significantly or uniquely affect small governments. This action imposes no enforceable duty on any state, local or tribal governments or the private sector.

E. Executive Order 13132: Federalism

This action does not have federalism implications. It will not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government.

F. Executive Order 13175: Consultation and Coordination With Indian Tribal Governments

This action does not have tribal implications as specified in Executive Order 13175. No tribal areas are implicated in the 11 areas that we are finding to have failed to meet their attainment date. The CAA and the Tribal Authority Rule establish the relationship of the federal government and tribes in developing plans to attain the NAAQS, and this rule does nothing to modify that relationship. Thus, Executive Order 13175 does not apply to this action.

G. Executive Order 13045: Protection of Children From Environmental Health and Safety Risks

The EPA interprets Executive Order 13045 as applying only to those regulatory actions that concern environmental health or safety risks that the EPA has reason to believe may disproportionately affect children, per the definition of "covered regulatory action" in section 2–202 of the Executive Order. This action is not subject to Executive Order 13045 because this action determines that 11 areas, identified in Table 3, did not attain the 2008 ozone standard by their applicable attainment date and to reclassify these areas as Moderate ozone nonattainment areas and to adjust applicable deadlines.

[18] *See* 76 FR 48210, Federal Implementation Plans: Interstate Transport of Fine Particulate Matter and Ozone and Correction of SIP Approvals (August 8, 2011).

H. Executive Order 13211: Actions That Significantly Affect Energy Supply, Distribution, or Use

This action is not subject to Executive Order 13211, because it is not a significant regulatory action under Executive Order 12866.

I. National Technology Transfer and Advancement Act

This rulemaking does not involve technical standards.

J. Executive Order 12898: Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Populations

The EPA believes the human health or environmental risk addressed by this action will not have potential disproportionately high and adverse human health or environmental effects on minority, low-income or indigenous populations. The results of this evaluation are contained in the section of the preamble titled "Environmental Justice Considerations."

K. Congressional Review Act (CRA)

This rule is exempt from the CRA because it is a rule of particular applicability that names specific entities where this rule makes factual determinations and does directly regulate any entities. The determinations of attainment and failure to attain the 2008 ozone NAAQS (and resulting reclassifications), and the determination to grant 1-year attainment date extensions do not in themselves create any new requirements beyond what is mandated by the CAA.

L. Judicial Review

Under section 307(b)(1) of the CAA, petitions for judicial review of final actions that are locally and regionally applicable may be filed only in the United States Court of Appeals for the appropriate circuit. However, the statute also provides that notwithstanding that general rule, "a petition for review of any action . . . may be filed only in the United States Court of Appeals for the District of Columbia if such action is based on a determination of nationwide scope or effect and if in taking such action the Administrator finds and publishes that such action is based on such a determination." 42 U.S.C. 7607(b)(1). *See also Dalton Trucking* v. *EPA,* 808 F.3d 875 (D.C. Circuit 2015). Because this final action makes findings with regard to nonattainment areas across the country, interprets the CAA and applies such interpretations to states and nonattainment areas across the country, and establishes SIP deadlines for newly reclassified areas in different states in a consistent fashion, the Administrator finds that this action has nationwide scope and effect. Therefore, in accordance with CAA section 307(b)(1), petitions for review of this final action may be filed only in the United States Court of Appeals for the District of Columbia Circuit by July 5, 2016. Note, under CAA section 307(b)(2), the requirements established by this final rule may not be challenged separately in any civil or criminal proceedings for enforcement.

List of Subjects

40 CFR Part 52

Environmental protection, Administrative practice and procedure, Air pollution control, Designations and classifications, Incorporation by reference, Intergovernmental relations, Nitrogen oxides, Ozone, Reporting and recordkeeping requirements, Volatile organic compounds.

40 CFR Part 81

Environmental protection, Administrative practice and procedure, Air pollution control, Designations and classifications, Intergovernmental relations, Nitrogen oxides, Ozone, Reporting and recordkeeping requirements, Volatile organic compounds.

Authority: 42 U.S.C. 7401 *et seq.*

Dated: April 11, 2016.

Gina McCarthy,

Administrator.

For the reasons stated in the preamble, parts 52 and 81, title 40, chapter I of the Code of Federal Regulations are amended as follows:

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

■ 1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

Subpart E—Arkansas

■ 2. Add § 52.174 to read as follows:

§ 52.174 Control strategy and regulations: Ozone.

(a) The EPA has determined that the Crittenden County Marginal 2008 ozone NAAQS nonattainment area attained the NAAQS by the applicable attainment date of July 20, 2015.

(b) [Reserved]

Subpart F—California

■ 3. Section 52.282 is amended by revising paragraphs (e) introductory text and (e)(1) and (2) to read as follows:

§ 52.282 Control strategy and regulations: Ozone.

* * * * *

(e) *Determinations of attainment.* Effective June 3, 2016.

(1) *Approval of applications for extensions of applicable attainment dates.* Under section 181(a)(5) of the Clean Air Act, the EPA is approving the applications submitted by the California Air Resources Board dated June 1, 2015, referencing the District's letter of May 19, 2015, for extensions of the applicable attainment date for the San Luis Obispo (Eastern San Luis Obispo), CA 2008 8-hour ozone nonattainment areas from July 20, 2015 to July 20, 2016.

(2) *Determinations of attainment.* The EPA has determined that the Calaveras County, Chico (Butte County), San Francisco Bay Area and Tuscan Buttes 2008 8-hour ozone nonattainment areas in California have attained the 2008 8-hour ozone standard by the July 20, 2015 applicable attainment date, based upon complete quality-assured data for 2012–2014. Therefore, the EPA has met its obligation pursuant to CAA section 181(b)(2)(A) to determine, based on the area's air quality data as of the attainment date, whether the area attained the standard. As a result of these determinations, the Calaveras County, Chico (Butte County), San Francisco Bay Area and Tuscan Buttes 2008 8-hour ozone nonattainment areas in California will not be reclassified for failure to attain by their July 20, 2015, applicable attainment date under section 181(b)(2)(A).

* * * * *

Subpart H—Connecticut

■ 4. Section 52.377 is amended by adding paragraph (p) to read as follows:

§ 52.377 Control strategy: Ozone.

* * * * *

(p) *Rescission of clean data determination for the 1997 eight-hour ozone standard.* Effective June 3, 2016, the EPA is determining that complete quality-assured and certified ozone monitoring data for 2012–2014 show the NY-NJ-CT 1997 eight-hour ozone nonattainment area did not meet 1997 eight-hour ozone standard. Therefore, the EPA is rescinding the clean data determination for the 1997 eight-hour ozone standard only. The prior determination (*see* paragraph k of this section) is in accordance with 40 CFR 51.918. The prior determination suspended the requirements for this area to submit an attainment demonstration, associated reasonably available control measures, a reasonable

further progress plan, contingency measures, and other planning SIPs related to attainment of the standard for as long as this area continues to meet the 1997 annual eight-hour ozone NAAQS. This rescission of the clean data determination will result in a SIP Call for a new ozone attainment demonstration, associated reasonably available control measures, a reasonable further progress plan, contingency measures, and other planning SIPs related to attainment of the standard, for this area only. If the revised plan is approved by the EPA as demonstrating reasonable further progress and attainment for the more stringent 2008 NAAQS by the Moderate area attainment date, and is approved by the EPA as containing adequate contingency measures for the 2008 NAAQS, then the plan would be deemed to have also satisfied requirements of the SIP Call associated with violations for the 1997 NAAQS.

Subpart I—Delaware

■ 5. Section 52.425 is amended by adding paragraph (c) to read as follows:

§ 52.425 Determinations of attainment.

* * * * *

(c) The EPA has determined, as of June 3, 2016, that based on 2012 to 2014 ambient air quality data, the Seaford, DE 2008 ozone Marginal nonattainment area has attained the 2008 ozone NAAQS by the applicable attainment date of July 20, 2015. Therefore, the EPA has met the requirement pursuant to CAA section 181(b)(2)(A) to determine, based on the area's air quality data as of the attainment date, whether the area attained the standard. The EPA also determined that the Seaford nonattainment area will not be reclassified for failure to attain by its applicable attainment date under section 181(b)(2)(A).

Subpart P—Indiana

■ 6. Section 52.777 is amended by adding paragraph (tt) to read as follows:

§ 52.777 Control strategy: photochemical oxidants (hydrocarbons).

* * * * *

(tt) *Determination of attainment.* As required by section 181(b)(2)(A) of the Clean Air Act, the EPA has determined that the Cincinnati, OH-KY-IN Marginal 2008 ozone nonattainment area has attained the 2008 ozone NAAQS by the applicable attainment date of July 20, 2015.

Subpart S—Kentucky

■ 7. Section 52.930 is amended by adding paragraph (m) to read as follows:

§ 52.930 Control strategy: Ozone.

* * * * *

(m) *Determination of attainment.* The EPA has determined, as of June 3, 2016, that based on 2012 to 2014 ambient air quality data, the Cincinnati, OH-KY-IN 2008 ozone Marginal nonattainment area has attained the 2008 ozone NAAQS. Therefore, the EPA has met the requirement pursuant to CAA section 181(b)(2)(A) to determine, based on the area's air quality data as of the attainment date, whether the area attained the standard. The EPA also determined that the Cincinnati, OH-KY-IN nonattainment area will not be reclassified for failure to attain by its applicable attainment date under section 181(b)(2)(A).

