PTE* greater than 25 tpy for combined HAP  □ Yes ☒ No

*PTE does not include self-imposed emission limitations.

Description of Facility:
Canton Wood Products Company, LLC manufactures white oak barrels and toasted oak chips for the wine industry. Raw materials are stored on site for up to 4 years to season the wood. Wood used for barrels is later kiln dried to reduce the moisture content, sized by various machines, pre-assembled, heated, assembled, and toasted based on customer specifications. Oak chips are toasted, sized, and bagged.
SECTION 2 – CURRENT APPLICATION AND EMISSION SUMMARY FORM

Permit Number: F-19-023
Activities: APE20190001

Received: April 9, 2019
Application Complete Date(s): May 29, 2019

Permit Action: ☐ Initial ☑ Renewal ☐ Significant Rev ☐ Minor Rev ☐ Administrative

Construction/Modification Requested? ☐ Yes ☑ No

Previous 502(b)(10) or Off-Permit Changes incorporated with this permit action ☐ Yes ☒ No

Description of Action:
• Renewal: No changes requested.

**EU02 Initial Construction Date:** 07/2001  
**EU05 Initial Construction Date:** 07/2004

### Process Description:
- **EU02**: Various machines size the stave blanks for barrel assembly.  
  Maximum Capacity: 1.08 tons/hr  
  Control Device: Steel Craft Corp HE-1 Cyclone Size 90 with 85% efficiency  
- **EU05**: The chips are manufactured from oak cores, a byproduct from the saw mill.  
  Maximum Capacity: 2.28 tons/hr  
  Control Device: Cyclone with 80% efficiency

### Applicable Regulation:
401 KAR 59:010. *New process operations*, applicable to each affected facility, associated with a process operation, which is not subject to another emission standard with respect to particulates, commenced on or after July 2, 1975.

### Comments:
**EU02**: The original application received by the Division on November 6, 2003 (APE20030002) specifies an hourly operating rate of 539.25 lb/hr and emission factors of 6.003 lb/ton and 3.176 lb/ton for PM and PM10, respectively. It is known that the density of white oak is 48 lb/ft$^3$ (AP-42 Appendix A) and 1 lb/ 0.0833 ft$^3$, so the following equation was used to calculate the hourly design rate:

$$\frac{539.25\text{ lb}}{\text{hr}} \cdot \frac{0.0833\text{ ft}^3}{\text{lb}} \cdot \frac{48\text{ lb}}{\text{ft}^3} = \frac{1.08\text{ tons}}{\text{hr}}$$

*Emission factors extracted from KYEIS for operations with similar processes or activities (APE20060004 Application Form DEP7007N).*

<td></td>
<td>2.34 lbs/hr</td>
<td>401 KAR 59:010, Section 3(2)</td>
<td></td>
<td>Assumed based on emission factor.</td>
</tr>
</tbody>
</table>

**Initial Construction Date:** 1976

**Process Description:**
After assembly, the barrels are toasted with small pots containing wood waste that’s burned at a constant rate of 15.2 lbs/hr/barrel (13 barrels/hr max). A large hood is located over the heating area to release smoke from the building; however, there is no control device in place.

**Applicable Regulation:**
401 KAR 59:010, *New process operations*, applicable to each affected facility, associated with a process operation, which is not subject to another emission standard with respect to particulates, commenced on or after July 2, 1975.

**Comments:**
^PM Potential emissions calculation based on source testing conducted by Kenvirons.

AP-42 emission factors for residential fireplaces have been used to determine PTE.

Compliance with the applicable 401 KAR 59:010 PM standard is assumed based on the emission factor established from a performance test (CMN20040001).

F-14-012 erroneously included a cyclone with an 80% efficiency. The 2014 application specifically states that there is no control device.
### Emission Unit 06 (EP7) Haul Roads and Yard Area

**Initial Construction Date:** 1967

**Process Description:**
One main haul road and several small yard areas maintained by the facility.

**Applicable Regulation:**
401 KAR 63:010, *Fugitive emissions*, applicable to each apparatus, operation, or road which emits or may emit fugitive emissions (emissions of any air contaminant into the open air other than from a stack or air pollution control equipment exhaust) provided that the fugitive emissions from such facility are not elsewhere subject to an opacity standard within the administrative regulations of the Division for Air Quality.

**Comments:**
Emission factors provided by the facility on the initial conditional major application (APE20040001).

**Initial Construction Date:** 1967

**Process Description:**
The 4.2 MMBtu/hr Power Master 125 hp Model 3G S/N 6712542 indirect heat exchanger is a back-up unit that provides process heat for 2 drying kilns and a steam tunnel when EP9 is unavailable.

**Applicable Regulation:**
401 KAR 61:015, *Existing indirect heat exchangers*, applicable to each indirect heat exchanger having a heat input capacity of more than one (1) MMBtu/hr commenced before April 9, 1972.

**Comments:** N/A

</tr>
</tbody>
</table>

Initial Construction Date: 03/2006

Process Description:
The 3.3 MMBtu/hr Superior Boiler Works Model CK1 15-500-80-8 indirect heat exchanger is used to provide steam to the plant and utilizes flyash re-injection to maintain temperature. A cyclone controls the release of PM with a control efficiency of 98.4%.

Applicable Regulation:
401 KAR 59:015, New indirect heat exchangers, applicable to each indirect heat exchanger having a heat input capacity of more than one (1) MMBtu/hr commenced on or after April 9, 1972.

401 KAR 63:002. Section 2(4)(jjjjj), 40 C.F.R. 63.11193 to 63.11237, Tables 1 to 8 (Subpart JJJJJJ), National Emission Standards for Hazardous Air Pollutants for Industrial, Commercial, and Institutional Boilers Area Sources, as published July 1, 2016, applicable to industrial boilers located at an area source of HAPs.

Comments:
AP-42 emission factors for dry wood-fired boilers have been used to determine PTE.

There are no pollutant specific NSPS requirements.

Total Heat Input Capacity for All Affected Facilities at the Source = 7.5 MMBtu/hr (See Appendix B)
## Emission Unit 09 (EP13) Deihl In-Line Rip Saw

<tr>
<td></td>
<td>2.59 lb/hr</td>
<td>401 KAR 59:010, Section 3(2)</td>
<td></td>
<td>Control device shall be maintained.</td>
</tr>
</tbody>
</table>

**Initial Construction Date:** 07/2001

**Process Description:**
Staves are inspected for quality of edges and appropriate length; the saw is used to fix any flaws.
Maximum capacity: 0.59 tons/hr
Control Device: Fabric Bag Dust Control System (2012) with a 96.8% efficiency

**Applicable Regulation:**
401 KAR 59:010, *New process operations*, applicable to each affected facility, associated with a process operation, which is not subject to another emission standard with respect to particulates, commenced on or after July 2, 1975.

**Comments:**
The facility provided an emission factor of 0.004352 lb/SCC, noting an SCC unit of lbs (APE20120002).

Version 3/8/18
SECTION A - PERMIT AUTHORIZATION

Pursuant to a duly submitted application the Kentucky Energy and Environment Cabinet (Cabinet) hereby authorizes the operation of the equipment described herein in accordance with the terms and conditions of this permit. This permit has been issued under the provisions of Kentucky Revised Statutes (KRS) Chapter 224 and regulations promulgated pursuant thereto.

The permittee shall not construct, reconstruct, or modify any affected facilities without first submitting a complete application and receiving a permit for the planned activity from the permitting authority, except as provided in this permit or in 401 KAR 52:030, Federally-enforceable permits for non-major sources.

Issuance of this permit does not relieve the permittee from the responsibility of obtaining any other permits, licenses, or approvals required by the Cabinet or any other federal, state, or local agency.
SECTION B - EMISSION POINTS, EMISSION UNITS, APPLICABLE REGULATIONS, AND OPERATING CONDITIONS

Emission Unit 02 (EP2)  
Cooperage Operations (Barrel Manufacturing)

Description:
- Maximum Capacity: 1.08 tons/hr
- Construction Commenced: July 2001
- Control Device: Steel Craft Corp HE-1 Cyclone Size 90
- Control Efficiency: 85%

Emission Unit 05 (EP5)  
Chip Manufacturing Operations

Description:
- Maximum Capacity: 2.28 tons/hr
- Construction Commenced: July 2004
- Control Device: Cyclone
- Control Efficiency: 80%

APPLICABLE REGULATIONS:
401 KAR 59:010, New process operations

1. Operating Limitations:
   N/A

2. Emission Limitations:
   a. No person shall cause, suffer, allow, or permit any continuous emission into the open air from a control device or stack associated with any affected facility which is equal to or greater than twenty (20) percent opacity [401 KAR 59:010, Section 3(1)(a)].

