IMPORTANT CONSIDERATIONS

DEAD ANIMAL DISPOSAL

LIVESTOCK BMP #15

Photo courtesy of Creative Commons

Description:

This BMP concerns a method of disposing of dead livestock that is legally and environmentally acceptable.

AWQA Minimum Requirements:

Follow requirements of state law [KRS 257:160](#). When burying carcasses, avoid areas subject to flooding or closer than 100 feet to a stream, well, spring, lake, or sinkhole. When composting carcasses, composting shall be conducted in accordance with [ID-166 On-farm Composting of Animal Mortalities](#).

Recommendations:

Plan ahead for livestock mortality events. Be prepared to manage mortalities by means of incineration, burial, rendering or composting. Manage mortalities within 48 hours, unless the

animal is stored in a cooler. If the death of an animal is suspicious or of an unknown cause that may pose a risk to other livestock, quarantine exposed livestock and contact State Veterinarian and the Veterinary Diagnostic Laboratory. Contact tree trimmers or county solid waste programs for wood chips.