Subpart T—Louisiana

■ 8. Section 52.977 is amended by adding paragraph (f) to read as follows:

§ 52.977 Control strategy and regulations: Ozone.

* * * * *

(f) The EPA has determined that the Baton Rouge Marginal 2008 ozone NAAQS nonattainment area attained the NAAQS by the applicable attainment date of July 20, 2015.

Subpart W—Massachusetts

■ 9. Section 52.1129 is amended by adding paragraph (k) to read as follows:

§ 52.1129 Control strategy: Ozone.

* * * * *

(k) *Determination of attainment for the eight-hour ozone standard.* Effective June 3, 2016, the EPA is determining that complete quality-assured and certified ozone monitoring data for 2012 to 2014 show the Dukes County, Massachusetts eight-hour ozone nonattainment area attained the 2008 eight-hour ozone standard by its July 20, 2015 attainment deadline. Therefore, the EPA has met the requirement pursuant to CAA section 181(b)(2)(A) to determine, based on the area's air quality data as of the attainment date, whether the area attained the standard. The EPA also determined that the Dukes County nonattainment area will not be reclassified for failure to attain by its applicable attainment date under section 181(b)(2)(A).

Subpart Z—Mississippi

■ 10. Add § 52.1273 to read as follows:

§ 52.1273 Control strategy: Ozone.

(a) *Determination of attainment.* The EPA has determined, as of June 3, 2016, that based on 2012 to 2014 ambient air quality data, the Memphis, TN-MS-AR 2008 ozone Marginal nonattainment area has attained the 2008 ozone NAAQS. Therefore, the EPA has met the requirement pursuant to CAA section 181(b)(2)(A) to determine, based on the area's air quality data as of the attainment date, whether the area attained the standard. The EPA also determined that the Memphis, TN-MS-AR nonattainment area will not be reclassified for failure to attain by its applicable attainment date under section 181(b)(2)(A).

(b) [Reserved]

Subpart FF—New Jersey

§ 52.1576 [Amended]

■ 11. Section 52.1576 is amended by remove paragraph (d).

■ 12. Section 52.1582 is amended by adding paragraph (p) to read as follows:

§ 52.1582 Control strategy and regulations: Ozone.

* * * * *

(p) *Rescission of clean data determination for the 1997 eight-hour ozone standard.* Effective June 3, 2016, the EPA is determining that complete quality-assured and certified ozone monitoring data for 2012–2014 show the New York-Northern New Jersey-Long Island, NY-NJ-CT 1997 eight-hour ozone nonattainment area did not meet 1997 eight-hour ozone standard. Therefore, the EPA is rescinding the clean data determination for the 1997 eight-hour ozone standard only. The prior determination (*see* paragraph (n)(2)) is in accordance with 40 CFR 51.918. The prior determination suspended the requirements for this area to submit an attainment demonstration, associated reasonably available control measures, a reasonable further progress plan, contingency measures, and other planning SIPs related to attainment of the standard for as long as this area continues to meet the 1997 annual eight-hour ozone NAAQS. This rescission of the clean data determination will result in a SIP Call for a new ozone attainment demonstration, associated reasonably available control measures, a reasonable further progress plan, contingency measures, and other planning SIPs related to attainment of the standard, for this area only. If the revised plan is approved by the EPA as demonstrating reasonable further progress and attainment for the more stringent 2008 NAAQS by the Moderate area

attainment date, and is approved by the EPA as containing adequate contingency measures for the 2008 NAAQS, then the plan would be deemed to have also satisfied requirements of the SIP Call associated with violations for the 1997 NAAQS.

Subpart HH—New York

■ 13. Section 52.1679 is amended by revising paragraph (b) to read as follows:

§ 52.1679 Determinations of attainment.

* * * * *

(b) *Determination of attainment.* The EPA has determined, as of June 3, 2016, that based on 2012 to 2014 ambient air quality data, the Jamestown, NY 2008 ozone Marginal nonattainment area has attained the 2008 ozone NAAQS. Therefore, the EPA has met the requirement pursuant to CAA section 181(b)(2)(A) to determine, based on the area's air quality data as of the attainment date, whether the area attained the standard. The EPA also determined that the Jamestown, NY nonattainment area will not be reclassified for failure to attain by its applicable attainment date under section 181(b)(2)(A).

■ 14. Section 52.1683 is amended by revising paragraph (f)(2)(v) and adding paragraph (n) to read as follows:

§ 52.1683 Control strategy: Ozone.

* * * * *

(f) * * *

(2) * * *

(v) Jamestown (consisting of Chautauqua County) as of June 3, 2016.

* * * * *

(n) *Rescission of clean data determination for the 1997 eight-hour ozone standard.* Effective June 3, 2016, the EPA is determining that complete quality-assured and certified ozone monitoring data for 2012 to 2014 show the New York-Northern New Jersey-Long Island, NY-NJ-CT 1997 eight-hour ozone nonattainment area did not meet the 1997 eight-hour ozone standard. Therefore, the EPA is rescinding the clean data determination for the 1997 eight-hour ozone standard only. The prior determination (*see* paragraph (f)(2)(viii) of this section) is in accordance with 40 CFR 51.918. The prior determination suspended the requirements for this area to submit an attainment demonstration, associated reasonably available control measures, a reasonable further progress plan, contingency measures, and other planning SIPs related to attainment of the standard for as long as this area continues to meet the 1997 annual eight-hour ozone NAAQS. This rescission of the clean data determination will result in a SIP Call for a new ozone attainment demonstration, associated reasonably available control measures, a reasonable further progress plan, contingency measures, and other planning SIPs related to attainment of the standard, for this area only. If the revised plan is approved by the EPA as demonstrating reasonable further progress and attainment for the more stringent 2008 NAAQS by the Moderate area attainment date, and is approved by the EPA as containing adequate contingency measures for the 2008 NAAQS, then the plan would be deemed to have also satisfied requirements of the SIP Call associated with violations for the 1997 NAAQS.

Subpart II—North Carolina

■ 15. Section 52.1779 is amended by adding paragraph (c) to read as follows:

§ 52.1779 Control strategy: Ozone.

* * * * *

(c) *Determination of attainment.* The EPA has determined, as of June 3, 2016, that based on 2012 to 2014 ambient air quality data, the Charlotte-Rock Hill, NC-SC 2008 ozone Marginal nonattainment area has attained the 2008 ozone NAAQS. Therefore, the EPA has met the requirement pursuant to CAA section 181(b)(2)(A) to determine, based on the area's air quality data as of the attainment date, whether the area attained the standard. The EPA also determined that the Charlotte-Rock Hill, NC-SC nonattainment area will not be reclassified for failure to attain by its applicable attainment date under section 181(b)(2)(A).

Subpart KK—Ohio

■ 16. Section 52.1885 is amended by adding paragraph (nn) to read as follows:

§ 52.1885 Control strategy: Ozone.

* * * * *

(nn) *Determination of attainment.* As required by section 181(b)(2)(A) of the Clean Air Act, the EPA has determined that the Cincinnati, OH-KY-IN and Columbus, OH Marginal 2008 ozone nonattainment areas have attained the NAAQS by the applicable attainment date of July 20, 2015.

Subpart NN—Pennsylvania

■ 17. Section 52.2056 is amended by adding paragraphs (k), (l), and (m) to read as follows:

§ 52.2056 Determinations of attainment.

* * * * *

(k) The EPA has determined, as of June 3, 2016, that based on 2012 to 2014 ambient air quality data, the Allentown-Bethlehem-Easton, PA 2008 ozone Marginal nonattainment area has attained the 2008 8-hour ozone NAAQS by the applicable attainment date of July 20, 2015. Therefore, the EPA has met the requirement pursuant to CAA section 181(b)(2)(A) to determine, based on the area's air quality as of the attainment date, whether the area attained the 2008 8-hour ozone NAAQS. The EPA also determined that the Allentown-Bethlehem-Easton, PA marginal nonattainment area will not be reclassified for failure to attain by its applicable attainment date pursuant to section 181(b)(2)(A).

(l) The EPA has determined, as of June 3, 2016, that based on 2012 to 2014 ambient air quality data, the Lancaster, PA 2008 ozone Marginal nonattainment area has attained the 2008 8-hour ozone NAAQS by the applicable attainment date of July 20, 2015. Therefore, the EPA has met the requirement pursuant to CAA section 181(b)(2)(A) to determine, based on the area's air quality as of the attainment date, whether the area attained the 2008 8-hour ozone NAAQS. The EPA also determined that the Lancaster, PA Marginal nonattainment area will not be reclassified for failure to attain by its applicable attainment date pursuant to section 181(b)(2)(A).

