Energy and Environment Cabinet Mandate

During the 2026 Regular Session, the Kentucky General Assembly passed House Bill No. 757 to amend KRS 224.50-872(2), requiring the Energy and Environment Cabinet (Cabinet) to submit an annual report to the General Assembly detailing specific financial information associated with the Waste Tire Trust Fund (WTTF) and the Waste Tire Program, including tire fee deposits from the preceding fiscal year, a list of recipients and activities supported by the fund, all administrative expenses and unexpended funds, a description of how all expenditures align with the program's outlined objectives, and a compilation of the information required to be reported to the cabinet under KRS 224.50-878(4). This report is required to be submitted by November 1st of each year.

> *KRS 224.50-872(2) states, "The cabinet shall gather the following information related to the waste tire trust fund in KRS 224.50-880 and submit an annual report to the Legislative Research Commission for referral to the Interim Joint Committee on Appropriations and Revenue by November 1, 2026, and by each November 1 thereafter as long as the new tire fee established in KRS 224.50-868 is collected:*
>
> *(a) Total receipts deposited into the fund from the new tire fee during the preceding fiscal year;*
> *(b) A detailed accounting of the activities supported by fund moneys, including the amount spent on each activity;*
> *(c) A detailed accounting of all administrative expenses;*
> *(d) Identification of any unexpended funds and the reason why the funds were not expended;*
> *(e) An explanation of how all expenditures align with program objectives;*
> *(f) A list of recipients receiving money from the fund with a detailed accounting of the amount of money received by each recipient and the use of the moneys; and*
> *(g) A compilation of the information required to be reported to the cabinet under KRS 224.50-878(4)."*

Program Objective Alignment

The WTTF Grant Program provides financial assistance to Kentucky counties to support the proper management and disposal of waste tires within local communities. Through the administration of the WTTF Grant Program, the Cabinet partners with local communities to collaboratively manage waste tires. Improperly managed waste tires can pose environmental

and public health risks by contributing to the pollution of waterways and providing habitat and breeding grounds for disease vectors and other pests, including mosquitoes and rodents. The Cabinet assists counties in offsetting eligible waste tire management and disposal costs while promoting responsible collection, transportation, recycling, and disposal practices.

Pursuant to KRS 244.50-876, the Cabinet is authorized to enter into agreements with persons for the collection, transportation, processing, recycling, or disposal of waste tires, as well as the development of markets for waste tire products. In 2024, the Cabinet entered into a contract with a tire recycling company on the State Procurement's Master Agreement. Under the contract, the company provides equipment and logistical support for the collection and removal of waste tires throughout the Commonwealth. This support includes excavators, skid steers, semi-trucks and trailers, and other equipment necessary to facilitate waste tire removal. These resources support both on-site Waste Tire Collection Events (WTCEs) and off-site waste tire removal and disposal activities, thereby assisting the Cabinet and local governments in the efficient management of waste tires across the Commonwealth.

Tire Fee Receipts

KRS 224.50-868 establishes a fee known as the "new tire fee" which is imposed upon a retailer at the rate of two dollars ($2.00) for each new motor vehicle, trailer, or semitrailer tire sold in the Commonwealth. The fee was recently extended by House Bill No. 757 establishing a new sunset date of June 30, 2034. Over the last three (3) fiscal years, Kentucky received an average of $7.1 million per year from the new tire fee. Retailers are required to report to the Department of Revenue (DOR) on or before the twentieth day of each month the number of new motor vehicle tires sold and the number of waste tires received during the preceding month.

While the fund averages $7.1 million per year, the Division of Waste Management (Division) was notified of an accounting error from a large tire retailer resulting in a multi- year refund being issued by the Cabinet utilizing tire fees collected during FY2026.

Table 1 presents the total for tire receipts and other deposits into the WTTF during FY2026.

