

Response to Comments
Boyd County Sanitary Landfill
Solid Waste Permit Renewal
Agency Interest 40319 APE20200002
December 21, 2020

Background: The Division of Waste Management (DWM) received an application proposing the renewal of the Boyd County Sanitary Landfill on June 15, 2020. A public notice was published related to this action on July 15, 2020.

DWM received a comment during the comment period of the mentioned public notice concerning the renewal of the above-referenced landfill. The following is a summation of the comment and the response to the comment related to the permit issuance in accordance with 401 KAR 47:140.

Comment: A comment was submitted on behalf of the Citizens of Boyd County Environmental Coalition (CBCEC) requesting all required conditions adopted from the Agreed Order of Judgment from the current permit (APE20190010) be carried forward to the renewed permit.

Response: All permit conditions from the most recent permit, issued February 7, 2020, remained in facility permit. The only updates included revised dates, such as an extended expiration date, and an addition to the approved applications to include the renewal application. Further, this condition remains:

“The issuance of this permit does not supersede, and shall not negate, any term of the Agreed Judgment in Boyd Circuit Civil Action 15-CI-00618 as amended on August 16, 2017.”