   Compliance Demonstration:
   Compliance shall be demonstrated according to 4. Specific Monitoring Requirements a. and 5. Specific Recordkeeping Requirements a.

   b. Particulate matter (PM) emissions shall not exceed the following [401 KAR 59:010, Section 3(2)]:

   \[
   \begin{array}{|c|c|}
   \hline
   P = \text{Process Weight Rate} & \text{Maximum Allowable Emission Rate (lbs/hr)} \\
   \text{(tons/hr)} & \text{(lbs/hr)} \\
   \hline
   \leq 0.50 & 2.34 \\
   0.50 < P \leq 30 & 3.59P^{0.62} \\
   \hline
   \end{array}
   \]

   Compliance Demonstration:
   Compliance shall be demonstrated according to 7. Specific Control Equipment Operating Conditions a.

3. Testing Requirements:
   Testing shall be conducted at such times as may be requested by the Cabinet [401 KAR 50:045, Section 4 and 401 KAR 59:005, Section 2(2)].
SECTION B - EMISSION POINTS, EMISSION UNITS, APPLICABLE REGULATIONS, AND OPERATING CONDITIONS (CONTINUED)

4. **Specific Monitoring Requirements:**
   a. The permittee shall perform a qualitative visual observation of the opacity of emissions from the stack on a weekly basis. If visible emissions from the stack are observed (not including condensed water in the plume), then the permittee shall determine the opacity of emission by U.S. EPA Reference Method 9 [401 KAR 52:030, Section 10].

   b. The permittee shall monitor the hours of operation and the amount of wood processed (in tons) on a weekly basis [401 KAR 52:030, Section 10].

5. **Specific Recordkeeping Requirements:**
   a. The permittee shall maintain a log of the qualitative visual observations of the emissions from the stack and any U.S. EPA Reference Method 9 readings performed [401 KAR 52:030, Section 10].

   b. The permittee shall maintain records of the hours of operation and the amount of wood processed (in tons) on a weekly basis [401 KAR 52:030, Section 10].

6. **Specific Reporting Requirements:**
   See Section F – Monitoring, Recordkeeping, and Reporting Requirements for additional requirements.

7. **Specific Control Equipment Operating Conditions:**
   a. The control device shall be operated to maintain compliance with permitted emission limitations, in accordance with manufacturer’s specifications and standard operating practices [401 KAR 50:055, Section 2].

   b. The permittee shall maintain records regarding maintenance of the control equipment [401 KAR 52:030, Section 10].

   c. See Section E – Source Control Equipment Requirements for additional requirements.
SECTION B - EMISSION POINTS, EMISSION UNITS, APPLICABLE
REGULATIONS, AND OPERATING CONDITIONS (CONTINUED)

Emission Unit 04 (EP4)  Barrel Toasting Operations

Description:
- Maximum Capacity: 0.11 tons/hr
- Construction Commenced: 1976
- Heat Input Capacity: 1.11 MMBtu/hr
- Primary Fuel: Wood Waste

APPLICABLE REGULATIONS:
401 KAR 59:010, New process operations

1. Operating Limitations:
   N/A

2. Emission Limitations:
   a. No person shall cause, suffer, allow, or permit any continuous emission into the open air from a control device or stack associated with any affected facility which is equal to or greater than twenty (20) percent opacity [401 KAR 59:010, Section 3(1)(a)].

Compliance Demonstration:
Compliance shall be demonstrated according to 4. Specific Monitoring Requirements a. and 5. Specific Recordkeeping Requirements a.

b. Particulate matter (PM) emissions shall not exceed 2.34 lbs/hr [401 KAR 59:010, Section 3(2)]:

Compliance Demonstration:
This emission unit is assumed to be in compliance with the applicable 401 KAR 59:010 PM emission limitations. See Section D – Source Emission Limitations and Testing Requirements for source-wide limits.

3. Testing Requirements:
   Testing shall be conducted at such times as may be requested by the Cabinet [401 KAR 50:045, Section 4 and 401 KAR 59:005, Section 2(2)].

4. Specific Monitoring Requirements:
   a. The permittee shall perform a qualitative visual observation of the opacity of emissions from the stack on a weekly basis. If visible emissions from the stack are observed (not including condensed water in the plume), then the permittee shall determine the opacity of emission by U.S. EPA Reference Method 9 [401 KAR 52:030, Section 10].

   b. The permittee shall monitor the hours of operation and the amount of wood combusted (in tons) on a monthly basis [401 KAR 52:030, Section 10].

5. Specific Recordkeeping Requirements:
   a. The permittee shall maintain a log of the qualitative visual observations of the emissions from the stack and any U.S. EPA Reference Method 9 readings performed [401 KAR 52:030, Section 10].
b. The permittee shall maintain records of the hours of operation and the amount of wood combusted (in tons) on a monthly basis [401 KAR 52:030, Section 10].

6. **Specific Reporting Requirements:**
   See Section F – Monitoring, Recordkeeping, and Reporting Requirements for additional requirements.
SECTION B - EMISSION POINTS, EMISSION UNITS, APPLICABLE REGULATIONS, AND OPERATING CONDITIONS (CONTINUED)

Emission Unit 06 (EP7)  Haul Roads and Yard Area

Description:
  Equipment:  Trucks and Off-Road Vehicles
  Construction Commenced:  1967
  Maximum Operating Rate:  1.55 tons/hr
  Control:  Wet Dust Suppression

APPLICABLE REGULATIONS:
401 KAR 63:010, Fugitive emissions

1. Operating Limitations:
   a. No person shall cause, suffer, or allow any material to be handled, processed, transported, or stored; a building or its appurtenances to be constructed, altered, repaired, or demolished, or a road to be used without taking reasonable precaution to prevent particulate matter from becoming airborne. Such reasonable precautions shall include, when applicable, but not be limited to the following [401 KAR 63:010, Section 3(1)]:
      i. Use, where possible, of water or chemicals for control of dust in the demolition of existing buildings or structures, construction operations, the grading of roads or the clearing of land [401 KAR 63:010, Section 3(1)(a)];
      ii. Application and maintenance of asphalt, oil, water, or suitable chemicals on roads, materials stockpiles, and other surfaces which can create airborne dusts [401 KAR 63:010, Section 3(1)(b)];
      iii. Installation and use of hoods, fans, and fabric filters to enclose and vent the handling of dusty materials, or the use of water sprays or other measures to suppress the dust emissions during handling. Adequate containment methods shall be employed during sandblasting or other similar operations [401 KAR 63:010, Section 3(1)(c)];
      iv. Covering, at all times when in motion, open bodied trucks transporting materials likely to become airborne [401 KAR 63:010, Section 3(1)(d)];
      v. The maintenance of paved roadways in a clean condition [401 KAR 63:010, Section 3(1)(e)];
      vi. The prompt removal of earth or other material from a paved street which earth or other material has been transported thereto by trucking or earth moving equipment or erosion by water [401 KAR 63:010, Section 3(1)(f)].
   b. No person shall cause or permit the discharge of visible fugitive dust emissions beyond the lot line of the property on which the emissions originate [401 KAR 63:010, Section 3(2)].

2. Emission Limitations:
   N/A
SECTION B - EMISSION POINTS, EMISSION UNITS, APPLICABLE REGULATIONS, AND OPERATING CONDITIONS (CONTINUED)

3. **Testing Requirements:**
   Testing shall be conducted at such times as may be requested by the Cabinet [401 KAR 50:045, Section 4].