(m) The EPA has determined, as of June 3, 2016, that based on 2012 to 2014 ambient air quality data, the Reading, PA 2008 ozone Marginal nonattainment area has attained the 2008 8-hour ozone NAAQS by the applicable attainment date of July 20, 2015. Therefore, the EPA has met the requirement pursuant to CAA section 181(b)(2)(A) to determine, based on the area's air quality as of the attainment date, whether the area attained the 2008 8-hour ozone NAAQS. The EPA also determined that the Reading, PA Marginal nonattainment area will not be reclassified for failure to attain by its applicable attainment date pursuant to section 181(b)(2)(A).

Subpart PP—South Carolina

■ 18. Section 52.2125 is amended by adding paragraph (c) to read as follows:

§ 52.2125 Control strategy: Ozone.

* * * * *

(c) *Determination of attainment.* The EPA has determined, as of June 3, 2016, that based on 2012 to 2014 ambient air quality data, the Charlotte-Rock Hill, NC-SC 2008 ozone Marginal nonattainment area has attained the 2008 ozone NAAQS. Therefore, the EPA has met the requirement pursuant to

CAA section 181(b)(2)(A) to determine, based on the area's air quality data as of the attainment date, whether the area attained the standard. The EPA also determined that the Charlotte-Rock Hill, NC-SC nonattainment area will not be reclassified for failure to attain by its applicable attainment date under section 181(b)(2)(A).

Subpart RR—Tennessee

■ 19. Section 52.2235 is amended by adding paragraph (d) to read as follows:

§ 52.2235 Control strategy: Ozone.

* * * * *

(d) *Determination of attainment.* The EPA has determined, as of June 3, 2016, that based on 2011 to 2013 ambient air quality data, the Knoxville, TN and Memphis, TN-MS-AR 2008 ozone Marginal nonattainment areas have attained the 2008 ozone NAAQS. Therefore, the EPA has met the requirement pursuant to CAA section 181(b)(2)(A) to determine, based on an area's air quality data as of the attainment date, whether the areas attained the standard. The EPA also determined that the Knoxville, TN and Memphis, TN-MS-AR nonattainment areas will not be reclassified for failure to attain by their applicable attainment date under section 181(b)(2)(A).

Subpart ZZ—Wyoming

■ 20. Add § 52.2623 to read as follows:

§ 52.2623 Control strategy and regulations: Ozone.

(a) *Determination of attainment.* The EPA has determined, as of June 3, 2016, that based on 2012 to 2014 ambient air quality data, the Upper Green River Basin Area, WY 2008 ozone Marginal nonattainment area has attained the 2008 ozone NAAQS. Therefore, the EPA has met the requirement pursuant to CAA section 181(b)(2)(A) to determine, based on the area's air quality data as of the attainment date, whether the area attained the standard. The EPA also determined that the Upper Green River Basin Area, WY nonattainment area will not be reclassified for failure to attain by its applicable attainment date under section 181(b)(2)(A).

(b) [Reserved]

PART 81—DESIGNATION OF AREAS FOR AIR QUALITY PLANNING PURPOSES

■ 21. The authority citation for part 81 continues to read as follows:

Authority: 42 U.S.C. 7401, *et seq.*

Subpart C—Section 107 Attainment Status Designations

■ 22. Section 81.303 is amended in the table for "Arizona-2008 8-Hour Ozone NAAQS (Primary and secondary)" by revising the heading entry for "Phoenix-Mesa, AZ" and the entries for "Maricopa County (part)" to read as follows:

§ 81.303 Arizona.

[FR Doc. 2016–09729 Filed 5–3–16; 8:45 am]
BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 180

[EPA–HQ–OPP–2015–0014; FRL–9944–82]

Mefenoxam; Pesticide Tolerances

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This regulation establishes tolerances for residues of mefenoxam in or on rapeseed subgroup 20A. Syngenta Crop Protection, LLC., requested these tolerances under the Federal Food, Drug, and Cosmetic Act (FFDCA).

DATES: This regulation is effective May 4, 2016. Objections and requests for hearings must be received on or before July 5, 2016, and must be filed in accordance with the instructions provided in 40 CFR part 178 (see also Unit I.C. of the **SUPPLEMENTARY INFORMATION**).

ADDRESSES: The docket for this action, identified by docket identification (ID) number EPA–HQ–OPP–2015–0014, is available at *http://www.regulations.gov* or at the Office of Pesticide Programs Regulatory Public Docket (OPP Docket) in the Environmental Protection Agency Docket Center (EPA/DC), West William Jefferson Clinton Bldg., Rm. 3334, 1301 Constitution Ave. NW., Washington, DC 20460–0001. The Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room is (202) 566–1744, and the telephone number for the OPP Docket is (703) 305–5805. Please review the visitor instructions and additional information about the docket available at *http://www.epa.gov/dockets.*

FOR FURTHER INFORMATION CONTACT: Susan Lewis, Registration Division (7505P), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave. NW., Washington, DC 20460–0001; main telephone number: (703) 305–7090; email address: *RDFRNotices@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this action apply to me?

You may be potentially affected by this action if you are an agricultural producer, food manufacturer, or pesticide manufacturer. The following list of North American Industrial Classification System (NAICS) codes is not intended to be exhaustive, but rather provides a guide to help readers determine whether this document applies to them. Potentially affected entities may include:

- Crop production (NAICS code 111).
- Animal production (NAICS code 112).
- Food manufacturing (NAICS code 311).
- Pesticide manufacturing (NAICS code 32532).

B. How can I get electronic access to other related information?

You may access a frequently updated electronic version of EPA's tolerance regulations at 40 CFR part 180 through the Government Printing Office's e-CFR site at *http://www.ecfr.gov/cgi-bin/text-idx?&c=ecfr&tpl=/ecfrbrowse/Title40/40tab_02.tpl.*

C. How can I file an objection or hearing request?

Under FFDCA section 408(g), 21 U.S.C. 346a, any person may file an objection to any aspect of this regulation and may also request a hearing on those objections. You must file your objection or request a hearing on this regulation in accordance with the instructions provided in 40 CFR part 178. To ensure proper receipt by EPA, you must identify docket ID number EPA–HQ–OPP–2015–0014 in the subject line on the first page of your submission. All objections and requests for a hearing must be in writing, and must be received by the Hearing Clerk on or before July 5, 2016. Addresses for mail and hand delivery of objections and hearing requests are provided in 40 CFR 178.25(b).

In addition to filing an objection or hearing request with the Hearing Clerk as described in 40 CFR part 178, please submit a copy of the filing (excluding any Confidential Business Information (CBI)) for inclusion in the public docket. Information not marked confidential pursuant to 40 CFR part 2 may be disclosed publicly by EPA without prior notice. Submit the non-CBI copy of your objection or hearing request, identified by docket ID number EPA–HQ–OPP–2015–0014, by one of the following methods:

- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the online instructions for submitting comments. Do not submit electronically any information you consider to be CBI or other information whose disclosure is restricted by statute.
- *Mail:* OPP Docket, Environmental Protection Agency Docket Center (EPA/DC), (28221T), 1200 Pennsylvania Ave. NW., Washington, DC 20460–0001.
- *Hand Delivery:* To make special arrangements for hand delivery or delivery of boxed information, please follow the instructions at *http://www.epa.gov/dockets/contacts.html.* Additional instructions on commenting or visiting the docket, along with more information about dockets generally, is available at *http://www.epa.gov/dockets.*

II. Summary of Petitioned-For Tolerance

In the **Federal Register** of April 6, 2015 (80 FR 18327) (FRL–9924–00), EPA issued a document pursuant to FFDCA section 408(d)(3), 21 U.S.C. 346a(d)(3), announcing the filing of a pesticide petition (PP 4F8323) by Syngenta Crop Protection, LLC., 410 Swing Road, Greensboro, NC 27419. The petition requested that 40 CFR 180.546

For this ozone redesignation request, each county has two Census Tracts NOT included in the Population Growth calculations: 706.01 and 706.04 (Boone), 520.01 and 520.02 (Campbell), 637.01 and 637.02 (Kenton).

Individual county growth rates were calculated based on EPA's 2011 NEI 2011-2025 point source emission projections. Once 2025 emissions were calculated using these growth rates, 2014, 2017, and 2020 were interpolated between 2011 and 2025. Then 2025 was projected out to 2030 emissions, using the yearly growth rate from 2011 to 2025.

2011 baseyear point source emissions were determined based on location within these specific localized areas in each county. Emissions were obtained through the Kentucky Emissions Inventory database.

For this ozone redesignation request, each county has two Census Tracts NOT included in the Population Growth calculations: 706.01 and 706.04 (Boone), 520.01 and 520.02 (Campbell), 637.01 and 637.02 (Kenton).

Individual county growth rates were calculated based on EPA's 2011 NEI 2011-2025 point source emission projections. Once 2025 emissions were calculated using these growth rates, 2014, 2017, and 2020 were interpolated between 2011 and 2025. Then 2025 was projected out to 2030 emissions, using the yearly growth rate from 2011 to 2025.

2011 baseyear point source emissions were determined based on location within these specific localized areas in each county. Emissions were obtained through the Kentucky Emissions Inventory database.

