DIVISION OF WATER, WATERSHED MANAGEMENT
BRANCH, GROUNDWATER SECTION

KENTUCKY DRILLER QUARTERLY

Kentucky Driller Quarterly

Down-Hole Well Camera Water Well Inspections

The Groundwater Section of the Kentucky Division of Water (DOW) provides down-hole well camera inspections for Kentucky certified water well drillers and well owners. A well camera inspection can sometimes be useful to gain borehole information for constructing new water wells or for old wells that may need to be modified. While some well-related problems can be solved from the surface, many require observation of the drill hole itself. DOW owns and operates a color, down-hole camera with 500 feet of cable. This is a powerful tool for assessing subsurface conditions within wells. The down-hole camera has been used to successfully diagnose numerous problems in wells across Kentucky.

An example of some of the well information that can be obtained with the well camera are:

- Cracked or broken casing.
- Casing leaking at the base due to a failed annulus seal.
- Identification of producing zones.
- Subsurface voids or fractures.
- Unstable formations.
- Inspection of well screens for damage or bio fouling.

The well pump needs to be removed from the well at least 24 hours prior to the well camera inspection to allow any sediment in the water to settle out in the well. The well water must be relatively clear to view the aspects of the well construction through the water column in the well. If you have a need for this service, please contact Joe Moffitt or Rob Blair at 502-564-3410 or via email (joe.moffitt@ky.gov or robert.blair@ky.gov).

Fees Paid by Check or Money Order

Please note if you are paying by check or money order for certification renewals, new certifications, applications or exam fees for more than one driller, please submit a separate check for each driller. Combined fees on a single check or money order submitted for more than one driller **will be returned to you**. Our accounting system is not designed to process combined fees for multiple drillers in a timely manner. Trying to do so results in long delays in us depositing your submitted fees and you receiving your new license. If you have further questions regarding this issue, please don't hesitate to contact us. Thank you in advance for your cooperation concerning this matter.

Annual Certification Training Requirements

All training for annual certification requirements must be preapproved by the Water Well Driller Certification Program to receive credit. To receive preapproval for training, submit a course description of the classes you plan to take. Upon completion of the training, submit a proof of attendance and a training certificate from the training organization. **You will not receive credit for training that is not properly documented.** You are not required to have preapproval for training received at the annual Kentucky Ground Water Association's Driller Workshop.

If you have questions concerning the application process, exam requirements, certification renewals, wallet cards, liability insurance, surety bonds, etc., contact administrative coordinator Sam Collins at 502-564-3410, ext. 4938, or e-mail samuel_collins@ky.gov

If you have technical questions related to well construction, abandonment, groundwater, variances, training, etc. contact program coordinator Joe Moffitt at 502-564-3410, ext. 4940, or e-mail joe.moffitt@ky.gov

Attention:

If you have an e-mail address, please send it to us so that we can better provide you with information related to the driller certification program.

Also, please remember to give your water well customers a copy of the Water Well Owners Guide. This guide can be very useful to the water well owner in answering questions they may have concerning their well. For water wells located in areas of the state where methane gas may be present, there is a section in the guide that explains

how to vent a well. It is a requirement under 401 KAR 6:310 Section 1 (4) (c) that the certified driller provides this information to the well owner. You can print copies of this guide by going to the Well Drillers Program Web site

www.water.ky.gov/gw/gwtech/gwdrill/. Click on **Forms and Applications**, then click on **Well Driller Forms**, then click on **Water Well Owners Guide**.

Water Well Driller Certifications

The number of Kentucky water well driller certifications for the 2009/2010 period was slightly lower from the previous year. Listed below is a comparison of the number of certifications for this year and last year.

Year	Total	Breakdown
2008/2009	135	(W 32, M 50, C 53)
2009/2010	130	(W 32, M 52, C 46)

W= Water Well, M = Monitoring Well,
C=Combined Water and Monitoring Well

Monitoring Well Abandonment Variance

Blanket Approval Provision
Abandonment Procedures
Monitoring Well Construction Practices
and Standards

This driller's notification addresses monitoring well abandonment procedures for direct push monitoring wells, temporary monitoring wells, and permanent monitoring wells installed in unconsolidated formations.