4. **Specific Monitoring Requirements:**
   a. The permittee shall monitor actions taken (e.g. water usage for roads, maintenance of enclosures) to prevent the discharge of visible fugitive emissions beyond the property line for each vehicle on a monthly basis [401 KAR 52:030, Section 10].

   b. The permittee shall monitor the amount of material hauled (in tons), the distance the vehicle travels (in VMT), and the type of vehicle (in tons) that traverses the paved or unpaved roadways on a monthly basis [401 KAR 52:030, Section 10].

5. **Specific Recordkeeping Requirements:**
   a. The permittee shall maintain records of actions taken to prevent the discharge of visible fugitive emissions beyond the property line for each vehicle on a monthly basis [401 KAR 52:030, Section 10].

   b. The permittee shall maintain records of the amount of material hauled (in tons), the distance the vehicle travels (in VMT), and the type of vehicle (in tons) that traverses the paved or unpaved roadways on a monthly basis [401 KAR 52:030, Section 10].

6. **Specific Reporting Requirements:**
   See Section F – Monitoring, Recordkeeping, and Reporting Requirements for additional requirements.
SECTION B - EMISSION POINTS, EMISSION UNITS, APPLICABLE REGULATIONS, AND OPERATING CONDITIONS (CONTINUED)

Emission Unit 07 (EP3)  Natural Gas-Fired Boiler for Barrel Formation & Dry Kiln Operations

Description:
- Equipment: Power Master 125hp Model 3G S/N 6712542
- Construction Commenced: 1967
- Heat Input Capacity: 4.2 MMBtu/hr
- Primary Fuel: Natural Gas

APPLICABLE REGULATIONS:
401 KAR 61:015, Existing indirect heat exchangers

1. Operating Limitations:
During a startup period or a shutdown periods, the permittee shall comply with the work practice standards established as follows [401 KAR 61:015, Section 9]:

   a. The permittee shall comply with 401 KAR 60:055, Section 2(5) [401 KAR 61:015, Section 9(1)(a)];

   b. The frequency and duration of startup periods or shutdown periods shall be minimized by the affected facility [401 KAR 61:015, Section 9(1)(b)];

   c. All reasonable steps shall be taken by the permittee to minimize the impact of emissions on ambient air quality from the affected facility during startup periods and shutdown periods [401 KAR 61:015, Section 9(1)(c)]; and

   d. Startups and shutdowns shall be conducted according to either the manufacturer’s recommended procedures or recommended procedures for a unit of similar design, for which manufacturer’s recommended procedures are available, as approved by the Cabinet based on documentation provided by the permittee of the affected facility [401 KAR 61:015, Section 9(1)(e)1. and 9(1)(e)2.].

2. Emission Limitations:
   a. PM emissions shall not exceed 0.75 lbs/MMBtu [401 KAR 61:015, Section 4(1)(a)].

   b. Visible emissions shall not exceed forty (40) percent opacity except that for emissions from an indirect heat exchanger during building a new fire for the period required to ring the boiler up to operating conditions if the method used is that recommended by the manufacturer and the time does not exceed the manufacturer’s recommendations [401 KAR 61:015, Section 4(1)(c) and 4(1)(c)3.].

   c. Sulfur dioxide (SO2) emissions shall not exceed 6.0 lbs/MMBtu based on a twenty-four (24) hour average [401 KAR 61:015, Section 5(1)].

Compliance Demonstration:
This unit is assumed to be in compliance with the applicable 401 KAR 61:015 PM, opacity and SO2 standards while combusting natural gas.
SECTION B - EMISSION POINTS, EMISSION UNITS, APPLICABLE REGULATIONS, AND OPERATING CONDITIONS (CONTINUED)

3. **Testing Requirements:**
   Testing shall be conducted at such times as may be requested by the Cabinet [401 KAR 52:030, Section 10].

4. **Specific Monitoring Requirements:**
   The permittee shall monitor the hours of operation and the amount of natural gas combusted (in MMscf) on a monthly basis [401 KAR 52:030, Section 10].

5. **Specific Recordkeeping Requirements:**
   a. The permittee shall maintain records of the hours of operation and the amount of natural gas combusted (in MMscf) on a monthly basis [401 KAR 52:020, Section 10].

   b. The actions, including duration of the startup period, of the permittee of each affected facility during startup periods and shutdown periods, shall be documented by signed contemporaneous logs or other relevant evidence [401 KAR 61:015, Section 9(1)(d)].

6. **Specific Reporting Requirements:**
   See Section F – Monitoring, Recordkeeping, and Reporting Requirements for additional requirements.
SECTION B - EMISSION POINTS, EMISSION UNITS, APPLICABLE REGULATIONS, AND OPERATING CONDITIONS (CONTINUED)

Emission Unit 08 (EP9)  Wood Gasification Boiler

Description:
- **Equipment:** Superior Boiler Works Model CKI 15-500-80-8
- **Construction Commenced:** March 2006
- **Heat Input Capacity:** 3.3 MMBtu/hr
- **Primary Fuel:** Wood
- **Control Device:** Cyclone
- **Control Efficiency:** 98.4%

APPLICABLE REGULATIONS:
401 KAR 59:015. New indirect heat exchangers

401 KAR 63:002. Section 2(4)(jjjij), 40 C.F.R. 63.11193 to 63.11237, Tables 1 to 8 (Subpart JJJJJJ), National Emission Standards for Hazardous Air Pollutants for Industrial, Commercial, and Institutional Boilers Area Sources, as published July 1, 2016

1. Operating Limitations:
   a. During a startup period or a shutdown period, the permittee shall comply with the work practice standards established by the following [401 KAR 59:015, Section 7]:
      i. The permittee shall comply with 401 KAR 50:055, Section 2(5) [401 KAR 59:015, Section 7(1)(a)];
      ii. The frequency and duration of startup periods or shutdown periods shall be minimized by the affected facility [401 KAR 59:015, Section 7(1)(b)];
      iii. All reasonable steps shall be taken by the permittee to minimize the impact of emissions on ambient air quality from the affected facility during startup periods and shutdown periods [401 KAR 59:015, Section 7(1)(c)];
      iv. Startups and shutdowns shall be conducted according to either the manufacturer’s recommended procedures or recommended procedures for a unit of similar design, for which manufacturer’s recommended procedures are available, as approved by the Cabinet based on documentation provided by the permittee of the affected facility [401 KAR 59:015, Section 7(1)(e)1. and 7(1)(e)2].

   Compliance Demonstration:
   Compliance shall be demonstrated according to 5. Specific Recordkeeping Requirements a.

b. The permittee shall achieve compliance with the provisions of 40 CFR 63, Subpart JJJJJJ upon startup of the affected source [40 CFR 63.11196(c)].

c. At all times the permittee must operate and maintain the affected source, including associated air pollution control equipment and monitoring equipment, in a manner consistent with safety and good air pollution control practices for minimizing emissions. The general duty to minimize emissions does not require the permittee to make any further efforts to reduce emissions if levels required by the standards of 40 CFR 63, Subpart JJJJJJ
SECTION B - EMISSION POINTS, EMISSION UNITS, APPLICABLE REGULATIONS, AND OPERATING CONDITIONS (CONTINUED)

have been achieved. Determination of whether such operation and maintenance procedures are being used will be based on information available to the Administrator that may include, but is not limited to, monitoring results, review of operation and maintenance procedures, review of operation and maintenance records, and inspection of the source [40 CFR 63.11205(a)].

d. The permittee shall conduct a tune-up of the boiler biennially, no more than 25 months after the previous tune-up, to demonstrate continuous compliance as specified in the following [40 CFR 62.11223(b)]:

i. As applicable, inspect the burner, and clean or replace any components of the burner as necessary (you may delay the burner inspection until the next scheduled unit shutdown, not to exceed 36 months from the previous inspection) [40 CFR 63.11223(b)(1)].

ii. Inspect the flame pattern, as applicable, and adjust the burner as necessary to optimize the flame pattern. The adjustment should be consistent with the manufacturer's specifications, if available [40 CFR 63.11223(b)(2)].

iii. Inspect the system controlling the air-to-fuel ratio, as applicable, and ensure that it is correctly calibrated and functioning properly (you may delay the inspection until the next scheduled unit shutdown, not to exceed 36 months from the previous inspection) [40 CFR 63.11223(b)(3)].

iv. Optimize total emissions of CO. This optimization should be consistent with the manufacturer’s specification, if available, and with any nitrogen oxide requirement to which the unit is subject [40 CFR 63.11223(b)(4)].

v. Measure the concentrations in the effluent stream of CO in parts per million, by volume, and oxygen in volume percent, before and after the adjustments are made (measurements may be either on a dry or wet basis, as long as it is the same basis before and after the adjustments are made). Measurements may be taken using a portable CO analyzer [40 CFR 63.11223(b)(5)].

vi. Maintain on-site and submit, if requested by the Administrator, a report containing the following information [40 CFR 63.11223(b)(6)]:

(1) The concentrations of CO in the effluent stream in parts per million, by volume, and oxygen in volume percent, measured at high fire or typical operating load, before and after the tune-up of the boiler [40 CFR 63.11223(b)(6)(i)].

