

About us

The Environmental Compliance Assistance Program offers nonregulatory, cost-free solutions for entities regulated by the Department for Environmental Protection who may be struggling with their compliance obligations. Our primary goal is to assist those entities in understanding Kentucky's environmental requirements and permits in order to increase compliance rates and protect our environment.

Services

- Tailored assistance to meet your needs
- Free help desk staffed by technical and regulatory experts
- Both on-site and classroom training
- Assistance with self-auditing, self-disclosure and environmental management planning
- Advanced help for small businesses and small communities dealing with applications, recordkeeping and reporting issues
- Ombudsman services
- Assistance moving beyond compliance to better environmental stewardship

Benefits

- Monetary savings
- Access to a network of environmental professionals
- Opportunity to proactively correct compliance issues
- Free access to resources, including fact sheets, checklists and newsletters
- Increased environmental knowledge through training
- Increased compliance rates
- Improved facility performance
