

WATER CONSERVATION IN THE OFFICE

Kentucky Division of Water

Every office space or business owner can better serve their community with these water conservation tips:

- Upgrade older toilets with water-saving WaterSense labeled models
- Install water-saving aerators on all of your faucets
- Some commercial refrigerators and ice-makers are cooled with water. Upgrade to air cooled appliances for significant water savings
- Report leaks or water waste in bathrooms or kitchens to facility managers or maintenance personnel
- Include a water-saving tip in your employee newsletter
- Implement a water-saving plan for your facility
- Publish your organization's monthly water use to show progress toward water-saving goals

- Water audit your facility to find out your recommended water use, then monitor your utility bills to gauge your monthly consumption
- Shut off water in unused areas of your facility to eliminate waste from leaks
- Don't forget hidden water costs, like energy for pumping, heating, and cooling, chemical treatment, and damage and sewer expenses
- Inspect landscape irrigation systems for leaks