(2) A description(s) of any corrective actions taken as a part of the tune-up of the boiler [40 CFR 63.11223(b)(6)(ii)].

(3) The type and amount of fuel used over the 12 months prior to the tune-up of the boiler, but only if the unit was physically and legally capable of using more than one type of fuel during that period. Units sharing a fuel meter may estimate the fuel use by each unit [40 CFR 63.11223(b)(6)(iii)].
SECTION B - EMISSION POINTS, EMISSION UNITS, APPLICABLE REGULATIONS, AND OPERATING CONDITIONS (CONTINUED)

vii. If the unit is not operating on the required date for a tune-up, the tune-up must be conducted within 30 days of startup [40 CFR 63.11223(b)(7)].

2. Emission Limitations:
   a. PM emissions shall not exceed 0.56 lb/MMBtu [401 KAR 59:015, Section 4(1)(a)].

   Compliance Demonstration:
   This unit is assumed to be in compliance with the applicable 401 KAR 59:015 PM standard while the control device is in operation.

   b. Visible emissions shall not exceed twenty (20) percent opacity except [401 KAR 59:015, Section 4(2)]:

      i. A maximum of forty (40) percent opacity shall be allowed for a maximum of six (6) consecutive minutes in any sixty (60) consecutive minutes during fire box cleaning or soot blowing; [401 KAR 59:015, Section 4(2)(b)]; and

      ii. For emissions from an affected facility caused by building a new fire, emissions during the period required to bring the boiler up to operating conditions shall be allowed, if the method used is recommended by the manufacturer and the time does not exceed the manufacturer’s recommendations [401 KAR 59:015, Section 4(2)(c)].

   Compliance Demonstration:
   Compliance shall be demonstrated according to 4. Specific Monitoring Requirements b.

   c. SO\textsubscript{2} emissions shall not exceed 5.0 lb/MMBtu [401 KAR 59:015, Section 5(1)(c)3.a.].

   Compliance Demonstration:
   This unit is assumed to be in compliance with the applicable 401 KAR 59:015 SO\textsubscript{2} standard while combusting wood.

3. Testing Requirements:
   Testing shall be conducted at such times as may be requested by the Cabinet [401 KAR 50:045, Section 4 and 401 KAR 59:005, Section 2(2)].

4. Specific Monitoring Requirements:
   a. The permittee shall monitor the amount of wood combusted (in tons) on a monthly basis [401 KAR 52:030, Section 10].

   b. The permittee shall perform a qualitative visual observation of the opacity of emissions from the stack on a weekly basis. If visible emissions from the stack are observed (not including condensed water in the plume), the opacity shall be determined using U.S. EPA Reference Method 9 [401 KAR 52:030, Section 10].
SECTION B - EMISSION POINTS, EMISSION UNITS, APPLICABLE REGULATIONS, AND OPERATING CONDITIONS (CONTINUED)

5. Specific Recordkeeping Requirements:
   a. The actions, including duration of the startup period, of the permittee of each affected facility during startup periods and shutdown periods, shall be documented by signed, contemporaneous logs or other relevant evidence [401 KAR 59:015, Section 7(1)(d)].

   b. The permittee shall prepare, by March 1 of each year, and submit to the delegated authority upon request, an annual compliance certification report for the previous calendar year containing the information specified in 40 CFR 63.11225(b)(1) through (4). The permittee shall submit the report by March 15 if there was any instance described by 40 CFR 63.11225(b)(3). For boilers that are subject only to the energy assessment requirement and/or a requirement to conduct a biennial or 5-year tune-up according to 40 CFR 63.11223(a) and not subject to emission limits or operating limits, the permittee may prepare only a biennial or 5-year compliance report as specified in 40 CFR 63.11225(b)(1) and (2) [40 CFR 63.11225(b)].

   c. The permittee shall maintain the records specified in 40 CFR 63.11225(c)(1) through (7) [40 CFR 63.11225(c)].

      i. As required in 40 CFR 63.10(b)(2)(xiv), the permittee shall keep a copy of each notification and report that was submitted to comply with 40 CFR 63, Subpart JJJJJJ and all documentation supporting any Initial Notification or Notification of Compliance Status that was submitted [40 CFR 63.11225(c)(1)].

      ii. The permittee shall keep records to document conformance with the work practices, emission reduction measures, and management practices required by 40 CFR 63.11214 and 63.11223 as specified in 40 CFR 63.11225(c)(2)(i) through (vi). Records shall identify each boiler, the date of tune-up, the procedures followed for tune-up, and the manufacturer's specifications to which the boiler was tuned [40 CFR 63.11225(c)(2)(i)].

      iii. Records of the occurrence and duration of each malfunction of the boiler, or of the associated air pollution control and monitoring equipment [40 CFR 63.11225(c)(4)].

      iv. Records of actions taken during periods of malfunction to minimize emissions in accordance with the general duty to minimize emissions in 40 CFR 63.11205(a), including corrective actions to restore the malfunctioning boiler, air pollution control, or monitoring equipment to its normal or usual manner of operation [40 CFR 63.11225(c)(5)].

   d. Records shall be in a form suitable and readily available for expeditious review. The permittee shall keep each record for 5 years following the date of each recorded action. The permittee shall keep each record on-site or be accessible from a central location by computer or other means that instantly provide access at the site for at least 2 years after the date of each recorded action. The permittee may keep the records off site for the remaining 3 years [40 CFR 63.11225(d)].

   e. The permittee shall maintain records of the amount of wood combusted (in tons) on a monthly basis [401 KAR 52:020, Section 10].
SECTION B - EMISSION POINTS, EMISSION UNITS, APPLICABLE REGULATIONS, AND OPERATING CONDITIONS (CONTINUED)

f. The permittee shall maintain a log of any qualitative visual observations of the emissions from the stack and any U.S. EPA Reference Method 9 readings performed [401 KAR 52:020, Section 10].

g. See Section F – Monitoring, Recordkeeping, and Reporting Requirements for additional requirements.

6. Specific Reporting Requirements:
   a. The permittee shall submit the notifications specified in 40 CFR 63.11225(a)(1) through (5) to the administrator [40 CFR 63.11225(a)].
      i. The permittee shall submit all of the notifications in 40 CFR 63.7(b); 63.8(e) and (f); and 63.9(b) through (e), (g), and (h) that apply by the dates specified in those sections except as specified in 40 CFR 63.11225(a)(2) and (4) [40 CFR 63.11225(a)(1)].
      ii. An Initial Notification shall be submitted no later than January 20, 2014 or within 120 days after the source becomes subject to the standard [40 CFR 63.11225(a)(2)].
      iii. If the permittee is required to conduct a performance stack test, the permittee shall submit a Notification of Intent to conduct a performance test at least 60 days before the performance stack test is scheduled to begin [40 CFR 63.11225(a)(3)].
      iv. If the permittee is using data from a previously conducted emission test to serve as documentation of conformance with the emission standards and operating limits of 40 CFR 63, Subpart JJJJJ, the permittee shall include in the Notification of Compliance Status the date of the test and a summary of the results, not a complete test report, relative to 40 CFR 63, Subpart JJJJJ [40 CFR 63.11225(a)(5)].
   b. See Section F – Monitoring, Recordkeeping, and Reporting Requirements for additional requirements.

