ADDENDUM #1

GENERATOR'S ACKNOWLEDGMENT OF WASTE CHARACTERISTICS

Identify any chemical and physical waste parameters that are potential surface water or groundwater pollutants not required for characterization in Item 28, on page 3, of this application. This assessment must account for all ingredients, additives, by-products, contaminants, lubricants, cleaning agents, etc., that are known to occur or may occur in the waste to be landfarmed.

1. Chemicals and Contaminants – Refer to:
401 KAR 8:250 – maximum contaminant levels for inorganic chemicals;
401 KAR 8:400 – maximum contaminant levels for synthetic organic contaminants; and
401 KAR 8:420 – maximum contaminant levels for volatile organic chemicals.

Check the box next to the one statement that applies.

- None of the chemicals or contaminants listed in 401 KAR Chapter 8 are present in the waste to be landfarmed, except those already included in the parameters specified for waste analysis by 401 KAR 48:200, Section 3(5)(c), and this registration form.
- Any chemicals or contaminants listed can be shown by analysis to occur only in concentrations at or below the specified MCL. These additional parameters have been included in the waste characterization for this registration, but will not be included in the required regularly scheduled monitoring. I understand the cabinet may require monitoring of these additional parameters if cumulative effects over the life of this landfarming operation could lead to soil concentrations that would cause an environmental or human health risk in accordance with KRS 224.01-400.
- The following chemicals or contaminants are present in concentrations above the MCL, and will be included in the monitoring plan for this landfarming facility. If there are more than five (5) parameters, provide the additional information and LABEL AS ATTACHMENT 33.

Chemical or Contaminant Name	CAS No.

NOTE: When applicable, total coliform bacteria, for which MCLs are established in 401 KAR 8:200, must be addressed in the Pathogen Reduction Plan described in Section I, item (32) of this application form.

ADDENDUM #1 continued

Physical Characteristics: Include analytical results for Biological Oxygen Demand (BOD₅) and Electrical Conductivity. LABEL AS ATTACHMENT 34. If not applicable, check here .

I understand a solid waste site or facility may not violate the Environmental Performance Standards of 401 KAR 30:031. As the generator of the waste proposed to be landfarmed under this registration, I am fully liable if the landfarming operation fails to comply with all federal and state environmental statutes and regulations. I understand that no toxic or hazardous waste may be landfarmed under this registration. Based on my knowledge of the waste and analytical information, I certify the information submitted is, to the best of my knowledge and belief, true, accurate, and complete.
