

The Kentucky Underground Storage Tank Operator Online Learning System (KY TOOLS), Kentucky's free online compliance training program provided to UST owners and operators to comply with the annual combined Class A/B operator training requirement, is now operational and open for use.

The Kentucky Division of Waste Management, Underground Storage Tank (UST) Branch has worked tirelessly over the past year to revise our online operator training program to a supported web-based platform while also incorporating new lessons as a result of the amendments of Kentucky's UST Regulation (401 KAR Chapter 42) in April of 2019.

While the training may look different from the previous version, KY TOOLS continues to provide the same comprehensive UST operator training for Kentucky UST owners and operators since 2014. KY TOOLS is:

- Free of charge
- Accessible 24 hours a day
- UST facility specific only requiring training for the specific components located at your UST facility
- An "at your own pace" learning experience that saves progress as you go
- Compatible with iOS (Apple) and Android devices - *NEW*

**INSTRUCTIONS:** Updated KY TOOLS instructions are included in this email for your convenience. Please answer the questions below and select the appropriate instructions to use.

I am a UST owner or have been designated the responsibility to designate and assign an individual to be the combined Class A/B operator at my UST facility.	<b>Owner (Administrative) Instructions</b>
I have been designated and assigned by a UST owner to be the combined Class A/B operator for a UST facility.	<b>Operator Training Instructions</b>

The UST Branch would like to thank you for your patience during our renovations and updates to the KY TOOLS program. If you have additional questions or concerns regarding KY TOOLS, please feel free to contact the UST Branch Compliance Section at 502-564-5981.