The Cabinet will grant a variance to the monitoring well abandonment requirements of 401 KAR 6:350, Section 11(2)(a), for the referenced wells, based upon one or more of the following criteria:

1. The monitoring well(s) to be abandoned has been constructed in a manner, and meets the definitions of a direct push well or a temporary well per 401 KAR 6:350 Sections 5 and 6.
2. The monitoring well(s) to be abandoned is constructed and completed in an unconsolidated formation with a total depth of less than or equal to 30 feet below ground surface. In addition the variance request shall adhere to the following:
3. Shall be accompanied by written approval of other permitting agencies, 401 KAR 6:350, Section 12, and
4. The variance request shall be submitted to the Cabinet by approved procedures per 401 KAR 6:350, Section 1(6)(a through e).

The approved procedures for abandonment of the referenced monitoring wells shall require the removal of all the casing and screen from the borehole. The resulting borehole shall then be filled and completed per 401 KAR 6:350, Section 11(2)(b through d).

If the entire length of casing and screen can not be pulled from the borehole, the well shall be abandoned per 401 KAR 6:350, Section 11(2)(a).

Well Site Field Audits

Joe Moffitt is conducting field audits. These field audits are not intended to be regulatory inspections. The primary purpose is to observe the well drilling operations and to address any problems the driller may have related to the certification program. Mr. Moffitt will be randomly selecting a few drillers to schedule a field audit. You may also contact him if you would like to schedule a time to meet at your well site.

Groundwater & Water Well Search Information

The Kentucky Geological Survey has developed a user-friendly data base on groundwater located at: <http://www.uky.edu/KGS/>. Select Search Databases and Publications, then select Groundwater Information.

Call 811 Before You Dig

In compliance with the Kentucky Dig Law KRS 367.4901 to KRS 367.4917, any activity that results in the movement, placement, probing, boring or removal of earth, rock or other material in or on the ground requires the excavator to contact the One Call Center with adequate information regarding the dig. Remember...It's The Law!!! Kentucky 811 is open seven days a week, 24 hours a day to process locate requests or address questions regarding a locate request. The toll-free number is 800-752-6007 or 811 (the National Three Digit Call Before You Dig phone number).

Each excavator is required to provide no less than two business days' notice or no more than ten business days prior to commencing work. Kentucky 811 does not factor state and federal holidays in the Two Business Day Notice required by law. When a Locate Request is submitted and a holiday falls within the Two Business Day Notice, then the date the holiday is observed will not be considered in the Two Business Day Notice. To view the current year's holiday list that affects the Two Business Day Notice, visit the Kentucky 811 Web site at www.kentucky811.org.

Generic Groundwater Protection Plans

Pursuant to 401 KAR 5:037, certified well drillers are required to develop and implement a Groundwater Protection Plan (GPP) for protection of the groundwater. Guidance for developing GPPs can be found

at the Web site below. Drillers who drill closed-loop geothermal borings, and who install soil borings or rock coring are also required to implement a GPP. It is recommended that you provide to your clients GPPs for water well owners and septic tank systems. These generic plans which have been developed by the Cabinet are available on the Groundwater Section's Web site at:

www.water.ky.gov/gw/gwprotection/gwplans/ You can also contact Pat Keefe for more information at pat.keefe@ky.gov or 502-564-3410.

Grievance Process for Denial of Variance

The Cabinet has developed a process for addressing an initial denial of variance in response to concerns raised by applicants. The process is as follows:

1. A determination is made by the Cabinet whether to approve or deny a variance request. This determination will be made to the applicant per 401 KAR Section 1(6)(b)(2).
2. If the applicant is aggrieved by the determination, an appeal can be made to the Kentucky Water Well Certification Board (KWWCB) within 30 days of the written determination.
3. The KWWCB will address the appeal at their next quarterly meeting. Based upon the merits of the appeal, the KWWCB will make a recommendation to the Cabinet on whether to uphold or modify the appealed determination.

4. The Cabinet will take into consideration the KWWCB's recommendation, and will make a final determination to the appeal based upon the KWWCB's recommendation and the standards of 401KAR Section 1(6)(b)(3). The applicant will be notified in writing to this final determination.

This process was official adopted by KWWCB at the June 12, 2009, board meeting at Rough River State Park. And, for those who do not know, the proceedings of the board meetings are open to the public. The next board meeting will be held at the Pine Mountain State Park Lodge on Nov. 13, 2009.
