# Reducing our footprint

**Lexmark is committed**  
to becoming **carbon neutral** across all our operations by **2035**.

# Lexmark Solar array

- Lexmark is installing a 2 MW array on HQ property in 2022. This will account for approximately 10% of the overall energy needs in Lexington
- Pollinator flowers will be planted in the several acres housing the array
- The array will provide additional STEM education opportunities for area students
- This increased use of renewable energy will assist Lexmark's carbon neutrality by 2035

Additional solar arrays are being investigated at Lexmark's Cebu and Juarez locations.

# Lexmark Solar

Lexington Solar Array – Late August 2022
