WELCOME MESSAGE

The Kentucky Growing Gold has been around since the 1960's and has served as a way to advertise timber marked by the Kentucky Division of Forestry to the forest industry. Even though a few things have changed over the years, it has stayed true to its service to the Commonwealth by providing useful information to forest landowners and forest industry.

- Monitoring changes in the forest
- Matching wood producers and wood users
- Conducting industry surveys
- Compiling and reporting data on quantities and species of wood
- Compiling the Primary Wood Industries of Kentucky directory
- Reporting timber products output
- Monitoring trends in timber harvesting
- Publishing a Bi-annual newsletter called "Growing Gold"
- Offering technical assistance to mills and loggers to increase efficiency
- Resource assessments for economic development opportunities

ABOUT KENTUCKY DIVISION OF FORESTRY

The Kentucky Division of Forestry celebrated its 100th anniversary in 2012. Initially established as the Board of Forestry by the Kentucky General Assembly in 1912, the agency was renamed the Kentucky Division of Forestry following the Reorganization Act of 1936. Today, the division employs 125 full-time staff, with most working from offices across the state, including six field offices, two tree nurseries, and managing 10 state forests with a combined land mass of nearly 50,000 acres. Brandon Howard, the 16th director of the division, currently serves as the state forester for Kentucky.

The mission of the Kentucky Division of Forestry (KDF) is "to protect, conserve and enhance the forest resources of the Commonwealth through a public informed of the environmental, social and economic importance of these resources." As a means of meeting this mission, the division offers a variety of programs and services ranging from landowner assistance and master logger training to forest health protection and wildland fire management. The division is also involved in the operation of tree seedling nurseries, urban and community forestry assistance, forest resource utilization, forest inventory and analysis and forestry education.
