Department for Surface Mining
Reclamation and Enforcement

Reclamation Advisory Memorandum

From: Elmore C. Grim, Commissioner *E.C.G.*
Subject: Priority 1 Deadline for Sediment Structure Compliance
Demonstrations

Date: February 14, 1983

RAM# 58

Due to difficulties which applicants have encountered in completing compliance demonstrations for proposed and existing sediment structures, the Department has modified its technical submission requirements for Priority 1 applications.

A technically complete permit application must still be filed on or before March 1, 1983, however, submission of final pond designs and associated compliance demonstrations may be deferred. If a deferment is desired, the applicant must provide by March 1, 1983, a schedule indicating the dates by which demonstration data will be provided to the Department. In any event, all compliance demonstration data must be provided to the Department on or before May 1, 1983.

This deferment is applicable only to Priority 1 transition comprehensive applications which are identified by transition priority codes beginning with A, E, G or those ending with Y.

Technical review of Priority 1 applications will still begin on March 1, 1983, and applicants are encouraged to submit as much of the demonstration data as possible on or before this date.

If you have any questions concerning the above, you may contact Jim Adamson at (502) 564-2320.
