About Us

We improve the quality of life for all Kentuckians by protecting our land, air, and water resources; by utilizing our natural resources in an environmentally conscientious manner; by helping families connect with nature and preserving the Commonwealth's natural heritage; and by supporting innovative, resilient, and sustainable energy solutions that together bring economic benefit to the Commonwealth.

The Energy and Environment Cabinet provides technical assistance, education and funding to help landowners, institutions, industries, and communities conserve and sustain Kentucky's natural resources and ensure the protection of our citizens and our environment.