7. Specific Control Equipment Operating Conditions:
   a. The control device shall be operated to maintain compliance with permitted emission limitations, in accordance with the manufacturer’s specifications and standard operating practices [401 KAR 50:055, Section 2].
   b. The permittee shall maintain records regarding the maintenance of the control equipment [401 KAR 52:020, Section 10].
   c. See Section E – Source Control Equipment Requirements for additional requirements.
SECTION B - EMISSION POINTS, EMISSION UNITS, APPLICABLE REGULATIONS, AND OPERATING CONDITIONS (CONTINUED)

Emission Unit 09 (EP13)  Deihl In-Line Rip Saw

Description:
- Maximum Capacity: 0.59 ton/hr
- Construction Commenced: July 2001
- Control Device: Fabric Bag Dust Control System (2012)
- Control Efficiency: 96.8%

APPLICABLE REGULATIONS:
401 KAR 59:010, New process operations

1. Operating Limitations:
   N/A

2. Emissions Limitations:
   a. No person shall cause, suffer, allow, or permit any continuous emission into the open air from a control device or stack associated with any affected facility which is equal to or greater than twenty (20) percent opacity [401 KAR 59:010, Section 3(1)(a)].

   Compliance Demonstration:
   Compliance shall be demonstrated according to 4. Specific Monitoring Requirements a. and 5. Specific Recordkeeping Requirements a.

   b. Particulate matter (PM) emissions shall not exceed the following [401 KAR 59:010, Section 3(2)]:

<table>
<thead>
<tr>
<th>P = Process Weight Rate (tons/hr)</th>
<th>Maximum Allowable Emission Rate (lbs/hr)</th>
</tr>
</thead>
<tbody>
<tr>
<td>&lt; 0.50</td>
<td>2.34</td>
</tr>
<tr>
<td>0.50 &lt; P ≤ 30</td>
<td>3.59P^{0.62}</td>
</tr>
</tbody>
</table>

   Compliance Demonstration:
   Compliance shall be demonstrated according to 7. Specific Control Equipment Operating Conditions a.

3. Testing Requirements:
   Testing shall be conducted at such times as may be requested by the Cabinet [401 KAR 50:045, Section 4 and 401 KAR 59:005, Section 2(2)].

4. Specific Monitoring Requirements:
   a. The permittee shall perform a qualitative visual observation of the opacity of emissions from the stack on a weekly basis. If visible emissions from the stack are observed (not including condensed water in the plume), then the permittee shall determine the opacity of emission by U.S. EPA Reference Method 9 [401 KAR 52:030, Section 10].

   b. The permittee shall monitor the hours of operation and the amount of wood processed (in tons) on a weekly basis [401 KAR 52:030, Section 10].
SECTION B - EMISSION POINTS, EMISSION UNITS, APPLICABLE REGULATIONS, AND OPERATING CONDITIONS (CONTINUED)

5. **Specific Recordkeeping Requirements:**
   a. The permittee shall maintain a log of the qualitative visual observations of the emissions from the stack and any U.S. EPA Reference Method 9 readings performed [401 KAR 52:030, Section 10].
   
   b. The permittee shall maintain records of the hours of operation and the amount of wood processed (in tons) on a weekly basis [401 KAR 52:030, Section 10].

6. **Specific Reporting Requirements:**
   See Section F – Monitoring, Recordkeeping, and Reporting Requirements for additional requirements.

7. **Specific Control Equipment Operating Conditions:**
   a. The control device shall be operated in accordance with manufacturer’s specifications and standard operating practices [401 KAR 50:055, Section 2].
   
   b. The permittee shall maintain records regarding maintenance of the control equipment [401 KAR 52:030, Section 10].
   
   c. See Section E – Source Control Equipment Requirements for additional requirements.
SECTION C - INSIGNIFICANT ACTIVITIES

The following listed activities have been determined to be insignificant activities for this source pursuant to 401 KAR 52:030, Section 6. Although these activities are designated as insignificant the permittee must comply with the applicable regulation. Process and emission control equipment at each insignificant activity subject to an opacity standard shall be inspected monthly and a qualitative visible emissions evaluation made. Results of the inspection, evaluation, and any corrective action shall be recorded in a log.

SECTION D - SOURCE EMISSION LIMITATIONS AND TESTING REQUIREMENTS

1. As required by Section 1b of the Cabinet Provisions and Procedures for Issuing Federally-Enforceable Permits for Non-Major Sources incorporated by reference in 401 KAR 52:030, Section 26; compliance with annual emissions and processing limitations contained in this permit, shall be based on emissions and processing rates for any twelve (12) consecutive months.

2. Particulate matter (PM), sulfur dioxide (SO₂), Carbon monoxide (CO) and volatile organic compounds (VOC) emissions, measured by applicable reference methods, or an equivalent or alternative method specified in 40 C.F.R. Chapter I, or by a test method specified in the state implementation plan shall not exceed the respective limitations specified herein.

3. To preclude the applicability of 401 KAR 52:020, total source-wide emissions of VOC and CO from all emission units and insignificant activities shall not equal or exceed 90 tons per year each, based on a consecutive twelve month rolling total. The annual emissions shall be calculated by adding monthly emissions to the previous eleven months' emissions. The twelve month rolling total shall be calculated monthly and reported semi-annually (refer to Section F – Monitoring, Recordkeeping, and Reporting Requirements). The permittee shall maintain on site, available for review by the Cabinet, a log of the twelve month rolling total.

**Compliance Demonstration:**

\[
\begin{align*}
VOC_{\text{Total}} &= VOC_{EU04(EP4)} + VOC_{EU07(EP3)} + VOC_{EU08(EP9)} \\
CO_{\text{Total}} &= CO_{EU04(EP4)} + CO_{EU07(EP3)} + CO_{EU08(EP9)}
\end{align*}
\]

Monthly VOC and CO emissions shall be calculated using the following formulas:

a. **Barrel Toasting Operations:**

\[
\begin{align*}
VOC_{EU14(EP4)} &= \frac{EF_{VOC}}{1000} \times \text{Wood} \\
CO_{EU14(EP4)} &= \frac{EF_{CO}}{1000} \times \text{Wood}
\end{align*}
\]

\[EF_{VOC} = EF_{CO} = \text{Current emission factor from AP-42 Table 1.9-1}\]
\[\text{Wood} = \text{Amount of wood combusted per month}\]

b. **Natural Gas-Fired Boiler:**

\[
\begin{align*}
VOC_{EU07(EP3)} &= \frac{EF_{VOC}}{2000} \times \text{NG usage} \\
CO_{EU07(EP3)} &= \frac{EF_{CO}}{2000} \times \text{NG usage}
\end{align*}
\]

\[EF_{VOC} = \text{Current emission factor from AP-42 Table 1.4-2}\]
SECTION D - SOURCE EMISSION LIMITATIONS AND TESTING REQUIREMENTS (CONTINUED)

\[ \text{EF}_{\text{CO}} = \text{Current emission factor from AP-42 Table 1.4-1} \]
\[ \text{NG usage} = \text{Source-wide monthly natural gas usage} \]

c. **Wood Gasification Boiler:**

\[ VOC_{\text{EU98(EU99)}} = \frac{EF_{VOC} \left( \frac{\text{lb}}{\text{ton}} \right) \times \text{Wood} \left( \frac{\text{tons}}{\text{month}} \right)}{2000 \frac{\text{lb}}{\text{ton}}} \]

\[ CO_{\text{EU98(EU99)}} = \frac{EF_{CO} \left( \frac{\text{lb}}{\text{ton}} \right) \times \text{Wood} \left( \frac{\text{tons}}{\text{month}} \right)}{2000 \frac{\text{lb}}{\text{ton}}} \]

\[ EF_{VOC} = \text{Current emission factor from AP-42 Table 1.6-3} \]
\[ EF_{CO} = \text{Current emission factor from AP-42 Table 1.6-2} \]
\[ \text{Wood} = \text{Amount of wood combusted per month} \]
SECTION E - SOURCE CONTROL EQUIPMENT REQUIREMENTS

Pursuant to 401 KAR 50:055, Section 2(5), at all times, including periods of startup, shutdown and malfunction, owners and operators shall, to the extent practicable, maintain and operate any affected facility including associated air pollution control equipment in a manner consistent with good air pollution control practice for minimizing emissions. Determination of whether acceptable operating and maintenance procedures are being used will be based on information available to the Division which may include, but is not limited to, monitoring results, opacity observations, review of operating and maintenance procedures, and inspection of the source.
SECTION F - MONITORING, RECORDKEEPING, AND REPORTING REQUIREMENTS

1. Pursuant to Section 1b-IV-1 of the Cabinet Provisions and Procedures for Issuing Federally-Enforceable Permits for Non-Major Sources incorporated by reference in 401 KAR 52:030 Section 26, when continuing compliance is demonstrated by periodic testing or instrumental monitoring, the permittee shall compile records of required monitoring information that include:
   a. Date, place (as defined in this permit), and time of sampling or measurements;
   b. Analyses performance dates;
   c. Company or entity that performed analyses;
   d. Analytical techniques or methods used;
   e. Analyses results; and
   f. Operating conditions during time of sampling or measurement.

