

Help Ollie the Otter clean up the Watershed!

Circle the stuff Ollie wouldn't want in his home

Clean Water
Starts With Me!

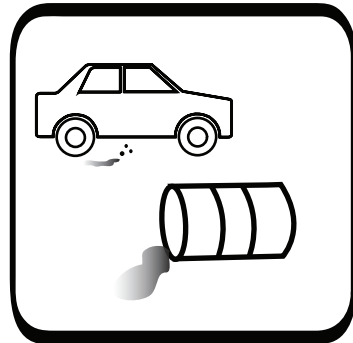

How can you prevent Water POLLUTION?

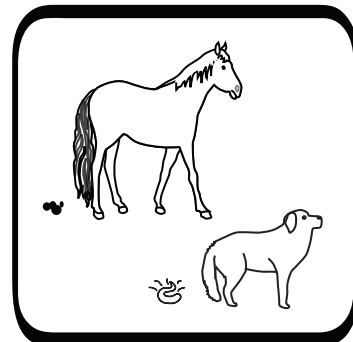

Litter

Pick it up and throw it
in the trash or the
recycling

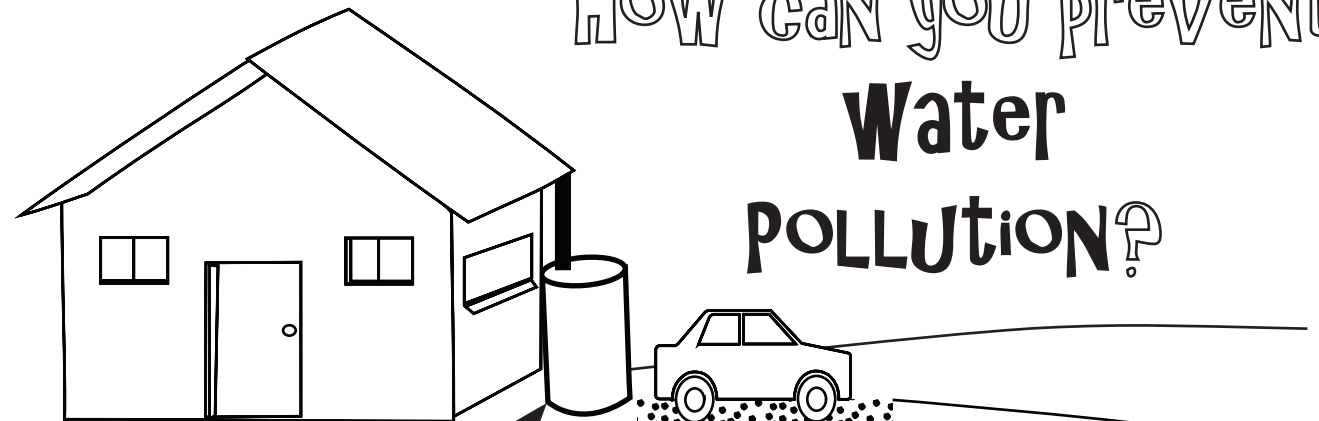

CHEMICALS

Keep harmful chemicals
out of the water by
maintaining vehicles and
properly storing and
disposing of chemical
containers

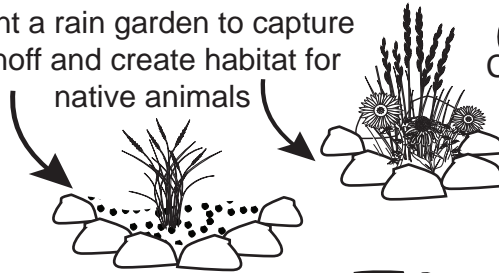

ANIMAL POO

Animal waste can
make people sick and
cause problems for the
creek

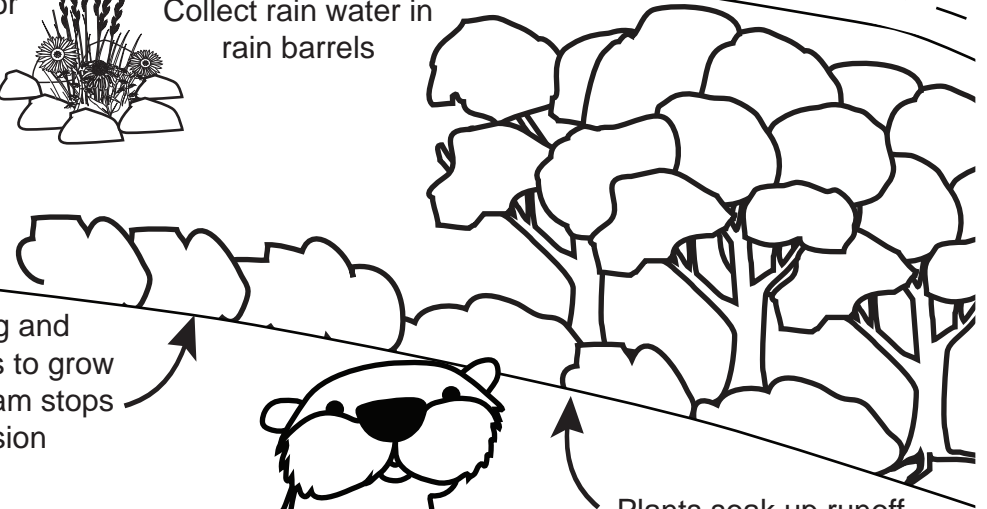

Plant a rain garden to capture
runoff and create habitat for
native animals

Collect rain water in
rain barrels

Not mowing and
allowing plants to grow
along the stream stops
bank erosion

Plants soak up runoff
and prevent bad things
from entering the creek

Soak it up! SLOW it down!
