Section	1.	Disposal or Treatment of Soil and Water from Within the Excavation Zone, Contaminated above Applicable Screening Levels at the Time of Permanent Closure: <i>NOTE: If optional soil removal outside the excavation zone, in accordance with Section 4.16 of the UST Corrective Action Manual, has also been performed, the request for reimbursement of contaminated material and water within the excavation zone shall be submitted on the UST Optional Soil Removal Reimbursement Worksheet, DWM 4288. Laboratory analysis shall exceed the applicable screening levels to substantiate the need for the transportation and disposal or treatment of contaminated material or water at a permitted facility.</i> a. Transportation and Disposal or Treatment of Contaminated Material at a Permitted Facility – Enter the tonnage of the contaminated material removed and disposed or treated from within the excavation zone. Reimbursement shall be contingent upon verification through the submittal of weigh tickets and based upon the verified tonnage disposed or treated at the nearest permitted facility. Weigh tickets from the permitted disposal or treatment facility shall be submitted with the UST Claim Request for Actions Not Directed, DWM 4285, to support the tonnage disposed or treated. If weigh tickets are not submitted to verify tonnage, reimbursement shall be made based on the actual area of over-excavation. The volume of the excavated area (cubic yards) shall be converted to tons utilizing a conversion factor of 1.5 (tons per cubic yard). b. Purchase and Transportation of Backfill Material – Enter the tons of backfill material purchased to replace the contaminated material transported and disposed of or treated in Section 1(a) above. Reimbursement shall be based upon the weigh tickets submitted, supporting the number of tons of backfill material purchased and transported from the nearest quarry. If the backfill is from a borrow area, reimbursement shall be based on the number of tons as determined in Section 1(a) above, unless weigh tickets can be submitted to support actual tonnage. Backfill material necessary to replace the tank void volume is not reimbursable. c. Transportation of Contaminated Water Removed from Within the Excavation Zone – Enter costs incurred for water pumped from within the excavation zone. The invoice and water manifest shall be submitted listing gallons transported. Laboratory analysis shall substantiate the need for removal and disposal or treatment of water contaminated above the applicable screening levels. d. Disposal or Treatment of Pit Water or Groundwater at a Permitted Facility – Enter costs incurred for disposal or treatment of water pumped from within the excavation zone. The invoice and water manifest shall be submitted listing gallons disposed or treated. Laboratory analysis shall substantiate the need for removal and disposal or treatment, at a permitted facility, of water contaminated above applicable screening levels.
Section	2.	Initial Abatement: a. Mobilization and Demobilization of Oversight Personnel to the Regulated Facility – Enter the round trip mileage from the eligible company or partnership's nearest office to the regulated facility. b. Initial and Immediate Response – Complete by entering "1" in the space provided if initial abatement actions are undertaken at a regulated facility in accordance with Section 2.2 of the UST Corrective Action Manual, incorporated by reference in 401 KAR 42:060.