Andy Reser from the Ohio-Kentucky-Indiana Regional Council of Governments, or OKI, provided the highway mobile source emissions for 2011 baseyear, 2014 (attainment year), 2020, and 2030. KYDAQ interpolated emissions for the years 2017 and 2025. The emissions for the specific portions of each county were not calculated based on population percentages. Instead, the emissions were more accurately reflected by dividing the vehicle miles traveled in the portion by the vehicle miles traveled in the entire county.

Data Source : Andy Reser, "Ozone Mobile Source Emissions Inventory for the Cincinnati Ozone Nonattainment Area," Ohio-Kentucky-Indiana (OKI) Regional Council of Governments, Cincinnati, Ohio, August 2015, p. 6, Table 3.

IMPORTANT NOTES:

For this ozone redesignation request, each county has two Census Tracts NOT included in the Population Growth calculations: 706.01 and 706.04 (Boone), 520.01 and 520.02 (Campbell), 637.01 and 637.02 (Kenton).). The method to omit the six total Census Tracts mentioned was by using the measurement function in *Google Earth*. This approximated the percentage of each county that was determined to be in the designated nonattainment area. This Area % was applied to Area and Non-Highway emission sources.

Individual county growth rates were averaged to represent the growth rate that was used to project emissions in the future. The average growth rate was used since it better represents the overall growth for the three-county region.

2011 baseyear emissions were obtained from a variety of sources. Point source emissions were obtained from state emissions inventory databases. 2011 baseyear area and non-highway mobile source emissions were obtained from the National Emissions Inventory (U.S. EPA). Highway mobile source emissions were obtained from the Ohio-Kentucky-Indiana Regional Council of Governments, or OKI, in Cincinnati, Ohio. KYDAQ interpolated the highway mobile source emissions for the years 2017 and 2025. Growth rates in the "Pop Growth" worksheet, shaded in gray, were then applied to project the Future Year O_3 emissions for 2014 (attainment year), 2017, 2020, 2025, and 2030. Where applicable (area and non-highway), county portions were applied by multiplying the 2011 baseyear emissions for the entire county by the Area %. Emissions from the portions were then be projected out to Future Years.

Ohio · Kentucky · Indiana
Regional Council of Governments

Acknowledgments

Title	Ozone Mobile Source Emissions Inventory for the Cincinnati Ozone Nonattainment Area
Abstract	This report was prepared for the Ohio Environmental Protection Agency, the Kentucky Department for Air Quality, and the Indiana Department of Environmental Management. The Cincinnati Ozone Nonattainment Area includes a portion of Dearborn County Indiana, the counties of Boone, Campbell, Kenton in Kentucky, and the counties of Butler, Clermont, Clinton, Hamilton, and Warren in Ohio. Clinton County is outside of OKI's MPO area, however, the Ohio Department of Transportation prepared Clinton emission estimates which are included in this report. This report includes emission estimates for years 2011, 2014, 2020 and 2030. EPA's Motor Vehicle Emission Simulation (MOVES) 2014 was used to generate the emission inventory.
Date	August 2015
Agency	Ohio-Kentucky-Indiana Regional Council of Governments Mark Policinski, Executive Director Robert Koehler, P.E., Deputy Director
Project Manager	Andrew J. Reser, AICP
Project Staff	Larry Buckler

The preparation of this document was financed cooperatively by the Federal Highway Administration, the Federal Transit Administration, the Commonwealth of Kentucky Transportation Cabinet, the Ohio Department of Transportation, and the units of local and county government in the OKI region. The opinions, findings, and conclusions expressed in this document are those of the OKI Regional Council of Governments and are not necessarily those of the U.S. Department of Transportation. This report does not constitute a standard, specification, or regulation.

Mobile Source Ozone Emissions Inventory for the Cincinnati Ozone Nonattainment Area

This report was prepared for the Ohio Environmental Protection Agency, the Kentucky Department for Air Quality, and the Indiana Department of Environmental Management. The Cincinnati 2008 Ozone Nonattainment Area includes a portion of Dearborn County Indiana, the counties of Boone, Campbell, Kenton in Kentucky, and the counties of Butler, Clermont, Clinton, Hamilton, and Warren in Ohio. Clinton County is outside of OKI's MPO planning area. The emission estimates for Clinton County were developed by the Ohio Department of Transportation and provided to OKI for inclusion in this report. This report includes emission estimates for years 2011, 2014, 2020 and 2030. The U.S. EPA's Motor Vehicle Emission Simulation (MOVES) 2014 was used to generate the emission inventory. Details on the various county data inputs used to generate the inventory are described in Table 5. Emissions of the ozone precursors, volatile organic compounds (VOC's) and oxides of nitrogen (NO_x), are reported.

Table 1 shows daily mobile source ozone emissions in tons per summer day for the Ohio and Indiana portion of the Cincinnati Ozone Nonattainment Area. The daily mobile source ozone emissions in tons per summer day for the Kentucky portion of the Cincinnati Ozone Nonattainment Area are shown in Table 2. The mobile source ozone emissions for the nonattainment portion only of each county is provided in Table 3. Mobile source emissions for entire counties are shown in Table 4.

Mobile Source Emission Forecast Process

Emission Factor Model

OKI's inventory assessment utilized U.S.EPA's emissions model MOVES 2014 to generate VOC and NO_x emissions. Table 5 summarizes the settings used in the MOVES run specification file. Table 6 lists the data used in the MOVES County-Data Manager. Further technical details on the use of MOVES are found in the appendix to the OKI report *"Mobile Source Emissions Inventory for Cincinnati PM2.5 Nonattainment Area"*, revised December 2010.

Table 5

MOVES RunSpec Parameter	Settings
MOVES 2014, default database 20141021	
Scale	County, Rates
Time Span	Time aggregation = Hour July weekday, July meteorological data All hours of day selected Weekdays only
Geographic Bounds	Two Custom Domains 1) 4 Ohio counties and Lawrenceburg IN; 2) 3 Kentucky counties
Vehicles/Equipment	All vehicle types. All vehicle/fuel type combos provided by MOVES except electric. Includes gasoline, diesel, ethanol and CNG.
Road Type	All road types including off-network
Pollutants and Processes	Total gaseous hydrocarbons, non-methane hydrocarbons, volatile organic compounds, and oxides of nitrogen
Strategies	none
General Output	Units= U.S. ton, joules and miles
Output Emissions	Time = 24-hour day, Location =county, on-road emission by road type
Advanced Performance	none

Average Speed Distribution	Local. OKI travel demand model V8.0.

OKI Travel Demand Model

Vehicle miles traveled, vehicle hours and average speeds were estimated using the OKI Travel Demand Model Version 8.0. The OKI Travel Demand Model is composed of a series of CUBE Voyager programs written by Citilabs and OKI. The model covers the combined planning areas of OKI and the Miami Valley Regional Planning Commission. It is a state of the practice model that uses the standard 4 phase sequential modeling approach of trip generation, distribution, modal choice and assignment. The model uses demographic and land use data and capacity and free-flow speed characteristics for each roadway segment in the network to produce a "loaded" highway network with forecasted traffic volumes with revised speeds based on specified speed/capacity relationships.

Travel analysis zones are the basic geographic unit for estimating travel in the OKI model. The region is subdivided into 3312 traffic analysis zones to permit detail as well as manageability. A variety of socioeconomic data items are used in the OKI transportation planning process. These data are used primarily to forecast future travel patterns by serving as independent variables in OKI trip generation equations. The following categories of planning data are utilized:

- Population (household and group quarter)
- Households
- Household vehicles
- Employment (by employment category and zone of work)
- Labor force participation (by zone of residence)
- Area type

The principal data requirements of the OKI travel demand forecasting model are population and employment. From these variables, other characteristics including households, labor force, and personal vehicles may be derived. Chapter 3 of *OKI 2040 Regional Transportation Plan 2012 Update* provides a complete demographic overview of the region.

OKI utilizes both base year (2010) and future year data (2020, 2030 and 2040) in the planning process. Planning data are maintained at the Traffic Analysis Zone (TAZ) level, and originate in the 2010 Census of Population and Housing. Base year 2010 and future year data for each variable are developed through various methods. More detailed explanation of base year and future year data generation for each of the above-mentioned categories of planning data follows. All of the variables represent the latest OKI planning assumptions.

Population

Base and Future Year Data: Population data for base year 2010 and future years 2020, 2030 and 2040 originate with the 2010 US Census of Population. Utilizing the geographic information systems software ArcMap, population data at the zonal level for 2010 was derived from the area proportion allocation of census block level population.

As a tristate regional planning agency, OKI uses county level population projections prepared by the respective state data centers (Ohio Development Services, Kentucky State Data Center and Indiana Business Research Center) as control totals. The most current projections (years 2020 to 2040) were released by Ohio Development Services in 2013, Indiana Business Research Center in 2012 and the Kentucky State Data Center in 2012. Population projections at the zonal level are calculated by multiplying the 2010 household size by the projected zonal households. Then, household size is factored so that, in each county, the sum of the zonal populations equals the control total.