2. Records of all required monitoring data and support information, including calibrations, maintenance records, and original strip chart recordings, and copies of all reports required by the Division for Air Quality, shall be retained by the permittee for a period of five (5) years and shall be made available for inspection upon request by any duly authorized representative of the Division for Air Quality [401 KAR 52:030, Section 3(1)(f)1a, and Section 1a-7 of the Cabinet Provisions and Procedures for Issuing Federally-Enforceable Permits for Non-Major Sources incorporated by reference in 401 KAR 52:030, Section 26].

3. In accordance with the requirements of 401 KAR 52:030, Section 3(1)f, the permittee shall allow authorized representatives of the Cabinet to perform the following during reasonable times:
   a. Enter upon the premises to inspect any facility, equipment (including air pollution control equipment), practice, or operation;
   b. To access and copy any records required by the permit;
   c. Sample or monitor, at reasonable times, substances or parameters to assure compliance with the permit or any applicable requirements.
Reasonable times are defined as during all hours of operation, during normal office hours; or during an emergency.

4. No person shall obstruct, hamper, or interfere with any Cabinet employee or authorized representative while in the process of carrying out official duties. Refusal of entry or access may constitute grounds for permit revocation and assessment of civil penalties.

5. Summary reports of any monitoring required by this permit shall be submitted to the Regional Office listed on the front of this permit at least every six (6) months during the life of this permit, unless otherwise stated in this permit. For emission units that were still under construction or which had not commenced operation at the end of the 6-month period covered by the report and are subject to monitoring requirements in this permit, the report shall indicate that no monitoring was performed during the previous six months because the emission unit was not in operation [Sections 1b-V-1 of the Cabinet Provisions and Procedures for Issuing Federally-Enforceable Permits for Non-Major Sources incorporated by reference in 401 KAR 52:030, Section 26].
SECTION F - MONITORING, RECORDKEEPING, AND REPORTING REQUIREMENTS (CONTINUED)

6. The semi-annual reports are due by January 30th and July 30th of each year. All reports shall be certified by a responsible official pursuant to 401 KAR 52:030, Section 22. If continuous emission and opacity monitors are required by regulation or this permit, data shall be reported in accordance with the requirements of 401 KAR 59:005, General Provisions, Section 3(3). All deviations from permit requirements shall be clearly identified in the reports.

7. In accordance with the provisions of 401 KAR 50:055, Section 1, the owner or operator shall notify the Regional Office listed on the front of this permit concerning startups, shutdowns, or malfunctions as follows:
   a. When emissions during any planned shutdowns and ensuing startups will exceed the standards, notification shall be made no later than three (3) days before the planned shutdown, or immediately following the decision to shut down, if the shutdown is due to events which could not have been foreseen three (3) days before the shutdown.
   b. When emissions due to malfunctions, unplanned shutdowns and ensuing startups are or may be in excess of the standards, notification shall be made as promptly as possible by telephone (or other electronic media) and shall be submitted in writing upon request.

8. The permittee shall promptly report deviations from permit requirements, including those attributable to upset conditions as defined in the permit, the probable cause of such deviations, and any corrective actions or preventive measures taken shall be submitted to the Regional Office listed on the front of this permit. Where the underlying applicable requirement contains a definition of prompt or otherwise specifies a time frame for reporting deviations, that definition or time frame shall govern. Where the underlying applicable requirement does not identify a specific time frame for reporting deviations, prompt reporting, as required by Sections 1b-V, 3 and 4 of the Cabinet Provisions and Procedures for Issuing Federally-Enforceable Permits for Non-Major Sources incorporated by reference in 401 KAR 52:030, Section 26 shall be defined as follows:
   a. For emissions of a hazardous air pollutant or a toxic air pollutant (as identified in an applicable regulation) that continue for more than an hour in excess of permit requirements, the report must be made within 24 hours of the occurrence.
   b. For emissions of any regulated air pollutant, excluding those listed in F.8.a., that continue for more than two hours in excess of permit requirements, the report must be made within 48 hours.
   c. All deviations from permit requirements, including those previously reported, shall be included in the semiannual report required by F.6.

9. Pursuant to 401 KAR 52:030, Section 21, the permittee shall annually certify compliance with the terms and conditions contained in this permit by completing and returning a Compliance Certification Form (DEP 7007CC) (or an alternative approved by the regional office) to the Regional Office listed on the front of this permit in accordance with the following requirements:
   a. Identification of each term or condition;
   b. Compliance status of each term or condition of the permit;
   c. Whether compliance was continuous or intermittent;
   d. The method used for determining the compliance status for the source, currently and over the reporting period.
   e. For an emissions unit that was still under construction or which has not commenced operation
SECTION F - MONITORING, RECORDKEEPING, AND REPORTING REQUIREMENTS (CONTINUED)

at the end of the 12-month period covered by the annual compliance certification, the permittee shall indicate that the unit is under construction and that compliance with any applicable requirements will be demonstrated within the timeframes specified in the permit.

f. The certification shall be submitted by January 30th of each year. Annual compliance certifications shall be sent to the Division for Air Quality, Bowling Green Regional Office, 2642 Russellville Road, Bowling Green, KY 42101.

10. In accordance with 401KAR 52:030, Section 3(1)(d), the permittee shall provide the Division with all information necessary to determine its subject emissions within 30 days of the date the Kentucky Emissions Inventory System (KYEIS) emissions survey is mailed to the permittee. If a KYEIS emissions survey is not mailed to the permittee, then the permittee shall comply with all other emissions reporting requirements in this permit.

11. The Cabinet may authorize the temporary use of an emission unit to replace a similar unit that is taken off-line for maintenance, if the following conditions are met:

   a. The owner or operator shall submit to the Cabinet, at least ten (10) days in advance of replacing a unit, the appropriate Forms DEP7007A1 to DD that show:
      (1) The size and location of both the original and replacement units; and
      (2) Any resulting change in emissions;
   b. The potential to emit (PTE) of the replacement unit shall not exceed that of the original unit by more than twenty-five (25) percent of a major source threshold, and the emissions from the unit shall not cause the source to exceed the emissions allowable under the permit;
   c. The PTE of the replacement unit or the resulting PTE of the source shall not subject the source to a new applicable requirement;
   d. The replacement unit shall comply with all applicable requirements; and
   e. The source shall notify Regional office of all shutdowns and start-ups.
   f. Within six (6) months after installing the replacement unit, the owner or operator shall:
      (1) Re-install the original unit and remove or dismantle the replacement unit; or
      (2) Submit an application to permit the replacement unit as a permanent change.
SECTION G - GENERAL PROVISIONS

1. General Compliance Requirements

   a. The permittee shall comply with all conditions of this permit. A noncompliance shall be a violation of 401 KAR 52:030, Section 3(1)(b), and a violation of Federal Statute 42 USC 7401 through 7671q (the Clean Air Act). Noncompliance with this permit is grounds for enforcement action including but not limited to the termination, revocation and reissuance, revision, or denial of a permit [Section 1a-2 of the Cabinet Provisions and Procedures for Issuing Federally-Enforceable Permits for Non-Major Sources incorporated by reference in 401 KAR 52:030, Section 26].

   b. The filing of a request by the permittee for any permit revision, revocation, reissuance, or termination, or of a notification of a planned change or anticipated noncompliance, shall not stay any permit condition [Section 1a-5 of the Cabinet Provisions and Procedures for Issuing Federally-Enforceable Permits for Non-Major Sources incorporated by reference in 401 KAR 52:030, Section 26].

   c. This permit may be revised, revoked, reopened and reissued, or terminated for cause in accordance with 401 KAR 52:030, Section 18. The permit will be reopened for cause and revised accordingly under the following circumstances:

      (1) If additional applicable requirements become applicable to the source and the remaining permit term is three (3) years or longer. In this case, the reopening shall be completed no later than eighteen (18) months after promulgation of the applicable requirement. A reopening shall not be required if compliance with the applicable requirement is not required until after the date on which the permit is due to expire, unless this permit or any of its terms and conditions have been extended pursuant to 401 KAR 52:030, Section 12;

      (2) The Cabinet or the United States Environmental Protection Agency (U. S. EPA) determines that the permit must be revised or revoked to assure compliance with the applicable requirements;

      (3) The Cabinet or the U. S. EPA determines that the permit contains a material mistake or that inaccurate statements were made in establishing the emissions standards or other terms or conditions of the permit.

