

Workgroup 4/19/2023

Wednesday, April 19, 2023 9:23 AM

Attendees:

Amy Stoffer
Andy Tompkins
Arianna Lageman
Dale Booth
Elizabeth Dowling
Sharmista Dutta
Nancy Hancock
Alicia Jacobs
Jason Peterson
Jackie Logsdon
Maggie Mahan
Marshall Carrier
Shannon McLeary
Mike Gardner
Russell Neal
Owensboro Municipal
Brandon Powers
Todd Mills
Madeline Traylor
Blair Lozier

Arianna asked for feedback from subgroup meetings.

Public/Risk Communication:

Maggie Mahan-Neal -Group decided they have nothing at this time and plan to reconvene after more is known to develop materials/templates, or until EPA provides materials.

Economic Analysis

Blair Lozier - The group has begun the discussion of data that will need to be collected, and next steps. Requested that workgroup members provide any research or experience they have related to costs of PFAS treatments. Plan to meet again on April 24.

Lab Capacity & Occurrence and Monitoring:

Arianna Lageman -Lots of concerns here. Lab capacity expected to be an issue and expressed concerns with labs certified for KY being located out-of-state.

Jackie Logsdon -Provided feedback from ADSWA subgroup meeting and the idea of asking for trigger level of 2.0 for PFOA & PFAS rather than 1.3. Most labs have a MRL of 2.0. Rule would need to require this of labs. KY has 9 labs certified to run PFAS; 4 of the have certification for all 6 proposed analytes. None are located in KY.

Amy raised concerns on the lack of training for collecting UCMR5 samples and not having UCMR5 data/blank data available now to make better comments on the rule.

Mike-concerned about Teflon tape used on sampling taps in plants

Alicia offered a Drinking Water Wednesday to address sampling procedures for collecting PFAS samples.

Treatment

Amy Stoffer -

Subgroups asked to send bullet points from individual meetings

Alicia, Arianna, Jackie & Melanie will meet to summarize and compile comments

Mike Gardner asked for list of subgroup participants