Households

Base Year Data: Household data for base year 2010 originates with the 2010 US Census of Population. Utilizing ArcMap, household data at the zonal level for 2010 was derived from the area proportion allocation of census block level households. Future Year Data: The development of household projections was accomplished by calculating the number of households for a projected county population using 2010 Census ratios of householders to total population by age specific cohorts for each future analysis year. This step results in county-level household control totals for each future analysis year. Disaggregation of households to TAZs was determined by historical trends, existing and future land use, topography, flood plain information, availability of land, local knowledge and other factors.

Household Vehicles

Base and Future Year Data: Base and future year household vehicle data were obtained from 2009-2013 American Community Survey tabulations at the block group level. Average vehicles per household were calculated for block groups and then applied to the TAZs associated with each block group. The 2020, 2030 and 2040 vehicles per household were held at the 2009-2013 level based on the fact that, since 2002, the number of vehicles per household has exceeded the number of drivers per household.

Labor Force

Base and Future Year Data: The OKI labor force is a function of the population as determined by a labor force participation rate (the number of employed persons in the labor force per persons 16 and over).

Household data for base year 2010 is derived from 2009-2013 American Community Survey tabulations. Utilizing ArcMap, labor force data at the zonal level for 2009-2013 was derived from the area proportion allocation of block group level. Labor force projections for 2020, 2030 and 2040 were based on the most recent projections of national labor force participation rates by age and sex cohorts from the U.S. Department of Labor, Bureau of Labor Statistics, for each of those years. These rates were then applied to the projected county age/sex cohorts and adjusted to eliminate the unemployed to arrive at a county employed labor force control total. Employed labor force at the zonal level is calculated by multiplying the labor force participation rate by the zonal population. The labor force participation rate is adjusted so that, in each county, the sum of the zonal labor force counts equals the control total.

Employment

Base Year Data: Quarterly Census of Employment and Wages (QCEW) data for 2010 was the primary tool used to calculate employment at the zonal level for the base year. Individual business records containing physical location, number of employees and NAICS code were geocoded in ArcMap and aggregated to the TAZ level. This data set was supplemented by other sources to complete the commuting employment picture in the OKI region. Each zone's employment was divided into 13 classes based on NAICS codes. NAICS codes assignment to a class was based on the potential for generating trips.

Future Year Data: For future year employment projection, calculation was first made of the employment at the regional level. At the regional level, employment is a calculation of the region's employed labor force minus workers who live in the region but commute out to work, plus workers who live outside the region but commute in to work. The regional total was disaggregated first to the county level based on historic trends and expected changes in the county's share of the region's employment and then to the TAZ level. Disaggregation to TAZs was determined by historical trends, existing and future land use, topography, flood plain information, availability of land, local knowledge and other factors.

Area Type

Base and Future Year Data: For each analysis year, each TAZ is assigned an area type designation as CBD, Urban, Suburban or Rural based on population and employment densities.

Model Calibration

OKI's Travel Demand Model has been validated to observed traffic volumes for the model base year 2005. The modeling network encompasses the entire ozone Maintenance area with the exception of Clinton County, Ohio. The modeling network also includes Greene, Miami and Montgomery counties in Ohio and the remainder of Dearborn County Indiana. The difference between estimated vehicle miles traveled (VMT) and 2005 observed VMT is less than 1%. A highway screenline analysis compares the screenline observed and simulated traffic volume discrepancies with the ODOT standard of maximum desirable deviation. The comparison shows that the model performs at a satisfactory level and all the errors were under the ODOT curve. Further information can be found in OKI's 2007 report, "*OKI/MVRPC*

Travel Demand Model Methodology/ Validation Report". For the calibration, OKI used over 3000 traffic counts collected through 2006 by the Ohio Department of Transportation (ODOT), the Kentucky Transportation Cabinet, many county and local governments, transportation engineering consultants, and OKI. These traffic counts cover nearly 50% percent of the links in the OKI portion of the modeling network. The methodology provides consistency with past emission inventory and conformity analysis work performed by OKI.

Local Inputs and Post-Model Processing

OKI incorporates a variety of sources of local data to both improve and confirm the accuracy of VMT, as well as other travel-related parameters. Free flow speeds used on the highway and transit networks are compared to third party data of actual travel speeds gathered by anonymous cell phones, in-vehicle navigation systems and GPS-enabled fleet vehicles. The OKI post-processing program, IMPACT, uses the loaded highway network to generate VMT by hour, VMT by speed distribution and VMT by facility type. These tables are then combined with MOVES emission factors to generate emissions. Two separate sets of VMT tables are generated: one for the four Ohio counties plus Dearborn County Indiana, and a second for the three Kentucky counties. The VMT by hour tables utilize hourly traffic distribution and directional split factors for different roadway types as developed by OKI. The main source of the data is traffic counts from the permanent traffic counting stations located throughout the OKI region for the years of 2008-2012. This data was supplemented with data collected at coverage count stations (locations with counts taken on only one-two days). The stations were classified by area type: urban and rural, and functional classification: freeway, arterial and collector. Speeds representing various "loaded" conditions (with traffic volumes) are estimated using techniques from the 2010 Highway Capacity Manual. This permits the estimation of speeds as conditions vary from hour to hour on the different facility types throughout the region. The IMPACT program performs the appropriate summation by area and roadway type as well as regional totals. OKI has also developed seasonal conversion factors to adjust traffic volumes to summer conditions. The factors were derived from local data collected at permanent traffic counting stations during 2008-2012 utilizing the average daily traffic monthly conversion factors for June, July and August.

APPENDIX E

Kentucky Projected Inventory Methodology and Documentation

O_3 Redesignation Request Emissions Summary and Projections

Boone, Campbell, Kenton Counties

Introduction

In the summer of 2015, the Kentucky Division for Air Quality (KYDAQ) collaborated with the Indiana Department of Environmental Management (IDEM) and the Ohio Environmental Protection Agency (Ohio EPA) to prepare a redesignation request for the 2008 ozone (O_3) National Ambient Air Quality Standard (NAAQS). The specific area is the Cincinnati-Hamilton, OH-KY-IN O_3 nonattainment area.

The purpose of this document is to explain KYDAQ's process of compiling emissions data and the methodologies used in calculating emission projections for only the Kentucky portion of the area. Table 1 lists the interstate counties involved in this redesignation request.

TABLE 1
CINCINNATI-HAMILTON, OH-KY-IN OZONE NONATTAINMENT AREA

State	County
Indiana	Dearborn (portion)
Kentucky	Boone (portion)
	Campbell (portion)
	Kenton (portion)
Ohio	Butler
	Clermont
	Clinton
	Hamilton
	Warren

A total of six Census Tracts, two in each Northern Kentucky county, are NOT included as part of the designated O_3 nonattainment area. Therefore, these Census Tracts are in attainment for the O_3 NAAQS. All of the other Census Tracts for each county comprise the O_3 nonattainment area in Northern Kentucky. The Census Tracts not included in the Northern Kentucky O_3 nonattainment area are listed in Table 2 below.

TABLE 2
CENSUS TRACTS NOT INCLUDED IN NORTHERN KENTUCKY OZONE NONATTAINMENT AREA

Kentucky County	2000 Census Tract (in attainment for O_3)
Boone	706.01 and 706.04
Campbell	520.01 and 520.02
Kenton	637.01 and 637.02

It should be noted that the 2000 Census Tracts were used, which at the time of designation represented the latest available data. As stated on the U.S. Census website, "*Because of changes in boundaries and entity names, as well as the creation of new entities, and the dissolution of others, users should not expect to find a 'one-to-one' relationship between the entity names and codes*" when comparing the 2000 Census data with the most-recent 2010 Census data.

Selection of Years

In developing this O_3 redesignation request, the initial step was to select the years from base year to maintenance year. After discussions between representatives from the KYDAQ, IDEM, and the Ohio EPA, the appropriate years were selected. For the base year, 2011 was selected to develop a comprehensive O_3 emissions inventory from which projected emissions could be estimated for several future years.

For the attainment year, 2014 was selected since it corresponds to one of the years in the design value showing attainment. These design value years are 2012, 2013, and 2014.

Table 3 below provides a summary of the years for each year type chosen for each state.

TABLE 3
YEARS FOR O_3 REDESIGNATION REQUEST – INDIANA, KENTUCKY, OHIO

Year	Year Type	Indiana	Kentucky	Ohio
2011	Base Year	√	√	√
2014	Attainment Year	√	√	√
2017	Interim Maintenance Year		√	
2020	Interim Maintenance Year	√	√	√
2025	Interim Maintenance Year		√	
2030	Maintenance Year	√	√	√

Therefore, the years for the Northern Kentucky area used in this redesignation request are:

2011, 2014, 2017, 2020, 2025, and 2030

Below are detailed explanations for projections on population growth factors and future year O_3 emissions from point, area, highway mobile, and non-highway mobile sources. All emission and projection data for the Northern Kentucky counties can be found in Appendix C.

Growth Rate Calculations

Source-specific growth rate calculation methodologies are explained in the sections that follow. There were specific methodologies used for point, area, and non-highway mobile sources.

To determine the best-estimated percentage for each county, the measurement function in *Google Earth* was used. These percentages are associated with area and non-highway mobile

sources only. Refer to these two sections below as they relate to county-specific area percentages.

