

The Underground Storage Tank (UST) Branch has received notice that effective March 15, 2017 SRW Environmental Services, Inc. (SRW) will no longer be performing UST related environmental work in the Commonwealth of Kentucky. This decision was made solely by SRW and was not influenced by any decisions made by the UST Branch or the Commonwealth. The Commonwealth appreciates the work done by SWR for the UST owners in Kentucky. If SWR has been your UST contractor, you need to select a new eligible UST contractor to provide environmental remediation services for your UST facility. For your convenience, a current listing of eligible UST contractors can be found [here](#).

SRW Environmental Services, Inc. will no longer be performing UST related environmental work in Kentucky