Revenue Source	Revenue Source Name	Journal Accounting Line Description	Posting Amount
N163	Operational Transfer from Other Exp Trust Fund	Tire Fees Collected - Less Refunds	$ 4,565,751.57
R771	Interest Income	Interest Pursuant to KRS 224.50-880	$ 128,765.97

Grand Total	-	-	**$ 4,761,978.74**

Table 1: Waste Tire Trust Fund Revenues FY2026

Activities Supported by Waste Tire Trust Fund

Receipts deposited into the WTTF are utilized by the Cabinet to support multiple statutory and programmatic activities associated with waste tire management. KRS 224.50-880 establishes the purposes of the fund and qualifying activities for utilization of monies. Grant-funded activities include direct grant allocations to counties, crumb rubber and tire-derived product (CR/TDP) grants, rubber modified asphalt (RMA) grants, and the remediation of waste tire dump sites.

Table 2 presents the total expenditures for each activity administered by the Waste Tire Program during FY2026.

Activities Supported by WTTF	Total Posting Amount
Administrative	$ 1,460,322.25
Professional Services and Contracts	$ 1,816,915.93
Grant Funding	$ 2,831,129.79
Transfers to Capital Projects	$ 140,300.00
Grand Total	**$ 6,248,667.97**

Table 2: FY2026 Activities Supported by WTTF

Administrative Expenses

In accordance with KRS 224.50-880, the Cabinet is permitted to utilize up to twenty-five percent (25%) of funding from the WTTF for administrative costs to implement the waste tire program. These administrative costs include employee wages, direct and indirect benefits, office supplies, and cost sharing for professional maintenance and facility services.

Table 3 presents administrative expenses for implementation of the Waste Tire Program in FY2026.

Expenditure Code	Expenditure Code Name	Journal Accounting Line Description	Posting Amount
E111	Regular Salaries and Wages	-	$ 775,559.10
E119	Comp Time-Block 50 Payments	-	$ 21,638.95

Grand Total	-	-	**$ 1,460,322.25**

Table 3: FY2026 Administrative Expenses

Unexpended Funds

Pursuant to KRS 224.50-880(3), unexpended funds remaining in the WTTF at the end of a fiscal year do not lapse to the General Fund. Although the fund historically expends a substantial portion of the revenue generated through the new tire fee, several factors may result in funds being carried forward from one fiscal year to the next. At the close of FY2026, the WTTF carried forward a balance of approximately $1.4 million into FY2027. This year-end balance is attributable to the timing of program expenditures involving outstanding invoices associated with contractual collections, multi-stage grants extending across fiscal years, and reimbursement processes. Therefore, expenditures associated with program activities during one fiscal year may not be realized until the subsequent fiscal year. The carryforward balance remains available to support continued remediation and collection events, grants, and market development activities.

The Division's CR/TDP and RMA grants are administered on a calendar year basis resulting in an extension across fiscal years. Funds anticipated for program purposes could remain unexpended at fiscal year-end while applications are reviewed, awards finalized, agreements executed, and project completed. Additionally, in some cases recipients may not utilize their full allotment in a given fiscal year. Waste Tire Grants (WTGs) are administered on a fiscal year basis and require recipients to submit a close-out report identifying any unexpended grant funds. In these instances, the recipients are required to return any unexpended funds which are carried over into the following year's budget. In FY2026, the Cabinet received approximately $67,461 in grant refunds from recipients who did not utilize their full allotment.

Expenditures for WTGs may vary annually based on the number of eligible applicants, the amount of funding requested, and the needs of participating counties. County participation may also fluctuate depending on the timing of WTCEs. Counties that have recently participated in a WTCE may have a reduced need to apply for additional WTG funding during the same period. WTCEs are conducted statewide on a three-year rotating cycle by the local Area Development Districts (ADDs), providing each of Kentucky's 120 counties with an opportunity to participate during the cycle. As a result, annual expenditures from the WTTF may vary based on the counties scheduled for collection events, participation levels, grant demand, and other programmatic expenditures.

