Booker Noe Renewable Fuels Anaerobic Digester

- **Methane** (MMBTU/year): 1,300,000
- **Fertilizer** generated will sustainably provide majority of nutrients on over 34,000 acres of high-yielding corn fields
- Nearly half the total acreage required to supply Booker Noe's corn
- Today, the digestate as fertilizer has a very high value
 - **Provided at deep discount to local farmers**
 - Rural and Agricultural Development