   Proceedings to reopen and reissue a permit shall follow the same procedures as apply to initial permit issuance and shall affect only those parts of the permit for which cause to reopen exists. Reopenings shall be made as expeditiously as practicable. Reopenings shall not be initiated before a notice of intent to reopen is provided to the source by the Division, at least thirty (30) days in advance of the date the permit is to be reopened, except that the Division may provide a shorter time period in the case of an emergency.

   d. The permittee shall furnish information upon request of the Cabinet to determine if cause exists for modifying, revoking and reissuing, or terminating the permit; or to determine compliance with the conditions of this permit [Sections 1a- 6 and 7 of the Cabinet Provisions and Procedures for Issuing Federally-Enforceable Permits for Non-Major Sources incorporated by reference in 401 KAR 52:030, Section 26].

   e. Emission units described in this permit shall demonstrate compliance with applicable requirements if requested by the Division [401 KAR 52:030, Section 3(1)(c)].
SECTION G - GENERAL PROVISIONS (CONTINUED)

f. The permittee, upon becoming aware that any relevant facts were omitted or incorrect information was submitted in the permit application, shall promptly submit such supplementary facts or corrected information to the permitting authority [401 KAR 52:030, Section 7(1)].

g. Any condition or portion of this permit which becomes suspended or is ruled invalid as a result of any legal or other action shall not invalidate any other portion or condition of this permit [Section 1a-11 of the Cabinet Provisions and Procedures for Issuing Federally-Enforceable Permits for Non-Major Sources incorporated by reference in 401 KAR 52:030, Section 26].

h. The permittee shall not use as a defense in an enforcement action the contention that it would have been necessary to halt or reduce the permitted activity in order to maintain compliance [Section 1a-3 of the Cabinet Provisions and Procedures for Issuing Federally-Enforceable Permits for Non-Major Sources incorporated by reference in 401 KAR 52:030, Section 26].

i. All emission limitations and standards contained in this permit shall be enforceable as a practical matter. All emission limitations and standards contained in this permit are enforceable by the U.S. EPA and citizens except for those specifically identified in this permit as state-origin requirements. [Section 1a-12 of the Cabinet Provisions and Procedures for Issuing Federally-Enforceable Permits for Non-Major Sources incorporated by reference in 401 KAR 52:030, Section 26].

j. This permit shall be subject to suspension if the permittee fails to pay all emissions fees within 90 days after the date of notice as specified in 401 KAR 50:038, Section 3(6) [Section 1a-9 of the Cabinet Provisions and Procedures for Issuing Federally-Enforceable Permits for Non-Major Sources incorporated by reference in 401 KAR 52:030, Section 26].

k. Nothing in this permit shall alter or affect the liability of the permittee for any violation of applicable requirements prior to or at the time of permit issuance [401 KAR 52:030, Section 11(3)].

l. This permit does not convey property rights or exclusive privileges [Section 1a-8 of the Cabinet Provisions and Procedures for Issuing Federally-Enforceable Permits for Non-Major Sources incorporated by reference in 401 KAR 52:030, Section 26].

m. Issuance of this permit does not relieve the permittee from the responsibility of obtaining any other permits, licenses, or approvals required by the Cabinet or any other federal, state, or local agency.

n. Nothing in this permit shall alter or affect the authority of U.S. EPA to obtain information pursuant to Federal Statute 42 USC 7414, Inspections, monitoring, and entry.

o. Nothing in this permit shall alter or affect the authority of U.S. EPA to impose emergency orders pursuant to Federal Statute 42 USC 7603, Emergency orders.
SECTION G - GENERAL PROVISIONS (CONTINUED)

p. This permit consolidates the authority of any previously issued PSD, NSR, or Synthetic Minor source preconstruction permit terms and conditions for various emission units and incorporates all requirements of those existing permits into one single permit for this source.

q. Pursuant to 401 KAR 52:030, Section 11, a permit shield shall not protect the owner or operator from enforcement actions for violating an applicable requirement prior to or at the time of permit issuance. Compliance with the conditions of this permit shall be considered compliance with:
   (1) Applicable requirements that are included and specifically identified in this permit; and
   (2) Non-applicable requirements expressly identified in this permit.

2. Permit Expiration and Reapplication Requirements

   a. This permit shall remain in effect for a fixed term of five (5) years following the original date of issue. Permit expiration shall terminate the source's right to operate unless a timely and complete renewal application has been submitted to the Division at least six (6) months prior to the expiration date of the permit. Upon a timely and complete submittal, the authorization to operate within the terms and conditions of this permit, including any permit shield, shall remain in effect beyond the expiration date, until the renewal permit is issued or denied by the Division [401 KAR 52:030, Section 12].

   b. The authority to operate granted through this permit shall cease to apply if the source fails to submit additional information requested by the Division after the completeness determination has been made on any application, by whatever deadline the Division sets [401 KAR 52:030, Section 8(2)].

3. Permit Revisions

   a. Minor permit revision procedures specified in 401 KAR 52:030, Section 14(3), may be used for permit revisions involving the use of economic incentive, marketable permit, emission trading, and other similar approaches, to the extent that these minor permit revision procedures are explicitly provided for in the State Implementation Plan (SIP) or in applicable requirements and meet the relevant requirements of 401 KAR 52:030, Section 14(2).

   b. This permit is not transferable by the permittee. Future owners and operators shall obtain a new permit from the Division for Air Quality. The new permit may be processed as an administrative amendment if no other change in this permit is necessary, and provided that a written agreement containing a specific date for transfer of permit responsibility coverage and liability between the current and new permittee has been submitted to the permitting authority within ten (10) days following the transfer.

4. Construction, Start-Up, and Initial Compliance Demonstration Requirements

   No construction authorized by this permit F-19-023.
SECTION G - GENERAL PROVISIONS (CONTINUED)

5. Testing Requirements

a. Pursuant to 401 KAR 50:045, Section 2, a source required to conduct a performance test shall submit a completed Compliance Test Protocol form, DEP form 6028, or a test protocol a source has developed for submission to other regulatory agencies, in a format approved by the cabinet, to the Division's Frankfort Central Office a minimum of sixty (60) days prior to the scheduled test date. Pursuant to 401 KAR 50:045, Section 7, the Division shall be notified of the actual test date at least Thirty (30) days prior to the test.

b. Pursuant to 401 KAR 50:045, Section 5, in order to demonstrate that a source is capable of complying with a standard at all times, any required performance test shall be conducted under normal conditions that are representative of the source's operations and create the highest rate of emissions. If [When] the maximum production rate represents a source's highest emissions rate and a performance test is conducted at less than the maximum production rate, a source shall be limited to a production rate of no greater than 110 percent of the average production rate during the performance tests. If and when the facility is capable of operation at the rate specified in the application, the source may retest to demonstrate compliance at the new production rate. The Division for Air Quality may waive these requirements on a case-by-case basis if the source demonstrates to the Division's satisfaction that the source is in compliance with all applicable requirements.

c. Results of performance test(s) required by the permit shall be submitted to the Division by the source or its representative within forty-five days or sooner if required by an applicable standard, after the completion of the fieldwork.