Point Source Emissions

For Boone, Campbell, and Kenton Counties, point source facilities were first identified within the applicable Census Tracts. As indicated in the "Introduction" section, each county has two Census Tracts NOT included in the respective portion. There are a total of 21 facilities located within the designated Census Tract boundaries, as summarized below in Table 4.

TABLE 4
POINT SOURCE FACILITIES IN NORTHERN KENTUCKY – O_3 REDESIGNATION REQUEST

Kentucky County	Number of Point Source Facilities
Boone	17
Campbell	2
Kenton	2
TOTAL	**21**

There was a multi-step process in estimating the emissions out to the year 2030. This process can be divided into five steps based on the years involved.

1) 2011 Base Year: After the facility locations in the Northern Kentucky counties were identified, the 2011 base year emissions from those point sources were obtained from the Kentucky Emissions Inventory database.

2) 2025 Projected Year: After the 2011 base year emissions were obtained from the subject facility locations, growth rates were applied to estimate the 2025 projected emissions. These projected growth rates were based on EPA's 2011 National Emissions Inventory (NEI) and the 2011-2025 point source emission projections. Table 5 below summarizes EPA's NEI 2011-2025 emissions growth rates for both VOC and NO_x.

TABLE 5
EPA'S NEI 2011-2025 EMISSIONS GROWTH RATES – NORTHERN KENTUCKY COUNTIES

County	VOC	NOx
Boone	-0.14%	13.05%
Campbell	-3.50%	0.00%
Kenton	-6.46%	-0.20%

3) 2014 Attainment Year: After the 2025 projected emissions were calculated, the select years between the years 2011 and 2025 were interpolated. The 2011 base year emissions were multiplied by emission growth rates to obtain the projected emissions. Projected from the 2011 base year, or Present Year, these growth rates were first projected out to

2014. For the 2014 Attainment Year, the Future Year was 2025. The following formula was used in *Excel* to calculate these growth rates.

$$Growth\ Factor = EXP(RATE(Y,,-PY,FY))^{n}$$

Where Y = 14 = Total Years between Present and Future Years
PY = Present Year, in this case, 2011
FY = Future Year, in this case, 2025
n = 3 = Number of Years Out From Present Year

4) 2017 Projected and 2020 Projected Years: After the 2014 Attainment Year emissions were projected, emissions for the years 2017 and 2020 were interpolated. Since 2014 is the year of attainment, the 2014 attainment year emissions were multiplied by emission growth rates to obtain the projected emissions. Now projected from the 2014 attainment year, or Present Year, these growth rates were projected out to 2017 and 2020, respectively. For these projected years, the Future Year was still 2025. The following formula was used in *Excel* to calculate these growth rates.

$$Growth\ Factor = EXP(RATE(Y,,-PY,FY))^{n}$$

Where Y = 9 = Total Years between Present and Future Years
PY = Present Year, in this case, 2014
FY = Future Year, in this case, 2025
n = 3 = Number of Years Out From Present Year

A similar formula was also applied to calculate the growth rate for 2020 (where "n" equals 6).

5) 2030 Projected Year: For the final projection, emissions were projected from 2025 out to 2030. Based on the emissions data available, the annual emissions growth rate was calculated from 2011 and 2025, the two original years used in these emission calculations. This annual growth rate was multiplied by the number of years to project out, or 5 (out to 2030). This result was multiplied by the 2025 emissions. Finally, this was then added to the 2025 emissions. In summary, the following formula was used in *Excel* to calculate these growth rates.

$$2025\ Projected \times ((EPA\ NEI\ 2011\text{-}2025\ Growth \div 14) \times 5) + 2025\ Projected$$

Where 14 = Total Years between 2011 and 2025
5 = Number of Years from 2025 to 2030

Area Source Emissions

IDEM provided county data for the entire interstate area from the years 2011 to 2030. KYDAQ obtained data from this source for all of the years for Kentucky's redesignation request: 2011, 2014, 2017, 2020, 2025, and 2030. Since these county emission totals represented entire

counties, specific area percentages were applied. Table 6 below summarizes the county area percentages that were used.

TABLE 6
COUNTY AREA PERCENTAGES FOR NORTHERN KENTUCKY OZONE NONATTAINMENT AREA
AREA AND NON-HIGHWAY MOBILE SOURCES

Kentucky County	Area Percentage[Δ]
Boone	57%
Campbell	56%
Kenton	54%

Δ Percentages were obtained by using the measurement function in *Google Earth*.

The application of these percentages to the county emissions for area sources resulted in the representation of emissions from the applicable Census Tracts.

Highway Mobile Source Emissions

The Ohio-Kentucky-Indiana Regional Council of Governments, or OKI, provided the highway mobile source emissions for 2011 base year, 2014 attainment year, 2020, and 2030. The KYDAQ interpolated emissions for the years 2017 and 2025. The emissions for the specific county portions were not calculated based on population percentages. Rather, the emissions were more accurately reflected by dividing the vehicle miles traveled in the portion by the vehicle miles traveled in the entire county.

Non-Highway Mobile Source Emissions

Just like area source emissions, IDEM provided county data for the entire interstate area from the years 2011 to 2030. KYDAQ obtained data from this source for all of the years for Kentucky's redesignation request: 2011, 2014, 2017, 2020, 2025, and 2030. Since these county emission totals represented entire counties, specific area percentages were applied. Table 6 from the "Area Source Emissions" section summarizes the county area percentages that were used.

The application of these percentages to the county emissions for non-highway mobile sources resulted in the representation of emissions from the applicable Census Tracts.

Summary of Emissions

The spreadsheet in Appendix C titled, "Total Emissions Summary," shows the 2030 emission totals for both volatile organic compounds (VOC) and oxides of nitrogen (NO_x) are significantly below the 2014 emission totals. There is a reduction in O_3 emissions for the subject portions in Boone, Campbell, and Kenton Counties. This reduction contributes to the overall emission reductions for meeting the 2008 O_3 NAAQS for the entire Cincinnati-Hamilton, OH-KY-IN ozone nonattainment area.

APPENDIX F

Public Notice and Response to Comments

KENTUCKY DIVISION FOR AIR QUALITY
NOTICE OF PUBLIC HEARING
8-HOUR OZONE NATIONAL AMBIENT AIR QUALITY STANDARD REDESIGNATION REQUEST FOR CINCINNATI-HAMILTON, OH-KY-IN

The Kentucky Energy and Environment Cabinet will conduct a public hearing on June 21, 2016 at 10:00 a.m. (EDT) in Training Room B of the GAPS Training Facility, 801 Teton Trail, Frankfort, Kentucky. Those participating in the public hearing should enter through the door on the side of the building facing Schenkel Lane. This hearing is being held to receive comments on a proposed State Implementation Plan (SIP) revision to redesignate the Kentucky portion of the Cincinnati-Hamilton, Ohio-Kentucky-Indiana ozone nonattainment area to attainment for the 2008 8-hour ozone National Ambient Air Quality Standard. This revision, when approved by the U.S. EPA, will redesignate Boone, Campbell, and Kenton Counties to attainment.

This hearing is open to the public and all interested persons will be given the opportunity to present testimony. The hearing will be held, if requested, at the date, time and place given above. It is not necessary that the hearing be held or attended in order for persons to comment on the proposed submittal to EPA. To assure that all comments are accurately recorded, the Division requests that oral comments presented at the hearing also be provided in written form, if possible. To be considered part of the hearing record, written comments must be received by the close of the hearing. Written comments should be sent to the contact person. If no request for a public hearing is received, the hearing will be cancelled, and notice of the cancellation will be posted at the website listed below. Request for a public hearing must be received no later than June 14, 2016 while all comments must be submitted no later than June 21, 2016.

The full text of the proposed SIP revision is available for public inspection and copying during regular business hours (8:00 a.m. to 4:30 p.m.) at the following Division for Air Quality locations: 200 Fair Oaks, 1st Floor, Frankfort, Kentucky; Florence Regional Office, 802 Veterans Mem Dr., Suite 110, Florence, Kentucky. Any individual requiring copies may submit a request to the Division for Air Quality in writing, by telephone, or by fax. Requests for copies should be directed to the contact person. In addition, an electronic version of the proposed SIP revision document and relevant attachments can be downloaded from the Division for Air Quality's website at: **http://air.ky.gov/Pages/PublicNoticesandHearings.aspx.**

The hearing facility is accessible to people with disabilities. An interpreter or other auxiliary aid or service will be provided upon request. Please direct these requests to the contact person.

CONTACT PERSON: Leslie Poff, Environmental Control Supervisor, Division for Air Quality, 200 Fair Oaks Lane, Frankfort, Kentucky 40601. Phone (502) 564-3999; Fax (502) 564-4666; E-mail lesliem.poff@ky.gov.

The Energy and Environment Cabinet does not discriminate on the basis of race, color, national origin, sex, age, religion, or disability and provides, upon request, reasonable accommodation including auxiliary aids and services necessary to afford an individual with a disability an equal opportunity to participate in all services, programs, and activities.