Recipients of Funding and Reported Information

Kentucky counties that apply for the WTG are eligible to receive an annual allocation of $4,000 to support the proper management of waste tires within their jurisdictions. Grant funds may be utilized to offset costs associated with the transportation, recycling, and disposal of waste tire accumulated within the county. The WTG application is available on the EEC website beginning in April 15 of each year and is due June 1 (12-month grant). Funding is awarded by June 15, and the grant period ends June 30 of the following year. The WTG recipients are required to submit a close-out report documenting funds received, actual costs incurred, total unspent funds, and the total number of tires or total weight of tires (tons) disposed of. Any grant funds remaining unexpended at the end of the applicable grant period are required to be returned to the Cabinet. The close-out reporting deadline is July 15, the following year of the applicable grant period. See Appendix A for details on the most recent cycle of WTG.

The RMA grant is a pilot project that provides counties with Cabinet funding for the pavement of roads up to one mile using RMA, provided the county pays to have an equal length section of road paved using conventional asphalt. These grants require a five-year study consisting of a multitude of technical testing analyzing the rubberized and conventional sections with the

Transportation Cabinet specifications and observing physical changes over time. The purpose of this grant is to encourage recycling of Kentucky tires, demonstrate the benefits of RMA, collect performance data for the different types of asphalt, and create opportunities for county governments and paving contractors to gain experience working with RMA.

The RMA application is available on the EEC website beginning in February of each year and is due April 1 (7-month grant). Applications that are deemed complete are reviewed using specific criteria. Applications that are missing photos, aren't filled out properly, don't have cost estimates, etc., are automatically denied. Selected applicants receive a letter of approval and grant agreement via email. Grant agreements are calculated using the cost estimate submitted by an asphalt contractor as part of the application. Prior to commencement of paving, pre-construction meetings are scheduled with the county, contractors, and engineers to establish scheduling and discuss pre-existing road conditions. Upon completion of the pre-construction meeting, the asphalt contractor is required to provide the Division with a forty-eight (48) hour notice prior to commencement of paving. Division staff are present for all paving projects to ensure compliance with grant requirements. Once paving is complete, the county will submit a Construction Completion Report no later than January 31 of the year following project completion, a second report due 2 years after the first report is submitted, and a third report due 2 years after the second report. Given the timeline for application submission and project completion, funding for RMA grants is not awarded until the following fiscal year (ex. application submitted in FY2026 and funding is awarded in FY2027) once the project is completed. In FY2026, the Cabinet awarded nine (9) RMA grants totaling $1.15 million. See Appendix B for details on the most recent cycle of RMA grants.

The CR/TDP Grant funds the purchase of tire-derived materials or products mainly used for poured-in-place playgrounds, which provide an ADA-accessible surface, or benches and picnic tables repurposed from waste tires. Handicap accessible picnic tables can also be purchased with the grant. Other applications utilize the grant for landscaping projects, walking trails, horse trailer or stall mats, tree wells, and other products utilizing recycled Kentucky tires. The CR/TDP application is available on the EEC website beginning in February of each year and is due April 1 (7-month grant). Grant applications require the applicants to provide a cost estimate and quote for the proposed project, along with the anticipated tonnage of crumb rubber to be utilized. Following the application review and selection process, grant agreements are executed and funding is awarded to the selected applications. Division staff monitor project implementation and conduct periodic check-ins through the grant period to assess progress and ensure compliance with applicable grant requirements. Similar to the RMA grant, CR/TDP grant recipients are required to submit construction progress and financial close-out reports by January 31 of the year following the applicable grant period. This report consists of all invoices

and proof of payment, including a budget worksheet. The grantee must submit an annual report in the subsequent year addressing the status of the project and any public comments received. In FY2026 the Cabinet awarded thirty-six (36) CR/TDP grants totaling $1.31 million. See Appendix C for details on the most recent cycle of CR/TDP Grants, including amounts requested and awarded for each project.
