KNDOP SHORT FORM B – INSTRUCTIONS

Not all animal feeding operations or fish farms are required to obtain KPDES discharge permits. The size of the operation and the absence of discharge determine exclusions. Short Form B is for feeding operations that do not discharge to waters of the Commonwealth.

See 401 KAR 5:002 for the definition of “animal feeding operation.” Please note that an animal feeding operation that discharges or intends to discharge is a “concentrated animal feeding operation” that requires a discharge application on Form 1 and Form B.

Listed below are explanations of select Short Form B questions. If further information is needed concerning any questions, **please contact the Surface Water Permits Branch of the Division of Water at (502) 564-3410.**

I. Facility and Contact Information

The applicant name is the official or legal name of the individual, business, or company requesting the permit. The mailing address is the address of the applicant requesting the permit. The Division of Water mails communication to this address unless otherwise indicated.

The Division will correspond with the facility using either the email address provided or the primary mailing address unless otherwise indicated.

II. Facility Location and Description

The facility location should be for the actual physical location of the facility (i.e. road name, highway number, not the P.O. Box address). If there is no street address, identify the facility by the most accurate alternative geographic information such as direction and distance to the nearest intersection or permanent landmark (e.g., ½ mile east of intersection of KY 70 and US 127). List the latitude and longitude for the facility site using decimal degrees.

Briefly describe the nature of the business and the conducted activities that require a Kentucky No Discharge Operational Permit (KNDOP).

The Standard Industrial Classification (SIC) codes are 4 digit numbers and descriptions of activities classified by the Executive Office of the President, Office of Management and Budget. SIC Codes are available from the United States Department of Labor at: <https://www.osha.gov/pls/imis/sicsearch.html>.

If the application is for the modification of an existing permit, please provide the specific reason(s) for modifying the existing permit.

III. Additional Information

Indicate whether the facility is a large feeding operation as defined in 401 KAR 5:002. If the facility is a large feeding operation, attach the site-specific nutrient management plan.

Comments are optional. For example, use this area to clarify that the operation is a liquid waste handling system when the type of operation commonly uses a dry waste handling system.

IV. Source of Wastes

Provide the maximum number of each type of animal, including approximate live weight per animal, in open confinement or housed under roof (either partially or totally) which are held at your facility for a total of 45 days or more in any 12 month period. If the application involves new construction, indicate the number of animals that the facility plans to support.

Use the following categories for types of animals:

- Mature Dairy Cattle (milked or dry)
- Swine (each weighing over 55 pounds)
- Sheep
- Laying Hens
- Veal Calves
- Swine (each weighing 55 pounds or less)
- Lambs
- Broilers
- Cattle (other than mature dairy cattle or veal calves)
- Horses
- Turkeys
- Ducks

V. Destination of Wastes

Indicate the destination of wastes as land application or waste storage by type. Do not include any area used for growing feed in the total land area available for land application of waste.

VI. Attachments

Attach either a US Geological Survey 7 ½ minute quadrangle map, aerial map, topographic map, or other map with an area of at least 1 mile beyond the property boundaries. Depict or mark the facility and its intake structure, treatment system and disposal area. Also, mark the locations of the wells, springs, surface water bodies, and drinking water wells listed in public records or otherwise known to the applicant within one-quarter mile of the facility property boundary.

Permit Fees are established in 401 KAR 5:310 and outlined in the General Instructions for KPDES Individual Permits.

VII. Certification

The permit application shall be signed as follows:

1. Corporation: by a principal executive officer of at least the level of vice-president.
2. Partnership or sole proprietorship: by a general partner or the proprietor respectively.
3. Municipality, state, federal, or other public agency: by either a principal executive officer or ranking elected official.