6. Acid Rain Program Requirements

If an applicable requirement of Federal Statute 42 USC 7401 through 7671q (the Clean Air Act) is more stringent than an applicable requirement promulgated pursuant to Federal Statute 42 USC 7651 through 7651o (Title IV of the Act), both provisions shall apply, and both shall be state and federally enforceable.

a. Pursuant to 401 KAR 52:030, Section 23(1), an emergency shall constitute an affirmative defense to an action brought for noncompliance with the technology-based emission limitations if the permittee demonstrates through properly signed contemporaneous operating logs or other relevant evidence that:
   (1) An emergency occurred and the permittee can identify the cause of the emergency;
   (2) The permitted facility was at the time being properly operated;
   (3) During an emergency, the permittee took all reasonable steps to minimize levels of emissions that exceeded the emissions standards or other requirements in the permit; and,
   (4) The permittee notified the Division as promptly as possible and submitted written notice of the emergency to the Division within two (2) working days of the time when emission limitations were exceeded due to an emergency. The notice shall include a description of the emergency, steps taken to mitigate emissions, and the corrective actions taken.
SECTION G - GENERAL PROVISIONS (CONTINUED)

(5) Notification of the Division does not relieve the source of any other local, state or federal notification requirements.

b. Emergency conditions listed in General Provision G.7.a above are in addition to any emergency or upset provision(s) contained in an applicable requirement [401 KAR 52:030, Section 23(3)].

c. In an enforcement proceeding, the permittee seeking to establish the occurrence of an emergency shall have the burden of proof [401 KAR 52:030, Section 23(2)].

8. Ozone depleting substances

a. The permittee shall comply with the standards for recycling and emissions reduction pursuant to 40 CFR 82, Subpart F, except as provided for Motor Vehicle Air Conditioners (MVACs) in Subpart B:

   (1) Persons opening appliances for maintenance, service, repair, or disposal shall comply with the required practices contained in 40 CFR 82.156.

   (2) Equipment used during the maintenance, service, repair, or disposal of appliances shall comply with the standards for recycling and recovery equipment contained in 40 CFR 82.158.

   (3) Persons performing maintenance, service, repair, or disposal of appliances shall be certified by an approved technician certification program pursuant to 40 CFR 82.161.

   (4) Persons disposing of small appliances, MVACs, and MVAC-like appliances (as defined at 40 CFR 82.152) shall comply with the recordkeeping requirements pursuant to 40 CFR 82.166.

   (5) Persons owning commercial or industrial process refrigeration equipment shall comply with the leak repair requirements pursuant to 40 CFR 82.156.

   (6) Owners/operators of appliances normally containing 50 or more pounds of refrigerant shall keep records of refrigerant purchased and added to such appliances pursuant to 40 CFR 82.166.

b. If the permittee performs service on motor (fleet) vehicle air conditioners containing ozone-depleting substances, the source shall comply with all applicable requirements as specified in 40 CFR 82, Subpart B, Servicing of Motor Vehicle Air Conditioners.

a. The permittee shall comply with all applicable requirements of 401 KAR Chapter 68, Chemical Accident Prevention, which incorporates by reference 40 CFR Part 68, Risk Management Plan provisions. If required, the permittee shall comply with the Risk Management Program and submit a Risk Management Plan to U.S. EPA using the RMP* eSubmit software.

b. If requested, submit additional relevant information to the Division or the U.S. EPA.

ATTACHMENT C - PERMIT APPLICATION
PERMIT APPLICATION

The completion of this form is required under Regulations 401 KAR 52:020, 52:030, and 52:340 pursuant to KRS 224. Applications are incomplete unless accompanied by copies of all plans, specifications, and drawings requested herein. Failure to supply information required or deemed necessary by the division to enable it to act upon the application shall result in denial of the permit and ensuing administrative and legal action. Applications shall be submitted in triplicate.

1) APPLICATION INFORMATION

Note: The applicant must be the owner or operator. (The owner/operator may be individual(s) or a corporation.)

Name: Canton Wood Products Company, LLC

Title: ___________________________ Phone: (270) 692-9888

(If applicant is an individual)

Mailing Address: Canton Wood Products Company, LLC

Company

Street or P.O. Box: 365 S. Woodlawn Ave.

City: Lebanon State: KY Zip Code: 40033

Is the applicant (check one): _____Owner _____Operator _____Owner & Operator X Corporation/LLC* _____LP**

*If the applicant is a Corporation or a Limited Liability Corporation, submit a copy of the current Certificate of Authority from the Kentucky Secretary of State.

**If the applicant is a Limited Partnership, submit a copy of the current Certificate of Limited Partnership from the Kentucky Secretary of State

PERSON TO CONTACT FOR TECHNICAL INFORMATION RELATING TO APPLICATION:

Name: Anthony Morris

Title: V.P. of Operations (270) 692-9888

2) OPERATOR INFORMATION

Note: If the applicant is the operator, write “same as applicant” on name line.

Name: Same as Applicant

Title: ___________________________ Phone #: ___________________________

3) **Type of Permit Application**

A. For new sources that currently do not hold any air quality permit in Kentucky and are required to obtain a permit prior to construction pursuant to 401 KAR 52:030, 52:039, or 52:040.

- [ ] Initial Operating Permit (the permit will authorize both construction and operation of the new source)

  **Type of Source (Check all that apply):**
  - [ ] Major
  - [ ] Conditional Major
  - [ ] Synthetic Minor
  - [ ] Minor

B. For existing sources that do not have a source-wide Operating Permit required by 401 KAR 52:020, 52:030, or 52:040

  **Type of Source (Check all that apply):**
  - [ ] Major
  - [ ] Conditional Major
  - [ ] Synthetic Minor
  - [ ] Minor

  *(Check one only)*
  - [ ] Initial Source-wide Operating Permit
  - [ ] Construction of New Facilities at Existing Plant
  - [ ] Modification of Existing Facilities at Existing Plant
  - [ ] Other (Explain)
  - Proposed Start of Construction Date:
  - Proposed Operation Start-Up Date:

C. For existing sources that currently have a source-wide Operating Permit –

  **Type of Source (Check all that apply):**
  - [ ] Major
  - [x] Conditional Major
  - [ ] Synthetic Minor
  - [ ] Minor

  - [ ] Administrative Revision (describe type of revision requested, e.g. name change):
  - [x] Permit Renewal
  - [ ] Permit Number (In case of renewal)
  - Existing Permit # F-14-012
  - [ ] Significant Revision: [ ] Addition of New Facilities
  - Construction Start Date:
  - [ ] Minor Revision: [ ] Modification of Existing Facilities

8) Check other attachments that are part of this application:

Required Data

- Map or Drawing Showing Location
- Process Flow Diagram and Description
- Site Plan Showing Stack Data and Locations
- Emission Calculation Sheets
- Material Safety Data Sheets (MSDS)

Supplemental Data

- Stack Test Report
- Certificate of Authority from the Secretary of State (for Corporations and Limited Liability Companies)
- Certificate of Limited Partnership from the Secretary of State (for Limited Partnerships)
- Claim of Confidentiality (See 400 KAR 1:060)
- Other (Specify)

9) Indicate if you expect to emit, in any amount, hazardous or toxic materials or compounds of such materials into the atmosphere from any operation or process at this location.

- Pollutants regulated under 401 KAR 57:002 (NESHAP)
- Pollutants listed in 40 CFR 68 Subpart F [112(r) pollutants]
- Pollutants listed in 401 KAR 63:060 (HAPS)
- Other

10) Has your company filed an emergency response plan with local and/or state and federal officials outlining the measures that would be implemented to mitigate an emergency release?

☐ Yes  ☒ No
11) Check whether your company is seeking coverage under a permit shield. If "Yes" is checked, applicable requirements must be identified on Form DEP7007V. Identify any non-applicable requirements for which you are seeking a permit shield coverage on a separate attachment to the application.

☒ Yes ☐ No ☐ List of non-applicable requirements attached

12) OWNER INFORMATION

Note: If the applicant is the owner, write "same as applicant" on the name line.

Name: Same as Applicant
Title: __________________________ Phone #: __________________________
Mailing Address: __________________________
Company __________________________
Street or P.O. Box __________________________
City __________________________ State __________________________ Zip Code __________________________

List Names of Owners and Officers of Company Who Have an Interest in the Company of 5% or More.
