MATCHING FUND REQUIREMENTS

This is a cost-share grant. The federal government and the grantee share the total cost of the project. Funds are awarded on a 50/50 matching basis. The grantee must match the amount awarded by providing at least 50 percent of the total project cost. The grantee's share of the match must be in either cash or in-kind services. The grantee's share cannot come from a federal source, and the grant cannot be used as a match for any other federal cost-share project.

Cash purchase matches are direct, out-of-pocket expenditures for eligible project activities that are supported by paid invoices, canceled checks, and signed receipts.

In-kind contributions match such as third-party donations of supplies or equipment, professional services at the professional rate, or time spent by

employees or volunteers on eligible project activities. Volunteer hours may be applied to the project at rates appropriate to the skill level of the volunteer and/or the nature of the work being performed. Assistance provided by federal employees may not be claimed.

Grantees are required to maintain project records in accordance with all applicable federal and state regulations. This includes: (1) records shall comply with generally accepted accounting principles; (2) records will document allowable costs; (3) records will be supported by source documentation, such as canceled checks, paid invoices, and signed contracts; and (4) records will be maintained for three years following payment.
