Asbestos Monitoring Waiver Request: Producing Water Systems

Instructions:

Water systems that are producers should complete this waiver request template for the upcoming compliance period that they would be required to complete asbestos monitoring in the distribution system. The waiver request must be submitted 30 days prior to the beginning of the compliance period to be eligible. An approved waiver request is only good for the designated compliance period, a new request must be submitted for future compliance periods. All producing water systems must still complete source water monitoring requirements for asbestos at the entry point to distribution, as described in 40 CFR 141.23(a).

PWS ID:

Compliance Period:

Submittal Date:

I, _____, in responsible charge for
hereby state that, to the best of my knowledge, there are no asbestos or asbestos-cement pipes found within the distribution system.

The above-named water system requests that the asbestos monitoring requirement from a tap within the distribution system be waived for the compliance period listed above by the KY Division of Water based on the above statement. The above-named water system also acknowledges that the approval of this waiver request does not waive the requirement for source water monitoring for asbestos at the entry point to the distribution system.