JUN 2 1 2016

Sean Alteri, Director
Division of Air Quality
Department for Environmental Protection
200 Fair Oaks Lane, 1st Floor
Frankfort, Kentucky 40601

Dear Mr. Alteri:

Thank you for your letter dated May 13, 2016, transmitting a prehearing package regarding Kentucky's State Implementation Plan submittal including a maintenance plan and request for redesignation of the Kentucky portion of the Cincinnati nonattainment area for the 2008 8-hour ozone National Ambient Air Quality Standards. We have completed our preliminary review of the maintenance plan and request for redesignation and our comments are included in the enclosure to this letter.

We look forward to continuing to work with you and your staff. If you have any questions, please contact Ms. Lynorae Benjamin, Chief, Air Regulatory Management Section at (404) 562-9040, or have your staff contact Mr. Sean Lakeman at 404-562-9043.

Sincerely,

R. Scott Davis
Chief
Air Planning and Implementation Branch

Enclosure

U.S. Environmental Protection Agency's Comments on Kentucky's Prehearing Submission of the Redesignation Request and Maintenance Plan for the Kentucky Portion of the Cincinnati Nonattainment Area

Key Comments

1. Page 28 of document (Page #21), Safety Margins: There should be a section in the narrative discussing the transportation conformity, on-road mobile sources, motor vehicle emissions budgets (MVEBs), vehicle miles travelled and the EPA mobile model used to develop the MVEBs. In compliance with 40 CFR 93, Kentucky should also include a statement that interagency consultation was used to select an interim year for 2020.

2. Page 47 of document (Page #40), Requirement 3, Demonstration: More clarification is needed on any contingency measure, including any regulatory program that will be implemented within 18 months after the triggering of a violation.

General Comments

1. Throughout the document, more attention to how the discussion on the Clean Air Act section 172 and 182 requirements is necessary for accuracy and reader clarity. While section 172 provides the general requirements for nonattainment areas, 182 provides specific requirements for ozone areas and in some case overrides the provisions in section 172. The EPA is available to discuss specific examples of the language that needs clarification and suggests that Kentucky review the language under the sections related to Requirements 1, 3, and 5 in the document.

Emissions Inventory Development

2. Pages 16 and 18 of document (Pages #9 and #11), Table 4: For the emissions inventory summaries, please clarify what "air" emissions represent and how they were developed.

3. Page 16 of document (Page #9): For reader clarity, a discussion of how non-road emissions were developed (e.g., EPA's NONROAD2008a model, or the version of the NONROAD model incorporated into MOVES2014), and the assumptions and process used by the Indiana Department of Environmental Management is needed.

4. Consider clarifying in the narrative and/or support documents how ozone season, or "summer day emissions," were selected and calculated. Refer to pages 15 and 56 of the EPA's most recent draft guidance, "Emissions Inventory Guidance for Implementation of Ozone [and Particulate Matter]* National Ambient Air Quality Standards (NAAQS) and Regional Haze Regulations," located here: https://www.epa.gov/sites/production /files/2014-10/documents/ 2014revisedeiguidance_0.pdf.

5. Pages 382–383 of document (Pages 8–9 of Appendix D), Table 6: The EPA expects that locally derived population and age distribution data, rather than national defaults, be used in the MOVES modeling for source types IDs 41, 42, 43, 51, 52, 53, 54, and 61 because these are considered to be local. Please clarify whether registration data was not available or if they are not local and therefore considered to drive through portions of the counties being modeled.

Transportation Conformity

6. Page 30 of document (Page #23): For completeness, there should be a discussion regarding the amount of the safety margin remaining for volatile organic compounds (VOC) and nitrogen oxides (NOx) for the Kentucky portion of the maintenance area.

7. Page 39 of document (Page #32): There are several tables in the document that detail the budgets and safety margin for the Kentucky, Indiana and Ohio counties. For reader clarity, the EPA recommends that Kentucky consider the inclusion of one simplified table (Table 42) that clearly identifies the MVEBs for 2020 and 2030. As currently provided in the submission, Table 42 appears to indicate that there are Kentucky budgets for 2011 and 2014. See below for an example of a simplified table:

Table 42

	2020	2030
VOC	4.10	2.87
NOx	7.35	4.64

General Plan Elements

8. Page 13 of document (Page #6), Requirement 1, 2nd paragraph of Demonstration: The second sentence does not match the table. The 2012–2014 data shows the two KY monitors as 65 and 75 and the 2013–2015 data shows them at 61 and 71. This sentence and/or the tables need to be clarified.

9. Page 44 of document (Page #37): Please clarify that the emission reductions cited here for Tier III are national reductions.

10. Page 46 of document (Page #39), Open Burning Bans: The open burning ban is listed under Chapter 5 of the document which seems to indicate that it is permanent and enforceable. For attainment and maintenance of the national ambient air quality standards (NAAQS) only measures that are approved in the state implementation plan (SIP) can be claimed as permanent and enforceable unless the measure is already a federal measure that is still being implemented and enforced. If the open burning bans are approved into the SIP, provide the citation for the EPA's approval of these regulations. If these regulations were not approved into the SIP, for clarity on permanent and enforceable measures that are being relied upon for attainment and maintenance of NAAQS, consider adding including this measures in a state only section of the document and not under the measures that are permanent and enforceable for the purposes of demonstrating attainment or maintenance.

11. Consider including the citation for the EPA's approval of Kentucky's NOx SIP Call regulations in the document where appropriate.

12. Page 47 of document (Page #40), Requirement 1, Demonstration: Clarify why the requirement to provide an updated maintenance plan covering the second 10-year period would not continue to be applicable for the area. This is unclear.

13. Page 47 of document (Page #40), Requirement 2, Demonstration: Consider providing a schedule of events for the initial "indicator" trigger in this section.

14. Page 47 of document (Page #40), Requirement 3, Demonstration: Consider including a statement in the last sentence that Kentucky will notify the EPA and seek approval for any other contingency measures not listed here at the time Kentucky determines they are necessary.

15. Page 50 of document (Page #43), Conclusion: The EPA suggests that Kentucky consider updating the statement regarding 2012-2014 data being the most recent data since 2013-2015 data is now available. The statement regarding the area attaining with 2012-2014 is helpful for the reader; however, the EPA will have to consider the most recent available data prior to taking action on any redesignation request.

Other Comments

Emissions Inventory Development

1. Pages 19 and 30 of document (Pages #12 and #23), Tables 5, 6, 25, and 26: Certain tables with summary emissions do not appear to add up. Please note whether this is a round error carried over from the spreadsheet. For example, in the 2011 column of Tables 5 and 25, the total should be 3.96 tons, but is listed as 3.82 tons.

2. Starting on Page 205 of document, Base Year Emissions Tables: Consider including units in the tables.

3. Page 391 of document (Page 4 of Appendix E): For the 2017 and 2020 projected inventory development, it appears that Y should be set equal to 14 for the growth factor calculation for interim years, since the total years between the listed present year and future year is 14, not 9.

Response to Comments

From May 16, 2016, until June 21, 2016, the Cabinet provided an opportunity for comments on the proposed State Implementation Plan (SIP) submittal requesting that the Northern Kentucky portion of the Cincinnati-Hamilton, OH-KY-IN be redesignated to attainment for the 2008 8-hour Ozone National Ambient Air Quality Standards (NAAQS). The public notice announcing the public comment period included an opportunity to request a public hearing. No request for a public hearing was received; therefore, the scheduled public hearing was cancelled.

During the public comment period, the only comments received were from the U.S. Environmental Protection Agency (U.S. EPA). The comments and responses are listed below.

Response to Comments for the proposed SIP submittal requesting NKY be redesignated to attainment for the 2008 8-hour Ozone NAAQS.

1. Comment: Page 28 of document (Page #21), Safety Margins: There should be a section in the narrative discussing the transportation conformity, on-road mobile sources, motor vehicle emissions budgets (MVEBs), vehicle miles travelled and the EPA mobile model used to develop the MVEBs. In compliance with 40 CFR 93, Kentucky should also include a statement that interagency consultation was used to select an interim year for 2020.
(Scott Davis, U.S. EPA)

Response: The Division acknowledges this comment. Additional documentation to address the comment is now included throughout Chapter 4 within Kentucky's submittal.

2. Comment: Page 47 of document (Page #40), Requirement 3, Demonstration: More clarification is needed on any contingency measure, including any regulatory program that will be implemented within 18 months after the triggering of a violation.
(Scott Davis, U.S. EPA)

Response: The Division acknowledges this comment. Additional clarification on contingency measures has been added to the narrative. Please see Page 43.

3. Comment: Throughout the document, more attention to how the discussion on the Clean Air Act section 172 and 182 requirements is necessary for accuracy and reader clarity. While section 172 provides the general requirements for nonattainment areas, 182 provides specific requirements for ozone areas and in some case overrides the provisions in section 172. The EPA is available to discuss specific examples of the language that needs clarification and suggests that Kentucky review the language under the sections related to Requirements 1, 3, and 5 in the document.
(Scott Davis, U.S. EPA)

Response: The Division acknowledges this comment. Narrative has been added to Chapter 5 requirements 1, 3, and 5 to clarify what actions are required to fulfill CAA sections 172 and 182 and to clarify for readers what requirements are exempt for areas already attaining the standard and submitting a redesignation request.

4. Comment: Pages 16 and 18 of document (Pages #9 and #11), Table 4: For the emissions inventory summaries, please clarify what "air" emissions represent and how they were developed.
(Scott Davis, U.S. EPA)

Response: The Division acknowledges this comment. "Air emissions" is the term used to represent aircraft emissions. This term ("Air") was also used to be consistent with documents from the two other states involved in this EPA submittal, Ohio and Indiana.

5. Comment: Page 16 of document (Page #9): For reader clarity, a discussion of how non-road emissions were developed (e.g., EPA's NONROAD2008a model, or the version of the NONROAD model incorporated into MOVES2014), and the assumptions and process used by the Indiana Department of Environmental Management is needed.
(Scott Davis, U.S. EPA)

Response: The Division acknowledges this comment. Additional documentation to address the comment is now included in Kentucky's submittal. Please see Pages 10-11.

6. Comment: Consider clarifying in the narrative and/or support documents how ozone season, or "summer day emissions," were selected and calculated. Refer to pages 15 and 56 of the EPA's most recent draft guidance, "Emissions Inventory Guidance for Implementation of Ozone [and Particulate Matter]* National Ambient Air Quality Standards (NAAQS) and Regional Haze Regulations," located here: https://www.epa.gov/sites/production/files/2014-10/documents/2014revisedeiguidance_0.pdf.
(Scott Davis, U.S. EPA)

Response: The Division acknowledges this comment. Additional documentation to address the comment is now included in Kentucky's submittal. Please see Page 9.

7. Comment: Pages 382-383 of document (Pages 8-9 of Appendix D), Table 6: The EPA expects that locally derived population and ages distribution data, rather than national defaults, be used in the MOVES modeling for source types IDs 41, 42, 43, 51, 52, 53, 54, and 61 because these are considered to be local. Please clarify whether registration data was not available or if they are not local and therefore considered to drive through portions of the counties being modeled.
(Scott Davis, U.S. EPA)

Response: The Division acknowledges this comment. The Kentucky Transportation Cabinet (KYTC) provided the distribution of the population, by taking MOBILE classifications and migrating them into MOVES classifications, using the percentages from pages 43 and 44 from the "**Technical Guidance on the Use of MOVES2010 for Emission Inventory Preparation in State Implementation Plans and Transportation Conformity"** document. The collected data's decoder does not have the capabilities of distinguishing between similar source type IDs. For example, the KY Vehicle Identification Number (VIN) data captures buses, but cannot decode whether it is an intercity bus, a school bus, and/or a transit bus. The MOVES2010 Guidance described a process KYTC used to estimate values for source types IDs 41, 42, and 43. The same methodology was applied for source type IDs 51, 52, 53, 54, and 61. The "Age Distribution" line reflects that the KYTC distributed vehicles into age categories using the model year of the vehicle registration. KYTC did not use "default data" to distribute their ages. Kentucky is not aware of any federal and/or state requirements for collecting this data. At this time, this is the process KYTC can use to report VIN data.

8. Comment: Page 30 of document (page #23): For completeness, there should be a discussion regarding the amount of the safety margin remaining for volatile organic compounds (VOC) and nitrogen oxides (NOx) for the Kentucky portion of the maintenance area.
(Scott Davis, U.S. EPA)

Response: The Division acknowledges this comment. Kentucky has its own mobile budget while Ohio and Indiana have a combined mobile budget between their two states. A statement has been added to Kentucky's narrative to clarify the amount of the safety margin remaining for the Kentucky portion of the maintenance area. Please see Page 23.

9. Comment: Page 39 of document (Page #32): There are several tables in the document that detail the budgets and safety margin for the Kentucky, Indiana and Ohio counties. For reader clarity, the EPA recommends that Kentucky consider the inclusion of one simplified table (Table 42) that clearly identifies the MVEBs for 2020 and 2030. As currently provided in the submission, Table 42 appears to indicate that there are Kentucky budgets for 2011 and 2014. See below for an example of a simplified table:

Table 42

	2020	2030
VOC	4.10	2.87
NOx	7.35	4.64

(Scott Davis, U.S. EPA)

Response: The Division acknowledges this comment. Table 42 has now been amended in Kentucky's submittal and now clearly identifies the MVEBs for 2020 and 2030. Please see Page 33.

10. Comment: Page 13 of document (#6), Requirement 1, 2nd paragraph of Demonstration: The second sentence does not match the table. The 2012-2014 data shows the two KY monitors as 65 and 75 and the 2013-2015 data shows them at 61 and 71. This sentence and/or the tables need to be clarified.
(Scott Davis, U.S. EPA)

Response: The Division acknowledges this comment and has updated the narrative to reflect the 2013-2015 ozone design values. The information cited for ozone monitor 21-037-3002 (Campbell County) is correct and mirrors the data provided in Table 1.

11. Comment: Page 44 of document (Page #37): Please clarify that the emission reductions cited here for Tier III are national reductions.
(Scott Davis, U.S. EPA)

Response: The Division acknowledges this comment and will specify that the emissions reductions for Tier III are national reductions in the narrative. Please see page 39.

12. Comment: Page 46 of document (Page #39), Open Burning Bans: The open burning ban is listed under Chapter 5 of the document which seems to indicate that it is permanent and enforceable. For attainment and maintenance of the national ambient air quality standards (NAAQS) only measures that are approved in the state implementation plan (SIP) can be claimed as permanent and enforceable unless the measure is already a federal measure that is still being implemented and enforced. If the open burning bans are approved into the SIP, provide the citation for the EPA's approval of these regulations. If these regulations were not approved into the SIP, for clarity on permanent and enforceable measures that are being relied upon for attainment and maintenance of NAAQS, consider adding including this measures in a state only section of the document and not under the measures that are permanent and enforceable for the purposes of demonstrating attainment or maintenance.
(Scott Davis, U.S. EPA)

Response: The Division acknowledges this comment. The open burning regulation and specific date when it was adopted into Kentucky's SIP has been added to the narrative. Please see page 41.

13. Comment: Consider including the citation for the EPA's approval of Kentucky's NOx SIP Call regulations in the document where appropriate.
(Scott Davis, U.S. EPA)

Response: The Division acknowledges this comment. The NOx SIP call regulations have been cited. Please see page 41.

14. Comment: Page 47 of document (Page #40), Requirement 1, Demonstration: Clarify why the requirement to provide an updated maintenance plan covering the second 10-year period would not continue to be applicable for the area. This is unclear.
(Scott Davis, U.S. EPA)

Response: The Division acknowledges this comment. The hypothetical statement has been removed from the narrative. Please see Page 42.

15. Comment: Page 47 of document (#40), Requirement 2, Demonstration: Consider providing a schedule of events for the initial "indicator" trigger in this section.
(Scott Davis, U.S. EPA)

Response: The Division acknowledges this comment. A schedule of events has been provided for any indicator trigger that occurs within the maintenance area. Please see Page 42.

16. Comment: Page 47 of document (Page #40), Requirement 3, Demonstration: Consider including a statement in the last sentence that Kentucky will notify the EPA and seek approval for any other contingency measures not listed here at the time Kentucky determines they are necessary.
(Scott Davis, U.S. EPA)

Response: The Division acknowledges this comment. A statement that Kentucky will notify the EPA and seek approval for any contingency measures not listed within the submittal has been added to Page 43 of the narrative.

17. Comment: Page 50 of document (Page #43), Conclusion: The EPA suggests that Kentucky consider updating the statement regarding 2012-2014 data being the most recent data since 2013-2015 data is now available. The statement regarding the area attaining with 2012-2014 is helpful for the reader; however, the EPA will have to consider the most recent available data prior to taking action on any redesignation request.
(Scott Davis, U.S. EPA)

Response: The Division acknowledges this comment. All references to the 2012-2014 monitoring data have been replaced with the 2013-2015 monitoring data so that readers can see that the Cincinnati OH-KY-IN area is attaining the 2008 8-hour ozone standard based on the most recent available data.

18. Comment: Pages 19 and 30 of document (Pages #12 and #23), Tables 5, 6, 25, and 26: Certain tables with summary emissions do not appear to add up. Please note whether this is a round error carried over from the spreadsheet. For example, in the 2011 column of Tables 5 and 25, the total should be 3.96 tons, but is listed as 3.82 tons.
(Scott Davis, U.S. EPA)

Response: The Division acknowledges this comment. The referenced tables have been updated to reflect the correct data.

19. Comment: Starting on Page 205 of document, Base Year Emissions Tables: Consider including units in the tables.
(Scott Davis, U.S. EPA)

Response: The Division acknowledges this comment. In order to clarify units of measure, the Division will include them in the tables.

20. Comment: Page 391 of document (Page 4 of Appendix E): For the 2017 and 2020 projected inventory development, it appears that Y should be set equal to 14 for the growth factor calculation for interim years, since the total years between the listed present year and future year is 14, not 9.
(Scott Davis, U.S. EPA)

Response: The Division acknowledges this comment. In addressing this comment, it was discovered that the Y value should be 11 instead of 14, as previously indicated. The present year (2014) and future year (2025) have a difference of 11 years.
